PREFACE.

The present Grammar is a work of no pretensions; it is offered as a small contribution toward advancing the Avesta cause. It is written in part fulfilment of a design formed when I first began to study the Avesta and became deeply interested in the true value and importance of that monument of antiquity.

The end for which the book is intended would perhaps have been better accomplished, however, if the work had been a mere grammatical sketch. This was my first design; and it may at another time be carried out. But as the work grew under my hands, it seemed desirable to enlarge it somewhat further, and to embody additional material which for reference might be serviceable to the general philologist, not to the specialist alone. The linguist may thus find in it useful matter and fresh illustrations, especially in the new readings from Geldner's edition of the Avesta texts.

No attempt, on the other hand, has been made to secure absolute completeness. Numerous minor points have been purposely omitted. These may perhaps later be taken up in a more extended work including also the Old Persian by the side of the Avesta and the Sanskrit. Little of im-

portance, however, it is believed, has been overlooked. A fairly symmetrical development has been aimed at, although at times certain less familiar points have received fuller illustration than those that are well-known. This was intentional. They are chiefly matters that had not as yet been sufficiently emphasized elsewhere, or points which are peculiarly individual to the Avesta. They will easily be recognized.

The method of treatment is based throughout on the Sanskrit grammar; a knowledge of Sanskrit is presupposed. At every step, therefore, references have been made to Whitney's *Sanskrit Grammar* 2 ed. 1889; and it is a pleasure here to express thanks to the author of that work for the abundant suggestions received from it.

In the Grammar it might have been easier and more practical in many respects to use the Avesta type itself instead of employing a transcription. On the whole, however, it seemed best under the circumstances to transliterate. For general reference at present this method appears more convenient, and is useful in showing grammatical formations. The original type, it is expected, will be employed, as hinted above, in a little book *Avesta for Beginners*, planned for a date not far distant.

In regard to the transcription here adopted, my views have already been given in *The Avestan Alphabet and its Transcription*, Stuttgart, 1890. The phonetic and palaeographic character of each of the Avestan letters is there discussed. Reasons are likewise presented for transliterating Av. ṭ, ḍ by the 'turned' ɔ, ɔ̄, so familiar in phonetic works. The composite ə̄ (ɔ̄) for 𐬯 (𐬰) is also

there explained (p. 13). The choice of the old Germanic characters *ƕ*, *ȝ*, *þ*, *đ* for the spirants *ƀ*, *ɣ*, *ð*, *ɧ*, and for the nasal *ŋ* (ı), as well as the method of transliterating 𐬫 (ı+𐬭) by *hv* (*h*+*v*) is defended (pp. 14, 21). The 'tag' (ˌ) appearing in the letters *ḫ*, *ṇ*, *ṉ*, *ḥ*, *ą* is an attempt at systematically representing the 'derivation stroke' ˛ ˽ ˩ by which many of the letters palaeographically are formed. Thus, 𐬨 𐬨̣, 𐬙 𐬙̣, 𐬝 𐬝̇, 𐬚 𐬚̇ 𐬚̣, 𐬫 𐬫̣, 𐬯 𐬯̣ etc.—the dotted line denoting the 'derivation stroke'. See *Av. Alphabet* pp. 16—17. The same 'tag' appears in the transcription of 𐬩 (𐬴+𐬯) by *ṡ́* (ˌ+*š́*). See *Av. Alphabet* p. 20. In the case of 𐬰 *ṡ́* (beside *ṡ̌*), the 'subscript' tag is merely turned in the opposite direction so as to correspond with the hooked part (ʒ) of the letter. The threefold differentiation *š́*, *ṡ́*, *ṡ̌* for 𐬯, 𐬩, 𐬰, is not necessary, however, except in transliterating a text for purely scientific purposes. In practise, *š́* may everywhere be written. A 'substitute alphabet' to be used in popular articles is offered in the same monograph p. 28. I wish again to repeat my thanks to the authorities there quoted (*Av. Alphabet* p. 7) who so kindly aided me with advice and suggestions in regard to the transcription adopted.

In reference to the transliteration of Sanskrit, the familiar system (cf. Whitney, *Skt. Gram.* § 5) is followed; but be it observed that for comparison with the Avesta it seems preferable to transcribe the palatal sibilant by *ṡ́* (Whitney *ç*), the palatal nasal by *ṅ́* (Whitney *ñ*), the guttural nasal by *ṅ* (Whitney *ṅ*).

A word may now be added in regard to my manifold indebtedness in the present book. The general gram-

matical works from the early contribution of Haug (*Essays*, 1862), through Hovelacque (*Grammaire*, 1868) down to the present date have been on my table. Justi's *Handbuch der Zendsprache* (1864) was of course consulted continually. Constant reference has been made also to Bartholomae's *Altiranische Dialekte* (1883) and to his other admirable grammatical contributions. Spiegel's *Vergl. Gram. der altéran. Sprachen* (1882) was often opened, and will be specially acknowledged with others under the Syntax (Part II). C. de Harlez' *Manuel de l'Avesta* (1882), Darmesteter's *Études Iraniennes* (1883), W. Geiger's *Handbuch der Awestasprache* (1879) furnished more than one good suggestion, for which I am much indebted.

Acknowledgment is also due to some special contributions on grammatical subjects. In the Phonology, selections were made from the rich material collected by Hübschmann in *Kuhn's Zeitschrift* xxiv. p. 323 seq. (1878). My indebtedness to that well-known standard work Brugmann's *Grundriss der vergl. Gram.* (= *Elements of Compar. Grammar of the Indg. Languages*, English translation by Wright, Conway, Rouse, 1886 seq.) may be noticed from the citations below. Under Declension, frequent reference was made to Horn's *Nominalflexion im Avesta* (1885) and Lanman's *Noun-Inflection in the Veda* (1880). Under Verbal Inflection, in addition to Bartholomae's contributions below cited, acknowledgments are due to other authors to be mentioned in connection with Syntax (Part II). Caland's *Pronomina im Avesta* (1891) unfortunately came too late for the Inflections, but is cited under the Syntax of the Pronouns. I also regret that the work of Kavasji Edalji Kanga,

A Practical Gram. of the Av. Language (1891) was not received in time. My indebtedness to Whitney's *Skt. Gram.* is noticed above. For grammatical training in Sanskrit, moreover, I shall always thank my teachers in America and Germany—Professors Perry, Hopkins, and Pischel.

To my honored instructor and friend, Professor K. F. Geldner of Berlin, I owe, as I have owed, a lasting debt of gratitude. The book was begun when I was a student under his guidance; since I returned to America it has progressed with the aid of his constant encouragement, suggestion, and advice. He has been kind enough, moreover, not only to read the manuscript, as it was sent to Stuttgart, but also to look through the proof-sheets before they came back to me in America. The work I may call a trifling expression of the inspiration he gave me as a student. Let what is good in it count as his; the faults are my own.

It is a pleasure to add my cordial thanks to the publisher, Herrn W. Kohlhammer, for the characteristic interest which, with his usual enterprise, he has taken in the work. Special praise is due to his compositor, Herrn A. Säuberlich, whose accuracy is in general so unfailing that I fear I must say that the misprints which may have escaped notice are probably due to original slips of the author's pen, and not to inaccuracies on the part of the type-setter—a thing which cannot always be said. I should like also to express to Messrs. Ginn & Co., of Boston and New York, my appreciation of their willing co-operation in advancing the Iranian as well as other branches of the Oriental field in America.

The present part of the Grammar (Part I) is confined to the Introduction, Phonology, and Morphology. The prefatory sketch of the Avesta and the Religion of Zoroaster may perhaps prove not without use. The second volume (Part II), a sketch of the Syntax, with a chapter also on Metre, is already half in print, and is shortly to appear. The numbering of sections in the second part will be continued from the present part; the two may therefore be bound together as a single volume if preferred.

With these words and with the suggestion to the student to observe the Hints for using the Grammar, given below, and to consult the Index, the book is offered to the favor of Oriental scholars. Any corrections, suggestions, or criticisms, which may be sent to me, will be cordially appreciated and gladly acknowledged.

INTRODUCTION.

Avesta: The Sacred Books of the Parsis.[1]

The Avesta as a Sacred Book.

§ 1. The Avesta, or Zend-Avesta, as it is more familiarly, though less accurately called, is the name under which, as a designation, we comprise the bible and prayer-book of the Zoroastrian religion. The Avesta forms to day the Sacred Books of the Parsis or Fire-Worshippers, as they are often termed, a small community living now in India, or still scattered here and there in Persia. The original home of these worshippers and of their holy scriptures was ancient Iran, and the faith they profess was that founded centuries ago by Zoroaster (Zarathushtra), one of the great religious teachers of the East.

§ 2. The Avesta is, therefore, an important work, preserving as it does, the doctrines of this ancient belief and the customs of the earliest days of Persia. It represents the oldest faith of Iran, as the Vedas do of India. The oldest parts date back to a period of time nearly as remote as the Rig-Veda, though its youngest parts are much later. The religion which the Avesta presents was once one of the greatest; it has, moreover, left ineffaceable traces upon the history of the world. Flourishing more than a thousand years before the Christian era, it became the religion of the great Achæmenian kings, Cyrus, Darius, and Xerxes, but its power was weakened by the conquest of Alexander, and many of its sacred books were lost. It revived again during the first centuries of our own era, but was finally broken by the Mohammedans in their victorious invasion. Most of the Zoroastrian worshippers were then compelled through persecution to accept the religion of the Koran; many, however, fled to India for refuge, and took with them what was left of their sacred writ-

[1] This sketch, with additions and some alterations, is reprinted from my article AVESTA, simultaneously appearing in the *International Cyclopaedia*; for which courtesy I am indebted to the kindness of the Editor, my friend, Professor H. T. Peck, and that of the Publishers, Messrs. Dodd, Mead & Co., New York.

ings. A few of the faithful remained behind in Persia, and, though persecuted, they continued to practise their religion. It is these two scanty peoples, perhaps 80,000 souls in India, and 10,000 in Persia, that have preserved to us the Avesta in the form in which we now have it.

§ 3. The designation *Avesta*, for the scriptures, is adopted from the term *Avistāk*, regularly employed in the Pahlavi of the Sassassian time. But it is quite uncertain what the exact meaning and derivation of this word may be. Possibly Phl. *Avistāk*, like the Skt. *Vēda*, may signify 'wisdom, knowledge, the book of knowledge'. Perhaps, however, it means rather 'the original text, the scripture, the law'. The designation 'Zend-Avesta', though introduced by Anquetil du Perron, as described below, is not an accurate title. It arose by mistake from the inversion of the oft-recurring Pahlavi phrase, *Avistāk va Zand* 'Avesta and Zend', or 'the Law and Commentary'. The term *Zand* in Pahlavi (cf. Av. *zaēnti-*), as the Parsi priests now rightly comprehend it, properly denotes 'understanding, explanation', and refers to the later version and commentary of the Avesta texts, the paraphrase which is written in the Pahlavi language. The proper designation for the scriptures, therefore, is *Avesta*; the term *Zend* (see below) should be understood as the Pahlavi version and commentary.

Allusions to the Avesta; its Discovery and History of Research.

§ 4. Of the religion, manners, and customs of ancient Persia, which the Avesta preserves to us, we had but meagre knowledge until about a century ago. What we did know up to that time was gathered from the more or less scattered and unsatisfactory references of the classic Greek and Latin, from some allusions in Oriental writers, or from the later Persian epic literature. To direct sources, however, we could not then turn. Allusions to the religion of the Magi, the faith of the Avesta, are indeed to be found in the Bible. The wise men from the East who came to worship our Saviour, the babe in Bethlehem, were Magi. Centuries before that date, however, it was Cyrus, a follower of the faith of Zoroaster, whom God called his anointed and his shepherd (Isaiah 45.1,13; 44.28; 2 Chron. 36.22,23; Ezra 1.1—11) and who gave orders that the Jews be returned to Jerusalem from captivity in Babylon. Darius, moreover (Ezra 5.13—17; 6.1—16), the worshipper of Ormazd, favored the rebuilding of the temple at Jerusalem as decreed by Cyrus. Allusions to the ancient faith of the Persians are perhaps contained in Ezek. 8.16; Is. 45.7,12. See also Apocryphal New Test., The Infancy, 3.1—10.

§ 5. The classical references of Greek and Roman writers to the teachings of Zoroaster, which we can now study in the Avesta itself, may be said to begin with the account of the Persians given by Herodotus

(B. C. 450) in his History 1.131—141. To this account may be added references and allusions, though often preserved only in fragments, by various other writers, including Plutarch 'On Isis and Osiris', and Pliny, down to Agathias (A. D. 500).

§ 6. After the Mohammedan conquest of Persia, we have an allusion by the Arabic writer, Masūdī (A. D. 940), who tells of the *Avesta* of Zeradusht (Zoroaster), and its commentary called *Zend*, together with a *Pazend* explanation. The *Abasta* (Avesta) is also mentioned several times by Al-Bīrūnī (about A. D. 1000). The later Mohammedan writer, Shahrastani (A. D. 1150), sketches in outline the creed of the Magi of his day. An interesting reference is found in the Syriac-Arabic Lexicon of *Bar-Bahlūl* (A. D. 963) to an *Avastāk*, a book of Zardusht (Zoroaster), as composed in seven tongues, Syriac, Persian, Aramæan, Segestanian, Marvian, Greek, and Hebrew. In an earlier Syriac MS. Commentary on the New Testament (A. D. 852) by 'Ishō'dād, Bishop of Ḥadatha, near Mosul, mention is made of the Abhāstā as having been written by Zardusht in twelve different languages. These latter allusions, though late, are all important, as showing the continuity, during ages, of the tradition of such a work as the Avesta, which contains the teachings of Zoroaster, the prophet of Iran. All these allusions, however, it must be remembered, are by foreigners. No direct Iranian sources had been accessible.

§ 7. From this time, moreover, till about the 17th century we find there was little inquiry into the sacred books of the Persians. One of the first series of investigations into the Greek and Roman sources seems then to have been undertaken by a European, Barnabé Brisson, *De Persarum Principatu* (Paris 1590). The Italian, English, and French travelers in the Orient next added some information as to the religion and customs of the Persians. Among them may be mentioned the works of Pietro della Valle (1620), Henry Lord (1630), Mandelso (1658), Tavernier (1678), Chardin (1721), Du Chinon. Most important, however, was the work of the distinguished Oxford scholar, Thomas Hyde (1700). It was written in Latin, and entitled *Historia Religionis veterum Persarum*. Hyde resorted chiefly to the later Parsi sources; the original texts he could not use, although an Avesta MS. of the Yasna seems to have been brought to Canterbury as early as 1633. Hyde earnestly appealed to scholars, however, to procure MSS. of the sacred books of the Parsis, and aroused much interest in the subject. In 1723 a copy of the Vendīdād Sādah was procured by an Englishman, George Boucher, from the Parsis in Surat and was deposited as a curiosity in the Bodleian Library at Oxford.

§ 8. No one, however, could read these texts of the Avesta. To a young Frenchman, Anquetil du Perron, belongs the honor of first de-

ciphering them. The history of his labors is interesting and instructive. Happening, in 1754, to see some tracings made from the Oxford MS., and sent to Paris as a specimen, du Perron at once conceived the spirited idea of going to Persia, or India, and obtaining from the priests themselves the knowledge of their sacred books. Though fired with zeal and enthusiasm, he had no means to carry out his plan. He seized the idea of enlisting as a soldier in the troops that were to start for India, and in November, 1754, behind the martial drum and fife this youthful scholar marched out of Paris. The French Government, however, recognizing at once his noble purpose, gave him his discharge from the army and presented him his passage to India. After countless difficulties he reached Surat, and there after innumerable discouragements, and in spite of almost insurmountable obstacles, he succeeded in winning the confidence and favor of the priests, with whom he was able to communicate after he had learned the modern Persian. He gradually induced the priests to impart to him the language of their sacred works, to let him take some of the manuscripts, and even to initiate him into some of the rites and ceremonies of their religion. He stayed among the people for seven years, and then in 1761, he started for his home in Europe. He stopped at Oxford before going directly to Paris, and compared his MSS. with the one in the Bodleian Library, in order to be assured that he had not been imposed upon. The next ten years were devoted to work upon his MSS. and upon a translation, and in 1771, seventeen years from the time he had first marched out of Paris, he gave forth to the world the results of his untiring labors. This was the first translation of the Avesta, or, as he called it, Zend-Avesta (*Ouvrage de Zoroastre*, 3 vols., Paris 1771), a picture of the religion and manners contained in the sacred book of the Zoroastrians.

§ 9. The ardent enthusiasm which hailed this discovery and opening to the world of a literature, religion, and philosophy of ancient times was unfortunately soon dampened. Some scholars, like Kant, were disappointed in not finding the philosophical or religious ideas they had hoped to find; while others missed the high literary value they had looked for. They little considered how inaccurate, of necessity, such a first translation must be. Though Anquetil du Perron had indeed learned the language from the priests, still, people did not know that the priestly tradition itself had lost much during the ages of persecution or oblivion into which the religion had fallen. They did not sufficiently take into account that Anquetil was learning one foreign tongue, the Avesta, through another, the modern Persian; nor did they know how little accurate and scientific training du Perron had had. A discussion as to the authenticity

of the work arose. It was suggested that the so-called Zend-Avesta was not the genuine work of Zoroaster, but was a forgery. Foremost among the detractors, it is to be regretted, was the distinguished Orientalist, Sir William Jones. He claimed, in a letter published in French (1771), that Anquetil had been duped, that the Parsis had palmed off upon him a conglomeration of worthless fabrications and absurdities. In England, Sir William Jones was supported by Richardson and Sir John Chardin; in Germany, by Meiners. In France the genuineness of the book was universally accepted, and in one famous German scholar, Kleuker, it found an ardent supporter. He translated Anquetil's work into German (1776, Riga), for the use of his countrymen, especially the theologians, and he supported the genuineness of those scriptures by classical allusions to the Magi. For nearly fifty years, however, the battle as to authenticity, still raged. Anquetil's translation, as acquired from the priests, was supposed to be a true standard to judge the Avesta by, and from which to draw arguments; little or no work, unfortunately, was done on the texts themselves. The opinion, however, that the books were a forgery was gradually beginning to grow somewhat less.

§ 10. It was the advance in the study of Sanskrit that finally won the victory for the advocates of the authenticity of the Sacred Books. About 1825, more than fifty years after the appearance of du Perron's translation, the Avesta texts themselves began to be studied by Sanskrit scholars. The close affinity between the two languages had already been noticed by different scholars; but in 1826, the more exact relation between the Sanskrit and the Avesta was shown by the Danish philologian, Rask, who had travelled in Persia and India, and who had brought back with him to the Copenhagen library many valuable MSS. of the Avesta and of the Pahlavi books. Rask, in a little work on the age and authenticity of the Zend-Language (1826), proved the antiquity of the language, showed it to be distinct from Sanskrit, though closely allied to it, and made some investigation into the alphabet of the texts. About the same time the Avesta was taken up by the French Sanskrit scholar, Eugène Burnouf. Knowing the relation between Sanskrit and Avestan, and taking up the reading of the texts scientifically, he at once found, through his knowledge of Sanskrit, philological inaccuracies in Anquetil's translation. Anquetil, he saw, must often have misinterpreted his teachers; the tradition itself must often necessarily have been defective. Instead of this untrustworthy French rendering, Burnouf turned to an older Skt. translation of a part of the Avesta. This was made in the 15th century by the Parsi Naryosangh, and was based on the Pahlavi version. By means of this Skt. rendering, and by applying his philologial learning, he was able to restore

sense to many passages where Anquetil had often made nonsense, and he was thus able to throw a flood of light upon many an obscure point. The employment of Skt., instead of depending upon the priestly traditions and interpretations, was a new step; it introduced a new method. The new discovery and gain of vantage ground practically settled the discussion as to authenticity. The testimony, moreover, of the ancient Persian inscriptions deciphered about this time by Grotefend (1802), Burnouf, Lassen, and by Sir Henry Rawlinson, showed still more, by their contents and language so closely allied to the Avesta, that this work must be genuine. The question was settled. The foundation laid by Burnouf was built upon by such scholars as Bopp, Haug, Windischmann, Westergaard, Roth, Spiegel —the two latter happily still living—and to day by Bartholomae, Darmesteter, de Harlez, Hübschmann, Justi, Mills, and especially Geldner, including some hardly less known names, Parsis among them. These scholars, using partly the Sanskrit key for the interpretation and meaning of words, and partly the Parsi tradition contained in the Pahlavi translation, have now been able to give us a clear idea of the Avesta and its contents as far as the books have come down to us, and we are enabled to see the true importance of these ancient scriptures. Upon minor points of interpretation, of course, there are and there always will be individual differences of opinion. We are now prepared to take up the general division and contents of the Avesta, and to speak of its Pahlavi version.

Contents, Arrangement, Extent, and Character.

§ 11. The Avesta, as we now have it, is but a remnant of a once great literature. It has come down in a more or less fragmentary condition; not even a single manuscript contains all the texts that we now have; whatever we possess has been collected together from various codices. All that survives is commonly classed under the following divisions or books:

1. *Yasna*, including the *Gāthās*
2. *Vispered*
3. *Yashts*
4. Minor texts, as *Nyāishes*, *Gāhs* etc.
5. *Vendidād*
6. Fragments, from *Hādhōkht Nask* etc.

§ 12. In the first five divisions two groups are recognized. The first group (i) comprises the Vendidad, Vispered, and Yasna; these as used in the service of worship are traditionally classed together for liturgical purposes and form the Avesta proper. In the manuscripts, more-

over, these three books themselves appear in two different forms, according as they are accompanied, or not, by a Pahlavi version. If the books are kept separate as three divisions, each part is usually accompanied by a rendering in Pahlavi. On the contrary, however, these three books are not usually recited each as a separate whole, but with the chapters of one book mingled with another for liturgical purposes, on this account the MSS. often present them in their intermingled form, portions of one inserted with the other, and arranged exactly in the order in which they are to be used in the service. In this latter case the Pahlavi translation is omitted, and the collection is called the Vendidād Sādah or 'Vendidād pure' i. e. text without commentary. (ii) The second group comprising the minor prayers and the Yashts which the MSS. often include with these, is called the *Khordah Avesta* or 'small Avesta'. Of the greater part of the latter there is no Pahlavi rendering. The contents and character of the several divisions, including the fragments, may now be taken up more in detail.

§ 13. (1) The *Yasna*, 'sacrifice, worship', is the chief liturgical work of the sacred canon. It consists principally of ascriptions of praise and prayer, and in it are inserted the *Gāthās*, or 'hymns', verses from the sermons of Zoroaster, which are the oldest and most sacred part of the Avesta. The Yasna (Skt. *yajñá*) comprises 72 chapters, called *Hā*, *Hāiti*. These are the texts recited by the priests at the ritual ceremony of the Yasna *(Izashne)*. The book falls into three nearly equal divisions. (a) The first part (chap. 1—27) begins with an invocation of the god, Ormazd, and the other divinities of the religion; it gives texts for the consecration of the holy water, *zaothra*, and the *baresma*, or bundle of sacred twigs, for the preparation and dedication of the Haoma, *haoma*, the juice of a certain plant — the Indian Soma — which was drunk by the priests as a sacred rite, and for the offering of blessed cakes, as well as meat-offering, which likewise were partaken of by the priests. Interspersed through this portion, however, are a few chapters that deal only indirectly with the ritual; these are Ys. 12, the later Zoroastrian creed, and Ys. 19—21, catechetical portions.—(b) Then follow the Gāthās lit. 'songs', 'psalms' (chap. 28—53), metrical selections or verses containing the teachings, exhortations, and revelations of Zoroaster. The prophet exhorts men to eschew evil and choose the good, the kingdom of light rather than that of darkness. These Gāthās are written in meter, and their language is more archaic and somewhat different from that used elsewhere in the Avesta. The Gāthās, strictly speaking, are five in number; they are arranged according to meters, and are named after the opening words, Ahunavaiti, Ushtavaiti etc. The Gāthās comprise 17 hymns (Ys. 28—34; 43—46; 47—50; 51, 53), and,

like the Psalms, they must later have been chanted during the service. They seem originally to have been the texts or metrical headings from which Zoroaster, like the later Buddha, preached. In their midst (chap. 35—42) is inserted the so-called Yasna of the Seven Chapters *(Yasna Haptanghāiti)*. This is written in prose, and consists of a number of prayers and ascriptions of praise to Ahura Mazda, or Ormazd, to the archangels, the souls of the righteous, the fire, the waters, and the earth. Though next in antiquity to the Gāthās, and in archaic language, the Haptanghaiti represents a somewhat later and more developed form of the religion, than that which in the Gāthās proper was just beginning. Under the Gāthās also are included three or four specially sacred verses or formulas. These are the Ahuna Vairya or Honovar (Ys. 27.13), Ashem Vohu (Ys. 27.14), Airyama Ishyo (Ys. 54.1) and also the Yenghe Hātām (Ys. 4.26), so called from their first words, like the Pater Noster, Gloria Patri, etc., to which in a measure they answer.—(c) The third part (chap. 52, 55—72) or the 'latter Yasna' *(aparō yasnō)* consists chiefly of praises and offerings of thanksgiving to different divinities.

§ 14. (2) The *Vîspered* (Av. *vīspē ratavo*) consists of additions to portions of the Yasna which it resembles in language and in form. It comprises 24 chapters (called *Karde*), and it is about a seventh as long as the Yasna. In the ritual the chapters of the Vispered are inserted among those of the Yasna. It contains invocations and offerings of homage to 'all the lords' *(vîspē ratavō)*. Hence the name Vispered.

§ 15. (3) The *Yashts* (Av. *yešti* 'worship by praise') consist of 21 hymns of praise and adorations of the divinities or angels, *Yasatas (Izads)*, of the religion. The chief Yashts are those in praise of Ardvi-Sura, the goddess of waters (Yt. 5), the star Tishtrya (Yt. 8), the angel Mithra, or divinity of truth (Yt. 10), the Fravashis, or departed souls of the righteous (Yt. 13), the genius of victory, Verethraghna (Yt. 14), and of the Kingly Glory (Yt. 19). The Yashts are written mainly in meter, they have poetic merit, and contain much mythological and historical matter that may be illustrated by Firdausi's later Persian epic, the Shāh Nāmah.

§ 16. (4) The minor texts, *Nyāishes, Gāhs, Sīrōzahs, Afrīngāns*, consist of brief prayers, praises, or blessings to be recited daily or on special occasions.

§ 17. (5) The *Vendîdād*, or 'law against the daevas, or demons' *(vîdaēva dāta)*, is a priestly code in 22 chapters (called *Fargard*), corresponding to the Pentateuch in our Bible. Its parts vary greatly in time and in style of composition. Much of it must be late. The first chapter (Farg. 1) is a sort of an Avestan Genesis, a dualistic account of creation.

Chap. 2 sketches the legend of Yima, the golden age, and the coming of a destructive winter, an Iranian flood. Chap. 3 teaches, among other things, the blessings of agriculture; Chap. 4 contains legal matter — breaches of contract, assaults, punishments; Chap. 5—12 relate mainly to the impurity from the dead; Chap. 13—15 deal chiefly with the treatment of the dog; Chap. 16—17, and partly 18, are devoted to purification from several sorts of uncleanness. In Chap. 19 is found the temptation of Zoroaster, and the revelation; Chap. 20—22 are chiefly of medical character. In the ritual, the chapters of the Vendidad are inserted among the Gāthās.

§ 18. (6) Besides the above books there are a number of fragments, one or two among them from the *Hadhōkht Nask*. There are also quotations or passages from missing Nasks, likewise glosses and glossaries. Here belong pieces from the *Nīrangistān*, *Aogemadaēca*, *Zand-Pahlavi Glossary*, and some other fragments. These are all written in the Avesta language, and are parts of a once great literature. Under the Zoroastrian religious literature, moreover, though not written in Avesta, must also be included the works in Pahlavi, many of which are translations from the Avesta, or contain old matter from the original scriptures.

§ 19. From the above contents, it will be seen that our present Avesta is rather a Prayer-Book than a Bible. The Vendidād, Vispered, and Yasna were gathered together by the priests for liturgical purposes. It was the duty of the priests to recite the whole of these sacred writings every day, in order to preserve their own purity, and be able to perform the rites of purification, or give remission of sins to others. The solemn recital of the Vendidād, Vispered, and Yasna at the sacrifice might be compared with our church worship. The selections from the Vendidād would correspond to the Pentateuch when read; the preparation, consecration, and presentation of the holy water, the Haoma-juice, and the meat-offering, described in the Yasna and Vispered would answer to our communion service; the metrical parts of the Yasna would be hymns; the intoning of the Gāthās would somewhat resemble the lesson and the Gospel, or even the sermon. In the Khordah Avesta, the great Yashts might perhaps be comparable to some of the more epic parts of our Bible; but as they are devoted each to some divinity and preserve much of the old mythology, they really have hardly a parallel, even in the apocryphal books.

§ 20. Such, in brief outline, is the contents of the books known to-day as the Avesta; but, as implied above, this is but a remnant of a literature once vastly greater in extent. This we can judge both from internal and from historical evidence. The character of the work itself in its present form, sufficiently shows that it is a compilation from various

sources. This is further supported by the authority of history, if the Parsi tradition, going back to the time of the Sassanidæ, be trustworthy. Pliny (*Hist. Nat.* 30.1,2) tells of 2,000,000 verses composed by Zoroaster. The Arab historian, Tabari, describes the writings of Zoroaster as committed to 12,000 cowhides (parchments); other Arabic references by Masudi, and Syriac allusions to an Avesta, which must have been extensive, have been noted above § 6. The Parsi tradition on the subject is contained in the Rivāyats, and in a Pahlavi book, the Dinkard. The Dinkard (Bk. 3) describes two complete copies of the Avesta. These each comprised 21 Nasks, or Nosks (books). The one deposited in the archives at Persepolis, as the Arda Viraf says, perished in the flames when Alexander burned the palace in his invasion of Iran. The other copy, it is implied, was in some way destroyed by the Greeks. From that time the scriptures, like the religion under the Græco-Parthian sway, lived on, partly in scattered writings and partly in the memories of the priests, for nearly 500 years.

§ 21. The first attempt again to collect these writings seems to have been begun under the reign of the last Arsacidæ, just preceding the Sassanian dynasty. Pahlavi tradition preserved in a proclamation of King Khusro Anoshirvān (6th cent. A. D.), says it was under King Valkhash, probably Vologoses I., the contemporary of Nero, that the collection was begun of the sacred writings as far as they had escaped the ravages of Alexander, or were preserved by oral tradition. Valkhash was among the last of the Arsacidæ. The Sassanian dynasty (A. D. 226) next came to the throne. This house were genuine Zoroastrians and warm upholders of the faith, and they brought back the old religion and raised it to a height it had hardly attained even in its palmiest days. The first Sassanian monarchs, Artakhshir Pāpakān (Ardeshir Bābagān, A. D. 226—240) and his son Shahpuhar I. (A. D. 240—270), eagerly continued the gathering of the religious writings, and the Avesta again became the sacred book of Iran. Under Shahpuhar II. (A. D. 309—380) the final revision of the Avesta texts was made by Atur-pāt Māraspend, and then the king proclaimed these as canonical, and fixed the number of Nasks or books.

§ 22. Of these Nasks, 21 were counted, and a description of them, as noted, is found in the Rivāyats, and in the Dinkard; each received a name corresponding to one of the twenty-one words in the Ahuna-Vairya (Honovar), the most sacred prayer of the Parsis. Each of these Nasks contained both Avesta and Zend, i. e. original scripture and commentary. This tradition is too important to be idly rejected. Its contents give an idea of what may have been the original extent and scope of the Avesta. The subjects said to have been treated in the 21 Nasks may practically be described in brief, as follows: Nask 1 (twenty-two sections), on virtue

and piety; 2 (likewise twenty-two sections), religious observance; 3 (twenty-one sections), the Mazdayasnian religion and its teachings; 4 (thirty-two sections), this world and the next, the resurrection and the judgment; 5 (thirty-five sections), astronomy; 6 (twenty-two sections), ritual performances and the merit accruing; 7 (fifty sections before Alexander, thirteen then remaining), chiefly political and social in its nature; 8 (sixty sections before Alexander, twelve after remaining), legal; 9 (sixty sections before Alexander, fifteen later preserved), religion and its practical relations to man; 10 (sixty sections before Alexander, only ten afterwards surviving), king Gushtāsp and his reign, Zoroaster's influence; 11 (twenty-two sections originally, six preserved after Alexander), religion and its practical relations to man; 12 (twenty-two sections), physical truths and spiritual regeneration; 13 (sixty sections), virtuous actions, and a sketch of Zoroaster's infancy; 14 (seventeen sections), on Ormazd and the Archangels; 15 (fifty-four sections), justice in business and in weights and measures, the path of righteousness; 16 (sixty-five sections), on next-of-kin marriage, a tenet of the faith; 17 (sixty-four sections), future punishments, astrology; 18 (fifty-two sections), justice in exercising authority, on the resurrection, and on the annihilation of evil; 19, the Videvdād, or Vendidād (twenty-two sections, still remaining), on pollution and its purification; 20 (thirty sections), on goodness; 21 (thirty-three sections), praise of Ormazd and the Archangels.

§ 23. During the five centuries after the ravages of Alexander much, doubtless, had been lost, much forgotten. The Parsi tradition itself acknowledges this when it says above, for example, that the seventh Nask consisted originally of 50 sections, but only 13 remained 'after the accursed Iskander (Alexander)'. So says the Dinkard and so the Rivāyats. Like statements of loss are made of the eighth, ninth, tenth, eleventh Nasks. The loss in the five centuries from the invasion of Alexander, however, till the time of the Sassanian dynasty, was but small in comparison with the decay that overtook the scriptures from the Sassanian times till our day. The Mohammedan invasion in the seventh century of our era, and the inroad made by the Koran proved far more destructive. The persecuted people lost or neglected many portions of their sacred scriptures. Of the twenty-one Nasks that were recognized in Sassanian times as surviving from the original Avesta, only one single Nask, the nineteenth — the Vendidād — has come down to us in its full form. Even this shows evidence of having been patched up and pieced together. We can furthermore probably identify parts of our present Yasna and Vispered with the Staot Yasht *(staota yesnya)* or Yasht *(yesnya)*, as it is also called. The two fragments Yt. 21 and 22 (as printed in Westergaard's edition) and Yt. 11, in its first form, are recognized in the MSS. as taken

from the 20th, or Hādhokht Nask. The Nirangistān, a Pahlavi work, contains extensive Avestan quotations, which are believed to have been taken from the Huspāram, or 17th Nask. Numerous quotations in Pahlavi works contain translations from old Avestan passages. The Pahlavi work, Shāyast-lā-Shāyast, quotes briefly from no less than thirteen of the lost Nasks; the Bundahish and other Pahlavi works give translations of selections, the original Avesta text of which is lost. Grouping together all the Avesta texts, we may roughly calculate that about two-thirds of the total scriptures have disappeared since Sassanian times.

§ 24. The present form of the Avesta belongs to the Sassanian period. Internal evidence shows that it is made up of parts most varied in age and character. This bears witness to the statement that during that period the texts, as far as they had survived the ravages of Alexander, and defied the corrupting influence of time, were gathered together, compiled, and edited. According to the record of Khusro Anoshirvān (A. D. 531—579), referred to above, King Valkhash, the first compiler of the Avesta, ordered that all the writings which might have survived should be searched for, and that all the priests who preserved the traditions orally should contribute their share toward restoring the original Avesta. The texts as collected were re-edited under successive Sassanian rulers, until, under Shahpuhar II. (A. D. 309—379) the final redaction was made by his prime minister, Atur-pāt Māraspend. It is manifest that the editors used the old texts as far as possible; sometimes they patched up defective parts by inserting other texts; occasionally they may have added or composed passages to join these, or to complete some missing portion. The character of the texts, when critically studied, shows that some such method must have been adopted.

§ 25. Parts of the Avesta, therefore, may differ considerably from each other in regard to age. In determining this the text criticism by means of metrical restoration is most instructive. Almost all the oldest portions of the texts are found to be metrical; the later, or inserted portions, are as a rule, but not always, written in prose. The grammatical test also is useful; the youngest portions generally show a decay of clear grammatical knowledge. The metrical Gāthās in this respect are wonderfully pure. They are, of course, in their form the oldest portion of the text, dating from Zoroaster himself. The longer Yashts and metrical portions of the Yasna contain much that is very old and derived doubtless from the ancient faith of Iran; but in their form and in general composition, they are probably some centuries later than the Gāthās. The Vendidād is in this regard most incongruous. Some parts of it are doubtless of great antiquity, though corrupted in form; other parts, like younger

portions also of the Yashts, may be quite late. The same is true of formulaic passages throughout the whole of the Avesta, and some of the ceremonial or ritual selections in the Vispered and Nyāishes, etc. Roughly speaking, the chronological order of the texts would be somewhat as follows:

i. Gāthās (Ys. 28—53) and the sacred formulas Ys. 27.13,14, Ys. 54, including also

ii. Yasna Haptanghāiti (Ys. 35—42) and some other compositions, like Ys. 12, 58, 4.26, in the Gāthā dialect.

iii. The metrical Yasna and Yashts, as Ys. 9, 10, 11, 57, 62, 65; Yt. 5, 8, 9, 10, 13, 14, 15, 17, 19; portions of Vd. 2, 3, 4, 5, 18, 19, and scattered verses in the Vispered, Nyāishes, Afringāns, etc.

iv. The remaining prose portions of the Avesta.

In the latter case it is generally, but not always, easy to discover by the style and language, where old material failed and the hand of the redactor came in with stupid or prosaic additions.

§ 26. Considerable portions, therefore, of our present Avesta, especially the Gāthās, we may regard as coming directly from Zoroaster himself; still, additions from time to time must have been made to the sacred canon from his day on till the invasion of Alexander. The so-called copy of the Zoroastrian Bible which it is claimed was destroyed by that invader, doubtless contained much that was not directly from the founder of the faith, but was composed by his disciples and later followers. The Parsis, however, generally regard the whole work as coming directly from Zoroaster; this is a claim that the Avesta itself hardly makes. The Gāthās, however, undoubtedly came directly from the prophet; the Avesta itself always speaks of them as 'holy' and especially calls them the 'five Gāthās of Zoroaster'. We may fairly regard many other portions of the Avesta as direct elaborations of the great teacher's doctrines, just as the Evangelists have elaborated for us portions of the teachings of our Lord.

§ 27. In regard to the locality in which we are to seek the source of the Avesta and the cradle of the religion, opinions have been divided. Some scholars would place it in the West, in Media; the majority, however, prefer to look to the East of Iran, to Bactria. Both views probably have right on their side, for perhaps we shall not be amiss in regarding the Avesta as coming partly from the East, and partly from the West. The scene of most of it doubtless does belong in the East; it was there that Zoroaster preached; but the sacred literature that grew up about the Gāthās made its way, along with the religion to the West, toward Media and Persia. Undoubtedly some texts, therefore, may well have been composed also in Media. The question is connected also with that of Zo-

roaster's home which may originally have been in the West. On the native place of Zoroaster, see Jackson in *Amer. Or. Society's Journal*, May 1891 pp. 222 seq. The language itself of the texts, as used in the church, became a religious language, precisely as did Latin, and therefore was not confined to any place or time. We may regard the Avesta as having been worked upon from Zoroaster's day down to the time of the Sassanian redaction.

Religion of the Avesta.

§ 28. The religion contained in the Avesta is best called Zoroastrianism, a name that gives due honor to its founder and which is thus parallel with Christianity, Buddhism, Mohammedanism. Other designations are sometimes employed. It has often been termed Mazdaism, from its supreme god; or again Magism, from the Magi priests; sometimes we hear it styled Fire-Worship, or even Dualism, from certain of its characteristic features. The designation Parsiism, from the name of its modern followers, is occasionally applied.

§ 29. Beyond our own Bible, the sacred books perhaps of hardly any religion contain so clear a grasp of the ideas of right and wrong, or present so pure, so exalted a view of the coming of a Saviour, a resurrection and judgment, the future rewards and punishments for the immortal soul, and of the life eternal, as does the Avesta, the book of the scriptures of ancient Iran.

§ 30. In Zoroastrianism, however, as in other religions, we recognize a development. In the older stage of the Gāthās, we have the faith in its purity as taught by Zoroaster (Zarathushtra) himself, more than a thousand years perhaps before our Lord. But later, and even before the invasion of Alexander had weakened the power of the religion, we find changes creeping in. There was a tendency, for example, to restore many of the elements of the primitive faith of Iran, which Zoroaster had thrown into the background. Traces of the different stages are plainly to be recognized in the Avesta.

§ 31. The most striking feature of Zoroaster's faith, as taught in the Gāthās, is the doctrine of Dualism. There are two principles, the good and the evil, which pervade the world. All nature is divided between them. These principles are primeval. Good and evil have existed from the beginning of the world. Ahura Mazda, the Lord of Wisdom (the later Persian Ormazd) is Zoroaster's god; Angra Mainyu, or the Spiritual Enemy (the later Persian Ahriman) is the devil. The evil spirit is also called Druj 'Deceit, Satan'. The good spirit and the evil are in eternal conflict. The good, Zoroaster teaches, however, will ultimately

triumph. Man, a free agent, will bring the victory by choosing right and increasing the power of good. Evil shall be banished from the world. This will be the coming of the 'kingdom' or 'the good kingdom' — *vohu ḫšaθra* — as it is called. To the right choice Zoroaster exhorts his people. The question whence Zoroaster derived his idea of dualism, and how far he was a reformer, will not here be entered into.

§ 32. According to the prophet's teaching, Ahura Mazda, the god of good, is not without the aid of ministering angels. These are called Amesha Spentas, 'Immortal Holy Ones', the later Persian Amshaspands. They correspond in a measure to our idea of Archangels. They are six in number and constitute, with Ahura Mazda, the heavenly host. Their names are personifications of abstractions or virtues, Righteousness, Goodness, or the like. The seven-fold group, or celestial council, is as follows.

Ahura Mazda
aided by
Vohu Manah
Asha Vahishta
Khshathra Vairya
Spenta Armaiti
Haurvatāt
Ameretāt
also
Sraosha.

These abstractions or personifications may be noticed more in detail.

§ 33. Vohu Manah (lit. 'good mind', Plutarch εὔνοια) is the personification of Ahura Mazda's good spirit working in man and uniting him with God. In the later development of the religion, this divinity was specialized into the good mind or kindliness that is shown toward cattle. He thus became the guardian genius of the flocks.

§ 34. Asha Vahishta (lit. 'best righteousness, Plutarch ἀλήθεια) is the next divinity in the celestial group and is the personification of right (Skt. *ṛtá*), the divine order that pervades the world. In the heavenly court Asha stands almost in the relation of prime minister to Ormazd. To live 'according to Asha' (Right, or the Law of Righteousness e. g. Ys. 31.2) is a frequent phrase in the Avesta. The attribute *Ashavan* is the regular designation of 'the righteous', as opposed to *Dregvant* 'the wicked', or one that belongs to Satan or the Druj. In later times Asha Vahishta came to preside as guardian genius over the fire, a symbol of perfect purity.

§ 35. Khshathra Vairya or Vohu Khshathra (lit. 'the wished-for kingdom, the good kingdom', Plutarch εὐνομία) is the personification of Ahura Mazda's good rule, might, majesty, dominion, and power, the Kingdom which Zoroaster hopes to see come on earth. The establishment of this kingdom is to be the annihilation of evil. In later times, Khshathra Vairya, as a divinity, came to preside over metals. The symbolic connection may have been suggested by the fact that the coming of the Kingdom (khshathra) was presumed to be accompanied by a flood of molten metal, the fire that should punish and purge the wicked, and which should purify the world. The metals thus became emblematic of Khshathra.

§ 36. Spenta Armaiti (lit. 'holy harmony, humility', Plutarch σοφία) is the harmony, peace, and concord that should rule among men. She is represented as a female divinity; the earth is in her special charge. She plays an important part at the resurrection. The earth is to give up its dead.

§ 37. Haurvatāt (Plutarch πλοῦτος) literally means 'wholeness, completeness, the saving health, the perfection', toward which all should strive, in short 'Salvation', with which word it is etymologically cognate. This divinity is always mentioned in connection with Ameretāt. In the later religion, Haurvatāt came to preside as guardian angel over the health-giving waters.

§ 38. Ameretāt literally means 'immortality', and is always joined with Haurvatāt. In later Zoroastrianism, Ameretāt presides over the trees. The pair of Haurvatāt and Ameretāt together seem to symbolize the waters of health and the tree of life.

§ 39. To the number of the celestial council also is to be added the divinity Sraosha (lit. 'obedience'). This genius completes the mystic number seven when Ahura Mazda is excepted from the list (cf. also Ys. 57.12). Sraosha is the angel of religious obedience, the priest god, the personification of the divine service that protects man from evil.

§ 40. Beside the above divinities in the Gāthās, mention is also made of Geush Tashan, the creator of the cow, and Geush Urvan, the personified soul of the kine. We sometimes also find Spenta Mainyu, the Holy Spirit of Ormazd, the will of God, represented practically as a distinct personage. Lastly, the Fire, Atar, is personified in the Gāthās as one of God's ministering servants, and is a sacred emblem of the faith.

§ 41. Such is the heavenly hierarchy, and such the faith of Ormazd in which Zarathushtra exhorts the people to believe. The faithful are

called Ashavans 'righteous', or later more often Mazdayasnians i. e. 'worshippers of Mazda'. This is the true religion in contradistinction to the false. The false religion is the worship of the Daevas 'demons' (Av. *daēva* opposed to Skt. *dēva* 'god'). The Daeva-worshippers are misguided and live in error. They are the wicked Dregvants (lit. 'belonging to the Druj, Satan'), 'the children of the wicked one' (St. Matt. xiii. 38—43). The two religions themselves are a part of the dualism.

§ 42. In juxtaposition to Ahura Mazda, Zoroaster sets the fiend Druj 'Deceit, Satan' or Angra Mainyu (Ys. 45.2). The spirit of evil in coexistent with Ormazd (Ys. 30.3), but is less clearly pictured in the Gāthās. In later times, to carry out the symmetry of dualism, Angra Mainyu is accompanied by a number of Arch-Fiends, in opposition to the Archangels of Ormazd. The number of the infernal group is not sharply defined, but the chief members are

Angra Mainyu
aided by
Aka Manah
Indra
Saurva
Taro-maiti
Tauru
Zairica
also
Aeshma.

Each is the opponent of a heavenly rival. Aka Manah or 'Evil Mind' is the antagonist of Vohu Manah; Taro-maiti, the demon of 'Presumption', is the opponent of Armaiti or humility; Aeshma, 'Fury, Wrath', the foe of Sraosha or holy obedience. The antagonism in the case of the others is less marked, and the connection somewhat more mechanical.

§ 43. In the final struggle between the two bands, the powers of light and the powers of darkness, the good eventually shall triumph. That was an ethical idea which Zoroaster inculcated. But the warfare that rages in the world between the two empires and between the true religion and the false, the belief in Mazda and the Daeva-worship, pervades also the soul of man and leaves the way uncertain. Yet on his choice the ultimate triumph of right or of wrong depends. Each evil deed which man commits, increases the power of evil (e. g. Ys. 31.15); each good deed he does, brings nearer the kingdom of good. As Ahura Mazda's creature, man should choose the right. Zoroaster's mission, as shown in the Gāthās (e. g. Ys. 31.2 et al.), is to guide man's choice. A summary of the prophet's moral

and ethical teachings may best be given in the triad, so familiar later, 'good thoughts, good words, good deeds'. This forms the pith of the whole teaching. Purity alike of body and soul, and the choice of the good Mazda-religion rather than the wicked Daeva-worship, are inculcated. Zoroaster enjoins also the care of useful animals, especially the cow, and commends the good deeds of husbandry. He is the teacher of a higher and nobler civilization, as may be judged from the Avesta creed Ys. 12.1 seq.

§ 44. Man's actions, according to Zoroaster, are all recorded in Ormazd's sight as in a life-book (e. g. Ys. 31.13,14, Ys. 32.6). By his own actions man shall be judged, and rewarded or punished. The doctrine of a future life, the coming of the Kingdom, the end of the world, forms a striking feature in the teachings of the Avesta. This is the tone that Zoroaster himself constantly strikes in the Gāthās. This very doctrine, and a belief also in a resurrection of the body characterises the entire Persian faith. The resurrection is to be followed by a general judgment when evil shall be destroyed from the world. This general division and new dispensation is called the Vidāiti (*vi* + $\sqrt{dā}$ 'dis-pose').

§ 45. The views in regard to a future life, though incomplete in the Gāthās, are carried out in the Younger Avesta, and are fully given in the Pahlavi books. That the belief in a resurrection and a life hereafter was common among the Persians, some centuries before our Saviour, we have evidence in the early Greek writers, such as Theopompus, Herodotus, etc. The belief in an immediate judgment of the soul after death, the weighing in the balance, the leading of the soul across the Cinvat Bridge and through the mansions of paradise to bliss, or through the grades of hell to torment, or again in special cases to an intermediate state to await the final judgment—are all to be recognized in the Zoroastrian books and have their prototypes in the Gāthās.

§ 46. In the Yasna of the Seven Chapters, though not much later than the Gāthās, we find in some respects a slight descent from the lofty level on which the religion had been placed by its founder. There is a tendency to revive ancient ideas and forms from the old worship, in which nature had played a prominent part. The elements, earth, air, fire, and water, receive adoration; the Fravashis, or guardian angels of the righteous, are worshipped and praised together with Ahura Mazda and the Amesha Spentas. The deity Haoma, the divinity of the plant which produced the intoxicating Soma drink, again finds place in the religious rites.

§ 47. In the Younger Avesta, especially in the Yashts, we find still further restorations or innovations. The gods of the ancient mytho-

logy, like Mithra, Verethraghna, once more appear in honor by the side of the supreme deity; the divinities of the stars, moon, and sun have their share of pious worship. In the later parts of the Yasna, the sacrifice is developed into a somewhat elaborate ritual. The Zoroaster presented in certain portions of the Vendidad, moreover, is evidently no longer a living, moving personage as in the Gāthās; he has become a shadowy figure, around whom time has thrown the aureola of the saint. These passages differ widely from the old hymns; they show unmistakeable signs of lateness. They present a religion codified in the hands of the priests; superstitious beliefs and practices have found their way into the faith; intricate purifications in particular are enjoined to remove or to avoid the impurity arising from contact with the dead. The spirit of the Gāthās is gone. It is only here and there that passages in late texts are old and have the genuine Zoroastrian ring. They must not be overlooked. In general, a distinction must be drawn between what is old and what is young. We must recall, as above (§ 27), that the Avesta was probably worked upon from Zoroaster's own day down to the time of the Sassanian redaction.

The Pahlavi Version of the Avesta.

§ 48. To the period of the Sassanian editing of the texts belongs the Pahlavi translation and interpretation of the Avesta. At the date when the texts were compiled and edited (§ 21), the general knowledge of the Avesta and the understanding of the sacred texts was far from perfect. The preparation of a translation or version became necessary. Accordingly, the great body of the texts was rendered into Pahlavi, the language used in Persia at the time of the Arsacidæ and Sassanidæ. The Pahlavi version and interpretation of the entire Yasna, Vispered, and Vendidad, with some portions of the other texts, has been preserved. We have not as yet a thorough enough understanding of this version, as the Pahlavi question is still a vexed one; but as our knowledge of this translation increases, we see more and more its importance. Owing to a somewhat imperfect knowledge of the Avesta texts at the time when the version was made, and owing to the unskilfull and peculiar manner in which the Pahlavi translation is made, this version abounds in numerous errors and inaccuracies. Its renderings, however, are often of the greatest value in interpreting allusions, particularly also in giving hints for the meanings of obscure words, and in such matters it is many times our best and only guide. When more fully understood and properly used in connection with the 'comparative method', referring to the Sanskrit in interpreting the sacred texts, the 'traditional method' or native explanation is destined to win great results. The 'traditional' and the 'comparative' methods must go hand in hand.

Manuscripts of the Avesta.

§ 49. The manuscripts of the Avesta are quite numerous. Some of our specimens were copied down over five hundred years ago. They are written on parchment. The oldest was copied about the middle of the 13th century. From that date onward we have a considerable number of codices still extant. They come to us from India and from Yezd and Kirman in Persia. A number of the manuscripts are deposited in the libraries at Copenhagen, Oxford, London, Paris, Munich. The Parsi priests, especially the Dasturs, Dr. Jamaspji Minocheherji and also Peshotanji Behramji, have shown princely generosity in aiding Western scholars in editing texts by putting valuable MSS. in their possession. It is thus that the new edition of the Avesta texts by Professor Geldner of Berlin, is able to be presented in so critical a manner. No codex is complete in containing all the texts (§ 11). The different MSS. themselves, moreover, show certain variations in reading; but these chiefly affect the form and construction of single words, rather than entire passages and the sense. As a rule, the older the MS. is, the better is its grammar; and the later, the more faulty. Notable exceptions, however, must be made, especially in favor of some later MSS. from Persia.

Importance of the Avesta.

§ 50. The importance of the Avesta, as stated above (§ 2), lies not alone in the field of philology, ethnology and early literature, but especially also is it of importance from the standpoint of comparative religion. Resemblances to Christianity in its teachings become significant when we consider the close contact between the Jews and the Persians during the Babylonian captivity. These are beginning more and more to attract the attention of students of the Bible.

Language of the Avesta.

Grammatical Summary.

§ 51. The language in which the Avesta is written belongs to the Iranian branch of the Indo-Germanic tongues. With the Ancient Persian of the inscriptions it makes up the Old Iranian division. The later Iranian languages, New Persian, Kurdish, Afghan, Ossetish, Baluchi, Ghalcha, and some minor modern dialects, complete the younger division. The intervening Pahlavi and Pāzand, or Parsi, do not quite complete the link between the divisions. The extent of its relationship with the Armenian is not yet defined with sufficient exactness. On the positive kinship between the language of the Avesta and Sanskrit, see below § 55.

§ 52. The language in which the Avesta is written may best be termed *Avesta* or *Avestan*. The designation *Avesta* for the language, as well as the book, is in keeping with the Pahlavi *Avistāk*, which is used both of the tongue and of the scriptures. The term *Avestan*, both for the language and as an adjective, is preferred by some scholars, in order to distinguish the speech from the work itself. This is sometimes found very convenient. The term *Zend* for the language, as noted above (§ 3), is a misnomer. The designation Old Bactrian, occasionally used for the tongue, has little to recommend it.

§ 53. The alphabet in which the Avesta is written is far younger than the language it presents. The characters are derived from the Sassanian Pahlavi, which was used to write down the oral tradition when the texts were collected and edited under the dynasty of the Sassanidæ. The writing is read from right to left. What the original Avestan script was we do not know.

§ 54. Two dialects may be recognized in the Avesta: one the 'Gāthā dialect' or the language of the oldest parts, the Gāthās, or metrical sermons of Zoroaster; the other 'Younger Avesta' or the 'classical dialect'. This latter is the language of the great body of the Avesta. The Gāthā dialect is more archaic, standing in the relation of the Vedic to the classical Sanskrit, or the Homeric Greek to the Attic. Possibly the Gāthā language may owe some of its peculiarities noticed below, also to an original difference of locality. The Gāthā dialect was the speech of Zoroaster and his followers. Its grammatical structure is remarkably pure. The younger Avesta, but only in its late compositions, owing to linguistic decay, shows many corruptions and confusions in its inflections. All that is old or is written in meter, however, is correct and accurate. Inaccuracies that have there crept in, we must generally attribute to the carelessness of the scribes. In its forms, as a rule, the Avesta is extremely antique; it stands in general on the same plane as the Vedic Sanskrit, and occasionally, though not often, it even shows more ancient forms.

§ 55. The language of the Avesta is most closely allied to the Sanskrit, though individually quite distinct from the latter. Together they may be classed as making up an Indo-Iranian group. Almost any Sanskrit word may be changed at once into its Avestan equivalent, or vice versa, merely by applying certain phonetic laws. As example may be taken the metrical stanza Yt. 10.6 in the Avesta:

təm amavaṇtəm yazatəm
sūrəm dāmōhu·spvištəm
miθrəm yazāi zaoθrābyā—

'Mithra that strong mighty angel, most beneficent to all creatures, I will worship with libations'—becomes when rendered word for word in Sanskrit:

tam ámavantam yajatám
śúram dhấmasu śáviṣṭham
mitrám yajāi hótrābhyaḥ.

§ 56. In its **phonology** the Avesta agrees with the Sanskrit in its vowels in general, but the Avesta shows a greater variety in using *e*- and *o*-sounds instead of *a*. Final vowels, except *ō*, are shortened as a rule. The Skt. diphthong *ē* appears in Av. as *aē*, *āi*, *ē* (final). Thus Av. *vaēnōiṗe* 'they two are seen' = Skt. *vēn-ē-tē*. Skt. *ō* appears as Av. *ao*, *āu*, *o* (final), thus Av. *aojō* 'strength' = Skt. *ójō*, *ójas*; Av. *ḫratūuś* 'of wisdom' = Skt. *krátōs*. A striking peculiarity in Av., moreover, is the introduction of epenthetic vowels and help sounds, giving rise to improper diphthongs, Av. *bavaiti* 'he becomes' = Skt. *bhávati*; Av. *haurva-* 'whole' = Skt. *sárva-*; Av. *vaŋ̇dra-* 'word' = Skt. *vaktra-*; Av. *ḫvarᵊ-* 'sun' = Skt. *svàr*. The Skt. voiceless stops *k*, *t*, *p* generally become spirants *ẋ*, *ṗ*, *f* in Av. before consonants. Thus, Av. *ẋšaṗra-* 'rule, kingdom' = Skt. *kṣatrá-*; Av. *fra* 'forth' = Skt. *pra*. The original voiced aspirates *gh*, *dh*, *bh*, become in Av. simply voiced stops *g*, *d*, *b*. They are so preserved in the old Gāthā dialect; the younger dialect commonly resolves them again before consonants and between vowels into voiced spirants. Thus, GAv. *adā*, YAv. *ada* 'then' = Skt. *ádha*. Similarly spirantized in YAv. the voiced stops YAv. *ugra-*, GAv. *ugra-* 'mighty' = Skt. *ugrá-*. The sibilant *s*, when initial in Skt., becomes Av. *h*, as in Greek. Thus, Av. *hapta* 'seven' = Skt. *saptá*. When internal, Skt. *s* may also appear as *vh*. Thus, Av. *vavhana-* 'vesture' = Skt. *vásana-*. Final *-as* of Skt. appears regularly as *-ō*. Thus Av. *aspō* 'horse' = Skt. *áśvas*.

§ 57. The Gāthā dialect regularly lengthens all final vowels. It frequently inserts the anaptyctic vowels: GAv. *fərā*, YAv. *frā* = Skt. *pra*. Original *ns* appears in GAv. as *ŋg*. Thus GAv. *daēvāŋg* (acc. pl.), YAv. *daēvąn* 'demons' = Skt. *dēvấn*; GAv. *mīŋghāi* 'I shall think' = Skt. *mṛṣāi*.

§ 58. In **inflection** the Avesta shows nearly the richness of the Vedic Sanskrit. There are three genders, masculine, neuter, feminine; likewise three numbers, singular, dual, plural. The dual is not extensively used. There are eight well-developed cases of the noun and the adjective; the normal endings are: Singular. Nom. *-s*; Acc. *-əm*; Instr. *-ā*; Dat. *-ē*; Abl. *-aŋ̇*; Gen. *-ō (-as)*; Loc. *-i*; Voc. —. Dual. Nom., Acc., Voc. *-ā*; Instr., Dat., Abl. *-byā*; Gen. *-ōō*; Loc. *-ō*, *-yō*. Plural. Nom., Voc. *-ō (-as)*, *-ā*; Acc. *-ō (-as, -ns)*, *-ā*; Instr. *-bīš*; Dat. *-byō (-byas)*; Gen. *-ąm*; Loc. *-su*, *-hu*, *-ẋva*. The classes of declension agree exactly with the

Sanskrit; the method of forming comparison of adjectives likewise corresponds. The numerals answer to Skt. forms, except Av. *aźva-* 'one', opposed to Skt. *éka-*, Av. *baźvar-* '10,000', but Skt. *ayúta*. The Av. pronouns closely resemble the Skt., but show also individual peculiarities. Noteworthy is the remote demonstrative Av. *ava, hāu* 'that, yonder', contrasted with Skt. *amú, asāu*. The verbal system in Av. and in Skt. are in general identical. The roots are chiefly monosyllabic and are subject to the same modifications as in Skt. In voice, mode, and tense, and in their conjugation-system the two languages quite agree. The endings show equal antiquity with the Sanskrit. The primary active endings in Av. are: Sing. 1, *-mi*, 2, *-hi*, 3, *-ti*; Dual. 1, *-vahi*, 3, *-tō, -þō*; Plur. 1, *-mahi*, 2, *-þa*, 3, *-nti*. The other endings also are parallel with the Sanskrit.

§ 59. The Av. possesses like facility with the Sanskrit in forming words by means of prefixes, and by adding suffixes of primary and secondary derivation. The same classes of compounds may be recognized in both tongues. The rules of external Sandhi, or joining together of words in a sentence, so universal in Skt., are almost wanting in Avesta. The Avesta separates each word by a dot. The vowels are fully expressed as in Greek etc., by individual letters. No diacritical points or accents are written in the texts. The meters in which the Gāthās are composed have analogies in the Veda. Almost all the metrical parts of the younger Avesta are in eight-syllable lines. The syntax, however, differs from the Sanskrit in certain points, and shows some marked individualities, especially in the later portions.

SUGGESTIONS.

The following hints may be helpful to the student in using the Grammar. The chief points on which stress should be laid, and which it will be sufficient for the beginner to acquire, are:

1. In the Preface, the remarks on Transcription, pp. vi—vii.

2. In the Introduction, the sketch of the language of the Avesta, pp. xxx—xxxiii.

3. Throughout the Grammar, the large print alone need be studied. Every thing marked 'GAv.' (Gāthā Avesta), and all that is in small type, may be practically disregarded.

4. Under Phonology, only the sections (§§) referred to in the Résumé pp. 60—61.

5. Under the Declension of Nouns and Adjectives, the following sections should suffice: §§ 236, 243, 251, 262, 279, 291, 300, 322, 339, 362, 363.

6. Under Numerals, note merely the Cardinals § 366.

7. Under Pronouns, compare the Av. and Skt. forms in the case of §§ 386, 390, 399, 409, 417, 422, 432. No attempt need be made to commit the paradigms to memory.

8. Under Verbs, the following sections relating to the Present-System are important: §§ 448, 466, 469, 470, 478—481, 483—488. The remaining conjugations, and the Perfect, Aorist, Future, etc., may be learned as needed.

9. The rest of the book may be overlooked by the beginner.

10. In consulting the Grammar, the Index will be found of service for reference.

A FEW OF THE BOOKS MOST NECESSARY FOR THE BEGINNER.

The following list contains a few books that the beginner will find most useful. The list is very brief; the student as he advances will see how rapidly it may be enlarged.

A good and readable book.

WINDISCHMANN—*Zoroastrische Studien,* herausgegeben von Fr. Spiegel.—Berlin 1863.

Beside the above works the student will find abundant and valuable contributions on the Avesta and kindred Iranian subjects in the philological journals and periodicals of the last few years. Reference need only be made to the names Bartholomae, Bang, Bezzenberger, Caland, Casartelli, Darmesteter, de Harlez, Geiger, Geldner, Horn, Hübschmann, Fr. Müller, Mills, Pischel, Spiegel, Wilhelm, and some others, in the following:

Observe.

1. Av. (Avesta) prefixed to a word indicates that the word or form in question is either found in both GAv. and YAv. or has nothing peculiar about it which would prevent its occurence in both.

2. GAv. (Gāthā Avesta) is prefixed (1) when the word, or form, or construction is peculiar to the Gāthā dialect and is not found in YAv.; (2) to contrast a Gāthā form with a younger form (YAv.) which may stand beside it; (3) to emphasize the fact that the form in question is found even in the Gāthās, e. g. *stavas* § 143.

Under GAv. are comprised the usual 17 hymns and the sacred formulas (Introd. p. xxiii, § 25), the Yasna Haptanghāiti, and those por-

tions, such as Ys. 12, that are written in the Gāthā dialect even including some possible later imitations, e. g. Ys. 58, 4.26.

3, YAv. (Younger Avesta) comprises everything that is not written in the dialect of the Gāthās. For its usage see preceding note.

4. The sign (ᵃ) is placed before a form to denote that the first part of the word is omitted.

5. In the paradigms under Inflection, the forms in parentheses () do not actually occur, but are made up after the form in small print which stands beside them. See § 236 foot-note. Thus Loc. *(yasnaēšu) vīraēšu.*

GRAMMAR.

PHONOLOGY.

Alphabet.

§ 1. The Avesta is written in the following characters

A. Vowels.

Short	𐬀 *a*	𐬁 *i*	𐬂 *u*	𐬃 *ə*	𐬄 *e*	𐬅 *o*							
Long	𐬆 *ā*	𐬇 *ī*	𐬈 *ū*	𐬉 *ə̄*	𐬊 *ē*	𐬋 *ō*	𐬌 *ąə*	𐬍 *ą*					

B. Consonants.

Guttural . . .	𐬐 *k*	𐬑 *x*	𐬒 *γ*	𐬓 *g*	𐬔 *j*								
Palatal . .	𐬕 *c*		𐬖 *j*										
Dental . . .	𐬙 *t*	𐬚 *θ*	𐬛 *d*	𐬜 *ð*	𐬝 *t*								
Labial . . .	𐬞 *p*	𐬟 *f*	𐬠 *b*	𐬡 *β*									
Nasal	𐬨 *n*	𐬩 *ŋ*	𐬪 *n*	𐬫 *ŋ*	𐬬 *m*								
Semivowels and Liquid . . .	𐬭 *y*	𐬮 *r*	𐬯 *v*										
Sibilant . . .	𐬰 *s*	𐬱 *š*	𐬲 *š*	𐬳 *š*	𐬴 *ʃ*	𐬵 *ž*							
Aspiration . .	𐬷 *h*	𐬸 *ḫ*											
Ligature . .	𐬹 *hv*												

§ 2 The writing runs from right to left. The vowels are fully expressed by individual letters as in Greek

* Note. The epenthetic and anaptyctic vowels (§§ 70, 72) will be expressed in transcription, in the Grammar only, by a small vowel slightly raised: e. g. Av. *aᵘruša-* 'white' = Skt. *aruṣá-*; Av. *antarᵊ* 'within' = Skt. *antár*.

etc.; there are no diacritical points; nor are any accents written in the Avesta texts.

§ 3. In the manuscripts numerous ligatures occur; these except 𐬯𐬀 *št* are generally resolved in printing. Observe that 𐬎 *hv* is different from 𐬍𐬎 *hv*. Many MSS. have a sign 𐬞 *m* interchanging with 𐬞𐬌 *hm*.

§ 4. In Avesta, all words except some enclitics are written separately and each is followed by a point (.); the compounds even are mostly written separately in the MSS.; but in printed texts these are written together, a point (.) being used to divide the members.

§ 5. The punctuation in the MSS. is meagre, mostly arbitrary and quite irregular; the following symbols borrowed from the MSS. have been adopted to correspond to our signs, namely ∴ for colon or semicolon; ∵ a full stop; 𐬾 a larger break; 𐬾𐬾 the end of a chapter; ▫ symbol of abbreviation.

Pronunciation.

§ 6. **Vowels.** 𐬀 *a*, 𐬁 *ā*, 𐬂 *i*, 𐬃 *ī*, and 𐬄 *u*, 𐬅 *ū* are pronounced as ordinarily in Sanskrit, but *a*, *ā* perhaps duller. —𐬆 *ə* is most probably obscure like the short indefinite vowel familiar in English, 'gard*e*n*e*r', 'meas*u*ring', 'hist*o*ry', 'sach*e*m'; it often corresponds to the vulgar 'chim^{e}ney', 'rheumatis^{u}m'. In the combination 𐬉𐬭𐬀 *ərə*, cf. Skt. *r*, much like English 'pretty' (when pronounced 'p^{e}r^{e}tty'), e. g. 𐬞𐬀𐬭𐬎𐬀𐬰𐬀𐬌 *pərəsaṭ* 'he asked', cf. Mod. Persian *pursīdan* 'to ask'; Av. *mərəγa-* 'bird', Skt. *mṛga-*, Mod. Pers. *murγ*. See above, Introduction, on Transcription. —𐬇 *ə̄* is the corresponding long vowel to 𐬆 *ə*. —𐬋 *e* and 𐬌 *ē*, both narrow, about as English 'let, veil', French 'été'. —𐬏 *o* and 𐬐 *ō* probably somewhat muffled. —𐬍 *ā̆*, as English 'extr*a*ordinary, f*a*ult,

fawing', i. e. approaching '-aw' in 'saw'. — ँ *q*, nasalized *a*, or *ā*, French 'sans', likely rather dull.

§ 7. Diphthongs. ा *āi* and ा *āu* are pronounced as in Sanskrit. — े *ōi* as a Gk. ωι. — ॅ *aē*, ॉ *ao* and ं *ən* as a union of the two elements *a i* etc. — ॆ *ăe* as forming two distinct sounds.

§ 8. **Tenues** क *k*, त *t*, ट *ṭ*, प *p*, and **Mediae** ग *g*, द *d*, ड *ḍ*, ब *b*, as ordinarily. — च *c*, ज *j*, as in Sanskrit, English 'church, judge'.

§ 9. **Spirants.** ख *ẖ*, as *ch* in Scotch 'loch', Mod. Gk. χ. — ग़ *ġ*, a roughened *g*, guttural buzz, cf. (often) Germ. 'Tage', Mod. Gk. γ. — थ *þ*, as English 'thin', surd. — ध *đ*, as English 'then', sonant. — ऽ *ƀ*, apparently a spirant, § 81. — फ *f*, as in English. — व *w*, corresponding sonant, Germ. *w*, Mod. Gk. β (cf. Eng. *v*). — स *s*, sharp as in 'sister'. — ज़ *z*, corresponding sonant, English 'zeal'. — श *š*, as English *sh* in 'dash'. — ष *ž*, corresponding sonant, English 'pleasure, azure'. — ष़ *ś*, a more palatal *sh*, generally before *y*. — ष *ṣ*, apparently a variety *sh*, differing little from श *š*; etymologically it most often equals original *rt*.

§ 10. **Nasals.** ङ *ṅ*, guttural = Skt. *ṅ*. — ञ *ñ*, a modification of the preceding, -mouillé; the two (ङ *ṅ* and ञ *ñ*) respectively perhaps as in Eng. 'longing'. — न *n*, as Eng. 'nun'. — ऩ *ṇ* (modified from *an*), a variety of *n*. — म *m*, as ordinarily.

§ 11. **Semivowels and Liquid.** य *y* (initial), probably spirant as Eng. 'youth'; — य़ *y* (internal), probably semivowel, *i*, English 'many a man'. — व *v* (initial), probably spirant as Eng. 'vanish'; — व़ *v* (internal), probably semivowel, *u*, cf. Eng. 'lower, flour'. — र *r* is a liquid vigorously pronounced. Observe *l* is wanting.

Note. On व़ in *svaēḇya*, see Vocabulary after व *u*.

§ 12. **Aspiration.** 𐬵 *h*, as ordinarily.—𐬶 *ẖ*, a modification of *h* before *y*, possibly stronger.

§ 13. **Ligature.** 𐬷 *hr*, perhaps more vigorous than 𐬸 *hv*, and possibly already shading towards the later Pers. *ẖᵛ*.

Sounds.

SYSTEM OF VOWELS.

§ 14. **General Remark.** The Avesta presents a greater variety than the Sanskrit in its vowel-system, especially through the frequent presence of *e*- and *o*-sounds instead of *a*.

Simple Vowels.

A. Agreement in Quality between Avesta and Sanskrit Vowels.

Av. 𐬀, 𐬁, 𐬂, — 𐬃, 𐬄, 𐬅.

a, i, u, — ā, ī, ū.

i. Agreement in both Quality and Quantity.

§ 15. The Av. vowels *a, ā, i, ī, u, ū*, agree in general with the corresponding vowels in Sanskrit.

(1) Av. *a* = Skt. *a*;—Av. *ā* = Skt. *ā*.

Av. *asti* 'is' = Skt. *ásti*; Av. *mātarō* 'mothers' = Skt. *mātáras*; Av. *vātāiš* 'with winds' = Skt. *vātāis*.

(2) Av. *i* = Skt. *i*;—Av. *ī* = Skt. *ī*.

Av. *cistiš* 'wisdom' = Skt. *cítti*ṣ; Av. *hiṇcaiti* 'he sprinkles' = Skt. *siñcáti*; Av. *jīvyąm* 'living, fresh' (acc. f.) = Skt. *jīvyām*.

(3) Av. *u* = Skt. *u*;—Av. *ū* = Skt. *ū*.

Av. *uta* 'also' = Skt. *utá*; Av. *dāuru* 'wood' = Skt. *dáru*;—Av. *būrōiš* 'of richness' = Skt. *bhūrēs*; Av. *būmīm* 'earth' = Skt. *bhūmim*.

ii. Agreement in quality; difference in quantity.

§ 16. As to the relation between long and short quantity, the Avesta and the Sanskrit do not always coincide with each other. This is probably due in part to shifting of accent, partly to deficiencies or inaccuracy in Avesta writing, partly to dialectic peculiarities.

§ 17. (1) Av. *a* = Skt. *ā*.

GAv. *nanā* 'differently' = Skt. *nánā*; GAv. *mavaitē* 'to one like me' = Skt. *mávatē*; YAv. *ᵒkasaṭ* 'looked' = Skt. *kā́šat*; YAv. *ḫajina* 'dishes' = Skt. *bhājana-*; YAv. *dvarəm* 'door' = Skt. *dvā́ram*; YAv. *urvaranąm* 'of trees' = Skt. *urvárāṇām*.

§ 18. (2) Av. *ā* = Skt. *a*.

Av. *varᵊzānāi* 'for the community' = Skt. *vṛjánāya*; Av. *yatārō* 'which of two' = Skt. *yatarás*; Av. *āθrava* (nom. sg.) 'priest' = Skt. *átharvā*.

Note 1. The manner of writing the same word or form in the Av. itself, sometimes varies between *a* and *ā*. — Av. *hāmō* beside *hamō* 'same' = Skt. *samás*; Av. *ayu-* beside *āyu* 'age' = Skt. *áyu-*; Av. *hutāšṭəm*, *hutašṭəm* 'well-formed' = Skt. *sútaṣṭam*; Av. *yazamaide* 'we worship' beside (rarer) *barāmaide* 'we carry' (Yt. 11.7) = Skt. *yájāmahai*, *bhárāmahai*; Av. *uštanəm* beside *ištanəm* 'vital power'; YAv. *aδwānəm* (but GAv. *aδvānəm*) 'way' = Skt. *ádhvānam*; GAv. *ayār²* beside YAv. *ayar²* 'days'. — Especially does the preposition *ā*, Av. *ā (a)*, vary: Av. *ayazaiti* 'he rides to' = Skt. *ā-vahati*; GAv. *akā-* beside *ākā-* 'judgment'.

Note 2. A part of the differences between *a* and *ā* in Av. and Skt., as well as the variation in the Av. itself, may be explained, as said (§ 16), by vowel-gradation: e. g. Av. *-mna-*, *-mana-*, ptcpl. pres. mid. = Skt. *-māna-*. The treatment of the old vowel-gradation must be sought in the comparative grammar, cf. Brugmann, *Grundriss der vergl. Gram.* § 307. Examples in Avesta are

Lower-grade	Higher-grade
apąm 'of waters'	*āpō* 'waters'
(1) *da-dᵊ-maide* 'we give', (2) *daθra-* 'gift'	*dātar-* 'giver'
haᵘrva-fᵊ-u- 'with full flocks'	*pasu* 'flock, sheep'
(1) *fra-bd-a-* 'fore-foot', (2) *padō* (acc. pl.)	*pāda* (acc. du.)
caθru-gaoša- 'four-eared'	*caθwar-aspa-*, *caθwāro*.

See also under guṇa and vṛddhi § 60.

Note 3. On the relation, Av. *hātąm* 'of beings' = Skt. *satām;* or GAv. *drəgvāitē* 'for the wicked', cf. YAv. *drvataŋ*, see Bartholomae, in *B.B.* x. 278 seq.; *K.Z.* xxix. p. 543 = *Flexionslehre* p. 124.

§ 19. Similarly (§ 18 Note 1) in Av. itself, internal *a* often takes the place of *ā*, when *ca* etc. is suffixed or the word otherwise grows by increment:

(a) Av. *katārō* 'which' but *kataraściŋ;* Av. *dahāka* 'dragon' but *dahākāca;* Av. *āhyō* 'with these' but *aⁱwyasca* (initial *ā*); GAv. *dᵊmānəm* 'house' (acc.) but (gen.) *dᵊmānahyā;* Av. *bipaⁱtištānəm* 'biped' (acc.) but *bipaⁱtištānayō* Yt. 13.41.—(b) Likewise a lightening of *ā* to *a* in ablative *-āŋ* occurs before enclitic *haca:* Av. *yimaŋ haca* 'from Yima'; *apaŋtaraŋ haca naẑmāŋ* 'from northern region'; *huš-hąm.bərᵊtaŋ haca ŋ̊aẑtāŋ* 'from well-collected possessions'.

§ 20. (3) Av. *ī*, *ū* = Skt. *i*, *u*.

Very often, Av. *ī* and *ū* are found where the Skt. has *i*, *u*. The long vowel *ī*, occurs most frequently in the vicinity of *v;* the long vowel *ū*, chiefly when followed by epenthetic *i* § 70.

Av. *šīŋ̊ōiŋ* 'might direct, teach', cf. Skt. *śiṣyāt* (√*śās-*, *śiṣ-*); Av. *vīspəm* 'all' = Skt. *viśvam;* Av. *vītastīm* 'a span length' = Skt. *vitastim.*—Av. *sūnō* 'of a dog' = Skt. *śúnas;* Av. *yūšmaŋ, yūšmākəm* 'from, of you' = Skt. *yuṣmát, yuṣmákam;* Av. *srūtō* 'heard' = Skt. *śrutás;* Av. *ᵊdrūta-* 'run' = Skt. *drutá-;* Av. *stūtō* 'of praise' = Skt. *stutás.*—Av. *āhūirīš* (but gen. *āhurōiš*) 'Ahurian' = Skt. *ásuris;* Av. *āzūᵊtiš* (but gen. *āzutōiš*) 'oblation' = Skt. *áhutiṣ;* Av. *staⁱtiš* 'praise' = Skt. *stutis;* Av. *stūᵊdi* 'praise thou' = Skt. *stuhí;* Av. *yūᵊdyeⁱti* 'he fights' = Skt. *yúdhyati.*

§ 21. (4) Av. *i*, *u* = Skt. *ī*, *ū*.

Sometimes Av. *i* and *u* are found where the Skt. shows *ī*, *ū*.

Av. *iŋ̊yeⁱti* 'he seeks', cf. Skt. *ícchatē;* Av. *aⁱnikəm* 'face' = Skt. *ánīkam;* Av. *išānəm* 'having power' = Skt. *īśānam;* Av. *hunavō* 'sons' = Skt. *sūnávas;* Av. *tanunąm* 'of bodies' = Skt. *tanūnām.*

Note 1. In general as to *i*, *ī* and *u*, *ū*, the MSS. themselves often vacillate between the long and the short in the same passage, or in the same word at different places:—e. g. at times Av. *srīra-* written instead of *srīra-* 'fair'; Av. *mišti* and *mīšti* 'with moisture'; Av. *vispəm* for *vīspəm*

'all'; Av. *miždəm* and *mīždəm* 'reward'.—Av. *dura-* written for *dūra-* 'far'; Av. *drūjō* and *drujō* 'of the Druj'; Av. *yūẖta-* and *yuẖta-* 'yoked'.

§ 22. GAv. shows everywhere an overwhelming preference for long vowels, especially for ¡ *ā*.

GAv. *azəm* 'I', YAv. *azəm* = Skt. *ahám;* GAv. *apəma-* 'last', YAv. *apəma-* = Skt. *apamá-;* GAv. *jəmyāṯ* 'might come', YAv. *jamyāṯ* = Skt. *gamyāt;*—GAv. *-cāṯ, īṯ*, particles, YAv. *-ciṯ, iṯ* = Skt. *cid, -id;* GAv. *dᵊjīṯ-* 'victorious', YAv. *jīṯ-;* GAv. *ratūš* 'chief, Ratu' (nom. sg.) beside *ratuš.*

Note. Similarly, GAv. *-bīš* (pada-ending) compared with YAv. *-biš* or *-bīš*, Skt. *-bhiṣ;* but GAv. *cīš* etc. No rule for lengthening is laid down.

Principal Rules for Quantity of Vowels.

§ 23. (1) In Avesta, original *i* and *u* are regularly lengthened before final *m*.

Av. *paⁱtīm* 'lord' (acc.) = Skt. *pátim;* Av. *dāhīm* 'creation' = Skt. *dhāsím;*—Av. *tāyūm* 'thief' = Skt. *tāyúm;* Av. *pitūm* 'food' = Skt. *pitúm.*

Note. Likewise *i* arising from reduction of *ya*, § 63 is lengthened; but the *u*, arising from reduction of *va*, appears mostly short before *m*:—Av. *maⁱdīm* 'middle' (acc.) = Skt. *mádhyam;* but often Av. *þriγum* beside *þriγūm* (from **þriγ-va-m*) 'third'.

§ 24. (2) Monosyllables ending in a vowel show regularly the long vowel.

Av. *zī* 'for' = Skt. *hí;* Av. *nī* 'down' = Skt. *ní;* Av. *nū* 'now' = Skt. *nú, (nû);* Av. *frā* 'forth' = Skt. *prá.* Zəmā, 3/rg Zəm.

Note. The enclitic *-ca*, as united with the preceding word, does not regularly fall under this law.

§ 25. (3) Polysyllables in YAv. shorten as a rule all final vowels except *ō*.

YAv. *haēna* 'army' (nom. sg. fem.) = Skt. *sḗnā;* YAv. *pita* 'father' = Skt. *pitâ;* YAv. *para* 'before' = Skt. *párā.*—YAv. *āfriti* 'blessing' (instr. f.), cf. Skt. *dhītí* 'with devotion'; YAv. *nāⁱri* 'woman' = Skt. *nárī.*—YAv. *sūre* 'O mighty one' (fem.) = Skt. *śúrē;* YAv.

baraite 'he carries' = Skt. *bháratē*.—YAv. *dahyu* 'two nations', cf. Skt. *dásyū*; YAv. *dva ərᵊzu* 'two fingers' = Skt. *dvá ŕjú*.

Note. Exceptions occur: YAv. *pāyū* 'two protectors' = Skt. *pāyú*; YAv. *maⁱnyū* beside *maⁱnyu* 'two spirits', cf. Skt. *manyú*; YAv. *asrū* 'tears'; etc.

§ 26. (4) In GAv. all final vowels are long without exception.

(a) GAv. *ahurā* 'O Ahura, Lord' = YAv. *ahura*, Skt. *ásura*; GAv. *utā* 'also' = YAv. *uta*, Skt. *utá*; GAv. *kuþrā* 'whither' = YAv. *kuþra*, Skt. *kútra*.—GAv. *ahī* 'thou art' = YAv. *ahi*, Skt. *ási*.—GAv. *yaēšū* 'among whom' = Skt. *yéṣu*.—(b) Even the anaptyctic vowel (§ 72), with trifling exceptions, is lengthened: GAv. *āvhar³* 'they have been' = YAv. *āvhar³*, cf. Skt. *āsúr*; GAv. *vadar³* 'weapon' = YAv. *vadar³*, Skt. *vádhar*; GAv. *aŋtar³* (but also *aŋtar³*) 'within' = YAv. *aŋtar³*, Skt. *antár*.

Note. Before *-cā* 'que' in GAv. a vowel is sometimes found lengthened, sometimes again shortened:—e. g. GAv. *yehyācā* 'and of which'; *vacahīcā* 'and in word';—*aŝicā* 'and Ashi' (fem. *ī*); *vahucā manavhā* beside *vohū manavhā* 'with the Good Mind'.—Similar fluctuations are to be observed in YAv. also.

B. Differences in Quality between Avesta and Sanskrit Vowels.

Av. 𐬀, 𐬁, 𐬆, 𐬇, 𐬉, 𐬊, 𐬋, 𐬌.

ə, ə̄, e, ē, o, ō,—ąⁱ, ąu.

§ 27. The above vowels are found under special conditions as representatives of Skt. *a* and *ā*.

§ 28. **Summary.** The Av. 𐬁 *e* answers oftenest to Skt. *a* before *n* or *m*, also occasionally before *v*. It is commonly the anaptyctic vowel.—The corresponding long is 𐬂 *ə̄* very frequent in GAv., more rare in YAv.—The

letter 𐬉 *e* is commonly a shading from *a* after *y*.—The corresponding long is 𐬊 *ē*.—Avesta 𐬋 *o* and 𐬌 *ō* stand sometimes for *a* under influence of a labial, *u*, *v*.—Av. 𐬍 *ā̊* is either Skt. *ās*, or it answers to Skt. *ā* before *n* plus stop-sound.—Av. 𐬎 *ą* is nasalization of *a*, *ā* before *m*, *n*; it often answers to Skt. *a* with anusvāra.

Av. 𐬀 *ə*.

§ 29. Av. *ə* often corresponds to Skt. *a* before *n* or *m*—regularly so before the latter when final; occasionally also before *v*.

Av. *viṇdən* 'they found' = Skt. *ávindan*; Av. *hąṇtəm* 'being' = Skt. *sántam*; Av. *upəmən* (beside *upamən*) 'highest' = Skt. *upamám*;—GAv. *evistī* 'by ignorance', cf. Skt. *ávittī*; Av. *maiŋyəvīm* 'spiritual' beside Av. *maiŋyavō*; Av. *səvišta-* 'most mighty, beneficent' (beside *savō*) = Skt. *śáviṣṭha-*; Av. *hvaŋhəvīm* 'blessed life' Ys. 53.1 (acc. from *hvaŋhavya-*).

Note. The MSS. sometimes vary between *ə* and *a*: e. g. Av. *baraṇtō* beside *bərəṇtō* 'carrying'; *jasaṇtu* beside *jasəṇtu* 'let them come'; *vazaṇti* beside *vazəṇti* 'they drive'; etc.

§ 30. The *ə* (§ 29) arising from *a* before *m* or *n*, is often palatalized to *i* when either *y*, *c*, *j* or *š*, immediately precedes.

Av. *yim* 'whom' = Skt. *yám*; Av. *vācim* 'voice' beside *vācəm* = Skt. *vâcam*; Av. *drujim* beside *drujəm* 'Deceit, Fiend' = Skt. *drúham*; Av. *būjim* beside *būjəm* 'absolution'; Av. *bajina* 'dishes' = Skt. *bhājana-*; Av. *draŋžimnō* 'holding' beside Av. *draŋžəmnō*.

§ 31. In GAv., *ə* appears sometimes to be written (as a kind of dissimilation) for *u* or *i*, when in the following syllable an *u* (*v*) or *i* stands. The epenthetic vowel is written beside it, according to rule § 70. Thus is to

be explained GAv. *drəgvaŋt-* 'wicked' (= **drugvaŋt-* to Av. *druj-*); GAv. *bəzvaŋt-* 'advantageous' (= **buzvaŋt-* to Skt. √*bhuj-*); GAv. *uš²uru-* 'zeal' (?) see Ys. 34.7, cf. *ušuruyē* Ys. 32.16; GAv. *huš²iti-* 'well-being'; GAv. *ānə²iti-* Ys. 30.11; GAv. *āskə²iti-* Ys. 44.17.

Note. This interchange of *ə* with *u* and *i* may be added as a further suggestion in regard to the intermediate character of Av. ɨ *ə*, before suggested.

Av. ɨ *ā*.

§ 32. Av. *ā* is the corresponding long vowel to *ə*; it is especially common in GAv.—answering to YAv. *ə*, *a* and sometimes to YAv. *ō*, *ą*.

GAv. *azām* 'I' = YAv. *azəm*, Skt. *ahám*; GAv. *yām* 'whom' (beside GAv. *yim*) = YAv. *yim*, Skt. *yám*; GAv. *āmavaŋtəm* 'strong' = YAv. *amavaŋtəm*, Skt. *ámavantam*; GAv. *āhmā* 'of us' Ys. 43.10 beside YAv. *ahmā*, cf. Skt. *asmákam*;—GAv. *yā* 'who' = YAv. *yō*, Skt. *yás*; GAv. *nā* 'us' = YAv. *nō*, Skt. *nas*.—Sometimes, GAv. *starām* 'of stars' = YAv. *straṃ*; GAv. *hām* 'with, together' = YAv. *haṃ*, Skt. *sám*.—Also GAv. *hvar²* 'sun' = YAv. *hvar²*, Skt. *svàr*; GAv. *vadar²* 'weapon' = YAv. *vadar²*, Skt. *vádhar*.

Note. On GYAv. *ā* in *amaṣā spəṇtā*, and GAv. *āŋg* (final), *āŋgh* (internal) from original *ans*, see §§ 128, 129.

§ 33. In YAv., *ā* (not common) is used apparently often without fixed rule, perhaps being borrowed from GAv.; it occurs most often for *an*, *ah* before *b*, also for *ā*.

YGAv. *spāništa-* 'holiest'; YGAv. *amaṣā spəṇtā* 'Immortal Holy Ones'; YAv. *yazatā* beside *yazata* 'divinities'; YAv. *draomābyō* 'from assaults'; YAv. *avābiš* 'with helps'; YAv. *raocābyō* 'to light'; YAv. *haēnābyō* (l) abl. 'from enemies' Yt. 10.93;—as contraction YAv. *frār²naoṭ* (i. e. *fra-ər²naoṭ*) 'he offered'.

Av. 𐬎 *e*.

§ 34. Av. *e* generally answers to Skt. *a*, *ā*, after *y*, if *i*, *ī*, *e*, *ē* or *y* follows in the next syllable.

YAv. *raocayeiti* 'lights up' = Skt. *rōcáyati*; GAv. *ḫšayehī* 'thou rulest' = Skt. *kṣáyasi*;—YAv. *ayeni*, GAv. *ayenī* 'I shall go' = Skt. *áyāni*;—YAv. *yesne*, GAv. *yesnē* 'in worship' = Skt. *yajñé*;—YAv. *yeŋhā* 'of whom' (f.) = Skt. *yásyās*; GAv. *yeŋhyā* 'of whom' (m.) = Skt. *yásya*.

Note. Observe, however, that *y* does not always thus change *a* to *e*: e. g. *māzdayasniš* 'Mazdayasnian'; *yave* 'for ever'; *yahmi*, *yahmī*, *yahmya* 'in which'. Sometimes the MSS. vary.

§ 35. YAv. *e* answers to Skt. *ē* only when final. See §§ 54α, 25.

YAv. *avavhe* 'for help' = Skt. *ávasē*; YAv. *yasaite* 'he worships' = Skt. *yájatē*.

Note 1. On Av. *e* for *ya* in reductions, see § 67.

Note 2. In the MSS. final *e* often interchanges with *i*.

Av. 𐬏 *ē*.

§ 36. Av. *ē*, the corresponding long to *e*, stands:—(1) in the combination Av. *aē* = Skt. *ē*; (2) at the end of monosyllables § 24; (3) everywhere when final in GAv. § 26.

(1) GYAv. *daēva-* 'demon'.—(2) GYAv. *mē* 'me', *hē* 'him'.—(3) GAv. *yasaitē* 'he worships' (opp. to YAv. *yasaite*); GAv. *ārmaitē* 'O Armaiti' (opp. to YAv. *sūre* 'O mighty one' fem.).

Note. See Geldner, in *K.Z.* xxvii. p. 259.

Av. 𐬐 *o*.

§ 37. Av. *o* occurs chiefly in the combination Av. *ao* = Skt. *ō*, see § 57.

§ 38. Av. *o* rarely corresponds to Skt. *a* when followed by *u*. Labialization.

Av. *vohu* 'good' = Skt. *vásu;* Av. *moŋu* 'quickly' = Skt. *makṣú;* Av. *vohunąm* 'of good things' = Skt. *vásūnām.*

Av. ↢ *ō.*

§ 39. Av. *ō* often corresponds to Skt. *a, ā* when followed by a labial vowel *u, ū, ō;* rarely before *r* plus consonant.

Av. *dāmōhu* (beside *dāmahva*) 'among creatures' = Skt. *dhâmasu;* GAv. *gūšōdūm* 'may ye hear', beside GAv. *gūšahvā* 'hear thou'; GAv. *vərᵊzyōtū* 'let him do', beside Av. *vərᵊzyaŋtō.*—Av. *astō.vīδōtuš* 'Bone-divider', beside *vīδātaoţ* = Skt. *-dhātus.*—GAv. *baḷšōhvā* 'share thou' = Skt. *bhákṣasva;* Av. *aojōvhvaŋtəm,* beside *aojavhvaŋtəm* 'mighty' = Skt. *ójasvantam;* Av. *ḷšapōhva* 'in nights, at night' = Skt. **kṣápasu;* so locatives Av. *yavōhva* 'in granaries' variant *yavahva; gurᵊmōhva* 'jaws', *karᵊšvōhu* 'regions', *ravōhu* 'freedom' (*an*-stems).—GAv. *uzᵊmōhī* 'we may respect', influence of labial *m.*—YAv. *þwōrᵊštāra* (dual) 'deciders', beside YAv. *þwarštahe;* GAv. *cōrᵊţ* 'he made' = Skt. *ákar* (for *ákart*); GAv. *frōrᵊti-,* beside YAv. *frārᵊti-* 'forth-coming'.

Note. Observe GAv. *vītōyātā* 'let him make known' = Skt. *vītáyatu;* GAv. *aḫtōyōi* 'for sickness' (for *-ayāi*),—the first *ō* being due to the influence of the following *ō.*

§ 40. On Av. *ō* = Skt. *as,* see § 120.

§ 41. On Av. *ō* in compounds, see under Composition.

§ 42. Av. *ō* (final) sometimes answers to Skt. *āu*

Av. *garō* 'on a mountain' = Skt. *girāú;* Av. *dva yaska acištō* 'the two worst sicknesses'.

Av. ⌐ *ō.*

Av. *ō* = Skt. *ās.*

§ 43. (1) On Av. *ō* answering to Skt. *ās,* see § 121 seq.

Av. *masāṇtəm* 'great' = Skt. *mahántam*; Av. *pāṇtō* 'guarding', pres. ptcpl. nom. pl. = Skt. *pántas*.

Note. Similarly, Av. *vīrō.nyāṇcim* 'striking men down' = Skt. *nyáñcam*.

Av. *ę* *ą*.

§ 45. (1) Av. *ą* presents a nasalization of *a*, *ā* before Av. *m* or *n*.

Av. *hąm* 'with, together' = Skt. *sám*; Av. *mąm* 'me' = Skt. *mám*;—Av. *ayąn* 'they may go' = Skt. *áyan*; Av. *daēvąn* 'demons' = Skt. *dēvấn*; Av. *urvąnō* 'souls' beside Av. *urvānəm* (acc. sg.).

Note 1. In the MSS., *ā* often stands as variant beside *ą*: e. g. Av. *dąmi*, *dāmi* 'creature', et al.

Note 2. Defective writing:—instances often occur in endings where the final nasal after *ą* is omitted:—e. g. *imą haomą* 'these haoma-offerings' = Skt. *imấn sómān*; Av. *yą* 'quos' = Skt. *yấn*.

Note 3. Pleonastic writing:—a pleonastic *n* is sometimes introduced after *ą* before *m*: e. g. *dąnmahi* 'we shall give' Ys. 68.1 (variant) cf. Skt. *dáma*; Av. *hvąnmahī* variant *hvąmahī* 'we put foward'; Av. *fryąnmahī* variant *fryąmahī* 'we bless'.

§ 47. The Skt. *ṛ* is represented in Av. by *ərᵊ* or often *arᵊ*.

Av. *ker³naoiti* 'he makes' = Skt. *kṛṇóti*; Av. *mər³-θyuš* 'death' = Skt. *mṛtyús*; Av. *hakər³ṭ* 'at once' = Skt. *sakṛ́t*.—Av. *anar³tāiš* 'with the untrue' = Skt. *ánṛtāis*; Av. *var³šəm* 'wood' = Skt. *vṛkṣám*; Av. *aršti̊š* 'spear' = Skt. *ṛṣṭís*.

Note. The MSS. vary, often writing *ar³* for *ər³*. The new edition of the Avesta has restored many instances of *ər³*: e. g. *frastər³ta-* (where Westergaard *frastar³ta-*).

§ 48. Av. *ar, ər* (also *ar³, ər³, aⁱr, aᵘr*) often = (orig. *ṛ*) Skt. *ir, ur*;—sometimes = (orig. *ṝ*) Skt. *īr, ūr*. See Brugmann, *Grundriss der vergl. Gram.* I. § 288 seq., 306 seq.

Skt. *ṛtú-*.

§ 49. Av. *ərq* may represent original *ṛ* + *n*.

Concurrence of vowels.

Contraction and Resolution.

§ 50. **General Remark.** In Avesta, the rule for the union of two vowels within a word or in composition, corresponds in general to the Sanskrit. (1) Two similar vowels coalesce into their corresponding long (sometimes short). (2) Two dissimilar vowels, when the first is *a* unite in giving guṇa § 60. (3) Before dissimilar vowels, the *i*- or *u*-vowel (simple or in diphthongs), passes over into the corresponding semi-vowel. (4) In Avesta compounds, however, hiatus is often allowed to remain.

§ 51. The following are instances of contraction of similar vowels.

Av. *a, ā* + *a, ā* = *ā:* Av. *parāzəṇti* 'they drive away' = *para* + *azᵊ;*
i, ī + *i; ī* = *ī:* Av. *nīre* 'I let go down' = *ni* + *īre;*
u, ū + *u, ū* = *ū:* Av. *hūḫtāiš* 'by good words' *(hu* + *uᵊ)* = Skt. *sūktāiḥ;*
a + *q* = *q:* Av. *nqmyqsuš* 'with pliant branches' = *nqmya qsuš* § 46.

Note 1. Instead of the long vowel in contractions, the short vowel is often written: e. g. Av. *frapayemi* 'I shall attain to' *(= fra* + *apᵊ);* Av. *paitiiəm* 'atoned' *(= paiti* + *iᵊ);* Av. *anuḫtée* 'speak after' *(= anu* + *uḫti-).*

Note 2. Hiatus sometimes remains in compounds: Av. *ava-aŋhaoiti* 'he attains'; GAv. *ciprā-avaoəhəm* Ys. 34.4, beside YAv. *ciprāvaoəhqm* Ny. 3.10 'manifestly aiding'; Av. *ḫṛviwi-iṣuš* 'having darting arrows'.

Note 3. Metrically, contractions of like vowels are often to be resolved in reading. See Geldner, *Metrik*, p. 13 seq.

§ 52. Av. *i-* and *u*-vowels, simple or in diphthongs, before dissimilar vowels, pass over into *y* or *v*.

(a) Av. *vyānō* 'pursued' (√*vī-*) = Skt. *vyānáḥ;* Av. *ḫṛayehi* 'thou rulest' (√*ḫṛi-*); Av. *vīdāyūm* 'anti-demoniac' (*daēva-*, on *āi* = *aē* § 56); *uityaojanō* 'thus speaking' beside *uiti aojanō; paityāpəm* 'up stream' *(paiti* + *āpᵊ);* *nmānaya* (loc. *ᵊaē* + *a* postpos.) 'in a house' beside *nmāne.* — (b) *tanvō* 'of body' *(tanu-as);* *hāvana* 'haoma-mortars' *(√hu);* *hvaspəm* 'well-horsed' *(hu* + *aspəm);* *anaŋraēẓva* 'among the infinite' (loc. *-ẓu* + *a*). — (c) With lengthening after the semi-vowel: Av. *aiwyāmanqm* 'of the over-mighty' *(aiwi* + *amᵊ);* *aiwyāvaoha* 'with protection' *(avaoh-);* *aiṗyāḫḍa* 'interrupted in speaking mispronounced' *(uḫḍa-).*

Note 1. In compounds the hiatus often remains: e. g. Av. *tiži-arštīm* 'sharp-speared'; Av. *āsu-aspəm* 'swift horsed' = Skt. *āśváśvam.*

Note 2. Metrically, the resulting semi-vowel *y, v* is often to be restored as vowel or read *iy, uv.*

Diphthongs.

§ 53. **General Remark.** The Avesta vowel-combinations (diphthongs with triphthongs) are of four-fold origin, and may conveniently be divided and designated as follows:

i. Proper diphthongs, corresponding to Sanskrit *guṇa* (more rarely *vṛddhi*) in its two-fold sense: (1) vowel-

strengthening, (2) the result of contraction of two dissimilar vowels. See § 60 seq.

ii. Reduction-diphthongs, resulting from reduction by contraction of two syllables. See § 64 seq. Metrically often dissyllabic.

iii. Improper diphthongs (and triphthongs) arising from epenthesis. See § 70 seq.

iv. Protraction-diphthong *āa,* a peculiar extension of *a* or *ā* into *āa* in ablative singular before *-ca* 'que'; likewise in *āaṭ* 'then' (abl. as adv.), GAv. *bāaṭ* 'verily' Ys. 35.5. Cf. Av. *daēvāaṭca* 'and from the Demon' *(daēva-)*; *apāaṭca* beside *apaṭ* 'from water', etc.

Proper Diphthongs.

Av. 𐬀𐬌, 𐬀𐬍—𐬀𐬎, 𐬀 — 𐬀𐬎, 𐬀𐬍

aē, ōi — ao, ǝu — āi, āu.

§ 54. The above are real diphthongs when they correspond to the Skt. diphthongs. The relation between the Av. and the Skt. diphthongs is concisely this:

α. Skt. *ē* is represented in Av.
(1) chiefly by *aē,* (2) less often by *ōi,* (3) again by *ē,* only when final, but there regularly.

β. Skt. *ō* is represented in Av.
(1) chiefly by *ao,* (2) more rarely by *ǝu,* (3) again by *ō,* only when final, but there regularly.

γ. Skt. *āi* and *āu* are represented in Av. by *āi* and *āu.*

Note. In some instances Skt. *āu* (final) seems to be represented in Av. by *ō,* § 42.

Av. *aē* = Skt. *ē.*

§ 55. The diphthong Av. *aē* (very common) answers to Skt. *ē* (old *ai*), initial or internal; likewise as ending in first member of a compound, or again before enclitic *-ca* 'que'

Av. *aētaṭ* 'this' = Skt. *ētát;* GAv. *vaēdā*, YAv. *vaēda* 'knows' = Skt. *vêda.*—Av. *fraēšyeiti* 'he drives forth' *(fra* + *iš-)* = Skt. *prêṣyati.*—Av. *dūraēdars* 'far-seeing' (loc. *dūire*) = Skt. *dūrē.dṛś-;* Av. *raþaēštārəm* 'warrior in chariot' = Skt. *rathēṣṭhâm* (loc. *ráthē*).

Note 1. Observe that in gen. *aṣaheca* 'and of righteousness', the *e* is reduction-vowel (= *ya*), therefore of course no *aē* appears.

Note 2. On reduction-diphthong *aē*, see § 64.

Av. *ōi* = Skt. *ē*.

§ 56. Av. *ōi*, as real diphthong, also answers to Skt. *ē* (old *ai*). It interchanges often with Av. *aē*, being of like etymological value; but *ōi* occurs perhaps oftenest in monosyllables and in declensional endings generally. It is especially frequent in GAv.

GAv. *vōistā* 'thou knowest' = Skt. *vêttha;* YAv. *sōire* 'they lie' = Skt. *śêrē;* Av. *hṣōiþni* (fem.) 'shining, princely', beside Av. *hṣaētō* (masc.); Av. *maiδyōi.paitištāna-* 'to middle (loc.) of foot', beside Av. *dūraē.srūta-* 'far (loc.) renowned'.—GYAv. *yōi* 'who' (beside *yaē-ca*) = Skt. *yê;* GYAv. *kōi* 'who' (interrog.) = Skt. *kê.*—YAv. *aēōiš* 'of Dragon' = Skt. *áhēs;* GAv. *būrōiš* 'of richness' = Skt. *bhûrēs;* GYAv. *barōiṭ* 'he might carry' = Skt. *bhárēt;* Av. *pairi.vaēnōiþe* 'they two are seen' = Skt. *vênēthē.*—GAv. *gavōi* 'for the cow', YAv. *gave* = Skt. *gávē;* GAv. *zastōibyā* 'with both hands' = YAv. *zastaēibya;* GAv. *hṣaþrōi* 'in the kingdom', YAv. *hṣaþre* = Skt. *kṣatrê.*

Av. *ao* = Skt. *ō*.

§ 57. Av. *ao* as real diphthong answers to Skt. *ō* (old *au*), initial and internal.

Av. *aojō* 'strength' = Skt. *ójas;* Av. *raoδəṇti* 'they grow' = Skt. *rṓhanti;* Av. *tāyaoš* 'of a thief' = Skt.

tāyôs. — Av. *fraoḫtō* 'pronounced' (*fra* + *uc*) = Skt. *prōktás.*

Note. On reduction-diphthong *ao*, see § 64.

Av. *ōu* = Skt. *ō.*

§ 58. The diphthong Av. *ōu* (as strengthening of *u*), also sometimes answers to Skt. *ō*, internal. It occurs in the genitive of *u*-stems, and in a very few words. Observe the pair *ōu* and *ao* as *ōi* and *aē.*

Av. *ḫratōuš* 'of wisdom' = Skt. *krátōs;* Av. *vaŋhōuš* 'of the good' = Skt. *vásōs;* Av. *mainyōuš* 'of spirit' = Skt. *manyôs.*—Also in *dōuš.sravō* 'things of ill-repute', cf. *haosravaŋha; dōuš.manaŋya-* 'evil-minded', cf. *haomanaŋha-;* GAv. *gōušāiš* 'with ears' = Skt. *ghôṣāis.*

Av. *āi* = Skt. *āi;*—Av. *āu* = Skt. *āu.*

§ 59. Av. *āi, āu* when they are real diphthongs (i. e. not epenthetic or reduction) correspond to Skt. *āi, āu.*

Av. *mąθrāiš* 'with words' = Skt. *mántrāis;* Av. *gāuš* (nom.) 'cow' = Skt. *gāús.*

i. Vowel-Strengthening — *a*-Vowel Contraction.

§ 60. **Guṇa and Vṛddhi.** The terms *guṇa* and *vṛddhi* are conveniently borrowed from the Sanskrit Grammar for the Avesta. In Avesta, as in Sanskrit, guṇa- and vṛddhi-vowels in the fullest sense have a double origin: (1) vowel-strengthening in vowel-gradation;[1] (2) contraction of two dissimilar vowels whether in composition or in inflection.

[1] Brugmann, *Grundriss der vergl. Gram.* § 307 seq.

Guṇa in Avesta, owing to the greater richness in the vowel system, has a greater variety than in Sanskrit.—The vṛddhi-increment, however, is comparatively rare, and is not so regularly carried out as in Sanskrit; nor are the instances always certain (cf. § 18 Note 1); but vṛddhi is not to be denied to the Avesta.

Synopsis of Guṇa and Vṛddhi modelled after the Sanskrit.

Strengthening:

From Av. *vərəθraγna-* 'victory', *vārəθraγni-* 'victorious'; so Av. *kərənəm* 'I cut', *kərətəm* 'knife' (acc.), *karanəm* 'limit, dividing line' (acc.), *kārayeiti* 'he cuts'. But see § 47 Note.

Note. (a) The Avesta sometimes has guṇa where the Skt. has a long vowel: Av. *staorəm* 'bullock' = Skt. *sthūrám;* Av. *gaozaiti* 'he hides' = Skt. *gūhati.* — (b) Conversely, the Av. sometimes has a long vowel where the Skt. shows guṇa: Av. *yāŋtar-* 'yoker' = Skt. *yóktár-;* GAv. *urūpayeiŋtī* 'they cause pain' = Skt. *rópayanti;* GAv. *urūdōyatā* 'he made lament' = Skt. *ródāyata.* — (c) The Av. has sporadically guṇa where the Skt. has vṛddhi: Av. *haomanaŋhəm* 'well-minded' = Skt. *sāumanasám;* Av. *ϑyaoϑna-* 'deed' = Skt. *cyāutná-;* Av. *haēnyō* 'belonging to the army' = Skt. *sāinyás.* — (d) Sporadically, Av. vṛddhi, where Skt. guṇa: Av. *gāvyaŋqm* beside *gaoya-* 'belonging to the cow' (§ 18) = Skt. *gavyá-.* — (e) Observe Av. *dāuš.sravah-* 'ill-famed'; *dāuš.manaŋha-* 'evil-minded' opp. to Skt. *duḥṣa-*.

ii. Changes in *y*- or *v*-Syllables.

§ 61. General Remark. The syllables containing internal „ *y* and „ *v* often suffer reduction and abbrevia-

tion. This is partly old and due to the vowel character of *y (i̯)* and *v (u̯)*; in part it is young and is to be explained from the character of the writing—the close graphic resemblance of » *i* to » *y (ii)* and » *u* to » *v (uu)* often producing awkward accumulations of signs which are avoided.

(a) Vocalization of *y* and *v*.

§ 62. In the combinations original internal *vy, vn, vr, yv,* the first element is generally vocalized to *u, i*. When *a* immediately precedes this *u,* the two are contracted according to § 60 into *aȯ*. For *ao* an *āu* is frequently found in GAv.

(1) Orig. *vy* = Av. *uy*;—*yv* = Av. *iv*.

Av. *vavhuyā̊* 'of the good' (fem.) = Skt. *vásvyās;* GAv. *pᵒʳuyō* 'first' = Skt. *pūrvyás;* Av. *marəšuyā̊* 'of the belly' (stem *marəšvī-*); Av. *snāuya-* 'made of sinew', cf. Skt. *snā́van-*.—Av. *maⁱnivā̊* 'of the two Spirits' (for *maⁱnyvā̊* § 68, b).

(2) Orig. *avy* = Av. *aoi*;—*avn* = Av. *aon (āun)*;—*avr* = Av. *aor*.

Av. *haoyąm* 'the left' = Skt. *savyā́m;* Av. *gaoyaoitīš* 'cow-pastures' = Skt. *gávyūtīs*.—Av. *vaonarᵊ* 'they have won', cf. Skt. *vavnḗ;* Av. *raonąm* 'of valleys' *(ravan-);* Av. *aŝaonō* 'of the righteous' *(aŝavan-)*, cf. Skt. *maghónas*.—GAv. *vāunuš* 'having striven', ptcpl. pf. √*van-;* GAv. *aŝāunē* 'to the righteous' = Skt. *ṛtā́vnē* (cf. Note 1); Av. *aβaᵘrun-* wk. stem of *āβravan-* 'priest' = Skt. *átharvan-*.—Av. *fraoⁱrisaiti* 'he comes forward' (for orig. *fra-vris-aⁱti*), cf. *fraoᵘrvaēsayeni;* Av. *fraorᵊnta* 'they confessed', cf. Skt. *ávṛṇīta;* Av. *fraorᵊt* (i. e. **pravṛt*) 'prone, ready'.

Note 1. Often in YAv., *aŋ̊āun-* is found in the formulaic connection *aŋ̊āunąm fravaŋ̊ayō*. The original difference is to be explained thus: *āu* = orig. *āv*, and *ao* = orig. *av*; cf. Av. *aŋ̊āvan* = Skt. *ṛtávan-*.

Note 2. In YAv., *paoiryō* is written for GAv. *poᵘruyō* 'first' above.

Note 3. A like vocalization of Av. *v* = Av. *w* (orig. *bh*) § 87 may take place:—e. g. Av. *vāiǰnāuyō* (for *ᵒnāvyō, ᵒwyō, ᵒbyō*) 'from plagues'; Av. *adaoyō* (for *adawyō*) 'undeceived' = Skt. *ádābhyas*; Av. *nuruyō aŋ̊avaoyō* (for *ᵒvyō, ᵒwyō, ᵒbyō*) 'to righteous men' Yt. 10.55; Av. *rasmaoyō* (for *ᵒvyō, ᵒwyō, ᵒbyō*) 'to the ranks'. Perhaps Av. *aoi*, beside *avi* (for Av. *aiwi*) = Skt. *abhí*.

(b) Reduction and Abbreviation.

a. Reductions.

§ 63. The syllables *ya* and *va* before *m* or *n*, especially when final, are generally reduced to *i* (*ī*), or *u* (*ū*) respectively—a kind of samprasāraṇa.

Old *ya* = Av. *i* (*ī*); *va* = Av. *u* (*ū*)—before *m*, *n*.

Av. *zaranim* 'golden' (acc.) = Skt. *híraṇ-ya-m*; Av. *uhŝin* 'they increased' (for **uhŝ-ya-n*); Av. *maⁱnimna* 'thinking' (fem.) = Skt. *mán-ya-mānā*; Av. *paⁱθimnō* 'possessing' = Skt. *pát-ya-mānas*; Av. *ⁱriθiŋti* 'they die' (for *ⁱriθ-ya-ŋti*).—GAv. *asrūδūm* 'ye were heard of' Ys. 32.3 = Skt. *áśrōḍh-va-m*; Av. *daēūm* 'demon' = Skt. *dē-vá-m*; Av. *θrišum* 'third' (for *θriš-va-m*); Av. *mōᵘrum* 'Merv' (for **mar-va-m*);—Av. *təmaŋhuŋtəm* 'dark' = Skt. *támasvant-*; Av. *hvarᵊnaŋhuŋtəm* 'glorious' beside *hvarᵊnaŋuhaŋtᵊ* for *hvarᵊnaŋh-va-ŋtəm*.

Note 1. In the acc. sg. of *-va*-stems, *ūm* instead of *ām* is mostly written.

Note 2. Av. *-aēva-* commonly becomes *-ōyu-* before *m* (cf. §§ 60, 52 a): Av. *vīdōyūm* 'anti-demoniac' acc. to *vīdaēva-* (but also Av. *daēūm*); Av. *harōyūm* 'Haraeva', cf. Anc. Pers. *haraiva-*; Av. *hōyūm* 'scaevum', if stem *haēva-*.

Note 3. Instead of *i* (= *ya*), an *ə* appears in Av. *maδəma-* 'midmost' = Skt. *madh-ya-má-*.

§ 64. On the same principle as § 63, the syllables *aya* and *ava*, reduced before *m* or *n*, give rise to diphthongs, *aē* and *ao* (*āu* §§ 62, 195).

Old *aya* = Av. *aē*; *ava* = Av. *ao* (also *āu* § 195)—before *m*, *n*.

Av. *aēm* 'this' (nom.) = Skt. *ayám*; Av. *vīdāraēm* 'I upheld' = Skt. *-dhārayam*; Av. *cikaēn* 'they atoned' (i. e. **cikayan*) cf. Av. *cikayaṭ*.—Av. *yaom* 'grain' = Skt. *yávam*; Av. *maⁱnyaom* 'spiritual', acc. to *maⁱnyava-*; Av. *mraom* 'I spake' = Skt. *ábravam*.—Av. *nāumō* also *naomō* 'ninth' = Skt. *navamás*; Av. *kərᵊnāun* (var. *kərᵊnaon*) 'they made' = Skt. *kṛṇávan*; Av. *bāun* also *baon* 'they were' = Skt. *ábhavan*.

Note. Similarly, Av. *raēš-ca* Ys. 68.11 cf. instr. *raya* 'splendor'.

§ 65. The syllables internal *āya*, *āva* likewise reduced § 64, give rise to the diphthongs *āi*, *āu*.

Orig. *āya*, *āva* = Av. *āi*, *āu*—before *m*, *n*.

Av. *dasa.gāim* 'space of ten steps' = Skt. **gāyam*; Av. *avāin* 'they came down' = Skt. *avâyan*; Av. *nasāum* 'corpse' (i. e. *nasāvam*).

Note. Metrically the reduced syllables *aēm*, *aom*, *āum*, *aēn*, *āin* (§§ 63, 64) are dissyllabic.

§ 66. Final *aye* is reduced to Av. *āe*,—metrically dissyllabic.

Av. *apa.gatāe* 'for going away' = Skt. *gátayē*; Av. *paⁱtištātāe* (beside *paⁱtištātayaē-ca*) 'to withstand' = Skt. *sthitayē*; Av. *ārmatāe* 'to Piety'; Av. *saŋtu.patāe* 'for the lord of a town'.

§ 67. Final *ya* in polysyllables appears in YAv. as *e* (GAv. shows *yā*).

YAv. *kahe* 'of which' (GAv. *kahyā*) = Skt. *kásya*; YAv. *gayehe* 'of life' (GAv. *gayehyā*) = Skt. *gáyasya*; YAv. *aṣahe* 'of Righteousness' (GAv. *aṣahyā*) = Skt. *ṛtásya*; YAv. *aⁱre* (for *aⁱrya*, nom. pl.) 'the Aryans'; YAv. *franrase* (for **sya*, nom. sg.) 'Franraṣyan' cf. acc. **syānəm*; YAv. *maⁱre* (for **rya*, nom. sg. fem.)

'deadly', cf. gen. *mairyayō*; ¥Av. *bāzuwe* 'with both arms' (§ 85 a, end), beside YAv. *bāzubya*.

Note. Isolated is internal *ε (= ya)* in *vahchīš* 'better' (fem. pl.) cf. § 137 = Skt. *vásyasīs*.

β. Abbreviated Writing.

Av. „ *y* (*i̯*) = *iy*; „ *v* (*u̯*) = *uv*.

§ 68. To avoid awkward combinations of letters, the original syllables *iy* (graphically Av. ‟‟ *iii*) and *uv* (graph. Av. ‟‟ *uuu*) are respectively abbreviated in writing „ *y* (graph. *ii*) and „ *v* (graph. *uu*). See § 61. Metrically, to such *y* or *v* the syllabic value *iy* or *uv* is generally to be restored.

(a) Av. „ for ‟‟.

(1) In composition:—Av. *paityaŋtu* 'let them come to' = Skt. *prátiyantu*; Av. *þryaþštīš* 'three twigs' (for *þri-yaþštīš*) cf. *paŋca-yaþštīš*.—(2) Internal:—Av. *fryō* 'friend' (graphically *friiō* for *friiiō*) = Skt. *priyás*; Av. *yasnyō* 'worshipful' = Skt. *yajñíyas*.—(3) Initial:—Av. *yeyąn* (written *iieiiąn* for orig. **iyáyān*); GAv. *yadacā* 'and here' Ys. 35.2 (written *iiadā* for Av. *iiiadā*).

(b) Av. „ for ‟.

(1) In composition:—Av. *hvacavhəm* 'having good words' = Skt. *suvácasam*; Av. *hviδātō* 'well-built (houses)' Yt. 17.8 (i. e. *hu-viδāta-* cf. Ys. 57.21); Av. *vohvarᵊɛ-* 'doing good' (i. e. *vohu* + *vᵉ*).—(2) Internal:—Av. *yvānəm* 'juvenem' = Skt. *yúvānam*; Av. *drvahe* 'firm' (gen.) = Skt. *dhruvásya*;—Av. *hva-* 'suus' (metrically *huva-*) cf. Skt. *svà-*. See Geldner, *Metrik*, p. 20 seq.

Note 1. Similarly when *v* („) stands for *w* (= *bh*) § 87: Av. ‟‟‟‟ *uuaēibya* for *uuuaēibya* for *uwaēibya* cf. GAv. *ubāibyā* 'with both' = Skt. *ubhábhyām*.

Note 2. Instances of Av. *v* („) equal Skt. *īv*, *iv* may be found: Av. *jvaṇti* 'they live' = Skt. *jívanti*; Av. *cvaŋ* 'quantum' = Skt. *kíyat*; Av. *vīdiδvō*

'looking around' (√*dī*) = Skt. *dīdīvâṅs;* perhaps Av. *jaγnvō* 'having smitten' cf. Skt. *jaghnivâṅs.*

Note 3. Internal *ay, av* are sometimes found written as an extension of *y, v* (i. e. *iy, uv*): Av. *nāvaya-* 'navigable, flowing' = Skt. *nāvyà;* Av. *aspaya-* (cf. acc. *aspaēm* § 64) 'belonging to a horse' = Skt. *áśvya-;* Av. *hava-* (cf. gen. f. *haoyō*) 'suus' = Skt. *svà-;* Av. *kava* variant for *kva* 'where' = Skt. *kvà.*

iii. Epenthesis, Prothesis, and Anaptyxis.

Cf. Brugmann, *Grundriss der vergl. Grammatik* § 637 seq.; § 623 seq.

§ 69. Two of these viz. Epenthesis, Prothesis (and certain cases of Anaptyxis like *s^{u}runvata*)—may be considered fundamentally the same, as each consists in the introduction of an anticipatory parasitic sound. For convenience, however, in the following, Epenthesis and Prothesis will be distinguished thus: (1) Epenthesis—an anticipatory vowel attached internally to a vowel; (2) Prothesis—an anticipatory vowel attached initially before a consonant.

§ 70. Epenthesis is one of the characteristic sound-phenomena of the Avesta. It consists in the insertion of a light anticipatory *i* or *u*, when in the following syllable respectively an *i, ī, e, ē, y,* or an *u, v* stands.—Epenthesis of *i* takes place before *r, n, ŋt, t, þ, þr, d, þ, b, w,* also before *ŋh* (= orig. *sy*).—Epenthesis of *u* takes place only before *r*.

Note. The epenthetic vowel attaches itself parasitically to diphthongs as well as to the simple vowels including *a*-privative. In the MSS., the law of epenthesis is not always consistently carried out; many times it is omitted: e. g. *manyəuš* beside *maⁱnyəuš* 'of the Spirit'.

Epenthetic *i*.

Av. *bavaⁱti* 'he becomes' = Skt. *bhávati;* Av. *aēⁱti* (GAv. *aēitī*) 'he goes' = Skt. *êti;* Av. *inaⁱti* 'he forces, drives' = Skt. *inôti;* Av. *aⁱpi* 'unto, in' = Skt. *ápi;* Av. *baraⁱŋti* 'they carry' = Skt. *bháranti;* Av. *aⁱnikəm* 'face' = Skt. *ánīkam;* Av. *būiri* 'fullness' = Skt. *bhûri;* Av. *aⁱrištəm* 'unhurt' = Skt. *áriṣṭam.*—GAv.

rāitī 'with offering' = Skt. *rātí;* GAv. *aibī* (YAv. *aiwi*) 'unto, to' = Skt. *abhí;* YAv. *maiδīm* 'middle' (acc. sg.) = Skt. *mádhyam;*—Av. *bairyeiṇte* 'they are brought' = Skt. *bhriyantē;* Av. *nivōiryeite* 'is confined' (√*var-*); Av. *niuruiδyāṭ* 'should flow' (√*rud-*). — Av. *airyō* 'Aryan' = Skt. *aryás;* Av. *nairyąm* 'manly' (acc. fem.) = Skt. *náryām;* Av. *mainyuš* 'Spirit' = Skt. *manyús.*— With vanishing of the *y* which caused the epenthesis, *aiṇhā* gen. sg. fem. of *aēm* 'this' = Skt. *ásyās.*

Epenthetic *u*.

Av. *aurvaṇtō* 'swift steeds' = Skt. *árvantas;* Av. *auruna-* 'wild, fiery', cf. Skt. *aruṇá-;* Av. *aurušō* 'bright, white' = Skt. *aruṣás;* Av. *paurvata* 'two mountains' = Skt. *párvatāu;* Av. *taurunəm* 'young' = Skt. *táruṇam;* Av. *haurvąm* 'whole' = Skt. *sárvām;* Av. *pouru-* (also *paouru-*) 'many', for *paru-*.

Note 1. Epenthetic *i* is even attached to the anaptyctic vowel (§ 72): Av. *hąm.varəitīm* 'courage' Vsp. 7.3; GAv. *mərəŋgəidyāi* 'to destroy' Ys. 46.11; *fraorəitīm* 'confession' Ys. 13.8.

Note 2. Epenthetic *u* is found also before *v* for *w* (§ 87): *gauruvaeite* 'he seizes' (√*garw-* = Skt. √*grabh-*).

§ 71. **Prothesis.** As intermediate between Epenthesis and Anaptyxis, we may distinguish Prothesis, which consists in the similar introduction of an anticipatory *i* or *u* initially before a consonant. It takes place regularly before *r* followed by *i* or *u (v)*. An instance is found also before *þ*.

Av. *irinaḫti* 'he lets go, drives' = Skt. *riṇákti;* Av. *irišyeiti* 'is hurt' = Skt. *riṣyati;* GAv. *urūpayeiṇtī* 'they cause pain' = Skt. *rōpáyanti;* Av. *urune* 'for the soul', *urvan-* 'soul'. (i. e. for *ruvan* § 68 = Mod. Pers. *ruvān).*—Before *þ,* Av. *iþyejō* 'destruction' = Skt. *tyájas.*

§ 72. **Anaptyxis.** An irrational vowel (Anaptyxis), which does not count in the metre, is often developed

in Avesta between two consonants, especially if one be *r*, and regularly after final *r*. The anaptyctic vowel is generally *ə (ā)*, more rarely *a, i* or *ō*. In GAv., anaptyxis is still more common than in YAv.

Av. *valᵊdra-* 'word' = Skt. *vaktrá-* Av. *nafᵊdraṭ* 'offspring' (abl. from *naptar-*); Av. *ɛᵊmō* 'of earth'; GAv. *dadᵊmahī* 'we give' = Skt. *dadmási;* Av. *garᵊmō* 'hot' = Skt. *gharmás;* GAv. *fᵊrā* 'forth', YAv. *frā* § 24 = Skt. *prá;* GAv. *aēšᵊmō* 'Fury' = YAv. *aēšmō;* GAv. *raēȟᵊnavhō* 'of share' = Skt. *rékṇasas.*—GAv. *dᵊbāvayaṭ* 'he deceived'.—YAv. *aŋtarᵊ* 'within', GAv. *aŋtarᵊ* = Skt. *antár;* YAv. *hvarᵊ* 'sun', GAv. *hvarᵊ* = Skt. *svàr.*—GAv. *šyaoθna-* 'deed', YAv. *šyaoθna-* = Skt. *cyāutná-;* GAv. *marᵊka-* 'death', YAv. *mahrka-* = Skt. *markā́-.*—GAv. *yɛᵊvī* 'young' = Skt. *yahvī;* YAv. *nisᵊrinaᵒiti* 'he delivers over'.—YAv. *māyᵒya* 'to me' = GAv. *maiᵒbyā;* YAv. *hāvaya-* 'left' = Skt. *savyá-;* GAv. *dužɑɛᵒbā* 'maledictus'.—YAv. *sᵘrunvata* (instr.) 'worthy of being heard'.

Note. Anaptyxis occurs sometimes between the members of a compound: e. g. GAv. *dušᵊ.ȟšaθra-* 'evil-ruling'; GAv. *hāmᵊ.fraštā* 'he questioned with'; YAv. *usᵊ.hištaṭ* 'he stood up'.—More rarely in the few instances of sandhi: YAv. *hvaēpaiᵊyāsᵊ tanvō* 'of his own body'; YAv. *yasᵊ tē* 'who to thee'.

SYSTEM OF CONSONANTS.

§ 73. **General Remark.** Viewing the Av. and the Skt. system of consonants side by side, it may be noted: (1) The Av. palatal series is incomplete—the Av. possesses only *c* and *j*. (2) The Skt. cerebral series is entirely wanting in the Avesta. (3) The Av. has no aspirates, their place being in part taken by the corresponding spirants. (4) The nasals are only in part identical. (5) The

Av. is richer than the Skt. in sibilants, especially through the presence of the sonant sibilants *ž* and *ǰ*.

§ 74. **Surd and Sonant (Voiceless and Voiced).** For the distinction between surd and sonant (voiceless and voiced), we may refer to the Sanskrit. The law, moreover, that in internal combination, surd (voiceless) consonants stand before surd consonants, and sonant (voiced) before sonants, has in general the same extent as in Sanskrit.[1] Observe that *n* and in part *m* are at times treated as surd.[2]

§ 75. Sandhi between words (§ 4) is wanting in Avesta, except in case of some enclitics and compounds.

Tenues — Surd Spirants.

Av. 𐬐, 𐬑, 𐬒 and 𐬓 — *b̥*, *d̥*, *g̊* — *g*.
k, *t*, *p* and *c* — *x́*, *þ́*, *f* — *ṯ*.

Av. *k*, *t*, *p* and *c*.

§ 76. The Av. tenues *k*, *t*, *p* and *c* agree mostly with the corresponding tenues in the Sanskrit.

Av. *katārō* 'which of two' = Skt. *katarás;* Av. *tāpayeiti* 'makes hot' = Skt. *tāpáyati;* Av. *patəṇti* 'they fly' = Skt. *pátanti.*—Av. *caraiti* 'he moves' = Skt. *cárati;* Av. *cakana* 'has been pleased' = Skt. *cākana.*

Note. In the distinction between guttural and palatal *k*/*c*, the Av. and the Skt. do not always agree: Av. *paskāṭ* 'from behind, behind' = Skt. *paścāt*, cf. Av. *pasca;* Av. *ciciþwā* 'through the wise one' = Skt. *cikitvā;* Av. *fraš̌ō.carᵊtar-* 'converter' = Skt. *ᵒkartar-*, cf. Av. *fraš̌ō.karᵊti-;* Av. *vaokuṣe* dat. sg. pf. ptcpl. √*vak*/*c* = Skt. *ūcuṣé.*

Av. *x́*, *þ́*, *f*.

§ 77. The surd spirants *x́*, *þ́*, *f* in Av. are of two-fold origin:—(1) they are the representatives

[1] Cf. Whitney, *Sanskrit Grammar*, § 156 seq.; Stenzler, *Elementarbuch der Sanskritsprache*, § 44 seq.

of the old surd aspirates *kh, th, ph;* or (2) they have arisen from the tenues *k, t, p* regularly changed before most consonants in Av. to corresponding *χ, þ, f*. Observe that *t* has in general the treatment of a spirant § 81.

(1) Av. *χ, þ, f* = Skt. *kh, th, ph.*

Av. *χā* 'fountains' = Skt. *khás;* Av. *χarəm* 'ass' = Skt. *kháram;* Av. *haχa* 'friend' = Skt. *sákhā.*— Av. *haptaþəm* 'seventh' = Skt. *saptátham;* Av. *gāþā* 'hymns' = Skt. *gáthās;* Av. *ar²þa-* 'part, portion' = Skt. *ártha-.*—Av. *safāvhō* 'hoofs' = Skt. *śaphásas;* Av. *kafəm* 'foam, slime' = Skt. *kapham.*

(2) Av. *χ, þ, f* = Skt. *k, t, p.*

Av. *χratuš* 'wisdom' = Skt. *krátus;* Av. *ⁱrinaχti* 'he lets go, drives' = Skt. *riṇákti;* Av. *taoχma* 'seed' = Skt. *tókma;* Av. *χšaþrəm* 'rule, kingdom' = Skt. *kṣatrám.*—YAv. *šyaoþnāiš,* GAv. *šyaoþ²nāiš* 'by deeds' = Skt. *cyāutnāis;* Av. *haⁱþyō* 'true' = Skt. *satyás.*—Av. *drafšō* 'spear, banner' = Skt. *drapsás;* Av. *χafnəm* 'sleep' = Skt. *svápnam;* YAv. *frā,* GAv. *f²rā* 'forth, before' = Skt. *prá;* Av. *fraoχtō* 'pronounced' = Skt. *prōktás.*

Note 1. In Av., we sometimes find *χ* prefixed to *š*, initial or internal, apparently without etymological value: e. g. *ā-χšnuš* 'up to knee', cf. Skt. *abhi-jñu.* See Bartholomae, *A.F.* iii. 19 seq., and § 188 below.

Note 2. In Av., *þ* sometimes takes the place of *s* (Skt. *ś*): e. g. Av. *þanuōvhvaŋt-* 'healing' from √*þam-* = Skt. √*śam-* 'to heal', cf. also Av. *sāma-;* Av. *aⁱwiþyō* 'over-sleeping' (nom. pl.) with √*sī-* = Skt. √*śī-* 'lie, sleep'; Av. *aⁱwiþūrō* 'very mighty', beside Av. *sūrō* 'mighty' = Skt. *śúras;* Av. *anaþaχtąm* (fem.) 'whose time of delivery is not come', beside *frasaχtahe* (masc.) 'whose time is come, dead' √*sac-.*

Note 3. Original *th* (Iranian *þ*) becomes *d* after *χ* and *f:* e. g. GYAv. *uχda-* 'spoken, word' = Skt. *uktá-;* Av. *þraf²da-* 'satisfied' = Indo-Iran. **tramptha-;* Av. *anaⁱwi.druχdō* 'not to be deceived' Yt. 10.5. See Bartholomae, *K.Z.* xxix. 483, 502 = *Flexionslehre* pp. 63, 82.

Note 4. On Av. *f* apparently for earlier *pv,* see § 95.

§ 78. (a) Exception. The change of *k, t, p,* to *ẖ, þ, f,* before consonants § 77, does not take place when a sibilant or a written nasal (not *ą*) immediately precedes; nor under these circumstances, are *ẖ, þ, f,* as answering to older aspirate § 77, allowed. In all such cases, simple *k, t, p* are employed.

Av. *uštrəm* 'camel' *(-štr-)* as opposed to *kuþra* 'where' *(-þr-)* = Skt. *úṣtram, kútra;* Av. *ẖrafstrāiš* 'with noxious creatures'; Av. *pištrəm* 'bruising, wound'; Av. *zaŋtvō* 'in this *(ahmi)* tribe' *(-ŋtv-* § 94) as opposed to *haozaþwa (-aþw-).*—Av. *staorəm* 'bullock' = Skt. *sthūrám (-th-);* Av. *sparat* 'he darted' = Skt. *ásphurat,* § 48; Av. *skarayaŋt-* 'springing, turning' (in nom. propr.) cf. Skt. *skhalayati;* perhaps Av. *skarᵊna-* 'turning, active' = Skt. *skhalana-.*—Av. *paŋtānəm* 'path' (beside Av. *paþō* acc. pl.) = Skt. *pánthānam, pathás.*

§ 79. (b) Exception. (1) Similarly *pt* remains unchanged; but (2) not original *ptr* which becomes (with assimilation) *fᵊdr* as original *ktr* becomes *ẖdr,* in both GAv. and YAv.

(1) Av. *hapta* 'ἑπτά' = Skt. *saptá;* Av. *supti-* 'shoulder' = Skt. *śúpti-.*—But (2) Av. *nafᵊdrō apąm* 'of offspring of waters', cf. Skt. *náptrē;* Av. *rafᵊdrəm* 'aid' cf. Av. *rap-əŋtəm, rap-akō;* Av. *apāẖdre* 'in north', beside *apāẖtara-;* Av. *ᵓyaoẖdra-* 'girdle' = Skt. *yóktra-.*

Note. Some further exceptions occur: Av. *dāityа-* 'lawful', *þritya-* 'third', *hitya-* 'second', see § 92 Note 1. Observe especially *ātrəm* 'fire', and *trᵊfyāṯ* 'may steal' for *tarᵊfyāṯ, tərᵊfyāṯ* see variants—an abbreviated writing.

§ 80. On *þw* for original *tv,* see § 94.

Av. ę *ṯ.*

§ 81. There can be little doubt that Av. *ṯ* has in general a spirant value. It seems to occupy a position

intermediate between *t, d* and *þ, đ*. It is both surd and sonant (voiceless and voiced); to find a distinction palaeographically when it appears as surd or as sonant is not warranted by the MSS. It occurs chiefly as final for *t*, except when *s* or *š* precede; in that case *t* appears § 192. As initial, surd and sonant, it is found in a few words, *ϑkaēšəm* 'faith, faithful'; *ϑbaēšō* 'hatred, harm' = Skt. *dvéṣas*, cf. § 96. As internal it occurs in a few words, compound or in the MSS. treated as compound, and therefore handled as if it were final.

Av. *aŝāϑ* 'from Right' = Skt. *ṛtắt*; Av. *bavaϑ* 'he became' = Skt. *ábhavat*; Av. *yavaϑ* 'how much' = Skt. *yắvat*; Av. *hakərᵊϑ* 'once' = Skt. *sakṛ́t*.—GAv. *haēcaϑ.aspa-* nom. propr.; YAv. *aᵘrvaϑ.aspa-* 'swift-horsed'; Av. *brvaϑbyąm* 'both brows'; Av. *ᵒtaϑkušiš* 'running' (MSS. *ᵒtaϑ kušiš*); Av. *aϑca* 'atque'.—GYAv. *ϑkaēšəm* 'faith, faithful'; YAv. *ϑbaēšō* 'hatred, harm', cf. GAv. *dvaēšavhā* = Skt. *dvéṣas*.

Note 1. Sometimes, *ϑ* appears as variant of *đ* before *k*: e. g. *adkəm* 'robe' (variant *aϑkəm*) = Skt. *átkam*.

Note 2. In *taϑ.āpəm* 'with running water' (adj.), Yt. 13.43, *ϑ* stands for final *c*, cf. Av. *taci aᵘpya* 'in running water' (loc.), Vd. 6.26.

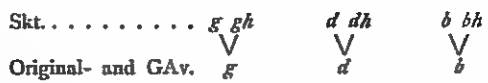
Mediae — Sonant Spirants.

Av. 𐬨, 𐬩, 𐬪 and 𐬫 — 𐬬, 𐬭, 𐬮.
g, d, b and *j* — *ǧ, đ, w*.

§ 82. The mediae *g, d, b*, in Av. have a two-fold value:—(1) they represent old mediae, agreeing with the Skt. *g, d, b*; or (2) they are the representatives of the old sonant aspirates, *gh, dh, bh*; that is to say, originally in Av. the sonant aspirates lost their aspiration and fell together with the mediae. In GAv., the mediae

thus arising are regularly preserved unchanged throughout. But see § 82 (a).

The following scheme shows the standpoint of the Gāthās in comparison with the Sanskrit.



(1) GAv. (old) *g, d, b* = Skt. *g, d, b*.

GAv. *ugrāŋg* 'mighty' (acc. pl.) = Skt. *ugrân;*—GAv. *yadā* 'when' = Skt. *yadâ;* GAv. *vīdvō* 'knowing' = Skt. *vidvân.*

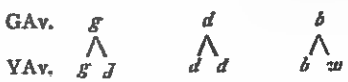
(2) GAv. *g, d, b* = Skt. *gh, dh, bh.*

GAv. *dar²gām* 'long' = Skt. *dīrghám;*—GAv. *adā* 'then' = Skt. *ádha;* GAv. *advānəm* 'way' = Skt. *ádhvānam;*—GAv. *ubōibyā* 'both', cf. Skt. *ubhâbhyām;* GAv. *aibī* 'unto' = Skt. *abhí.*

§ 82a. Observe in connection with this rule § 82 that the sonant spirants appear before *š:* cf. § 180. GAv. *aoǰšā* 'thou spakest'; *diwšaidyāi.*—See § 89 Bartholomae's Law.

Note. On the sonant spirants—in GAv. *raf²dra-* 'aid'; *uḫda-* 'spoken, word'—arising from old tenues or aspirate tenues, cf. § 77 Note 3.

§ 83. (1) In YAv. these mediae *g, d, b*—of double origin § 82—are preserved unchanged when initial; or again when internal, if immediately preceded by a nasal consonant or by a sibilant. (2) Under all other circumstances in YAv. these mediae—whether representing old mediae or old sonant aspirates—are regularly changed to the corresponding sonant spirant *(ǰ, ð, w).* Exceptions to the rule are not many. The secondary relation of GAv. to YAv. may thus be tabulated (cf. § 82):



(1) YAv. *g, d, b* (GAv. *g, d, b*) = Skt. *g, d, b.*

YAv. *gąm* 'cow' (GAv. *gąm*) = Skt. *gắm;* YAv. *grīvā-* 'neck' = Skt. *grīvắ-;* YAv. *aŋguštaēibya* 'toes of both feet', cf. Skt. *aṅguṣṭhắbhyām.*—YAv. *dūrāṭ* 'from afar' (GAv. *dūrāṭ*) = Skt. *dūrắt;* YAv. *viṇdāiti* 'may find, receive' = Skt. *vindắti;* YAv. *hazdyāṭ* 'might sit' opt. pf. = Skt. *sasadyāt, sēdyắt.*—YAv. *barᵊzište* 'on the highest' (cf. GAv. *barᵊzištəm*) = Skt. *bárhiṣṭhē.*

(2) YAv. *g, d, b* (GAv. *g, d, b*) = Skt. *gh, dh, bh.*

YAv. *gaošəm* 'ear' (cf. GAv. *gəuš̌āiš̌*) = Skt. *ghóṣam;* YAv. *saŋgəm* 'foot' = Skt. *jáṅghām.*—YAv. *dārayaṭ* 'he held fast' (GAv. *dārayaṭ*) = Skt. *dhāráyat;* YAv. *drvahe* 'firm' (gen.) = Skt. *dhruvásya;* YAv. *baṇdəm* 'bond, sickness' = Skt. *bandhắm;* YAv. *dasdi* 'give thou' = Skt. *daddhí.*—YAv. *būmīm* 'earth' (GAv. *būmīm*) = Skt. *bhûmim;* YAv. *brāta* 'brother' (GAv. *bᵃrātā*) = Skt. *bhrắtā;* YAv. *səmbayaδwəm* 'crush ye' = Skt. *jambhayadhvam.*

(3) YAv. *ǰ, ð, w* (GAv. *g, d, b*) = Skt. *g, d, b.*

YAv. *uǰrəm* 'mighty' (GAv. *ugra-*) = Skt. *ugrắm;* YAv. *baǰəm* 'portion, lot' (GAv. *baga-*) = Skt. *bhágam;* YAv. *mərᵊǰō* 'bird' = Skt. *mṛgás.*—YAv. *vīdvā* 'knowing' (GAv. *vīdvā*) = Skt. *vidvắn;* YAv. *paiδyavuha* 'set foot' = Skt. *pádyasva.*

(4) YAv. *ǰ, ð, w* (GAv. *g, d, b*) = Skt. *gh, dh, bh.*

YAv. *darᵊǰəm* 'long' (GAv. *darᵊgəm*) = Skt. *dīrghắm;* YAv. *maēǰəm* 'cloud' = Skt. *mēghắm;* YAv. *jaǰnvā* 'having smitten' = Skt. *jaghnivắn.*—YAv. *aδa* 'then' (GAv. *adā*) = Skt. *ádha;* YAv. *aδwanəm* 'way' (GAv. *advānəm*) = Skt. *ádhvānam;* YAv. *arᵊdəm* 'side, half' = Skt. *árdham.*—YAv. *aiwi* 'unto' (GAv. *aibi*) = Skt. *abhí;* YAv. *garᵊwəm* 'foetus' = Skt. *gárbham;* YAv. *awṛəm* 'cloud' = Skt. *abhrắm.*

§ 84. Exception 1. Initial *j*, not *g*, is found before *n*: YAv. *jʸnā, jnā* 'women' (GAv. *gᵉnā*) = Skt. *gnâs*; YAv. *jʸnąm* 'to smite' inf. to √*jan-* = Skt. √*han-*.

§ 85. Exception 2. Exceptions to the law for internal change are also found.

(a) Commonly in the endings *ᵒbiš, ᵒbyā, ᵒbya*:

YAv. *tanubyō* 'to bodies' = Skt. *tanúbhyas*; YAv. *āfrivanaēbiš* 'with blessings', cf. Skt. *samānē-bhis*, etc. But YAv. *aⁱwyas-ca* 'and with these' (fem. abl.) beside *ābyō* Yt. 10.82 = Skt. *ābhyás*; YAv. *bāzuwe* 'with both arms' § 67 cf. Skt. *bāhúbhyām*; YAv. *hinūⁱwyō* 'from fetters' Yt. 13.100 beside YAv. *gātubyō*.

(b) The combination internal *dr* remains generally unchanged:

YAv. *ɦṯudrāṯ* 'from seed' = Skt. *kṣudrât*; YAv. *udrəm* 'otter' = Skt. *udrám*; GYAv. *arᵊdra-* 'pious'; GYAv. *sādra-* 'misfortune'; YAv. *dadrāna-* 'being held' √*dar-* = Skt. √*dhar-*.

(c) In some other instances internal *d* remains in YAv. unchanged:

YAv. *vadarᵊ* 'weapon', GAv. *vadarᵊ* = Skt. *vádhar*; YAv. *yazamaⁱde* 'we worship' = Skt. *yájāmahē*, etc.; YAv. *varᵊdaþəm* 'growth', beside *varᵊdaya* 'make thou grow' = Skt. *vardháya*.

§ 86. Instead of internal *d* in YAv., *þ* is sometimes written; especially before *u, w*.

YAv. *vīþuši, vīþušīm* 'having knowledge' = Skt. *vidúṣī, vidúṣīm*, GAv. *vīdušē*; YAv. *caraþwe* 'ye go' Yt. 13.34 = Skt. *cáradhvē*; YAv. *daþušō* 'of creator' = GAv. *dadušō*; YAv. *ərᵊþwa-* 'uplifted' as variant to *ərᵊdwa-*. So YAv. *daþaⁱti* 'he gives' = Skt. *dádati* RV. 2.35.10; YAv. *zgaþaⁱti* 'vanishes' beside YAv. *zgadaⁱti*; GAv. *vaēþā* Ys. 5.6 'he knows', beside GAv. *vaēdā* = Skt. *vêda*.

§ 87. Instead of internal YAv. *w*, we sometimes find YAv. *v* written.

YAv. *avarōiṯ* 'should bring out' = Skt. *ā-bharēt*; YAv. *ɦšmāvᵒya* 'to you', beside GAv. *ɦšmaⁱbyā*, YAv. *yušmaoyō* = Skt. *yuṣmábhyam*; YAv. *māvᵒya* 'to me', GAv. *maⁱbyā*; YAv. *gəᵘrvayeⁱte* 'he seizes' (for **gərwayeⁱti* § 70 Note 2) = Skt. *gṛbhâyati*; YAv. *vaēⁱbya*

'with both' (for *uwaēⁱbya* § 68 for *uwaēⁱbya*), cf. Skt. *ubhâbhyām*, GAv. *ubōibya*; YAv. *frabavara* 'he brought forth' = Skt. *babhāra*. Perhaps YAv. *aⁱwi* > *avi* > *aoi* 'unto' = Skt. *abhi*.

Note. On Av. *pw* for *tv*, *ðw* for *dhv*, etc., see §§ 94, 96.

Av. *ž*, *j*.

§ 88. From the fact that the original sonant aspirates fell together with the mediae in Avesta, § 82, and also from the two-fold nature of Skt. *j* and *h*—see Brugmann, *Grundriss der vergl. Gram.* §§ 452, 480, 451,—is to be explained the following relation between the Avesta and the Sanskrit.

$$\text{Av. } j < \begin{matrix} \text{Skt. } j \\ \text{Skt. } h \end{matrix} > \text{Av. } ž$$

(1) Av. *j* = Skt. *j*.

YAv. *jvaṇtəm*, GAv. *jvaṇtō* 'living' = Skt. *jîvantam*, etc. (§ 68 Note 2); YAv. *jaγnvō* 'having smitten' = Skt. *jaghnivân*;—YAv. *jyō* 'bowstrings' = Skt. *jyâs*; GAv. *jyātōuš* 'of life', cf. Skt. *jîvâtōs*; also GYAv. *aojištō* 'strongest' = Skt. *ôjiṣṭhas*; GYAv. *iþyejō* 'destruction' = Skt. *tyájas*.

(2) Av. *j* = Skt. *h*.

YAv. *jaṇtārəm* 'smiter' = Skt. *hantâram*; YAv. *jaⁱṇti* 'he smites' = Skt. *hánti*; YAv. *arᵊjaiti* 'is worth' = Skt. *árhati*; GYAv. *drujəm* 'Deceit, Fiend' = Skt. *drúham*.

Note 1. According to § 83, the media *j* when initial should in YAv. pass over into its corresponding sonant spirant, this spirant has in our alphabet fallen together with the sonant sibilant *ž*. Hence the relation §§ 177, 178 below YAv. *ž* = Skt. *j*;—YAv. *ž* = Skt. *h*.

Note 2. Owing to the etymological relation *gl j*, we sometimes find Av. *j* = Skt. *g*:—e. g. GYAv. *hanjamana-* 'assembly' = Skt. *sagâmana-*;

GYAv. *jasōiṭ* 'he might come' = Skt. *gáchēt;* Av. √*jad-* 'to beseech', cf. Skt. √*gad-*.

Note 3. Av. *j* also sometimes answers to Skt. *gh*:—e. g. Av. *drājiiṭəm* 'longest' = Skt. *drāghiṣṭham;* Av. *drājō* 'length, duration', cf. Skt. *drāghmán-*.

Bartholomae's Law.

See Bartholomae, *A. F.* i. p. 3 seq.; *A. F.* iii. p. 22 Note.

§ 89. The combination, original aspirate mediae + *t* or + *s*, had already in the Indo-Iranian period become media + *dh* or + *zh*; the consonant group thus arising is then treated according to the special laws of the language, Indic or Iranic. In GAv. the law is carried through without exception (but see § 82 a, and Note). In YAv., however, the law shows a number of exceptions § 90.—Examples of the law from GAv. are:

GAv. *aogᵊdā* 'he spake' to √*aug₂h* + ending *ta*, cf. Gk. εὔχομαι, Skt. *ôhatē;* GAv. *cagᵊdō* 'they two grant' to √*k₂ag₂h* + *-tas*.—GYAv. *vərᵊzda-* 'grown great, mighty', to √*vardh* + *-ta-*, cf. Skt. *vṛddhá-;* GAv. *dazdē* 'he makes', to √*dhā-*, pres. stem *dadh* + *-tē;* GYAv. *mazdāh-*, nom. *mazdā* 'wisdom, Mazda', to orig. √*mandh* + *-tas-* = Skt. *-mēdhás-*.—GAv. *gərᵊzdā* 'he complained', to √*garg₁h* + *-ta*, cf. Skt. *gárhate*.—With orig. *s*, GAv. *aogžā* 'thou spakest', to √*aug₂h* + *-sa*, 2nd. sg. pret. mid.;—GAv. *diwžaⁱdyāi* 'to deceive', to orig. √*dabh* + *-sa-*, infin. desiderative, cf. YAv. *diwžaṭ* 'from deceit', a substantive from desid. stem, cf. Skt. *dipsati*.

§ 90. In YAv., as compared with GAv., this law holds good only in part; as for the rest, the old tenues *t*, or surd sibilant *s*, is restored and assimilation then takes place. Thus:—

YAv. *aoẖta* 'he spake', to √*aug₂h* + ending *ta*, beside GAv. *aogᵊdā;* YAv. *druẖtō* 'deceived', to √*draug₂h* + *-ta-*, = Skt. *drugdhás*.—YAv. *daste* 'he makes', to √*dhā-*, pres. stem *dadh* + *tē*, beside GAv. *dazdē;* YAv. *mastīm* 'wisdom' to orig. √*mandh* + *-ti-*, beside GAv. *humazdra-*, YAv. *mazdra-*.—YAv. *dapta* 'deceived' nom. f. past ptcpl. to orig. √*dabh*, cf. Skt. *dabdhá-*.—With orig. *s*, YAv. *vaṯata* 'he carried' (*s* restored § 165), 3rd. sg. mid. *sa-* aor. to √*vag₁h*, beside YAv. *vaṯaṯ* 'he carried'.

Semivowels.

Av. 𐬌 *y* (initial), 𐬉 *y* (internal); 𐬅 *v* (initial), 𐬊 *v* (internal).

§ 91. **General Remark.** The semivowels 𐬌 *y* and 𐬅 *v* were probably spirants; internal 𐬉 *y* and 𐬊 *v* were apparently sometimes spirant, sometimes vocalic (see § 92 Note 1).

Note. In a few instances 𐬉 *y* and 𐬊 *v* stand as initial, when representing *iy, uv:* GAv. 𐬉𐬀𐬙𐬀𐬌𐬀𐬉 *iyadacā* 'and here' Ys. 35.2 (pron. stem *i*); YAv. 𐬉𐬎𐬌𐬎𐬀𐬉 *uvaēibya* 'with both', Skt. *ubhābhyām*—see §§ 87, 68.

Av. *y* = Skt. *y*.

§ 92. Av. *y* (initial and internal) corresponds to Skt. *y:*

Av. *yasnəm* 'worship' = Skt. *yajñám;* Av. *tāyuš* 'thief' = Skt. *tāyúš;* GAv. *ahurahyā* 'of Ahura' = Skt. *ásurasya.*

Note 1. (a) A possible test as to when 𐬉 *y* is spirant or semivowel, may perhaps be found in the treatment of a preceding *i*, e. g. *haiϑya* 'true' (*y* spirant) but *dāityа-* 'lawful' (*y* semivowel *dāit-i-a-*). (b) Moreover the metre shows that *y* is often to be read with vowel value *iy* § 68: GAv. *fryō* 'friend' (read *fr-iy-ō*) = Skt. *priyás;* YAv. *bitya-* 'second' (read *bit-iy-a-*) = Skt. *dvitíya-*.—In Yt. 13.99 initial 𐬌 must be read *iy* in *yaēša* 'he has sought' = Skt. *iyēṣa.*

Note 2. On Av. *y* = Skt. *v̇*, in *tanuyē* etc., see § 190.

Av. *v* = Skt. *v*.

§ 93. Av. *v* (initial and internal) corresponds to Skt. *v:*

Av. *vastrəm* 'vesture' = Skt. *vástram;* Av. *vātō* 'wind' = Skt. *vātas;*—Av. *tūtava* 'he has power' = Skt. *tūtáva;* Av. *hvaspō* 'with good horses' = Skt. *sváśvas.*

Note 1. Metrically 𐬊 *v* is often to be read as a vowel. Thus: Av. *gužδāhva* 'among beings' Ys. 9.17 (loc. *°āhu* + *a* postpos.); *°ciϑraēδva* 'among seeds'; GAv. *tvəm* 'thou' (read *tuəm*) = Skt. *tvám (tuám);* YAv. *kva* 'where' (read *kua*) = Skt. *kvà (kúa).*

Note 2. On Av. *v* for *w*, see § 87.

Note 3. On Av. *v* for Skt. *uv* see § 68.

Original *v* in Combination with Consonants.

Av. representative of Skt. *tv*.

§ 94. The combination original *tv* (1) generally becomes Av. *θw;* (2) it remains unchanged when a sibilant

precedes or when *v* preserves its vocalic character *u*.—When samprasāraṇa with following *a* takes place, *t* remains unaltered.

(1) GYAv. *ɣraƀwā, ɣraƀwō* 'by, of wisdom' = Skt. *krátvā, krátvas;* YAv. *ƀwąm* 'thee' = Skt. *tvám;* Av. *mąƀwa-* 'to be thought, thought', for **mantva-;*—(2) Av. *varštva-* 'to be done, act'; Av. *ratvō* 'O Master', *gātvō* 'from the seat' (prob. *rat-u-ō, gāt-u-ō*); GAv. *tvāṁ* 'thou' *(tuām)*.—YAv. *tūm* 'thou' = Skt. *tvám.*

Original *ƭv.*

§ 95. The combination original *ƭv* apparently seems to become *f* in Av.:—e. g. Ys. 57.29 *āfənte* 'they are overtaken', for earlier **āƭvənte* (cl. 8); Av. *āfəntəm* 'aquosum' for older **āƭvantam;* Av. *hušhvafa* 'slumbering' nom. sg. from orig. **suṣvapvan(t)-.*

Original *dv, dhv.*

§ 96. The combination original *dv, dhv* becomes (1) when initial, GAv. *dv, dᵃb;* in YAv. *ʇb, b (dv);*—(2) when internal, GAv. *dv;* in YAv. *đv, đw (dv).*

(1) Initial.

GAv. *dvaēšavhā* 'through hatred' (YAv. *ʇbaēšavha*) = Skt. *dvéṣasā;* GAv. *dᵃibišəṇtī* 'they hate' (cf. YAv. *ʇbaēšayāʇ*) = Skt. *dviṣánti;* GAv. *dᵃibitīm* 'second' (YAv. *bitīm*) = Skt. *dvitîyam.*—YAv. *ʇbaēšavha* 'through hatred' = Skt. *dvéṣasā;* YAv. *ʇbaēšayāʇ* 'may harm through hatred' = Skt. *dvēṣáyāt;* YAv. *bitīm* 'second' = Skt. *dvitîyam.*—YAv. *dvà* 'two' = Skt. *dvâ;* Av. *dvarəm* 'door' = Skt. *dvâram;* Av. *dvąsᵃiti* 'rushes, springs' = Skt. *dhvąsati.*

(2) Internal.

GAv. *advaēšō* 'without harm' = Skt. *advēṣás;* GAv. *vīdvā* 'knowing', YAv. *vīđvā* = Skt. *vidvân;*—GAv. *advānəm* 'path', YAv. *ađwanəm* = Skt. *ádhvānam.*

—Av. *didvaēšα* 'I have hated' = Skt. *didvēṣa;* YAv. *vīdvaēštvō* 'foe to harm'.

Note. In YAv. *viθβaēšavhəm* 'foe to malice' and *vīdvaēštvō* 'foe to harm', the *θβ, dv* is treated apparently as initial,—prefix *vi*.

Av. representative of Skt. *śv*.

§ 97. The combination *śv* (Skt.) appears in Av. as *sp*.

Av. *vīspəm* 'all' = Skt. *víśvam;* Av. *aspō* 'horse' = Skt. *áśvas;* Av. *spaētəm* 'white' = Skt. *śvētám*.

§ 98. On Av. representative of *śv* (Skt.), see § 130.

Av. representative of Skt. *hv*.

§ 99. The combination Skt. *hv* appears in Av. as *zb*.

Av. *zbayemi* 'I invoke' = Skt. *hváyāmi;* GAv. *duš-azᵊbā* 'male-dictus' cf. Skt. √*hvā-*.

Liquid.

Av. *r*.

§ 100. The Av. liquid is *r;* it corresponds to Skt. *r* and *l*, the letter *l* being wanting in Av.

Av. *r* = Skt. *r (l)*.

Av. *raθəm* 'wagon' = Skt. *rátham;* Av. *narəm* 'man' = Skt. *náram;* Av. *srīrō* 'beautiful' = Skt. *śrīrás, śrīlás.*—Av. *hukərᵊpta-* 'well-formed' = Skt. *-klptá-;* GAv. *hrapaitī* 'arranges', cf. Skt. *kálpatē*.

Note 1. In Av., *hr* appears instead of simple *r* when immediately followed by *k* or *p:*—YAv. *vəhrkō* 'wolf' = Skt. *vṛ́kas;* GYAv. *kəhrpəm* 'corpus' = Skt. *kṛ́pam;* YAv. *mahrkō* 'death' = Skt. *markás*, cf. GAv. *marᵃkaē-cā* 'morti-que'; YAv. *kahrkana-* nomen propr., cf. Skt. *kṛkaṇa-*. See Bartholomae, *A.F.* ii.39; Brugmann, *Grundriss der vergl. Gram.* § 260.

Note 2. On *urv-* (i. e. *ᵘrv-* for *vr-*), see § 191.

Note 3. On *r* in vowel combinations *ar, aⁱr, aᵘr, ərᵊ*, see § 48.

Nasals.

Av. 𐬦, 𐬧, 𐬨, 𐬩, 𐬪.

n, ŋ, v, ṽ, m.

§ 101. **General Remark.** Of the nasals in Av., 𐬪 *m* corresponds in general to Skt. *m*.—To the Skt. *n* there correspond in Av., 𐬦 *n* and 𐬧 *ŋ*,—the latter, a modification of 𐬦 *n*, stands before stopped consonants.—The letter 𐬨 *v* is evidently guttural in Av. *pavtavhəm* 'fifth' from **pavᵏtasva*. Otherwise 𐬨 *v* stands in the combination *vh, vuh* derived from orig. *s*-syllable § 108.—The character 𐬩 *ṽ* is palaeographically, from the manuscripts, a modification of 𐬨 *v*; it occurs for *v* in connection with *h* when it is preceded by an *i*- or *e*-sound § 118 Note.

§ 102. Av. *n* occurs initial, internal (except before stopped-sounds), and final.

Av. *nāma* 'name' = Skt. *nāma*;—Av. *tanuš* 'body' = Skt. *tanūs*;—Av. *anyō* 'another' = Skt. *anyás*; Av. *vavanvā* 'victorious' = Skt. *vavanvān*;—Av. *varšnāiš* 'of a male' = Skt. *vṛṣṇás*;—Av. *barən* 'they carried' = Skt. *ábharan*.

§ 103. Av. *ŋ* occurs before *k, g, c, j, t, d* and *-byō* (for *-dbyō*), *bya*.

Av. *saŋga-* 'upper part of foot' = Skt. *jáṅghā-*;—Av. *paŋca* 'five' = Skt. *páñca*;—Av. *rəŋjaⁱti* 'bestirs, hurries' = Skt. *rghati*;—Av. *aŋtarᵉ* 'inter' = Skt. *antár*; Av. *barəŋti* 'they carry' = Skt. *bháranti*; Av. *bərᵉsaŋbya* 'for the two great ones'.

Note. For *-ŋg* see under Sibilants § 128.

§ 104. On Av. 𐬦 *n*, 𐬩 *ṽ*, see above General Remark.

§ 105. Av. *m* occurs initial, internal, final.

Av. *maδəmən* 'midmost' = Skt. *madhyamám*; Av. *aimən* 'strength' = Skt. *ámam*; Av. *mraom* 'I spake' = Skt. *ábravam*.

Note 1. The *m* in Av. √*mru-* (opp. Skt. √*brū-*) is probably the more original.

Note 2. On initial *m* = Skt. *sm*, see § 140.

Sibilants.

Av. 𐬰, 𐬯, 𐬱, 𐬲—ʃ, 𐬳.

s, *š*, *ṣ*, *š́*—*z*, *ž*.

§ 106. **General Remark.** Of the sibilants, *s*, *š*, *ṣ*, *š́* are surd; and *z*, *ž* are sonant. In Avesta, *s* corresponds to both Skt. *s* and to *ś*.—Av. *ṣ* answers in general to Skt. *ṣ*. The letter Av. *š* is chiefly final after *i*, *u* and consonants, also in some ligatures. Av. *š́* is not so common, chiefly before *y*.

Note. Av. *š*, *ṣ*, *š́* are palaeographically closely related. In most MSS., *š* and *ṣ* interchange with each other. In the younger Indian MSS., *š* is the predominant character; the Persian MSS. often (though by no means throughout) show a preference for *ṣ* when the sound answers to orig. *rt*. In the four oldest MSS., with Pahlavi translation, *ṣ* is the principal character,—*š* standing as final or in ligatures. This rule is there preserved almost without exception.—In the old Mss. 𐬲 *ʃ* has a double value—(1) as a ligature for *š* + *k*, *hišku* 'dry', et al.; or (2) it is a modification of *š*, *ṣ* before *y*, § 162. Younger MSS. write in the (1) first case *šk*; in the (2) second case they have a special ligature.—See Geldner, *Drei Yasht* p. viii seqq.

Av. *s*.

§ 107. **General Remark.** Av. *s* is of three-fold origin:—

1. = original *s*,
2. = older palatal *ś* (Skt. *ś*),
3. = developed.

1. Original *s*.

§ 108. **General Remark.** Original *s* (1) under certain conditions remains *s* in Avesta (2) but generally otherwise becomes *h (wh)*.

i. Original *s* remains *s*.

Original *sy*.

§ 131. This combination, orig. *sy* preceded by a vowel, becomes somewhat complicated in Av., owing to the varied treatment of *y*, as *y* sometimes remains after *s* has become an *h*-sound, or *y* sometimes vanishes, with or without leaving a trace of epenthesis. In GAv., *y* is generally retained, in YAv. *y* generally vanishes.

Av. *āϸrava* 'priest' = Skt. *átharvā;* Av. *caϸrudasō* 'fourteenth' = Skt. *caturdaśás;* Av. *brātūᵘryō* 'uncle' (for *brātvryō* § 62) = Skt. *bhrātṛvyas;* Av. *ᵘrvātāiš* 'with doctrines', cf. Skt. *vrátāiš;* Av. *ᵘrvaϸō* 'faithful, friend' (√*var-*).

§ 192. As final consonants in Av., the following may stand: (1) nasal, *n* and *m*, (2) dental *ṯ* (or *t* when preceded by developed *s* or by *š*), (3) sibilant *š* and *s*.— Two consonants may stand in the case of *ŋš, fš, št, st* and GAv. *ng*.

(1) *barən* 'they carried'; *azəm* 'I'; (2) *pərᵊsaṯ* 'he asked'; *amavaṯ* 'strong'; (3) *hizubīš* 'with tongues'; *tanuš* 'body'; *haᵘrvatās* 'perfection' (nom. sg. *-tāt-s*); *ŋšayąs* 'ruling' (nom. sg. *-ant-s*). — *druŋš* 'fiend, Druj'; *āfš* 'water'; *kərᵊfš* 'corpse'; *cōišt* 'he promised, announced'; *aⁱbī.mōist* 'he turned toward'.— GAv. *mašyəng* 'mortals' acc. pl.

Note. When orig. *s* precedes final *t* the latter is dropped:—e. g. Av. *·āṣ* (i. e. **āṣ-t*) 'was' = Skt. *āsīt;* Av. *cinas* (i. e. **cinast* § 109) 'thou didst promise', opp. to *cōišt* or to *mōist (miϸ-)*.

§ 193. Av. *m* appears instead of final *n* in vocatives of *an*-stems.

Av. *ašāum* 'O righteous one' = Skt. *ṛtāvan;* Av. *āϸraom* 'O priest' = Skt. *átharvan;* Av. *yum* (for **yuvən*) 'O youth' = Skt. *yúvan;* Av. *þrizafəm* 'O triple-jawed' (cf. acc. *þrizafanəm*).

Note 1. The MSS. often fluctuate between final *m* and *n* in endings, *ą, ąn, ąm*, e. g. *haomą, haomąn, haomąm* 'haoma-offerings' (acc. pl.) Yt. 10.92 = Skt. *sómān*, cf. § 45 Note 2.— So apparently, Av. *caŋmąm* 'in eye', cf. Skt. *jánman*.

Note 2. Observe other MS. fluctuations (cons. and vowel):— *c j; j z; þ d; ā ō; ō āu; ō āṯ; ai aē; ə :ı — daϸąm, daδąm; mazdā, mazdō; ŋratō ᵊtāu; vastrō ᵊtrāṯ*.

§ 194. Av. avoids generally a repetition of the same syllable.

Av. *maiδyāiryehe* 'of Mid-Year' (for *maiδya-yāiryehe*); *huyāiryā* 'of good harvest' (for *huyāiryayā*); Av. *frasiṇte, frasiṇta* 'they are, were plundered' (for **frasiṇaṇte,* **frasiṇaṇta*), cf. Skt. *prajināte;* Av. *hvar²na hacimnō* for **hvar²navha hacimnō* attended with glory Yt. 10.121.

Resumé.

Principal differences between Sanskrit and Avesta in Phonology.

Vowels.

§ 195. GAv. lengthens all final vowels, YAv. lengthens them in monosyllables, shortens them in polysyllables (§§ 24—26).

§ 196. Original *r* and *ā* are lengthened before final *m* in Av. (§ 23).

§ 197. Av. ᠠ᠋ᠷ᠋ *a* generally answers to Skt. *a* before *m* or *n*. — Av. ᠷᠠ *ar²* (*ar²*) = Skt. *r* (§§ 29, 47).

§ 198. Av. ᠡ *e*, commonly a modification of internal *a* after *y*. — Sometimes equals final *ya* (§§ 34, 67).

§ 199. Av. ᠣ *o* chiefly equals final Skt. *as* (*ō*) § 120.

§ 200. Av. ᠠᠨ *ąm* chiefly equals Skt. *ās;* — more rarely Skt. *ā* + stop-sound (§§ 121—124, 44).

§ 201. Av. ᠤ *q* is a nasalization of *a* (*ā*) before *m* or *n*. It often equals Skt. *a* with anusvāra (§§ 45, 46).

Diphthongs.

§ 202. The Skt. *ai* is represented by Av. *aē, ōi,* or (when final) *ē;* the Skt. *au* by Av. *ao, ōu,* or (when final) *ō* (§§ 55—58, 35, 41).

§ 203. A striking peculiarity in Av. is Epenthesis (§ 70) and Anaptyxis (§ 72) and the frequent Reductions (samprasāraṇa etc.) § 63 seq.

Consonants.

§ 204. The voiceless spirants Av. *ẖ, ṕ, f* are chiefly sprung from old tenues *k, t, p* before consonants; — sometimes they represent old voiceless aspirates (§ 77 seq.).

§ 205. The original voiced aspirates *gh*, *dh*, *bh* fell primarily together with the **mediae** in Av. (§ 82).

§ 206. The **voiced spirants** Av. *ǰ*, *d́*, *w* are **developments** from these earlier two-fold mediae (§ 83).

§ 207. Skt. *j* is often represented by Av. *z* (§ 168).

§ 208. Skt. *h* is represented sometimes by Av. *j*, sometimes by Av. *z* (§§ 88, 169).

§ 209. Skt. *s* generally becomes *h* in Av. (§ 110 seq.).

§ 210. Skt. *as* (internal) becomes *avh*, *ah*; or (final) *ō* (§§ 111—120).

§ 211. Av. *ās* (internal) becomes *āvh*, *āh*; or (final) *ā* (§§ 121—124).

§ 212. Skt. *ś* is represented in Av. by *s* (§ 146).

§ 213. Skt. *śv* is represented in Av. by *sp* (§ 97).

§ 214. Skt. *ch* is represented in Av. by *s* (§ 142).

§ 215. Dentals before dentals are changed to *s* in Av. (§ 151).

§ 216. Av. *z* and *s* (= Skt. *ś*) before voiceless consonants generally become *š* (§§ 164—166, 160).

§ 217. Skt. *rt* is often represented in Av. by *š* (§ 163).

§ 218. Skt. *kṣ* is represented by Av. *xš* or *š* (§ 158 Note 1).

INFLECTION.

DECLENSION,

NOUNS AND ADJECTIVES.

§ 219. Nominal declension includes nouns and adjectives; these may be conveniently taken together in Avesta and divided into two great classes of declension—(a) the vowel class, and (b) the consonant class—according as the stem ends in a vowel or in a consonant.

For a summary of Avesta declension in a tabular form, see opposite page.

§ 220. **Case, Number, Gender.** The Avesta agrees with the Sanskrit in its eight cases, nominative, accusative, instrumental, dative, ablative, genitive, locative, vocative; three numbers, singular, dual, plural; and in the three genders, masculine, feminine, and neuter.

The uses of the cases are in general the same as in Skt., but see § 233. The Av. dual is interesting as showing a distinct form for the locative case, see §§ 223, 236, 262. In Avesta, a substantive has commonly the same gender that it has in Sanskrit.

Note 1. As to gender, however, some individual peculiarities occur, as a few words in Av. show a different gender from that which they have in Skt.:—e. g. Av. *vāc-* (masc.) 'vox' = Skt. *vāc* (fem.)—but observe the compound *paitivac-* is fem.; Av. *tarǧna-* (masc.) 'thirst' = Skt. *tṛṣṇā-* (fem.); Av. *sanga-* (masc.) 'leg' = Skt. *jáṅghā-* (fem.); Av. *sti-* (fem.) 'existence, creation' = Skt. *sti-* (masc.) — This occasional phenomenon is sometimes important to observe in the matter of exegesis.

Note 2. On fem. and neut. plur. forms interchanging with each other, see § 232.

§ 221. **Endings.** Here may be enumerated the normal endings which are added to the stem in formation of the various cases. The stem itself, moreover, sometimes varies in assuming these endings, as it often appears in a stronger form in certain cases, and in a weaker form in others. Connecting elements as in Skt. seem at times to be introduced between stem and ending.

The normal endings (but observe §§ 25, 26) are:

General Remarks on the Endings.

I. MASCULINE—FEMININE.

§ 222. Singular:—

Nominative: The typical ending *-s* is disguised by entering into euphonic combinations with vowels and consonants; it assumes especially often the form *-ś*, § 156.—Often it is wanting—e. g. cf. derivative stems in orig. *ā* and *ī*.

Accusative: The typical ending *-m* appears after vowels; the ending *-ąm* (= *-am* = *-ṃm*) after consonants. Cf. also § 23.

Instrumental: Regularly *ā*, *a*, § 25.—This is sometimes disguised by combining with a preceding *y* to *e*, § 67.—The fem. *ā*-declension, as in Skt., shows a fuller form, making the case end in *-ayā (-aya)* beside the simpler normal form in *ā*.

Dative: YAv. *-e* (orig. *-ai*), GAv. *-ē*, *-ōi*, § 56.—Notice of course Av. *-aē-ca*.—In the *a*-declension, the *ē* (orig. *ai*) unites with the stem vowel into *āi*, cf. Gr. ῳ, § 60.—The feminine derivative *ā*-stems and *ī*-stems show a fuller ending *āi*, which in the *ā*-stems is preceded by a *y*, as in Skt. also.

Ablative: The typical ending is *-ṭ*, or *-(a)ṭ* (consonant decl.), *-āt* (in *a*-decl.). Observe, this is not confined, as in Skt., simply to the *a*-declension, but appears in all the declensions (*ā*, *ī*, *ū* and cons.). Instances of interchanges between *-aṭ* and *-āṭ* are not infrequent.—Observe before *-ca*, the form *-āatca*, § 53 iv.—The ending *-(a)ṭ* is often followed by the enclitic postposition *a*, thus giving *-(a)ḍa*.—In GAv., the *ṭ*-ablative is found, as in Skt., only with the *ā*-declension, e. g. *ẖšaθrāṭ*, *akāṭ*; otherwise, as in Skt., the genitive is used with ablative force.—The feminine *ā*- and *ī*-stems, unlike the Skt., both show *-āṭ* which in the *ā*-stems is preceded by *y*.

Genitive: The common ending, as in Skt., is *ō*, *-asca*; it occurs chiefly in the consonant declension.—The ending, simple *(s)* *ś* is also found, e. g. throughout the *i*- and *u*-stems, the stem vowel being generally strengthened before it.—In the *a*-stems, the ending *-he* (Skt. *-sya*, § 67), GAv. *-hyā*, *-hyācā* (on *h* cf. § 133) is regularly found.—In feminine *ā*- and *ī*-stems a fuller ending *-āō*, *-āōsca* (= Skt. *ās*) is found, which in the *ā*-declension is preceded by *y* as in Skt.—see dative above.

Locative: The normal form, as in Skt., is *-i*.—In the *a*-declension, this coalesces with the stem vowel to *-e*, *-aē-ca*.—Sometimes the loc. is without ending—the stem being simply strengthened, e. g. cf. *u*-stems and some *an*-forms.—To the locative ending, an enclitic postpositive *a* is often attached, giving rise to forms in *-ya (-aya)*,

-ava.—The feminine *ā*-stems show *-aya* (perhaps orig. instr., or *ya*-suffix advl.) answering to Skt. *-āyām.*

Vocative: Commonly, simple stem without ending.—Often the nom. stands instead of the vocative.

§ 223. Dual:—

Nom. Acc. Voc.: The prevailing form for the consonant and the *a*-declension is *ā (a)*, cf. Vedic Skt. *ā.*—The *ā*-stems show *ē (e).*—The masc. fem. *i*- and *u*-stems simply lengthen (then YAv., cf. § 25 and Note, shorten) their stem vowels.

Instr. Dat. Abl.: The normal ending in Av. is *-byā (-bya).*—The form *-byąm,* which exactly corresponds to Skt. *-bhyām,* is only once found, in Av. *brvatbyąm* 'both brows'.—Instead of YAv. *-bya,* the form written *-we* (§§ 67, 87) often appears. √

Genitive: Regularly *-ō, -ōsca* answering to Skt. *-ōs*—a preceding vowel being treated as in Skt.

Locative: The ending *ō* occurs in *zastayō* (YAv.) from *zasta-* 'hand', in *ubōyō* (GAv.) from *uba-* 'both', and *auhvō* (GAv.) Ys. 41.2 from *auhu-* 'world, life'.

§ 224. Plural:—

Nom. Voc.: The typical form orig. *as* occurs both in the vowel and the consonant classes of declension.—But beside this, in the masculine of both classes the ending *ā (a)* is common, especially in YAv.—Its occurrence in the consonant, declension is probably due to borrowing from the *a*-decl.—In the *a*-declension, the normal orig. *-as* unites, as in Skt., with the stem vowel, thus giving *-ō* (= orig. *-ās,* § 124) which is, however, less common than the ending *ā (a).*—Often the *a*-stems have *-ōuhō,* cf. Vedic Skt. *-āsas.*—In the *i*-stems, the usual nom. pl., as in Vedic Skt., is *-iš* instead of *-yō, -yasca.*

Accusative: The original ending *-ns* (seen in *-qsca* from *u*-stems) appears in the consonant stems as *-ō, -as°* (i. e. orig. *-ąs*).—Beside this, in the masculine of both classes the ending *ā (a)* is found, cf. nom. above.—In the *a*-declension the normal orig. *-ns* combines with the *a* of the stem into YAv. *-q(n), -qsca,* GAv. *-ąng, -qsca*—sometimes also YAv. *-ą, -ąsca.*—The fem. *ā*-stems show *-ąō, -ąōsca.*—The masc. fem. *i*- and *u*-stems show generally *-īš, -ūš.*

Instrumental: Everywhere the ending *-biš, -hiš* (§ 21 Note), except in the *a*-stems which show *-āiš.*

Dat. Abl.: The regular form is *-byō, -byasca,* or written *-wyō, -vyō, -uyō,* §§ 83 (4), 87, 62 Note 3.

Genitive: Universally *-qm,* which is often dissyllabic as in Vedic Skt.—In the vowel stems an *n* is usually inserted before this *-qm.*

Locative: The normal form is *-hu, -ǰu.*—To this ending, an enclitic postpositive *a* in YAv. is often attached, thus giving *-hva, -ǰva,* cf. Skt. *vánēṛv ā* RV. 9.62.8.

ii. NEUTER (Separate Forms).

The neuter shows in general the same endings as the masculine. Its special forms, however, are worthy of note in the following cases:

§ 225. **Singular:—**

Nom. Acc. Voc.: In general no ending—the case is simply the bare stem in its weak form, if the stem have a weak form. The *a*-stems have *m* as in the accusative masculine.

§ 226. **Dual:—**

Nom. Acc. Voc.: The ending orig. *-ī* is to be recognized in the *a*-stems, where it is combined with the stem vowel preceding it, into *e*, e. g. *duy-e saiti-e* 'two hundred'.—Sometimes the simple stem (or like nom. sing.) seems to be used, e. g. *va, dąma* Yt. 15.43, *aŋi* 'two eyes' Yt. 11.2.

§ 227. **Plural:—**

Nom. Acc. Voc.: Commonly the ending is wanting i. e. the case-form is the simple stem, or if consonantal it is the strongest form of the stem (cf. *afsmanivąn* i. e. orig. *-ānt;* or again *manā* from *ah*-stem).—Seldom the ending is *-i: nāmāni,* cf. Skt. *námāni.*—Sometimes in the consonant declension, the endings *-a, -ā* of the vowel *(a-* or *ā-)* declension are found, cf. § 234, e. g. *daŋmāna, masanā, maŋsma* to stems *daŋman-* 'eye, glance', *masan-* 'greatness', *maŋsman-* 'urine', but see § 308.

§ 228. **General Plural Case.**

The plural in Av. occasionally shows a certain instability which is exhibited in the transfer or rather generalization of some of its case-forms. This is especially true of the neuter plural; and in general it may be added that the tendency to fluctuation increases in proportion to the lateness of the text.—See also, Johannes Schmidt, *Pluralbildungen der indogermanischen Neutra* pp. 259 seq., 98 seq.

§ 229. (1) The instrumental plural in *-biš, -āiš* is occasionally used in YAv. as general plural case, e. g. *azdbīš* (as acc. neut. Vd. 6.49)—*vīspāiš* (nom. Yt. 8.48), *sraēštāiš* (Yt. 22.9), *ǰrafstrāiš* (as acc. Ys. 19.2), etc.

§ 230. (2) The *an*-stems have also the neuter plural in *q(n)* sometimes used as general plural case, see § 308.

§ 231. (3) An ending *-iš, -uš* (like orig. fem. pl.) is sometimes employed in nouns and adjectives as general plural case, acc. as well as instr., e. g. GYAv. *nāmāniš* (as acc.) Yt. 1.11 and (as instr.) Ys. 51.22

=Ys. 15.2, YAv. *aŋaonīš* Vsp. 21.3, *savavhaⁱīš* Vd. 19.37; *vavhīš* Vsp. 6.1, GAv. *avavhūš* (as instr.) Ys. 12.4, *yātūš* Ys. 12.4.

§ 232. **Interchange of Neuter with Feminine forms.** Closely connected with this instability in the plural (especially neuter) is the interchange between neuter and feminine forms, as the neuter plural (occasionally also the singular) often shows the closest analogy to the feminine. Instances of this interchange are abundant, e. g. *a*-decl. *nmānəm* (nom. acc. sg. neut.) 'house', beside which *nmānā* (acc. pl., cf. fem.), *nmānāhu* (loc. pl., cf. fem.); *awrəm* (nom. acc. sg. neut.) 'cloud', *awrā* (nom. pl., cf. fem.).—*ah*-stem *avavhō* (gen. sg.) 'of aid', GYAv. *avaŋyāi* (dat. sg. fem.).—Similarly stem *barᵊzah-* (neut.) beside *barᵊzā-* 'height', et al. —Adjective combinations *tišarō sata* 'three hundred', *vīspāhu karšvōhu* 'in all climes', *sᵖrascaiŋtīš hvarᵊþā* 'steaming viands'. See also, Johannes Schmidt, *Pluralbildungen* p. 29 seq.

§ 233. **Interchange of cases in their functions.** The cases in their usage are not always so sharply distinguished in YAv. as in Sanskrit. Sometimes a case may take upon itself the functions that belong properly to another, e. g. dative in genitive sense, etc. A discussion of the question, however, belongs to Syntax.

§ 234. **Transition in Declension.** Transfers of inflection in parts of some words from one declension to another, especially in general from the consonant declension to the *a*-declension, are not infrequent in Avesta. A word may thus follow one declension in the majority of its cases, but occasionally make up certain of its forms quite after another declension. Examples are numerous and are of two kinds.

(a) The simple unchanged stem is used, but given the endings of another declension—much the commonest case, e. g. stem *jaiδyaŋt-* 'imploring' with dat. sg. *jaiδyaŋt-āi* (*a*-decl.) instead of **jaiδyaŋt-e; taciŋt-ąm* acc. sg. f., et al.

(b) The stem itself is remodelled and made to conform to another declension, thus really giving a new stem, e. g. *sravaḥ-* 'word' with instr. pl. *sravāiš* (stem *srava-*) instead of **sravəbiš* cf. gen. pl. *sravavhąm*. The case is much less common.

§ 235. **Stem-gradation.** In Avesta, as in Sanskrit—cf. Whitney, *Skt. Gram.* § 311—the stem of a noun or adjective, especially in the consonant declension, often shows vowel-variation, strongest, middle or strong, and weak forms,

ā, a, —,
-āy-, -ay-, -i-;
-āu-, -ao-, -u-;
-ār²-, -ar²-, -r-, -ər²-;
-āṇt-, -əṇt-, -at- [=ṇt];
-ān-, -əṇ-, -n-; etc. (cf. § 60).

The strong and strongest forms appear commonly in Singular Nom. Acc. Loc., in Dual Nom. Acc., and in Plural Nom., of the Masc. and Fem., and in the Plural Nom. Acc. of the Neuter. The remaining cases are weak, but there is much overlapping in this matter of stem-gradation. The distinctions are not always so sharply drawn as in Sanskrit.

With stem-gradation (Strong and Weak).

Cf. Whitney, *Skt. Gram.* § 385 seq.

§ 284. The strong and weak forms are distinguished by a variation in the quantity of the stem-vowel (as long or short) or by its elision, again by the presence (strong) or absence (weak) of a nasal. For examples see the following declensions.

§ 285. (i) Declension of Av. *vaŋhc-* m. 'voice, word' (strongest stem *-ā-*, strong *-a-*) = Skt. *vāṅhc-* f. (no vowel variation), cf. Whitney, *Skt. Gram.* § 391:—

Singular. Nom. *vāŋhš;* Acc. *vācəm, vācim;* Instr. *vaca;* Gen. *vacō* (Ys. 31.20).—Dual. *vāʒʒibyā-ca.*—Plural. Nom. *vācō, vaca* (ending *a* cf. vowel decl. § 224); Acc. *vācō, vacas-ca, vāca;* Dat. Abl. *vāʒʒibyō;* Gen. *vacąm.*

Note. (a) The dat. du. and pl. (pada-endings) seem to derive their *s* (*ʒ*) from the nom. sg. *vāŋhš.*—(b) Observe the form *vāŋhš* as gen. Ys. 8.1.

§ 286. (ii) Declension of Av. *aṗ-* f. 'water' (strongest stem *āṗ-*, strong stem *aṗ-*) = Skt. *áṗ-* f. (stems *āṗ-, aṗ-*) Whitney, *Skt. Gram.* § 393:—

Singular. Nom. *āfš*; Acc. *āp*ǝ*m, ap*ǝ*m-ca* § 19; Instr. *apā-ca*; Abl. *apaṯ, apāaṯ-ca* (*a*-decl.); Gen. *apō, apas-ca, āpō*; Loc. *aiⁱpya* (*-i* + *a* § 222).—Dual. *āpa, āpe* (Gah 4.5 *ā*-decl.).—Plural. Nom. *āpō, apas-ca* § 19; Acc. *apō, apas-ca, āpō*; Dat. *aiⁱwyō*; Gen. *apąm*.

Note. The dat. pl. *aiⁱwyō* is for orig. **abhyás* § 186.

§ 287. (iii) Declension of *aŋc*-stems (cf. Whitney, *Skt. Gram.* §§ 408, 409):—

Singular. Nom. *frąš* 'forward'; Acc. **nyδąŋcǝm* 'down'; Instr. *fraca* (? Yt. 10.118 *fraca āiti* [√*i*- + *ā*] cf. Skt. *prâcā*), *tarasca* 'across', cf. Skt. *tiraścā* instr. advbl. (Whitney § 309 d), *paⁿᵗᵛąŋca* 'advancing'; etc.

§ 288. Av. *paϑ-* m. 'path' = Skt. *path-* belongs partly here and partly under *an*-stems § 310—which see.

7. (B) Derivative Stems in *aŋt, maŋt, vaŋt.*

Participial Adjectives and Possessives (see Bartholomae, in *K.Z.* xxix. p. 487 seq. = *Flexionslehre* p. 68 seq.—Whitney, *Skt. Gram.* § 441 seq., § 452 seq.)

§ 289. This subdivision of consonant stems includes:—(i) participial (and adjective) stems in *aŋt*; and (ii) possessive adjective stems in *maŋt, -vaŋt*. They are masculine and neuter; the corresponding feminine is made in *aⁱ(ŋ)tī-*. The stem shows vowel-gradation, strong stem *aŋt*, weak stem *at* (from *n̥t*; also GAv. *āt*, see § 18 Note).

§ 290. As to stem-gradation, (1) the adjective *aŋt*-stems generally show *at* in the weak (= Skt. weak) cases, (2) the participial (thematic) *aŋt*-stems show *aŋt* in almost all forms. (3) The *maŋt-, vaŋt*-stems agree with the adjective stems in showing *at* in the weak cases. A number of interchanges, however, between all three occur—these interchanges are found chiefly in YAv. e.g. dat. du. *berᵊzanbya* (from str. st.) Ys. 1.11; 3.13.

Johannes Schmidt, *Neutra* pp. 89, 316, but see § 227 above.

As general plural case, *ąn* is also used: e. g. (as instr.) Av. *srīrāiš nāmąn* 'by fair names' Ys. 15.1, Vsp. 6.1; so *damąn* (as nom. pl.) Yt. 8.48, (as gen. pl.) Ys. 57.2, (as instr. pl.) Yt. 22.9.—As acc. pl. and gen. loc. singular *ayąn*.

§ 310. Declension of Av. *paṇtan-, paθ-* m. 'path' = Skt. *pánthan-, path-* m. cf. Whitney, *Skt. Gram.* § 433. This word follows partly the *an*-declension (strongest stem *paṇtān-*, strong stem *paṇtan-* § 299), partly the suffixless consonant declension (weak stem *paθ-* § 288).

Singular. Nom. *paṇṭa, paṇṭā* Ys. 72.11; Acc. *paṇṭānəm, paṇṭąm;* Instr. *paṇa;* Abl. *paṇtaṭ;* Gen. *paṇō;* Loc. *paiṇī* (GAv.).—Plural. Nom. *paṇṭānō;* Acc. *paṇō, paṇa;* Gen. *paṇąm.*

§ 311. Often, a neuter stem in *an* stands parallel with one in *ar,* see § 237, and Brugmann, *Grundriss der vergl. Gram.* ii. § 118.

(b) *van*-Stems.

§ 312. The *van*-stems are declined like those in *an, man,* but in the weak case-forms the *va* becomes (by samprasāraṇa § 63) *u,* which coalesces with a preceding *a* into *ao* (*āu* § 62) or with a preceding *u* into *ū* (*u* § 51 Note 1).

§ 313. (i) Declension of Av. *aṣavan-* m. 'righteous' = Skt. *ṛtávan-* shows in weak cases *aṣaon-, aṣāun* (i. e. GAv. and cf. § 62 Note 1).

Singular. Nom. *aṣva;* Acc. *aṣavanəm;* Dat. *aṣaone, aṣaonaẓ-ca, aṣāunē* (GAv. § 62 Note 1); Abl. *aṣaonaṭ;* Gen. *aṣaonō, aṣaonas-cā* (GAv.), *aṣāunō* (GAv.); Voc. *aṣāum* § 193.—Dual. Nom. Acc. Note 1. Similar to *aṣavan-* is (a) the declension of GAv. *magavan-* (str. st.), *magāun-* (wk. st.) m. 'member of the community', cf. Skt. *maghávan-, maghón-* Whitney, *Skt. Gram.* § 428;—and (b) the declension of Av. *āθravan-* (str. st.), *aθaurun-* (wk. st. §§ 62, 191) m. 'priest' = Skt. *átharvan-.* Observe Av. voc. sg. *āθraom* § 193.

Note 2. Transfers to the *a*-decl. are not infrequent: e. g. Dat. Du. *aṣavanaẓibya.*

§ 314. (ii) Declension of Av. *ᵘrvan-* (i. e. *ᵘruvan-* §§ 68 b and 71 end) m. 'soul'. This has in weak case-forms *ᵘrun-* (*ū* § 51 Note 1).

cf. Whitney, *Skt. Gram.* § 427.—Observe Av. voc. sg. *yum* opp. to Skt. *yúvan* (§ 193).—(b) Similar also in Av. *span-* (triple stem *spān-*, *span-*, *sūn-* § 20) m. 'dog' = Skt. *śván-* (*śvān-*, *śvan-*, *śún-*) m., cf. Whitney, *Skt. Gram.* § 427.—(c) Likewise Av. *zrvan-* n. 'time', dat. sg. *zrūne* Yt. 5.129.

Note 2. Transfers to the *a*-decl. are found:—e. g. gen. sg. *sūnahe* beside *sūnō*; again gen. sg. *zrvānahe* (stem *zrvāna-*), loc. *zrūne* Vd. 19.9 (stem *zrūna-*, but cf. § 35 Note 2 or § 233). So above dat. pl. *ᵘrvāiḥya* (variant *ᵘrvaēibyō*, after *a*-decl. instead of **ᵘrvabyō*).

§ 315. (a) Forms to be observed are: YAv. nom. sg. *taᵘrvā* (*van*-stem) 'overpowering', cf. Bartholomae, in *K.Z.* xxix. p. 561 = *Flexionslehre* pp. 141, 142. So sg. nom. *hrizafā*, acc. *ᵒanəm*, voc. *ᵒəm* (stem orig. **zafvan-* § 95.—GAv. nom. sg. *advā* (variant *advō*) m. Ys. 71.6 *dāma aṣaoniš*; as instr. pl. masc. Vsp. 21.3).

9. (D) Derivative Stems in *in*.

Masculine, Feminine and Neuter, (derivative adjectives), cf. Whitney, *Skt. Gram.* § 438 seq.

§ 316. The *in*-stems (few in number) are declined like those in *an*; cf. Brugmann, *Grundriss der vergl. Gram.* ii. § 115:—e. g. Av. *kaⁱnin-* f. 'maiden', et al.

I. MASCULINE—FEMININE. Note. On the interchange of *i*, *ī*, see § 21 Note 1.

10. (E) Radical *n*- and *m*-Stems.

§ 317. Here belongs the root *jan-* 'slay' as final element of a compound: Av. *vərᵊθrajan-* 'victorious' = Skt. *vṛtrahán-*, cf. Whitney, *Skt. Gram.* § 402. The stem shows triple forms *-jān-*, *-jan-*, *-jn-*.

Singular: Nom. *vərᵊθraja*, *vərᵊθrəm.jā* (GAv.), *vərᵊθrajō* (i. e. *-ā* [= *an*] + *s* § 222); Acc. *vərᵊθrājanəm*; Abl. *vərᵊθrajnaṭ*; Gen. *vərᵊθrajnō*, *vərᵊθrājanō*.—Plural: Nom. *vərᵊθrājanō*; Acc. *aṣva-janō*.

Note 2. Similar to *z²m-* is Av. *zyam-* m. 'hiems', Sg. Nom. *zyō, zyās-ciṭ*; Acc. *zyqm*; Gen. *zimō*; cf. Brugmann, *Grundriss* ii. § 160. Likewise Av. *dam-* 'domus', cf. GAv. gen. sg. *dīng*, loc. sg. *dqm*—see Brugmann, *Grundriss* ii. § 160.

11. (F) Stems in original *r*.

Masculine (Feminine and Neuter), cf. Whitney, *Skt. Gram.* § 369 seq.

§ 319. Here belong a limited number of nouns: (a) Derivative stems in orig. *-tar, -ar*—nouns of agency and nouns of relationship; (b) Radical stems in orig. *-ar*; (c) Derivative stems (indeclinable) in orig. *-ar*.

§ 320. Strong and weak case-forms.—Nouns of this declension show three stem-forms: strongest stem *ār*, strong stem *ar*, weak stem *r* (before vowels), *ər²* (before consonants). The (1) nouns of agency show the strongest form *ār* in acc. sg., nom. du., and nom. pl.; the (2) nouns of relationship show simply the strong form *ar* in those cases.—The strong and weak case-forms, however, do not always agree with the Skt. in its sharp division, cf. also Lanman, *Noun-Inflection in the Veda* p. 420 fin.

(a) Derivative Stems in *-tar, -ar*.

§ 321. These are divided with reference to the acc. sg., nom. du., and nom. pl. *ār* or *ar* into two classes:

(β) Stems in *-yah*.—Comparative Adjectives.

§ 345. The stems in *-yah* (Skt. *-yas* or *-īyas* § 68) are found in the comparative degree of adjectives. They show an original double form of stem for masculine and neuter: strongest stem *-yāh,* strong stem *-yah.* The superlative *-iš-ta* presents the weak stem. The Skt. has *-yāṣ, -yas, -iṣ-ṭha,* cf. Brugmann, *Grundriss* ii. § 135 Anm. 5.—The corresponding feminine form has *-yehī-* (i. e. strong stem + *ī*-declension § 257) e. g. Av. *aspō.staoyehīš* (nom. pl. fem.) 'greater than a horse'.—Cf. Whitney, *Skt. Gram.* § 463 seq.

NEUTER. **Singular: Nom.** YAv. observe *vauhō* 'melius' § 134, GAv. *vahyō* 'melius' § 132. On YAv. *aŝō*, GAv. *aŝyō* 'worse', see § 162.

(γ) **Stems in *-vah*.—Perfect Active Participles.**

§ 348. The stems in *-vah* are perfect active participles used adjectively. They show a double form of stem for masculine and neuter: strongest stem *-vaḫ*, weak stem *-uš*. The Skt. has *-vāṣ, -uṣ*, cf. Brugmann, *Grundriss* ii. § 136 Anm. 6.—The corresponding feminine form has *-uṣī-* (i. e. weak stem + *ī*-declension § 257) e. g. Av. *vīṗuṣi* (nom.), *vīṗuṣīm* 'knowing', see § 86 on *ṗ*.—Cf. Whitney, *Skt. Gram.* § 458 seq.

Forms to be observed in GAv. and YAv.

§ 350. **Singular: Nom.** YGAv. also (from weak stem) *mamnūš* 'having thought' Yt. 8.39, *vīṗuš* 'knowing' Vd. 4-54, *yaētuš* 'having striven', Haug,

(nom. as voc.) *vīspō.vīdvō* 'O all-knowing one' Vd. 19.26.—Plural: Uncertain whether acc. pl. or gen. sg. *daduṯō* Ys. 58.6.

Note. On the interchange of *d*, *d*, *þ* see §§ 82, 83, 86.

§ 351. Transfers to the *a*-decl. may be found: e. g. dat. pl. Av. *vīþuṯaēibyas-ca*.

(b) Radical Stems in *-h* (= orig. *-s*).

(α) Stems in *-āh* (= orig. *-ās*).

§ 352. To this division (masculine, feminine and neuter) belong simple nouns like Av. *māh-* m. 'moon' (Skt. *mās-*), *āh-* n. 'mouth' (Skt. *ās-*) and the compounds of Av. *-dāh-* 'giving, doing'. The forms have all the long vowel *ā* (*ă*).—Cf. Horn, *Nominalflexion im Avesta* p. 4 seq., and Lanman, *Noun-Inflection in the Veda* p. 493 seq.

MASCULINE—FEMININE—NEUTER.

§ 353. Av. *-𐬵𐬎𐬵𐬀* YGAv. *hudāh-*, *hudāh-* 'beneficent' = Skt. *sudās-*.

Av. *yās-* n. (metrically dissyllabic) 'decision', *akō.dāh-* 'maleficent'.

	Av.	Singular:	cf. Skt.
N.V.	*huđ-ā*		*sud-ās*
A.	*huđ-āvhəm*		*sud-āsam*
I.	*huđ-āvhā*		*sud-āsā*

A.	*huđ-āvhō*		*sud-āsas*
I.	*(huđ-āδbīš)* *akō.dāδbīš*		—
D.	*huđ-āδyō*		—
G.	*huđ-āvhąm*		*sud-āsām*

Forms to be observed in GAv. and YAv.

§ 354. Plural: Instr. and Dat. often show MS. authority for *°ābīš, °ābyā;* the form in *-ā-* above, apparently arises from orig. *ās* being treated as if final, i. e. before *°bīš, °byā* — pada endings.—Observe Nom. Pl. *zaraᵘzdā* (GAv.).

§ 355. Transfers to the *a*-declension occur: e. g. Singular: Nom. *māuhō* 'moon' Yt. 10.142 (cf. Skt. *mā́sas* nom.); Dat. *māuhāi;* Gen. *māuhahe* beside *māuhō;* Voc. *duzda* 'O malevolent one' § 234b.

Note. The acc. sg. *uši.dąm* 'giving understanding' nom. propr. is perhaps to be explained as formed after the radical *ā*-decl. § 250, cf. Skt. *vayó-dhā́m* — cf. Brugmann, *Grundriss* ii. § 134, 1², Lanman, *Noun-Inflection* pp. 555, 443, 446.

(β) Like radical *āh*-Stems.

§ 356. Declension of Av. *mazdāh-* f. 'wisdom, Mazda', Anc. Pers. *-mazdāh-* = Skt. *-médhas-*. This word like *ušāh-, ušah-*, § 357, is after all[1] best considered a contract noun, cf. dat. sg. GAv. (trissyllabic) *mazdāi* (i. e. *mazdā(h)-ē*); acc. sg. GAv. (trissyllabic) *mazdąm* (i. e. *mazdā(h)-am*); gen. sg. GAv. (trissyllabic) *mazdā* (i. e. *mazdā(h)-as*); nom. pl. GAv. (trissyllabic) *mazdāis-cā* (i. e. *°ā(h)-as*). The forms are as follows:—

Singular. Nom. *mazdā* (dissyllable GAv.); Acc. *mazdąm;* Dat. *mazdāi;* Gen. *mazdā, mazdāis-ca* (YAv.), *mazdāis-cā* (trissyl. GAv.); Voc. (*a*-decl.) *mazda* (YAv.), *mazdā* (GAv.).—Plural. Nom. Voc. *mazdāis-cā* (GAv.).

§ 357. Here may be added Av. *ušāh-, ušah-* f. 'dawn' = Skt. *uṣás-, uṣás-*.—Singular: Acc. *ušāvhəm, ušąm* (cf. Skt. *uṣā́sam, uṣásam, uṣā́m*).—Plural: Acc. *ušā* (cf. Skt. *uṣás*); Gen. *ušaŋhąm* (cf. Skt. *uṣā́sām*); Loc. *ušahva*.

Note 1. Parallel, are the sg. nom. acc. Av. *hvāpā, hvāpąm* 'beneficent' = Skt. *svápās, *svápām*.

Note 2. An instance of contraction in orig. *as*-stem § 339 similar to the above, seems to be the loc. sg. *zrayāi* (trissyllabic) 'in the sea' Yt. 5.4; 8.31 (= *zraya(h)e* like *vaējahe, arᵉzahe*). But another explanation for *zrayāi* may be suggested: viz. mistake in writing *āi* for *ahi* due to Pahlavi script.—See further, § 341.

Note 3. Transfer to the *a*-declension, sg. nom. *hvāpō* 'beneficent'.

(c) Derivative Stems in *-iš, -uš*.

§ 358. The examples are not numerous. The words are chiefly neuter. There is no vowel-gradation.—Cf. Whitney, *Skt. Gram.* § 414.

§ 359. Av. *sna²pīš-* n. 'weapon'.—**Singular:** Nom. Acc. (neut.) *sna²pīš;* Acc. (masc. adj.) *nidā.sna²pīžəm* 'having weapons laid down'; Instr. *sna²pīša;* Gen. *hadiš-as-ca* 'of the abode'; Loc. *vipīši* 'at the judgment' (Geldner).—**Dual:** Instr. *sna²pīžbya.*—**Plural:** Gen. *sna²pīšąm.*

Note. Transfers to the *a*-decl. occur: e. g. sg. gen. *hadišahe* 'of the abode'.

§ 360. Similar are the *uš*-nouns: Av. *ar²duš-* n. 'assault, battery'.—**Singular:** Nom. *ar²duš;* Instr. *ar²duša;* Loc. *tanuši* 'in person'.—**Plural:** Gen. *ar²dušąm.*

ADJECTIVES.

Feminine Formation—Comparison.

§ 361. The declension of adjectives, as agreeing exactly with that of nouns, is treated above.

§ 362. **Feminine Formation.** The adjective *a*-stems masc. neut. form their corresponding feminine in *-ā* or *-ī*. The consonant stems and *u*-stems show regularly the fem. in *-ī*, before which the adjective stem usually appears in its weak form.

(1) With *-ā:* Av. *haurva-* (m. n.), *haurvā-* (f.) 'whole'; *sūra-* (m. n.), *sūrā-* (f.) 'mighty'; *uγra-* (m. n.), *uγrā-* (f.) 'strong'; *aspa-* (m.) 'horse', *aspā-* (f.) and *aspī-* (f.) 'mare'.

(2) With *-ī:* Av. *rava-* (m. n.), *rəvī-* (f.) 'broad, smooth'; *spitāma-* (m. n.), *spitāmī-* (f.) 'belonging to Spitama'; *daēva-* (m. n.), *daēvī-* (f.) 'devilish'.—*aşavan-* (m. n.), *aşaonī-* (f.) 'righteous'; *bərəzaṇt-* (m. n.), *bərəzaitī-* (f.) 'high, great'; *vīdvah-* (m. n.), *vīdušī-* (f.) 'knowing'; *dātar-* (m.), *dāθrī-* (f.) 'giving, giver'; *θrātar-* (m.), *θrāθrī-* (f.) 'protector, nurturer'; *vanhu-* (m. n.), *vanhī-* (f.) 'good'; *driγu-* (m. n.), *drīvī-* (f.) 'poor' § 187.

---

[1] For different views on the subject see Horn, *Nominalflexion im Avesta* p. 5; Brugmann, *Grundriss der vergl. Gr.* ii. § 133[2], but ii. § 134, 1[2].

§ 363. **Comparison of Adjectives.** In Avesta as also in Sanskrit, there are two ways of forming the comparative and superlative degrees of adjectives:—(1) *-tara-, -təma-* and (2) *-yah-, -išta-* added to the stem. The corresponding feminine to these is *-tarā-, -təmā-* and *-yehī-* (§ 34), *-ištā-* according to rule, § 362.

(1) *-tara-* (comparative), *-təma-* (superlative).

§ 364. Before *-tara-, -təma-*, adjectives whose stem ends in *a* appear commonly in the form *ō* as in noun compounds. The *a*-stems may, however, retain *a* unchanged, as in Sanskrit. Other stems commonly remain unchanged, appearing in the weak form if they have one.

baēšazya- 'healing',	*baēšazyōtara-,*	*baēšazyōtəma-*
srīra- 'fair',	*srīrōtara-,*	—
aka- 'bad',	*akatara-,*	—
huyašta- 'well-sacrificed',	*huyaštara-,*	—
hubaoiδi- 'sweet-scented',	*hubaoiδitara-,*	*hubaoiδitəma-*
ašaojah- 'very strong',	*ašaojastara-,*[1]	*ašaojastəma-*
yāskərᵊt- 'energetic',	*yāskərᵊstara-,*[2]	*yāskərᵊstəma-*
amavant- 'strong',	*amavastara-,*[3]	*amavastəma-*
yaētvah- 'having striven',	—	*yaētuštəma-*

(2) *-yah-* (comparative), *-išta-* (superlative).

§ 365. Before *-yah-, -išta-*, the adjective reverts to its original simple crude stem without formative suffix:

maz- 'great',	*mazyah-,*	*mazišta-*
mas- 'great',	*masyah-,*	—
vanhu- / *vohu-* 'good',	*vahyah-* (GAv.), *vanhah-* (YAv.),[3]	*vahišta-*
āš-u- 'swift',	*āšyah-,*	*āšišta-*
ak-a- 'bad',	*aŋyah-* (GAv.), *aŋah-* (YAv.),[4]	*acišta-*

[1] Cf. § 109.—[2] § 151.—[3] §§ 132, 134.—[4] § 162.

Note 1. Some few adjectives, in appearance at least, show both forms of comparison, as above *aka-* 'bad', *akatara-*, and to this also (cf. Note 2) *aǰyah-*, *acišta-*; so superlative *ašaojišta-* beside *ašaojastara-*, *ašaoyastəma-* to *ašaojah-* 'very strong'.

Note 2. As seen also above, comparatives and superlatives may be more or less mechanically attached to a positive of similar meaning and containing the same crude stem, see § 365: e. g. to *taŋ-ma-* 'strong', the comparative *taŋǰyah-*, superl. *taŋcišta-* beside *taŋmōtəma-*, et al.

Note 3. The *an*-stems sometimes follow the analogy of *ant*-stems in their comparison: e. g. *vərᵊθravan-* 'victorious', comparat. *vərᵊθravastara-*, superl. *vərᵊθravastəma-*; *aǰavan-* 'righteous', *aǰavastəma-*; *vərᵊθrajan-* 'victorious', *vərᵊθrajaŋstara-*, *vərᵊθrajaŋstəma-*.

Note. Observe, the common forms Av. *þrisata-* '30' and *caþwarᵊsata-* '40' arise from transfer of *þrisat-* etc. to the *a*-decl. The strong form *þrisaṇt-* is to be sought in *þrisąs* (orig. nom. but crystallized form), etc.

§ 368. In composite numbers the lesser numeral precedes, and *ca—ca* connects the terms: e. g. Av. *paŋcāca vīsatica* '25'; *þrayasca þrisąsca* '33'; *paŋcāca caþwar²satəmca* '45', etc.

Note. The first member is sometimes put in the sociative instrumental case; e. g. Av. *nava.satāiš hazaurəmca* 'one thousand and nine hundred'.

§ 376. Multiplicative Adverbs: Suffix *-vaŋt*—Av. *bižvaŋ* 'two-fold'; *þrižvaŋ* 'three-fold'; *vīsaⁱtivō* 'twenty-fold' (nom. masc.); *þrisaþwō* 'thirty-fold'; etc.—Suffix *-þwa:* e. g. *þrisata-þwəm* 'thirty-fold'; etc.

Note. Here also might be added a number of other words *þriždva-* 'a third' et al.; but they belong rather to the dictionary.

PRONOUNS.

§ 377. Pronominal declension in Avesta agrees in its main outlines with the Sanskrit. A synopsis of the Pronouns in Avesta may be given as follows:—

SYNOPSIS OF PRONOMINAL-DECLENSION.

A. Gender not distinguished.

1. Personal
   a. First person *azəm*.
   b. Second person *tūm*.
   c. Third person, *hē* and other forms.

B. Gender distinguished.

2. Relative — Pronoun *ya-*.

3. Interrogative — Pronoun *ka-*.

(Indefinite.)

4. Demonstrative
   a. Demonstrative *ta- (hvō)*.
   b. Demonstrative *aēta-*.
   c. Demonstrative *aēm (a-, i-, ima-, ana-)*.
   d. Demonstrative *ava- (hāu)*.

5. Other pronominal Words and Derivatives.

(Possessive).

(Reflexive).

(Adjectives declined pronominally).

§ 378. **General Remark.** Most of the pronouns in Avesta are closely parallel with those in Sanskrit, and like the latter they show also many marked peculiarities. They are generally made up by combining a number of different stems. The principal points to be observed in regard to their inflection are the following:

i—ii. MASCULINE—NEUTER.

§ 379. **Singular:—**

Nom. Acc. Neut.: Commonly the suffix *-ŧ* = Skt. *-t (d)*.—Sometimes in later texts of the YAv. instead of *-ŧ*, the ending *-m*, like the neuter ending of the noun-declension, is found: e. g. *yim*, *aom*.

Dat. Abl. Loc.: Show an inserted element *-hm-* = Skt. *-sm-*.—The dat. sg. of the two personal pronouns ends in *-bya (-vya)*, *-byō* = Skt. *-bhya(m)*, Whitney, *Skt. Gram.* § 492 a.—The loc. sg. in YAv. may take postpositive *a* as in the noun-declension, see § 222.

§ 380. Plural:—

Nom. (Acc.): The pronominal *a*-stems make this case end in *e*. This form in *e* often serves also as accusative.

Gen.: Shows *-šąm* = Skt. *-śām*.—The 'genitives' *ahmākəm*, *yūšmākəm*, *yavākəm*, as in Skt., are really crystallized cases nom. acc. neut. of possessives.

Loc.: In YAv. the loc. pl. may take postpositive *a* as in the noun-declension, see § 224. Similarly also in fem. loc. pl.

iii. FEMININE.

§ 381. Singular:—

Dat. Abl. Gen. Loc.: Show an inserted element *-hy- (-hy-)*, *-ŋh-* = Skt. *-sy-*.

§ 382. Plural:—

Gen.: Shows *-vhąm* = Skt. *-sām*.

§ 383. **Interchange of Neuter with Feminine Forms.** As in the nouns § 232, so also in the pronouns the neuter plural often assumes the form of the feminine or rather interchanges with it.—See also Johannes Schmidt, *Pluralbildungen der indogerm. Neutra* pp. 21, 260, etc.

Note. In formulaic passages, especially in the Yashts (e. g. Yt. 5.13,15), masc. forms *yeŋhe*, *aiŋhe*, *ahmāi* are sometimes used instead of the proper fem. forms. This arises from the mosaic character of such passages.

§ 384. **General Relative Case** is found in YAv. in the instances of *yāiš* as plural, cf. § 229.—For the treatment of *yō*, *yaţ*, *yim* as stereotyped case (plural and singular) see under Syntax.

A. GENDER NOT DISTINGUISHED.

1. Personal Pronouns.

§ 385. The first and second personal pronouns, as in Skt., show many peculiarities and individulities of inflection. Some cases also use two forms, a fuller and a briefer form, according to the position of the pronoun in

the sentence, whether accented, unaccented, or enclitic. Furthermore, on the third personal pronoun, see § 394 seq.

§ 386. (a) **First Person**, Av. 𐬀𐬵𐬌 *azəm* 'I' = Skt. *ahám*.

Forms to be observed in GAv. and YAv.

§ 391. GAv. has in general the same forms as YAv., but shows also a number of peculiarities to be marked; these are likewise sometimes found in YAv., perhaps borrowed.

§ 392. **Singular:**—

Nom.: GAv. *tvəm* (cf. §§ 32, 93 Note 1), *tū.*

Dat.: GAv. *taⁱbyā* (above), also *taⁱbyō*, and (encl.) *tōi.*

[2] Ys. 43.10.

[3] Fr. 6.1 and Haug, *ZPhl. Glossary* pp. 3, 46, see § 68 Note 3, cf. Skt. *yuvākú*, see § 380.

§ 394. (c) **Third Person**, Av. 𐬵𐬀 (𐬵𐬁) *hē (šē)* and other forms.

The proper third personal pronoun *hīm, hē* etc. (enclitic) is defective; its deficiencies are partly supplied by the demonstrative pronoun, and partly by enclitic forms of *di-, i-* used with personal force. These latter show distinction of gender, but they may best be included here.

§ 395. The following forms of the proper third personal (often used anaphorically, sometimes used reflexively, see also § 416) occur in GYAv.; they are all enclitic:

Singular. Acc. *hīm* (GYAv.); Dat. Gen. *hē* or *ȳē* § 155 (YAv.), *hōi* (GAv.).—**Dual.** N.A.V. *hī* (GAv.).—**Plural.** Acc. *hīš* (GYAv.).

Note 1. The form *hē* dat. gen. sg. seems in some passages in YAv. to serve as plural. See under Syntax.

Note 2. With the above Avesta forms compare Skt. acc. sg. *sīm;* Prakrit dat. gen. *sē*—all enclitic. See Wackernagel in *K.Z.* xxiv. p. 605 seq.

§ 396. Similar to *hē* in usage are the forms from stem YAv. *di-*—likewise enclitic:—

Sg. Acc. *dim* m. f.; *diṯ* n.—**Pl.** Acc. *dīš* m. f.; *dī* n. Vs. 65.8.

§ 397. Of like usage (cf. also § 422), is stem G(Y)Av. *i-* enclitic—sometimes employed almost pleonastically:—

Sg. Acc. *īm* m.; *īṯ* n. (GAv.), *ȳṯ* (YAv., particle).—**Du.** N.A.V. *ī.*—**Pl.** Nom. *ī* n.; Acc. *īš* m.; *ī* n.

§ 398. On *hvō, hvāvōya* used as personal (and reflexive) see §§ 416, 436 Note 3.

B. GENDER DISTINGUISHED.

2. Relative Pronoun.

§ 399. **Relative** Av. 𐬬𐬀 *ya-* 'who, which' = Skt. *yá-*.

The relative stem *ya-, yā-* = Skt. *yá-, yā́-*, shows the following forms.—Cf. Whitney, *Skt. Gram.* § 508.

i. MASCULINE—NEUTER.

Forms to be observed in GAv. and YAv.

§ 400. GAv. has generally the same forms as YAv., but shows also some peculiarities to be marked; these are occasionally found likewise in YAv., perhaps borrowed.

i. MASCULINE—NEUTER.

§ 401. Singular:—

Nom.: YAv. *yas-ca, yasᵉ tē.*—In YAv. (commonly in late passages, but cf. Yt. 10.119) the form *yō* is sometimes found as general relative case, cf. § 384, and under Syntax.—GAv. *yā, yas-cā* (also YAv. borrowed *yā*, cf. § 400).

Acc.: GAv. *yīm, yim*, see §§ 32, 30.

Abl.: YAv. also *yahmāṯ*, on *ā* see § 19(b).—GAv. once adverbial *yāṯ* Vs. 36.6 = Ys. 58.8, like Skt. *yāt*, cf. Whitney § 509a.

§ 402. Plural:—

Acc.: GAv. *yəŋg, yəŋgs-tū, yąs-cā*.

Instr.: YAv., *yāiš* commonly occurs as general plural case, cf. § 384.

Dat. Abl.: GAv. *yaēibyas-cā*.

ii. NEUTER.

§ 403. Singular:—

Nom. Acc.: YAv. also *yim* like neut. noun-declension, but generally in late passages.—On *yas-ca* = *yaṯ-ca* see § 151 Note.—GAv. *hyaṯ* (variants *yaṯ, yiaṯ*, e. g. Ys. 28.9, 30.6 etc.).

§ 404. Plural:—

Nom. Acc.: YAv. also neut. (like fem. § 383) *yā*.

iii. FEMININE.

§ 405. Plural:—

Nom. Acc.: YAv. *yās-ca*.—Also rare (like neut.) *yā*, cf. Ys. 10.78.—GAv. *yās-cā*.

---

3. Interrogative Pronoun.

§ 406. Interrogative Av. *ka-* 'who, which, what?' = Skt. *ká-*.

The interrogative *ka-, kā-* = Skt. *ká-, kā́-*, is identical in inflection with the relative and requires no full paradigm to be given.—Cf. Whitney, *Skt. Gram.* § 504.

i. MASCULINE—NEUTER.

	Av.	Singular:	cf. Skt.
N.	*k-ō*		*k-ás*
A.	*k-əm* etc.		*k-ám*

ii. NEUTER.

Sg.	N.A.V. *k-aṭ* etc.		*k-át*

iii. FEMININE.

Sg.	N.	*k-ā* etc.	*k-ā́*

Note. YAv. also an instr. sg. *kana* = Skt. *kéna* beside Av. *kā.*—YAv. also dat. *cahmāi* (indef.) beside *kahmāi;* GAv. *cahyā* beside *kahyā.*—YAv. as gen. pl. (or perhaps fem. sg. form = neut.) *kąm* m. f.

§ 407. Some special forms of interrogative are worthy of note.

1) Stem *ki-, ci-* 'quis':—Sg. Nom. (m. f.) *cīš*, cf. Skt. *ná-kis;* Acc. (m. n.) *cim, cīm*, cf. Skt. *kím.*—Pl. Nom. (m. n.) *kaya, cayā.*—Neut. also Sg. Nom. Acc. *ciṭ, cīṭ.*

2) Stem *kati-, cati-* 'what, how much':—Sg. Acc. (neut.) *caiti* = Skt. *káti.*

Note. Here also Av. *cina-* 'what'.—Likewise some forms of the interrogative used adverbially:—e. g. *kaṭ* 'how, nonne?'.—*cā* 'how'. Perhaps *kəm* Vd. 17.1 (?).—Uncertain *cyaoxaṭ* 'how' Ys. 44.12 abl. (?) or *ci-aoxaṭ* doubtful.

Indefinite.

§ 408. The indefinite force is usually given in Av., as in Skt., by combining a particle *-ciṭ, -cīṭ* = Skt. *-cit, -ca, -caṭ* etc., with the interrogative or relative. Sometimes it is added by the particle *-cina* (*-cana* Afr. 3.7 = Skt. *-caná*), which is likewise attached to nouns and adjectives; sometimes, again, reduplication of the pronoun (rel. interrog.) gives an indefinite or a distributive force.

Av. *kahmāiciṭ* 'to whomsoever' = Skt. *kásmāicit;* Av. *kaϕacina* 'howsoever, in any way'; *cayascā* 'qui-

cunque' Ys. 45.5, *cīcā* 'quaecunque' Ys. 47.5 (fr. *ci* + *ca*); *yaϑa kaϑaca* 'even as', *kaϑmi kaϑmicit* 'in any case whatever', et al.

Note. Indefinite negatives are Av. *naē-ciš* 'no one' = Skt. *nā-kis*; Av. *mā-ciš* (imperative) 'no one' = Skt. *mā-kis*.

4. Demonstrative Pronouns.

§ 409. (a) Demonstrative Av. *ta-* 'this' = Skt. *tá-*

The demonstrative stem *ha-, hā-, ta-* 'ὅ, ἥ, τό' = Skt. *sá-, sā-, tá-*, serves also as personal of the third person.— Cf. Whitney, *Skt. Gram.* § 495.

§ 411. **Singular:—**

Nom.: YAv. *has-cit.*—Observe *hā* Vsp. 12.1 = Skt. *sá*, Whitney, *Skt. Gram.* §§ 498, 176a, also Av. *aēša* § 418.—GAv. *hē* Ys. 58.4, *hā-cā* Ys. 46.1; cf. also at Vsp. 12.1, Ys. 27.6; YAv. (Gāthā reminiscence?) *hā-ca.*

Note. In oldest GAv., *hvō* takes the place of demonstr. *hō*, which form does not occur in the metrical Gāthās.

§ 417. (b) **Demonstrative** Av. 𐬀𐬉𐬙𐬀 *aēta-* 'this' = Skt. *etá-*.

The demonstrative *aēšą-, aēšā-, aēta-* 'this, here' = Skt. *ēṣá-, ēṣā́-, ētá-*, is identical in declension with *ha-, hā-, ta-* from which it is derived by prefixing *aē-* which makes it the nearer demonstrative. The only GAv. form noted is

§ 422. (c) **Demonstrative** Av. 𐬀𐬉𐬨𐬵 *aēm* 'this' = Skt. *ayám*.

The demonstrative *aēm*, as in Skt., is made up from defective stems *a-, i-, ima-, ana-* = Skt. *a-, i-, ima-, ana-* combined to fill out a complete declension.

It is to be observed (in GAv. it is evident) that beside the accented forms, there occur likewise unaccented forms (not found at beginning of a pada). These forms generally come from the brief stem.

5. Other Pronominal Words and Derivatives.

Possessive—Reflexive, Pronominal Derivatives and Adverbs.

§ 434. Under the above head belong the possessives and a number of words which have chiefly the nature of

[1] i. e. **avəm*, § 63.

adjectives and are inflected partly according to the pronominal declension, partly according to the nominal. They answer in general to corresponding forms in Sanskrit.—Cf. Whitney, *Skt. Gram.* § 515 seq.

Possessive — Reflexive.

§ 435. Here may be enumerated as connected with the personal pronoun, the following possessive (and reflexive) forms:—Av. *ma-* 'meus', *θwa-* 'tuus', *hva-*, *ẖwa-*, *ẖava-* (reflexive) 'suus', *ahmāka-* 'our', *yūšmāka-*, *ẖšmāka-* 'your'.—*mavaṇt-* 'like me', *θwāvaṇt-* 'like thee', *yūšmāvaṇt-*, *ẖšmāvaṇt-* 'like you'.—*ẖaēpaiθya-* 'own'.

Other Pronominal Derivatives and Adverbs.

§ 436. The following derivatives may further be noted:—Relative, *yavaṇt-* 'how much', *yatāra-* 'which of two'.—Interrogative, *cvaṇt-* 'how much?', *katāra-* 'which of two?'.—Demonstrative, *aētavaṇt-* 'so much', *avaṇt-* 'that, such', *avavaṇt-* (*avaṇt-* § 194) 'so much'.—Likewise here, numerous pronominal adverbs *ya-θa* 'how, as', *ka-ða* 'how, when?', *cū* 'how?', *i-ða* 'here', etc.

Note 1. Here observe Av. *hatō* 'reciprocally, each other' = Skt. *svátas*.

Note 2. On *hvō* 'ipse, ille' as personal pronoun, see §§ 398, 416.

Note 3. From same stem as *hvō* (in Note 2) comes the interesting reflex. dat. *hvavōya* 'self' (like *māuōya* § 388), cf. Lat. *s(v)ibi*.

Note 4. From an assumed demonstrative stem *tva-* comes the neut. adverb *θwaṭ* 'then again' Ys. 44.3 = Skt. *tvat*.

Note 5. Instances of GAv. *ahyā* gen. of demonstr. (= pers.), from *aēm* § 422, instead of the reflex. possessive, occur.

Declension of Pronominal Derivatives.

§ 437. In regard to inflection, the pronominal derivatives follow partly the pronominal declension and partly the nominal. The following forms of the possessives (reflexive), and of the demonstrative derivatives declined according to the pronominal declension are worthy of note.

§ 438. i. Declension of the possessive pronoun GAv. *ma-* 'meus'.

i—ii. MASC.—NEUT. Sg. Nom. *mō;* Dat. *mahmāi;* Gen. *mahyā.*—Pl. Acc. (Neut.) *mā.*—iii. FEM. Sg. Gen. *mahyā* (§ 133).

§ 440. iii. Declension of GYAv. *hva-, ha-* (*hava-*) 'suus' = Skt. *svá.*—GAv. has only -שו, YAv. -שו (from GAv.), -שוי and -שויי.

i—ii. MASC.—NEUT. Sg. Nom. *hō* (GAv.), *hvō* (YAv.); Instr. *hā;* Gen. *hahe;* Loc. *hahmi.*—Du. Acc. *hva.*—Pl. Instr. *hāiš;* Loc. *haēšu* (? emended Fn. 4.2).—iii. FEM. Nom. *haē-cā* (GAv.), *hva* (YAv.); Dat. *hahyāi.*

Note 1. From the by-form *hava-* come: Masc. Neut. Sg. Nom. *havō;* Acc. *haom* (§ 64); Instr. *hava;* etc. regularly according to nominal declension (§ 236 *a*-decl.).—Fem. Sg. Nom. *hava;* Acc. *havąm;* Dat. *havayāi* with variant *haoyāi* (§ 62, 2); Gen. *havayō* beside *haoyō* (§ 62, 2).

Note 2. The possessives *ahmāka-* 'our', *θwāvaŋt-* 'like thee' etc. follow the noun-inflection.

Note 3. Observe that *ahmākəm, yavākəm, yūšmākəm* employed as 'genitives' of the personal pronoun §§ 386, 390, are really stereotyped cases of possessive adjectives, as similarly in Skt. *asmākam, yavāká, yuşmākam.*

§ 441. iv. Declension of the demonstrative derivative *avaŋt-* 'that, such', from stem *ava-* § 430. This is to be distinguished from *avavaŋt-* (*avaŋt-* § 194) in § 442.

MASC. Sg. Nom. *avō.*—Pl. Dat. Abl. *avaθbyō.*—NEUT. Sg. Nom. Acc. *avaţ* above in paradigm.

§ 442. v. Declension of the demonstrative derivative *avavaŋt-* (*avaŋt-* § 194, cf. variants) 'so great'—to be distinguished from *avaŋt-* § 441.

Sg. Nom. (neut.) *avavaţ;* Acc. (masc.) *avāŋtəm* (§§ 194, 44) and *avavaŋtəm* (neut. adv. *a*-decl.); Instr. *avavata;* Gen. *avavatō.*—Pl. Gen. *avavatąm.*

Adjectives declined pronominally.

§ 443. A few adjectives in Av., like their corresponding Skt. equivalents, also follow the pronominal declension wholly or in part. Cf. Whitney, *Skt. Gram.* § 522 seq.— Instances are: Av. *aēva-* 'one, alone'; Av. *anya-* 'other' = Skt. *anyá-*; Av. *vīspa-* 'all' = Skt. *víśva-*.

For example: Pl. Nom. Acc. m. *vīspe, vīspā* (pronominal) beside Nom. m. *vīspāuhō*; Acc. *vīspāṣ-ca* (YAv.), *vīspąs-cā, vīspāŋg* (G̃Av.) i. e. nominal declension; — Gen. *vīspaēšąm* (pronominal) beside *vīspanąm* (nominal); et al.

CONJUGATION,

VERBS.

§ 444. The Avesta verb corresponds closely to the Sanskrit in form, character, and in usage. The Av. texts, however, are not so extensive as to give the verb complete in all its parts; some few gaps in the conjugation-system therefore occur.

Modelled after the Sanskrit, the Avesta verbal system may be presented as on the next page.

§ 445. **Voice, Mode, Tense.** The Av. agrees with the Skt. — especially with the language of the Vedas — in voices active, middle (passive), in tenses present (and preterite), perfect (and pluperfect), aorist, future, and in modes indicative, imperative, subjunctive, optative. In usage likewise these generally correspond with the Sanskrit.

Note 1. The middle voice, as in Skt., is often used with a passive force. A formative passive, as in Skt., however also occurs (cf. V. n).

Note 2. Under tenses, observe that 'injunctive' or 'improper subjunctive' is a convenient designation for certain forms of augmentless preterites used with imperative force. These are enumerated under the simple preterite. Cf. Whitney, *Skt. Gram.* § 563.

§ 446. **Infinitive, Participle.** Like the Skt., the Av. conjugation-system possesses also infinitive forms (abstract verbal nouns) and participial forms (active and middle in each tense-system) and gerundives. See VI below.

§ 447. **Person, Number.** The Av. like the Skt. distinguishes three persons, and three numbers.

Note. It is to be observed that the first persons imperat. are supplied by subjunctive forms.

Some individual peculiarities of form occur in (c) the imperative and in (d) the perfect; the endings, therefore, of the latter two also are separately enumerated.

General Remarks on the Endings.

§ 449. In general, GAv. has the same forms as YAv. above, with the long final vowel wherever possible, cf. § 26; but there are also a number of peculiarities to be remarked upon in connection with GAv. as well as with reference to YAv.

[1] Sporadic, cf. § 457.

Note. Observe that Av. 3 du. is in form often like Skt. 2 du.: e. g. Av. *-ẖō* (beside *-tō*) 3 du. pres. act. = Skt. *-tas* 3 du. (but *-thas* 2 du.); —again Av. *-ṯəm* 3 du. pret. act. = Skt. *-tām* 3 du. (but *-tam* 2 du.), et al.—Compare the Homeric interchange of -τον, -την in secondary tenses.

a. Primary Endings (Observations).

§ 450. Singular:—

First Person: i. ACTIVE. Indicative. GYAv. also *-ā*, *-a*—i. e. GAv. has *-ā* regularly in the thematic or *a*-conjugation pres. indic., and *-mī* in the unthematic or non-*a*-conj. pres. indic.; but in YAv. this distinction is not sharply drawn.—Subjunctive. YAv. *-ni*, *-a*, GAv. *-nī*, *-ā*.—ii. MIDDLE. Indicative. GAv. also *-āi* (§ 56, beside *-ē*).—Subjunctive. GYAv. *-nē*, *-ne*, *-āi* (i. e. *ā* + *ē*).

Second Person: i. ACTIVE. Subjunctive. In later texts of YAv. *-ā(h)i* sometimes drops its *h* and becomes *-āi*, e. g. YAv. *yasāi* 'mayest thou worship' Yt. 10.140.—ii. MIDDLE. Indicative. YAv., observe *-ṣe* (after *-ā [-t]* §§ 151, 186) *raoṣe* 'thou growest' Ys. 10.4.—GAv. also indic. subjunct. *-ẖōi* § 56.

Third Person: ii. MIDDLE. GYAv. also (but not common; cf. also perf. below) like 1 sg. *-e* = Skt. *-ē* beside *-tē*.

§ 451. Dual:—

Third Person: i. ACTIVE. YAv., observe *-ẖō* in *yāidyaẖō* 'they both fight' Yt. 8.22, a 3 du.-form (like Skt. *-thas* 2 du.-form) beside *-tō* above, see § 449 Note.—ii. MIDDLE. YGAv. occasionally *-te* or *-aite* e. g. *baraite* 'they two bring' *ZPhl. Gloss.* pp. 54. 8 = 107. 13, *vərənvaiṯē* 'both believe' (indic.) Ys. 31.17.—Again *-ītē*, GAv. *jamaētē* 'they both may come' (aor. subjunct.) Ys. 44.15.

§ 452. Plural:—

First Person: ii. MIDDLE. YAv. only occasionally is the MS. variant *-maiḍe* (observe *ḍ*) is noted.

Second Person: ii. MIDDLE. GAv. regularly *-duyē* = Skt. *-dhvē* § 190.

Third Person: i. ACTIVE—ii. MIDDLE. Indicative. YGAv. occasionally have in the 3 pl. of the non-*a*-conjugation (unthematic) the form *-aiti* (i. e. *-ṇti*) or even *-āiti* = Skt. *-ati* in the active, and *-aitē* (i. e. *-ṇtē*) = Skt. *-atē* in the mid.; but more commonly in the non-*a*-conj. (unthematic) the ending *(-aṇti) -ṇti*, *(-aṇtē) -ṇte* of the *a*-conj. (thematic) is assumed instead.—Uncommon in the pres. is *-re*, cf. indicative *sōire* 'they lie down' Yt. 10.80 = Skt. *śēre* Whitney, *Skt. Gram.* § 629, and subjunctive *mravāire* 'they may say' Yt. 13.64, *nigrāire* 'they may throw' Yt. 10.40, cf. §§ 486, 521.

b. Secondary Endings (Observations).

§ 453. Singular:—

First Person: ii. MIDDLE. Observe that the normal ending *i* coalesces with the final of an *a*-stem into *-e:* e. g. *aguze* 'I hid myself' opp. to *aojī* 'I spake'.—The ending *-a* is found in the optative.

Second Person: i. ACTIVE. The normal ending *-s* unites with *a* in the *a*-conj. and gives *-ō* (*-ā* subjunct.); the *s*-form occurs according to rule § 156.—ii. MIDDLE. YGAv. notice the suffix is *-sa* (cf. Gk. *-σο*) contrasted with Skt. *-thās*.

Third Person: i. ACTIVE. YGAv., orig. *t* is retained (unchanged to *-š*) after *s* (*š*), e. g. *məist* 'he turned', *cāišt* 'he promised', §§ 81, 192. —Notice *āṣ* (i. e. *āṣ-t*) 'he was' and *cinaṣ* 'he promised' § 192 Note.

§ 454. Dual:—

Third Person: i. ACTIVE. YAv., observe that the 3 du. Av. *-təm* is in form like the 2 du. Skt. *-tam*—on this interchange in form between 3 du. and 2 du. see § 449 Note.—ii. MIDDLE. YGAv., note Av. *-ātəm* opp. to Skt. *-ātām*, see again § 449 Note.—Again (like primary 2 du., but) with secondary meaning YAv. *-āiϑe* = Skt. *-āthē* and some other forms—see Bartholomae, *K.Z.* xxix. p. 286 seq. = *Flexionslehre* p. 17 seq.

§ 455. Plural:—

First Person: ii. MIDDLE. Observe that GAv. has a proper secondary ending *-maⁱdi* (cf. opt. *vaⁱrīmaⁱdi*) = Skt. *-mahi*, but YAv. substitutes for this *-maⁱde* drawn from the present.

Second Person: ii. MIDDLE. GAv. shows *-dūm* = Skt. *-dhvàm*, § 63.

Third Person: i. ACTIVE. In redupl. formations GAv. has occasionally an unthematic 3 pl. pret. in *-aẓ* (i. e. *-yt*) corresponding to the occasional *-nti* = *-yti* of the pres., e. g. *zazaẓ* 'they drove away', et al. —GYAv., remark also opt. *-ārᵊš*, *-ārᵊ*, thus *buyārᵊš* 'they would be', *hyārᵊ* beside *hyąn*. Also *-arᵊ* aor. pret. GAv. *ādarᵊ* 'they made' Ys. 43.15 = Skt. *ádur;* YAv. *aškarᵊ* 'they elapsed' Vd. 1.4, cf. Whitney, *Skt. Gram.* § 834 b (perhaps best as pluperf.).

c. Imperative Endings (Observations).

§ 456. Singular:—

Second Person: i. ACTIVE. YGAv., the *a*-verbs (thematic) have no ending, the simple stem form in *-a*, *-ā* is used.—The non-*a*-verbs (unthematic) show *-di* (*-di* § 83, 1), GAv. *-dī*.—ii. MIDDLE. YAv. re-

gularly *-ṷuha* = Skt. *-sva*.—GAv. *-svā* (in *dasvā* 'give' = **dad-sva* § 186), *-ϑvā*, *-hvā* § 130, 2 a.

Third Person: ii. MIDDLE. A suffix *-qm* = Skt. *-ām*, 3 sg. mid. is found in GAv. *sr²ūšcqm* 'let him speak aright' Ys. 48.9, *vīdąm* 'shall decide' *vi* + *dā* Ys. 32.6, Geldner, in *B.B.* xv. p. 261, cf. Whitney, *Skt. Gram.* § 618.

§ 457. Plural:—

Second Person: i. ACTIVE—ii. MIDDLE. The forms are undistinguishable from an augmentless imperfect § 445 Note 2.—A genuine instance of *-na* cf. Skt. *-tana* 2 pl. active imperat. is GAv. *baranā* Ys. 30.9, cf. Skt. *bhajatana*, Whitney, *Skt. Gram.* § 740.

Third Person: i. ACTIVE—ii. MIDDLE. The endings *-aŋtu*, *-əntu*, *-əntąm* occur in both *a*-verbs and in non-*a*-verbs—(in the latter case by transfer § 471 to *a*-conj.).

d. Perfect Endings.

§ 458. For observations on the perfect endings see Pf. ii below.

Mode-Formation.

1. Indicative Mode.

§ 459. The indicative has no special mode-sign other than the use of the present stem itself. The endings are the primary in the present, the secondary in the preterite.

Note. For special remarks on the strong and weak stem-forms in the indicative, see below §§ 467, 476 and observe under the different conjugation classes.

2. Imperative Mode.

(Cf. Whitney, *Skt. Gram.* § 569.)

§ 460. The imperative has no characteristic mode-sign, the stem is identical with that of the indicative, the special endings are simply added.

Note 1. For special remarks on the strong and weak stem-forms see below under the imperatives of the various conjugation-classes.

Note 2. For remarks on the endings see § 456.

3. Subjunctive Mode.

(Cf. Whitney, *Skt. Gram.* § 557 seq.)

§ 461. In Av., as in Skt., the subjunctive has as its characteristic mark an *a* added to the stem to form the

special mode-stem. In the *a*-conjugation (thematic) this *a* unites of course with the stem-final and forms *ā*:—e. g. (1) thematic *a*-stem, Av. *bar-ā-hi* 'mayest thou bear' (i. e. *bara-a-hi*) = Skt. *bhár-ā-si*;—(2) unthematic, Av. *jan-a-iti* 'may he smite' (cf. pres. indicat. *jaiŋ-ti*) = Skt. *hán-a-ti*.

§ 462. The endings of the subjunctive are partly primary (i. e. pres. subjunct.), partly secondary (i. e. pret. subjunct.). — the former predominating. Observe in 1 sg. active YGAv. *-ni*, *-nī* (i. e. *-āni*) or also YGAv. *-a*, *-ā*;—and in 1 sg. middle it is *-ne* (i. e. *-āne*) beside *-āi*. Cf. Whitney, *Skt. Gram.* § 562.

Note 1. Observe (late) YAv. 2 sg. *-āi* = *-āhi* § 450.

Note 2. On improper subjunctive or imperative see § 445 Note 2.

4. Optative Mode.

(Cf. Whitney, *Skt. Gram.* § 564 seq.)

§ 463. The characteristic mode-sign of the optative in Av., as in Skt., is *-yā-*, *-ī-* added to the weak-stem for the non-*a*-conjugation (unthematic), or it is *-ī-* added to the regular tense-stem of the class for the *a*-conjugation (thematic).

In the *a*-stems (thematic) the mode-sign *-ī-* unites with the stem-final *a* into *-aē-* *(-ōi-)* §§ 55, 56. In the non-*a*-conj. the distinction between *-yā-*, *-ī-* is that *-yā-* was employed in the active and *-ī-* in the middle.

Note. Instead of *-ī-*, instances of *-ĭ-* (§ 21 Note) occur, e. g. *daⁱβiṯa* beside *daⁱdīṯa* 'mayest thou give'.—Similarly occur instances of *-yă-* for *-yā-* (§ 18 Note 1), cf. *buyata*, *buyama* 'may ye, we be'.—Probably also GAv. *daⁱdyaṯ* Ys. 44.10.

§ 464. The endings of the optative are the secondary ones throughout. In YAv., however, the 1 pl. mid. *-maⁱδe* (primary, e. g. Ys. 9.21) instead of GAv. *-maⁱdī* (secondary) is found. Observe in the *a*-conj. (thematic) the 3 pl. act. mid. Av. *-ən*, *-ənta* (cf. Gk. λέγ-οι-εν, λέγ-οι-ντο) is to be contrasted with Av. non-*a*-verbs which show *-arᵊ*, *-arᵊš* = Skt. *-ur*, *-ran* (act. mid. in both *a*- and non-*a*-stems).

Reduplication and Augment.

a. Reduplication.

(Cf. Whitney, *Skt. Gram.* § 588 seq.)

§ 465. (a) Reduplication in Av., as in Skt., is found in certain parts of the verb-conjugation (pres. of 3rd. class, and in the desiderative, and intensive), in the perfect, and sometimes in the aorist. The reduplication consists in the repetition of a part of the root.—The rules of reduplication should be noted:—

(b) A long internal or final vowel of the root is commonly shortened in the reduplicated syllable; sometimes —see desiderative, intensive—it is lengthened or strengthened. Radical *ar* (*r*-vowel) is reduplicated by *i*. An initial vowel, by repetition of itself, of course merely becomes long in reduplicating.

(c) Roots beginning with a consonant repeat that consonant, but a guttural is reduplicated by the corresponding palatal; an original *s* (including *st, sp, sm*) is reduplicated by *h*, an orig. palatal *ś* by *s*, an initial spirant by the corresponding smooth:—e. g. Av. *ja-ǰm-aṭ* (√*gam-* 'go'), *hi-šta-iti* (√*stā-* 'stand'), *hi-spōs-əmna* (√*spas-* 'see'), *hi-šmar-əntō* (√*mar-*, **smar-* 'remember'), *tu-þru-ye* (√*þru-* 'nourish').

Note 1. The original guttural instead of palatal is retained in reduplication before *u*, cf. Av. *ku-ẖšnu-ąna* (√*ẖšnu-* 'rejoice, please').

Note 2. Observe the redupl. form (desiderative participle) *si-ẖšnəuh-əmnąm* Yt. 13.49, cf. Skt. *ji-jñās-amānās*.

b. Augment.

(Cf. Whitney, *Skt. Gram.* § 585.)

§ 466. In Av. the augment is comparatively rare, the instances of its omission far exceed in proportion those of the Vedic Sanskrit.

The augment, as in Skt., consists of short *a* prefixed to the preterite tense—imperfect, aorist, pluperfect. This

a, as likewise in Skt., combines with an initial vowel into the corresponding *vṛddhi*.

It is often difficult to decide whether an *a* is the augment *a* or the verbalprefix *a* = *ā*.

Note 1. For metrical purposes it seems sometimes that augment must be restored in reading where the texts omit it.—See Geldner, *Metrik* p. 38.

Note 2. Instead of *a*, GAv. shows once a form *ɔ* in augment before *v*, cf. GAv. *ɔvaocaŋ* (but written *ɔ. voacaŋ*) § 32.

Note 3. On augmentless preterites ('injunctive') with imperat.-subjunct. force, see § 445 Note.

§ 467. **Vowel-Variation (Strong and Weak).** In Av., quite as in Skt., verb-stems commonly show vowel-variation —strongest, middle or strong, and weak forms, cf. § 235. This phenomenon must of course go hand in hand with an original shift of accent.

I. PRESENT-SYSTEM.

§ 468. The present-system is the most important of the systems, its forms are by far the most frequent in occurrence, and upon the basis of present-formation may be founded in Av., as in Skt., the conjugation-groups and classification of verbs. See the following § 469.

Classes of Verbs.

§ 469. Taking the Sanskrit Grammar as model, we may in the Av. present-system likewise distinguish ten classes of verbs according to the method of forming the present-stem. In Av., however, the phenomenon of accent (§ 2 end) is not always so clearly discernible.

The ten classes fall into two great groups of conjugation according as the endings are attached to the root with or without the (thematic) stem-vowel *a*. The (I) first group, the thematic or *a*-conjugation (Cl. 1, 6, 4, 10), assumes *a* in the formation of its present-stem; the

(II) second group, the unthematic or non-*a*-conjugation (Cl. 2, 3, 7, 5, 8, 9), attaches the endings directly to the root (the latter as stem, however, subject to modification) without this *a* as formative element of the stem.—Cf. Whitney, *Skt. Gram.* § 602 seq.

§ 470. The classification of Av. verbs on the basis of the Sanskrit Grammar is the following:—

I. *a*-Conjugation (thematic).

First Formation—Class 1—see § 478 seq.

(1) *a*-class with strengthened root-form = Skt. first *(bhū-)* class.

Av. √*bū-*, *bav-a-iti* 'he becomes'.

Second Formation—Class 6—see § 479 seq.

(6) *a*-class with unstrengthened root-form = Skt. sixth *(tud-)* class.

Av. √*druj-*, *druž-a-iti* 'he deceives'.

Third Formation—Class 4—see § 480 seq.

(4) *ya*-class (unstrengthened root-form) = Skt. fourth *(div-)* class.

Av. √*nas-*, *nas-ye-iti* 'he vanishes'.

Fourth Formation—Class 10—see § 481 seq.

(10) *aya*-class (strengthened root-form), causal = Skt. tenth *(cur-)* class.

Av. √*ruc-*, *raoc-aye-iti* 'he lights up'.

II. Non-*a*-Conjugation (unthematic).

First Formation—Class 2—see § 516 seq.

(2) Root-class—root itself is present stem = Skt. second *(ad-)* class.

Av. √*jan-*, *jaiṇ-ti* 'he smites'.

Second Formation—Class 3—see § 540 seq.

(3) Reduplicating class—root redupl. is pres. stem = Skt. third *(hu-)* class.

Av. √*dā-*, *da-dā-iti* 'he gives'.

Third Formation—Class 7—see § 554 seq.

(7) Nasal-class—inserted *-na-* (str.), *-n-* (wk.) = Skt. seventh *(rudh-)* class.

Av. √*ric-*, *iri-nā-ŋti* 'lets go'.

Fourth Formation—Class 5—see § 566 seq.

(5) *nu*-class—root adds *nao-* (str.), *nu-* (wk.) = Skt. fifth *(su-)* class.

Av. √*kar-*, *kərᵊ-nao-iti* 'he makes'.

Fifth Formation—Class 8—see § 577 seq.

(8) *u*-class—root adds *u-* alone = Skt. eigth *(tan-)* class.

Av. √*āp-*, *āfənte* (i. e. **āp-v-antē* § 95) 'are overtaken'.

Sixth Formation—Class 9—see § 584 seq.

(9) *nā*-class—root adds *nā-* (str.), *n-*, *na-* (wk.) = Skt. ninth *(krī-)* class.

Av. √*garw-*, *gərᵊw-nā-iti* 'he seizes'.

§ 471. **Transfer of Conjugation.** A verb is not always inflected according to one and the same conjugation and class throughout. The majority of the forms of a verb may be made up after one conjugation and class of the present system, while a few forms of the same verb may be made up after another; the same part of the verb being thus occasionally formed according to two classes. Instances of such transition in forms from one class to another are not rare; in general, examples of the tendency for verbs of the non-*a*-conjugation (unthematic) to pass over to the inflection of the *a*-conjugation, are not difficult to find.—See §§ 529, 553 etc.

i. The *a*-Conjugation (thematic).

§ 472. **General Remark.** The thematic or *a*-conjugation in the present-system comprises four classes (Cl. 1, 6, 4, 10), in all which the endings are attached to the root by means of a thematic vowel *a* (in 1 person

ā, a). The root-vowel may, or may not be strengthened according to the class of the verb; it remains then as in the indicative throughout the other modes of the present-system.—The verbs of the *a*-conj. are numerous.—Cf. Whitney, *Skt. Gram.* § 733 seq.

Note. The 1 plur. thematic shows *ă* more often than *ā* (Skt. *ā*): e. g. Av. *yazămaⁱde* commoner than *barāmaⁱde*.

Mode Formation—Special Remark.

1. Indicative.

§ 473. The various endings are simply attached by means of the thematic *a* (in 1 person *ă*) directly to the stem formed according to the rules of its particular class.

2. Imperative.

§ 474. The normal endings are attached by means of the thematic *a* directly to the present-stem of the class.

3. Subjunctive.

§ 475. The characteristic *a* of the subjunctive unites with the thematic *a* into *ā* in attaching the subjunctive endings given above, § 462.

4. Optative.

§ 476. In the *a*-verbs the optative sign is *-ī-* (instead of *-yā-*) and it unites with the thematic *a* into *-aē-* (*-ōi* § 56) in attaching the endings.

5. Participle.

§ 477. The participial forms (verbal adjectives) are made in each class by attaching to the present-stem the formative element *-ŋt* (§ 291, *-ŋtī* fem.) for the active, and *-mna* (§ 237, *-mnā* fem.)—also *-āna (-ana)*, see Note—for the middle.

Note. On middle ptcpl. in *-āna (-ana)* see § 507.

Classes of the *a*-Conjugation (thematic).

Cl. 1, 6, 4, 10.

§ 478. Class 1—*a*-class with strengthened root-form = Skt. first *(bhū-)* class.—To form the present-stem,

the thematic *a* is attached to the root which has the strong (middle) form. Cf. Whitney, *Skt. Gram.* § 734.—Examples are numerous.

Av. √*bar-* 'to bear', *bar-a-iti* = Skt. *bhár-a-ti*; Av. √*hįšį-* 'to rule', *hįšay-e-iti* = Skt. *kṣáy-a-ti*; Av. √*bū-* 'to be', *bav-a-iti* = Skt. *bháv-a-ti*.

Note 1. Here for convenience, as in Skt., may be included the roots Av. *stā-*, *had-* (orig. redupl.) = Skt. *sthā-*, *sad-*, e. g. Av. *histaiti* 'he stands' = Skt. *tiṣṭhati*; Av. *hidaiti* 'he sits' = Skt. *sídati*, cf. Whitney, *Skt. Gram.* §§ 748, 749a.

Note 2. Some roots in *a* + cons. show a fluctuation between *ā* and *ū*, cf. Whitney, *Skt. Gram.* § 745d, e: Av. √*nam-* 'to bow' has *nąm-a-* beside *nām-a-* = Skt. *nám-a-*; Av. √*dvar-* 'to run' has *dvar-a-* beside *dvār-a-*, cf. also § 18 Note 1, and Whitney, *Skt. Gram.* § 545e.

§ 479. Class 6—*a*-class with unstrengthened root-form = Skt. sixth *(tud-)* class.—The thematic *a* is simply attached to the root in its weak form to make up the present-stem.—Cf. Whitney, *Skt. Gram.* § 751.

Av. √*iš-* 'to seek, desire', *iš-a-ite* = Skt. *iṣ-á-tē*; Av. √*vīs-* 'to become', *vīs-a-iti* (cf. § 20 on *ī*) = Skt. *viś-á-ti*; et al.

Note. With nasal strengthening Av. *hinc-a-iti* 'he sprinkles' (√*hic-*) = Skt. *siñc-á-ti*.

§ 480. Class 4—*ya*-class (unstrengthened root-form) = Skt. fourth *(div-)* class.—Also here the Passive, cf. V. a below. —The present-stem is formed by adding *ya-* (*ye-* § 34) to the simple unstrengthened root.—Cf. Whitney, *Skt. Gram.* § 759.

Av. √*nas-* 'to vanish', *nas-ye-iti* = Skt. *náś-ya-ti*; Av. √*frā-* 'to protect', *frā-ye-inte* = Skt. *trā́-ya-ntē*.

Note 1. For the Passive formation see V. a below.

Note 2. The strong form of the stem (*-aē-* instead of *-i-*) is to be noted in the verb Av. *sraēį-ye-iti* 'it clings' = Skt. *śliṣ-ya-ti*.

§ 481. Class 10—*aya*-class (strengthened root-form) = Skt. tenth *(cur-)* class.—This class includes in part the secondary formation causative, denominative, see V. b, c, below. The formative element *aya* is added to the strengthened

root.—The roots in internal *a* generally, but not always, receive the *vṛddhi* strengthening; the roots in *i*, *u* commonly receive the *guṇa* increase.

Av. √*tap-* 'to warm', *tāp-aye-iti* = Skt. *tāp-áya-ti*; Av. √*pat-* 'to fly', *apat-aya-n* = Skt. *ápāt-aya-n*; Av. √*riš-* 'to wound', *raēš-aya-ṭ* = Skt. *rēṣ-áya-t*; Av. √*ruc-* 'to light up', *raoc-aye-iti* = Skt. *rōc-áya-ti*.

Note 1. Observe that the roots with *a* do not always show the *vṛddhi* stage.

Note 2. Some exceptions to the rule for *guṇa* of *i-* and *u*-roots occur.

Note 3. In Av., as in Skt., a heavy syllable ending in consonant does not take *vṛddhi* or *guṇa*.

Paradigms of the *a*-Conjugation (thematic).

Cl. 1, 6, 4, 10.

(Cf. Whitney, *Skt. Gram.* § 734 seq.)

§ 482. Av. *bar-* 'bear, carry' = Skt. *bhár-*.

Cl. 1. Av. *ẖš-* 'rule, possess', *zā-* 'call, bless, curse', *vaēn-* 'see', *yaz-* 'worship', *jas-* 'come', *jīv-* 'live', *ciš-* 'teach, point out', *car-* 'move, go', *bar-* 'eat', *az-* 'drive, win', *yās-* 'desire, seek', *pac-* 'cook', *van-* 'win', *þwars-* 'cut, make', *ram-* 'delight', *miz-* 'make urine'.—Cl. 6. *vaŋ-* 'speak', *vīs-* 'become'.—Cl. 4. *yud-* 'fight', *zan-*, *zā-* 'give birth, be born', *varz-* 'work', *bud-* 'mark, know'.—Cl. 10. *vid-* 'know', *taurv-* 'overcome', *var-* 'to cover', *þar-* 'go, make go', *dar-* 'hold fast', *haẖš-* 'incite'.

Forms to be observed in GAv. and YAv.

§ 489. GAv. shows in general the same forms as above, but with the long final vowel, cf. § 26. It has, however, a certain number of individual differences; these as well as other variations in YAv. also may here be noted.

§ 490. (1) The original unmodified forms of 3 pl. act. mid. *-aŋti, -aŋte*, cf. *zavaiŋte* above, occasionally stand instead of being changed to *-əŋti, -əŋte*, e. g.:—

GAv. *vanaiŋtī*, YAv. *vananṭī* 'they win' Yt. 13.154, GAv. *hacaiŋtē* beside YAv. *haciŋte* 'they follow' (§§ 30, 491).

§ 491. (2) According to § 30, the forms *-iŋti, -iŋte, -in* are often found after palatals, instead of *-əŋti, -aiŋti* etc., e. g.:—

Av. *fratanciŋti* 'they run forth' (variants *°tacaiŋti, °tacənti* Ys. 65.3, √*tac-*), *fratacin* 'they ran forth'; *haciŋte* (YAv.) beside *hacaiŋtē*

[1] Ys. 8.7. — [2] i. e. **maēz-aē-aŋta* for **maēz-a-i-aŋtā*.

(GAv.) 'they follow'; *yasiṇti* 'they worship' Yt. 8.11 beside *yasəṇti* Yt. 8.24, cf. Yt. 10.54 *yasəṇte, yasiṇti; snaežiṇtaē-ca* 'and they drop as snow' (cf. § 55).

§ 492. (3) GYAv., when *y* precedes the thematic *-a- (-ā-)*, especially in Cl. 4, 10, the combination *-ya- (-yā-)* generally becomes *-ye-* according to § 34, e. g.:—

Av. *sādayemi, sādayehi, sādayeiti* 'I, thou, he appear' (√*sad-* Cl. 10); *jaidyemi, jaidyehi, jaidyeiṇti* 'I, thou, they beseech' (√*jad-* Cl. 4); *ẖšayehī* (GAv.), *ẖšayeiti, ẖšayeite, ẖšayəiṇti, ẖšayeni* (subjunct. *-āni*) 'thou, he etc. rule, possess' (√*ẖši-* Cl. 1); *zbayemi, zbayehi, zbayeiti* 'I invoke', etc.; *baṇdayeni* 'I may bind' (subjunct.).

§ 493. (4) Some reductions of *-ya-, -va-* before *m, n* (§ 63) occur, e. g.:—

Av. *vərəzinti* 'they work' (i. e. *vərəzyaṇti*, √*varz-* Cl. 4); *iriṇti* 'they wound' (i. e. *iriẏaṇti*, √*iriš-* Cl. 4); *ᵘrvaēsiṇti* 'they turn'; *uẖšin* 'they grew' (i. e. *uẖšyan*, √*vaẖš* Cl. 4); *fyavhuṇte* 'they shower sleet' (i. e. *fyavhvaṇte*).—So imperat. 2 sg. *naše* 'perish' (i. e. *našya*).

§ 494. (5) Some reductions of *-aya-, -ava- (-āya-, -āva-)* before final *m, n* (§ 64) occur, e. g.:—

Av. *daēšaēm* 'I showed' (i. e. *daēšayam*, √*diš-* Cl. 10); *abaom* 'I became' (i. e. *abavam*, √*ba-* Cl. 1) Yt. 19.57,61,63, *baon* 'they became' Yt. 5.98 etc.

§ 495. Certain other peculiarities likewise require detailed notice.

I. Indicative.

a. Present.

§ 496. **Singular:—**

First Person: i. ACT. GAv. shows only the ending *-ā* (Gk. -ω), instead of *-āmi* in the thematic verbs and only *-mī* in the non-*a*-verbs (unthematic), e. g. GAv. *ufyā* 'I praise', *kayā* 'I discern'.—YAv. similar but rare (perhaps borrowed) *zbaya* 'I invoke' at Vsp. 6.1 by the side of *frayeze* which likewise is an indicative.

§ 497. **Dual:—**

Third Person: i. ACT. GAv. add *caratas-cā* 'both come' Ys. 51.12.—ii. MID. *ZPhl. Gloss.* p. 54.8 has *baraite* 'they two bring' cf. *A. O. S. Proceedings* Oct. 1889 p. 165.

§ 498. **Plural:—**

First Person: i. ACT. YAv., similarly with short *ă* (as above) *zbayămahi* 'we invoke'.

Second Person: i. ACT. YAv. also isolated (*-t-* like pret. form) *ẖarata* 'ye eat' Vd. 7.57.—ii. MID. GAv. *-duyē* (cf. § 190) *dīdraǰōduyē* 'ye keep holding' (desiderative)—on *-ō-* for *-a-* of stem, see § 39.

Third Person: See general details above § 490 seq.

b. Preterite.

§ 499. Plural:—

Third Person: ii. MID. GAv., observe *vīsāŋtā* 'they entered' (on *-ā-*, cf. § 32).

2. Imperative.

§ 500. Singular:—

Second Person: i. ACT. YAv., note (by reduction §§ 34, 493) *nase* 'perish thou' (i. e. *nasya*, √*nas-* Cl. 4).—ii. MID. GAv., only *-ẖvā: gūšaẖvā* 'hear thou', *baẖšōẖvā* 'share thou' (on *-ō-* for *-a-*, see § 39).

Third Person: i. ACT. GAv., observe *-ō-* (cf. § 39) in *vərəzyōtū* 'let him work' (√*varz-* Cl. 4), *vātayōtū* 'let him announce' (√*vat-* Cl. 10).

§ 501. Plural:—

Second Person: i. ACT. GAv. with ending *-na* (cf. Skt. *-tana*) *baranā* 'bear ye' Ys. 30.9, cf. § 457 above, and Whitney, *Skt. Gram.* § 740.—ii. MID. GAv. *gūšōdāuu* 'hear ye' = Skt. *ghōṣadhvam*.

3. Subjunctive.

§ 502. Singular:—

Second Person: i. ACT. YAv. occasionally *-āi* for *-ā(ẖ)i* § 450: *apa.yasāi* 'thou wilt destroy' (i. e. *yasāhi*); *vasāi, vazāhi* (as variants) 'mayest thou bring' Vd. 5.16.—YAv., a form with secondary ending (but syntax bad) is *ẖavā* Yt. 24.8.

§ 503. Plural:—

Third Person: i. ACT. GAv. shows also *-ən* (for *-qn*) in *rapən* 'they may hold'.—ii. MID. YAv. like *mravaⁱre* above § 452, also *nizraⁱre* 'they may strike' Yt. 10.40, so again *ẖvhaⁱre* Yt. 10.45.

4. Optative.

§ 504. Singular:—

First Person: ii. MID. YAv., observe *maⁱnya* 'I would think' Yt. 10.106 (for *maⁱnyaya* § 194).

§ 505. Plural:—

First Person: i. ACT. GAv. (with regular secondary ending *-maⁱdī*, cf. Skt. *-mahi*) *vāurōimaⁱdī* 'we would cause to believe'.

Third Person: YAv. like *maēzayaŋta* in paradigm is *yasayaŋta* 'they would sacrifice'.

5. Participle.

§ 506. On the relation of Av. *-mna* (metrically often *-mana*) to Skt. *-māna*, see § 18 Note 2.

§ 507. In Av. more often than in Skt. (cf. Whitney, *Skt. Gram.* § 741 a) there appear instances of middle (passive) participles of *a*-verbs formed with the participial suffix *-ana*, *-āna* (= Skt. *-āna*, § 18) instead of *-mna*, e. g. *barana-* 'bearing', *ˢazana* 'driving';—*yazāna-* 'worshipping'; *ɹtarāna-* 'strewing'.

ii. The non-*a*-Conjugation (unthematic).

§ 508. **General Remark.** In Av., as in Skt., the verbs of the non-*a*-conjugation (unthematic) are not so numerous as those of the thematic conjugation. They may be grouped in six classes (Cl. 2, 3, 7, 5, 8, 9), in each of which the endings are attached directly (without an interposed *a*) to the stem which is subject to modification.

The striking characteristic of the entire group is the variation of the root in different forms. The modified root or the suffix assumes now a stronger form, again a weaker form.

§ 509. **Strong and Weak Stem-Forms.** The strong *(guṇa)* forms, as a rule, are:—(1) the Sing. Indic. Act. (Pres. Pret.),—(2) the 3rd. Sing. Imperat. Act.,—(3) the entire Subjunct.—The remaining forms are weak. Many fluctuations and transfers, however, occur; especially often is the strong stem employed in forms (see 3rd. plurals) modelled after the *a*-conjugation.

Mode Formation.—Special Remark.

1. Indicative.

§ 510. The endings of the non-thematic indicative require some remark. GAv. generally shows the older use of *-mī* (§ 450) and *-aⁱtī*, *-aⁱtē*, *-aṭ* (for thematic *-aṇti*, *-aṇte* *-an* § 452). In YAv. this old distinction is not sharply preserved. The stem in general to which the endings are

directly attached shows a variation of str. and wk. forms according to the preceding rule, § 509.

2. Imperative.

§ 511. The ending of the Imperat. 2 sing. is *-dī, -di.* The endings in general are attached directly to the prepared class-stem. This shows the strong form in the 3 sg. act.; in the other forms it has the weak grade, but fluctuations occur.

3. Subjunctive.

§ 512. The endings are attached by means of the mode-sign *a* to the prepared class-stem which shows the strong form throughout.

4. Optative.

§ 513. The regular optative endings are attached by the mode-sign *-yā-, -ī- (ī)* in accordance with the rules given above at § 463. The stem regularly shows its weak form throughout, but variations from this sometimes occur.

5. Participle.

§ 514. The participial forms (verbal adjectives) are made by attaching to the present stem in its weak grade the formative element *-aṇt, -aṭ* (i. e. *-n̥t*) for the active, and *-āna, -ana* beside *-mna,* for the middle.

Classes of the non-*a*-Conjugation (unthematic).

Cl. 2, 3, 7, 5, 8, 9.

§ 515. The six classes of unthematic verbs have certain characteristics in common but they have also certain individual peculiarities, these classes will now each be taken up in detail.

Class 2—Root-Class.

§ 516. Class 2—Root-Class—root itself is present stem = Skt. second *(ad-)* class.—The stem may have the strong or the weak form according to § 509, the endings

are then attached directly to the stem. Examples are quite numerous:

Av. √*pā-* 'to keep, protect', *pā-iti* (3 sg. pres.) = Skt. *pâ-ti;* Av. √*i-* 'to go', *aē-iti* (3 sg.), *y-ẽiṇtī* (3 pl. pres. § 34) = Skt. *é-ti, y-ánti;* Av. √*stu-* 'to praise', *staoiti* = Skt. *stāú-ti* (§ 60 Note c); Av. √*jan-* 'to slay', *jaiṇ-ti* (3 sg. pres. indic.) = Skt. *hán-ti;* Av. √*vas-* 'to wish', *vaš-tī* (3 sg.), *us-mahi* (1 pl. pres. indic.) = Skt. *váṣ-ti, uś-másі* (Ved.).

Paradigm of Class 2.

(Cf. Whitney, *Skt. Gram.* § 612 seq.)

§ 517. Av. -ע√*mrū-* 'to say' = Skt. √*brū-*.

Av. *hap-* 'promote', *vas-, us-* 'wish', *āh-* 'sit', *rud-* 'grow', *stu-* 'praise', *i-* 'go', *is-* 'be able'.

§ 538. Transfers to the *a*-conjugation:—1. Indic. Pret. 3 sg. *aṷh-a-ṭ*.—3. Subjunct. 3 sg. *aṷh-ā-ⁱti*.

§ 539. Beside all the above paradigm of the present-system, there is made from this root *ah* 'to be', as in Skt., a regular perfect *aṷha* etc. § 606 = Skt. *āsa* etc.

Class 3.—Reduplicating Class.

See p. 136

§ 540. **Class 3.—Reduplicating Class.** The root is reduplicated to form the present stem. The stem then shows a variation of strong and weak forms (§ 509); the endings are attached to it directly.

The general rules for reduplication have been given above § 465. As examples of formation, the following may be taken:—

Av. √*dā-* 'to give, to place' (Stems *daδā-, dadā-; daδ-, daþ-, dad-*, §§ 82, 83, 86), *da-δā-ⁱti* (YAv.), *da-dā-ⁱtī* (GAv.), *da-δą-m, da-þą-ṁ* = Skt. *dá-d(h)ā-ti, á-da-d(h)ā-m*;—Av. √*ci-* 'to atone' (Stems *ci-kay-, ci-ki-*), *ci-kay-aṭ* 3 sg. subjunct. = Skt. *cikayat*;—Av. √*hac-* 'to follow', *hi-šhaḷ-ti, hi-šc-a-maⁱdē* (Ys. 40.4) = Skt. *si-ṣak-ti*;—Av. √*jan-* 'to slay', *ni-ja-γn-ənti* = Skt. *ji-ghn-anti*.

Paradigm of Class 3.

(Cf. Whitney, *Skt. Gram.* § 647 seq.)

§ 541. Av. √*dā-* 'to give, to place' (str. stem YAv. *dadā-*, GAv. *dadā-*; wk. stem YAv. *daδ-, daþ-*, GAv. *dad-*) = Skt. √*dā-*, √*dhā-*—stems *dad(h)ā-, dad(h)-*—, cf. Whitney, *Skt. Gram.* § 667 seq.

Note. Observe that orig. *dā-, dhā-* are practically fallen together in Av. as *dā-*, §§ 82, 83.—On the interchange of *d, δ, þ*, see §§ 82, 83, 86.

Forms to be observed in GAv. and YAv.

§ 548. There are both in GAv. and in YAv. a number of forms beside the above, that deserve special notice.

1. Indicative.

§ 549. a. Present. i. ACT.—ii. MID. GAv., observe that the forms *dāitī, dāitē, dāṇtē* resembling pres. indic. forms after Class 2, are best regarded as radical aor. subjunct., cf. § 633 below.—Note GAv. *hiščaiδē* (with v. l. *hiščimaiδē*) 'we follow' 1 pl. pres. indic. mid. Ys. 40.4—(observe *a*, Bartholomae, *K.Z.* xxix. p. 273 = *Flexionslehre* p. 4).—Add also 3 sg. pres. indic. act. *zazaṇti* 'he produces' Vd. 3.5 = Skt. *jajánti*.

§ 550. b. Preterite. i. ACT. YGAv., observe with interposed *ī* (like Skt. *dábravīt* etc.) and from weak stem: *daidīš* (YAv. 2 sg. pret. indic.), *daidīẖ* (YAv. Yt. 13.12), *daidīẖ* (GAv. 3 sg. pret.), *daidītəm* (3 du. cf. above paradigm).—Remark 3 pl. in *-aẖ* (= *-ąt*) GAv. *jīgərəzaẖ* 'let them lament' (injunctive).—ii. MID. YAv., observe from strong stem, 2 sg. pret. mid. *ji-ǰaē-ŧa* 'thou didst live, mayest live' (√*gi-*, *ji-*).

3. Subjunctive.

§ 551. Sg. Pl. i. ACT. YAv., add (regularly) from √*ci-* 'to atone', *ci-kay-aẖ* (3 sg. subjunct.), *ci-kay-a-tō* (3 d u. subjunct. *ZPhl. Gloss.* p. 92, 34), *ci-kaēn* (3 pl. subjunct.) i. e. **ci-kay-ən* § 64.

4. Optative.

§ 552. Beside the mid. forms with long *ī (-īŋa, -īta)* are found also the variants *-ŋa, -ta*, cf. § 21 Note.

Transfers to the *a*-Conjugation (thematic).

§ 553. A number of transitions from the Third Class to the *a*-conjugation occur. The reduplicated wk. stem *daẖ-* (YAv.), *dad-* (GAv.) of √*dā-* in Av. as in Skt.—cf. Whitney, *Skt. Gram.* § 672—thus not infrequently assumes the inflection of an *a*-stem, § 483.

[1] Ys. 9.1.

1. Indicative. i. ACT. a. Pres. YAv. *daṗ-a-iti*, *daṗ-ə-ŋti*.—b. Pret. YGAv. *daṗ-ə-m*, *daṗ-ō*, *daṗ-a-ṯ*; *dad-a-ṯ*; *daṗ-ə-n*, *dad-ə-n* (beside *dadaṯ* § 543 Foot-Note).—ii. MID. YAv. *daṗ-a-ite*.—GAv. *dad-ə-ŋtē* 'they are placed'.

Note. Similarly transferred Av. *zīzanəŋti*, *zīzanən*, *zīzanāṯ* from √*zan-* 'beget, bear'. The Skt. shows *jījanat* as redupl. aor. Whitney, *Skt. Gram.* § 864.

Class 7.—Nasal Class.

§ 554. The roots of the nasal class all end in a consonant; the class has for its characteristic feature the assumption of an internal nasal to form the stem. That is, the root has a *-na-* (in strong forms), an *-n-* (in weak forms) inserted immediately before its final consonant to form the present stem. The root itself retains its weak grade; the endings are attached directly to the stem.—Cf. Skt. seventh Class, Whitney, *Skt. Gram.* § 683 seq.

Here belong for example: Av. √*ciš-* 'to announce, promise' *ci-na-sti*; Av. √*iric-* 'to let go' *iri-na-ʒti* = Skt. *ri-ṇa-kti*, and some others—see following paradigm § 555.

Paradigm of Class 7.

(Cf. Whitney, *Skt. Gram.* § 684.)

§ 555. Av. √*ciš-* 'to announce, promise', *ciṗ-* 'to proclaim, think', *mark-* (*mərᵊnc-*) 'kill', *kart-* 'to cut', *mis-* 'mingle', *vid-* 'find, receive'. Cf. Skt. √*chid-* 'to cut'.

Forms to be observed in GAv. and YAv.

§ 562. The form Av. *mərᵊʒəŋte* stands perhaps for **mərᵊ-ŋ-gte* (3 sg. mid.). If so, the formation would be regularly after this (7) class. But the form is quite uncertain.

Transfers to the *a*-Conjugation.

§ 563. The stem *marᵊnc-* 'kill' has practically become stereotyped as a root according to the *a*-conj. by transfer; hence the thematic forms:—Pres. Act. 3 sg. *marᵊncaⁱti*; 3 pl. *marᵊncinti*;—Mid. 3 sg. *marᵊncaⁱte*, 3 pl. *marᵊncante* (above).—Imperat. Mid. 2 sg. *marᵊncavha*.

§ 564. The root GAv. *mard-* (as *mārᵊnd-* § 39) 'to destroy' has likewise become practically crystallized according to *a*-conj.: Pret. Act. 3 sg. *mōrəndaţ*, 3 pl. *mōrᵊndən* (on *-ā-*, cf. § 39 end).

[1] i. e. *mi-na-s-s*, § 158.—[2] i. e. *ci-na-s-t*, § 192.—[3] Vd. 7.38, weak form!—[4] *a*-conj. by transfer as in Skt.—[5] On *-rą-* = *r* + *n*, see § 49. On *ž*, cf. § 162.—[6] Yt. 17.54, with variant *vindita (i)*.—[7] In compounds.

§ 565. Similar instances of stereotyped forms and transfer to *a*-conjugation as also in Skt., are: Av. 2 *vid-* 'find, obtain' *(vinḍ-*, like Skt. *vi-n-d-á-ti) vi-ŋ-d-ə-ŋ-ti* (3 pl. indic.), *vi-ñ-d-ā-ⁱti* (3 sg. subjunct. Vd. 13.36) beside unthematic *vi-na-stī* (GAv.), *vi-ᵱ-dita* (YAv. opt. above).—Likewise Av. *kart-* 'to cut' *(kərᵊnt-*, like Skt. *kṛ-n-t-á-ti) kərᵊ-ŋ-t-aⁱti* (3 sg. indicative), *kərᵊ-ŋ-t-a-ṯ* (pret.).—Also some others.

Note. Peculiar is 2 sing. pret. act. *mərᵊnᵃcaⁱnīš* 'thou didst destroy' —weak nasalized root with added *an* (= *n̥n*). On *-īš* = *īš* cf. § 527 end.

Class 5.—*nu*-Class.

§ 566. The verbs of this class are not numerous. The root adds *nao-* (in the strong forms), *nu- nv-* (in the weak forms) to make the present stem. The root itself retains its weak grade.

Here belong for example: Av. √*kar-* 'to make' *kərᵊ-nao-ⁱti* = Skt. *kṛ-nṓ-ti*; Av. √*sru-* 'to hear' *sᵘru-nao-ⁱti* = Skt. *śṛ-ṇṓ-ti*; Av. √*as-* 'to attain' *aš-nao-ⁱti* = Skt. *aś-nṓ-ti*; and a few others.

Paradigm of Class 5.

(Cf. Whitney, *Skt. Gram.* § 698.)

Class 8.—*u*-Class.

§ 576. The eigth class (Skt. *tan*-class, Whitney, *Skt. Gram.* § 697 seq.) is hardly more than a variety of the preceding (5) class. It comprises, however, enough roots to be distinguishable. The present-stem is made by adding to the root *ao-, av-* (in the str. forms), *u-, v-* (in the wk. forms).

Included under this class are the roots: Av. √*tan-* 'to stretch' = Skt. √*tan-*; Av. √*in-* 'drive' = Skt. √*in-*. Likewise here, parts of Av. √*āp-* 'to reach' = Skt. √*āp-*; Av. √*ǰǎar-* 'flow' (pres. participle), cf. Skt. √*kṣar-*; Av. √*har-* 'protect'.

Class 9.—*nā*-Class.

§ 583. In the ninth class *nā-* is added to the root to form the strong present-stem; *n-*, *na-* (i. e. *n* + *a*-conj.) is added to make the weak pres. stem. The form *na-* (i. e. *a*-conj.) is commoner than *n-*. The endings are attached directly; the root itself retains its weak grade.

The Skt. ninth class likewise adds *nā́-* in the strong forms, but *n-*, *nī-* (i. e. *nⁱ* before cons.) in the weak.—Cf. Whitney, *Skt. Gram.* § 717 seq., esp. § 731.

Here belong: Av. √*frī-* 'to love' *frī-nā-mi* = Skt. *prī-ṇā́-mi*; Av. √*garw-* 'to seize' *gərᵊw-nā-iti* = Skt. *gṛbh-nā́-ti*; Av. √*var-* 'to choose' *vərᵊ-ŋ-tē* = Skt. *vṛ-ṇī-tḗ*; Av. √*gar-* 'to sing' *gərᵊ-ŋ-te* = Skt. *gṛ-ṇī-tḗ*. Likewise some others—see following paradigm § 584.

Forms to be observed.

§ 590. The weak forms in *na-* (i. e. *a*-conjugation by transfer) are frequent; the instances of 3 pl. thus formed are noted above. Other examples of this transfer *(-n-a)* are given in the next section § 591.

§ 591. The transfers to the *a*-conjugation with weak stem *(na)* are:

1. Indicative. i. ACT. a. Pres. *hu-n-a-hi* 'thou pressest', *frī-n-a-ⁱti, frī-n-ā-mahi, frī-n-əŋti* (above).—ii. MID. *kərᵊ-n-əŋte* 'they make, cut'.—b. Pret. i. ACT. *kərᵊ-n-əm* 'I made, cut', *sa-n-a-ṭ* 'it appeared' (i. e. *saŋ-n-aṭ* § 185) Yt. 14.7.—ii. MID. *stərᵊ-n-a-ta* 'he strewed'.

II. PERFECT-SYSTEM.

Perfect.

(Cf. Whitney, *Skt. Gram.* § 780 seq.)

§ 592. **General Remark.** The chief characteristic of the perfect is the reduplication; the endings also differ in some respects from those of the present-system; the perfect shows likewise a distinction of strong and weak forms. As to signification, the perfect (and pluperfect) as

[1] Vd. 5.59. — [2] *-əmna* like *a*-conj.

in Skt. commonly denotes simple past time; sometimes present time is expressed.

Note 1. An assumed periphrastic form of the perfect sporadically occurs, see § 623.

Note 2. On the absence of reduplication, see § 620.

Reduplicated Syllable.

§ 593. The principal points to be observed in regard to reduplication of the vowels (cf. Whitney, *Skt. Gram.* § 783) are:

1. Internal or final *a* or *ā* is regularly reduplicated by *a* (sometimes by *ā*—cf. Whitney, *Skt. Gram.* § 786a), occasionally by *i*. For example—

Av. *ta-taš-a* 'he has formed' (√*taš-*) = Skt. *ta-tákṣ-a*; Av. *da-dā-θa* 'thou hast created' (√*dā-*) = Skt. *da-dhā-tha*; Av. *dā-darᵊs-a* 'I have seen' (√*dars-*) = Skt. *da-dárś-a*; Av. *cā-ḫr-arᵊ* 'they have made' (√*kar-*) = Skt. *ca-kr-úr*; GAv. *vā-vərᵊz-āi* 'he has worked' (mid.) √*varz-*; Av. *ji-gaᵘrv-a* (observe palatal *j* § 465c) 'I have perceived' (√*garv-*) = Skt. *ju-grābh-a*.

2. Internal or final *i*, *u* or *ī*, *ū* are reduplicated by *i*, *u* (sometimes *ī*, *ū*). For example—

Av. *di-dvaēš-a* 'I have hated' (√*dviš-*) = Skt. *di-dvéṣ-a*; Av. *di-day-a* 'he has seen' (√*dī-*) = Skt. *di-dhay-a*; Av. *tū-tav-a* 'he has been able' (√*tū-*) = Skt. *tū-tāv-a*.

Note. Worthy of remark is Av. *bā-bv-arᵊ* (with *ā* from √*bū-* 'to be') Yt. 13.150 = Skt. *ba-bhūv-úr*, but Av. *bvāva* (i. e. *bu-vāv-a*, Yt. 13.2, cf. § 68b = Skt. *ba-bhāv-a*.

3. Initial *a* by reduplication with itself becomes *ā*. For example—

Av. *ā-ah-a* 'he has been' (√*ah-*) = Skt. *á-s-a*.

4. Initial *i* (or *u* if found) is reduplicated by „ *y* i. e. *i-y* (or *u* i. e. *u-v*), cf. § 68a.

Av. יאיאנ *yeyą* (i. e. *iy-ay-qn*) 'they may have come' Vs. 42.6 (√*i-* subjunct. *a*-inflect. if not redupl. pres.). So also יאיאנ *yaēẓa* i. e. *iyaēẓa* Yt. 13.99.

§ 594. The laws for the reduplication of consonants have been sufficiently treated above, § 465c.

Radical Syllable.

Strong and weak Stem-Forms.

§ 595. The strong stem or guṇa-form of the radical syllable, as in the non-*a*-conjugation (unthematic), is found in the perfect-system 1) in the Indicative Act. 1, 2, 3 sg. Pres. Pret.; 2) in the Imperative Act. 3 sg.; 3) in the Subjunctive entire. The remaining forms are weak. But numerous fluctuations in this rule occur.

Note. In GAv., as in Vedic Skt., medial short *a* before a single consonant is lengthened to *ā* in the radical syllable of the 3 sg. pf. act. For YAv. no rule is laid down.—Cf. Whitney, *Skt. Gram.* § 793c. Thus, GAv. *nā-nāṣ-a* 'it is lost' (√*nāṣ-*) ≐ Skt. *na-nāś-a*.

§ 596. With reference to the weak forms, some observations as regards the radical syllable may be made. An internal or final *i, u* remains unchanged e. g. *iṛī-riṇ-arᵊ* 'they lie' (√*riṇ-*), *su-sruu-ye* 'I have heard' (√*sruu-*) Yt. 17.17, yet *sū-srū-ma* 'we have heard' Yt. 13.198; but a number of roots having medial *a* between single consonants (cf. Whitney, *Skt. Gram.* § 794e) and certain others, by loss of the vowel in weak forms may undergo some change:

1. Roots in *-ar* show weak forms in *-r-* before vowels: Av. *ba-wr-arᵊ* 'they bore' (√*bar-*), beside GAv. *vā-vərᵊz-ōi* 'he worked' 3 sg. pf. mid. (√*varz-* i. e. two cons.).

2. Roots in *-am, -an* show weak forms in *-m-, -n-:* Av. *ja-ǰm-yąm* 'I would have come' (√*gam-*); GAv. *cā-ẖn-arᵊ* 'they have desired' (√*kan-*).

3. Roots with initial *ya-, va-* by contraction with the reduplicated syllable show in the weak forms *yaē- (yāi-), vao- (vāu-)* i. e. *ya-i-, va-u-:* Av. √*yat-* 'to strive' makes 1 pl. act. YAv. *yaēẖma*, GAv. *yāiẖmā* (i. e. *ya-yt-ma, ya-it-ma*); Av. √*van-* 'win' makes 3 pl. act. *vaonarᵊ* (i. e. *va-vn-ar, va-un-ar*). Cf. § 63 seq.

4. Roots with radical final *ā* lose this *ā* before endings beginning with a vowel, so also before endings where Skt. shows the union-vowel *i*, Whitney, *Skt. Gram.* § 794 end: Av. √*stā-* 'to stand', *hi-šṭ-a* 1, 3 sg. pf. act.; √*dā-* 'give, place', *da-d-a* 3 sg. act., *da-iḍ-e* 3 sg. mid.; *da-d-vā* ptcpl. (Skt. *dad-i-vāṣ* or *da-d-vāṣ*).

Personal Endings
and their connection with the Stem.

§ 597. The endings of the perfect, especially in the middle voice, are mostly primary. They are attached directly to the tense-stem as in the unthematic conjugation; sporadic traces of a 'union-vowel' *i*, *ə* (cf. Whitney, *Skt. Gram.* § 797 seq.) perhaps however exist. See Bartholomae, *A.F.* ii. p. 97.

§ 598. The endings agree with those of the Skt.; some forms however are to be specially observed, see below § 599 seq.

First Person: II. MIDDLE. A 1st. sg. mid. form in *-ō* (i. e. *-āu* § 54 = Skt. *-āu*) from a root ending in long *ā* is perhaps to be found in *dadō* 'I have made' Ys. 10.9 = Skt. *dadhāu*, Whitney, *Skt. Gram.* § 800 e.

Second Person: I. ACTIVE. Note the form *-ta* (for *-þa* § 78 end) after *s* in GAv. *vōistā* 'thou knowest'.

§ 600. **Dual:—**

Third Person: II. MIDDLE. Observe the suffix *-tē* 3 du. mid. in GAv. *dazdē* 'they both created' Ys. 30.4 (i. e. **dhazdhai*, *dha-dh-tai*), cf. Bartholomae, *K.Z.* xxix. p. 285 = *Flexionslehre* p. 16.

§ 601. Plural:—

Third Person: I. ACTIVE. The ending *-ɹ²š* (above) beside *-ar²* is found in GAv. *ci-kāit-ɹ²š* 'they have thought, taught' Ys. 32.11.

Pluperfect (Preterite).

(Cf. Whitney, *Skt. Gram.* § 817 seq.)

§ 602. The existence of a preterite (pluperfect) indicative corresponding to the present perfect, seems to be shown by a few forms. There is, however, some uncertainty, see Note. The forms here recognized as pluperfect are made by adding the secondary endings directly to the perfect stem. The strong stem appears in the singular active; the weak stem elsewhere. The thematic *a* (transferring to the *a*-inflection) is sometimes found.—Cf. Whitney, *Skt. Gram.* § 817 seq.

Note. There is much difficulty in distinguishing a pluperfect from some other reduplic. forms. Some of the examples may equally well be referred to other forms (impf., aor.) of the redupl. preterite.

Mode-Formation of the Perfect.

§ 603. The perfect like the other tense-systems shows an indicative (pres. perf.; pret. pluperf.), imperative, subjunctive (prim. and sec.), optative and participle (cf. Whitney, *Skt. Gram.* § 808 seq.). These are formed as in the non-*a*-conjugation (unthematic); the subjunctive has the strong stem + mode-sign *a;* the optative has the weak stem + *-yā-, -ī-*.

§ 604. A number of transfers to the *a*-inflection instead of the thematic are found in pluperfect, imperat., subjunct., optative, and participle. See § 619.

Paradigm of the Perfect-System.

(Cf. Whitney, *Skt. Gram.* § 800 seq.)

§ 605. Examples of the inflection of the perfect may be taken from the following roots:—

Av. √*garw-* 'to seize' = Skt. √*grabh-;* Av. √*dviš-* 'hate' = Skt. √*dviṣ-;* Av. √*1 rud-* 'grow' = Skt. √*1 rudh-;* Av. √*dars-* 'see'

= Skt. √*darś-*; Av. √*dā-* 'give, make' = Skt. √*dā-, dhā-*; Av. √*kan-* 'love' = Skt. √*kan-*; Av. √*tu-* 'be able' = Skt. √*tu-*; Av. √*dar-* 'hold' = Skt. √*dhar-*; Av. √*sru-* 'hear' = Skt. √*śru-*; Av. √*yat-* 'strain, strive' = Skt. √*yat-*; Av. √*han-* 'earn' = Skt. √*san-*; Av. √*bar-* 'bear' = Skt. √*bhar-*; Av. √*kar-* 'make' = Skt. √*kar-*; Av. √*þru-* 'support, nourish'; Av. √*man-* 'think' = Skt. √*man-*; Av. √*dī-* 'consider, see' = Skt. √*dhī-*; Av. √*z rud-* 'obstruct' = Skt. √*z rudh*; Av. √*sac-* 'learn, can' = Skt. *śac-*; Av. √*qs-, as-* 'attain' = Skt. *qś-, aś-*; Av. √*vaz-* 'curry' = Skt. √*vah-*; Av. √*ar-* 'go, rise' = Skt. √*ar-*; Av. √*har-* 'protect'; Av. √*ah-* 'be' = Skt. √*as-*; Av. √*vraz-* 'proceed'; Av. √*gam-* 'go, come' = Skt. √*gam-*; Av. √*van-* 'strive, contend, win' = Skt. √*van-*.

Third Person: i. ACT. Observe radical *ā* in (root with medial *a* before one consonant) GAv. *nānāsā* 'it is lost', YAv. *dadāra* 'he fixed'—see § 595 Note, but likewise *ā*, YAv. *cakāna* 'he loved' (√*kan-*), *yayāta* 'he strove' (√*yat-*), *bavāra* 'he bore' (√*bar-*).—Again from weak stem (final radical *ā* lost before vowels, § 596.4) *da-d-a* 'he made' (√*dā-*).—ii. MID. GAv. also (with strengthened reduplication) *vā-vərᵊz-āi* 'he has worked', cf. § 56.—Add GAv. *āraẽ-cā* 'has been earned' (√*ar-*) Ys. 56.3.

§ 613. Dual:—

Third Person: i. ACT. GAv. (note *-ā-*) *vaocātarᵊ* 'they both have spoken', *vāvərᵊzātarᵊ* 'they both have done' Ys. 13.4.

§ 614. Plural:—

b. Pluperfect.

§ 615. Singular:—

Third Person: ii. MID. GAv. *ᵓnāẖ̬ītā* (in paradigm, see Foot-Note) presents 'Attic reduplication'.

§ 616. Plural:—

Third Person: ii. MID. YAv. *vaoᵓirəm* (i. e. *va-vᵓ-i-rəm* √*vaz-*) above in paradigm shows 3 pl. ending in *-rəm* = Skt. *-ram* (cf. Whitney, *Skt. Gram.* §§ 834b, 867) with connecting vowel. See above § 455 end.

4. Optative.

§ 617. Plural:—

First Person: i. ACT. YAv., perhaps here *daiδyama* Yt. 24.58.

5. Participle.

Transitions to the thematic *(a)* inflection.

§ 619. A number of transfers to the *a*-inflection occur cf. § 604.

1. Indicative. i. ACT. b. Pluperf. Sg. 3. YAv. *ta-taš-a-ṯ* 'he formed'; *ja-ǰm-a-ṯ*.

2. Imperative. i. ACT. Sg. 3. GAv. *ni-ǰavhar-a-tū* (in paradigm).

3. Subjunctive. i. ACT. Sg. 3. YAv. *ɷvhāṯ* 'may be'; Du. 3. *ɷvhātəm* Yt. 13.12; Pl. 3. *iyeŋą (iieiią = *iy-ay-a-an)* 'they may go' (√*i-*) Ys. 42.6 (if not desiderative).—ii. MID. Pl. 3. YAv. *ɷvhāire* Yt. 10.45, cf. §§ 452, 486.

Absence of Reduplication.

§ 620. In Av., as in Skt., the absence of a reduplicated syllable is met with in a number of cases. This is familiar in *vaēδa* 'vîδα' = Skt. *vêda*, and in some other forms.—Cf. Whitney, *Skt. Gram.* § 790.

§ 621. As example of perf. lacking reduplication may be given G(Y)Av. √*vid-* 'to know' = Skt. √*vid-*.

1. Indic. a. Perf. Sg. 1. *vaēdā*, 2. *vōistā*, 3. *vaēdā*, *vaēda* (YAv.).

2. Imperat. Pl. 2. *vōiδūm* Ys. 33.8.

3. Subjunct. Sg. 1. *vaēdā* Ys. 48.9; Pl. 2. *vaēdōδūm* (§ 39).

4. Optat. Sg. 3. *vīdyāṯ*.

5. Partic. i. ACT. *vīdvah-* (GAv.); *vīdvah-* (YAv.).—ii. MID. *vaēdəna-* Ys. 34.7, *vaēdəmna-* (themat.).

§ 622. Other examples of pf. wanting redupl. are: GAv. √*cag-* 'grant', *cagᵊmā* (1 pl. pf. act.), *cagᵊdō* (3 du. plpf.), *cagvō* (ptcpl.).—Also GAv. *apānō* 'attained' (ptcpl. √*ap-*).

Periphrastic Perfect.

§ 623. In YAv. traces of a periphrasis which may be construed as forming a perfect are found.—Cf. also Whitney, *Skt. Gram.* §§ 1070, 1072. In Av. the acc. sg. fem. of the pres. participle is united with the perfect of the auxiliary *ah-* to be:—

YAv. *sraēžyeiṇtīm āuhāṯ* 'it may have clung' (subjunct.), *āstarayeiṇtīm āuhāṯ* 'should have corrupted'.—Perhaps also here *biwivāuha* 'he had frightened' Yt. 19.48,50 (? nom. sg. ptcpl. √*bī-* + *āuha*, cf. variants).

III. AORIST-SYSTEM.

Aorist.

(Chiefly found in Gāthā Avesta.)

§ 624. **General Remark.** In regard to form the aorist in Av. may perhaps best be defined as a preterite, whose exact corresponding present is missing and which consequently attaches itself to an analogous present and preterite, and forms a new system subordinate to these.

In regard to meaning the aorist in Avesta commonly denotes a simple past action, usually but not always momentary. It may often, as in Skt., be rendered by our 'have'.

The instances of aorist formation are found chiefly in the Gāthā portions of the literature, but occurences in the later parts are by no means uncommon.

Note. The resemblance in form which the aorist bears to the preterite (imperfect) sometimes gives rise to question whether certain given forms are to be classed as preterite (imperfect) or as aorist; the decision depends chiefly upon whether or not we assume a present to the form—e. g. cf. Bartholomae, *Verbum* p. 63 seq.

§ 625. Two groups of aorists may conveniently be distinguished; they are 1. non-sigmatic, 2. sigmatic. These comprise several sub-varieties of formation (7 as in Skt.), as follows.—Cf. Whitney, *Skt. Gram.* § 824.

Aorist-System
- i. Non-Sigmatic
  1. Root-aorist.
  2. Simple *a*-aorist (thematic).
  3. Reduplicated aorist.
- ii. Sigmatic
  4. *h-* (*s-*) aorist.
  5. *ha-* (*sa-*) aorist (or *h*-thematic).
  6. *iš*-aorist,
  7. *hiš*-aorist.

§ 626. **Augment and Endings.** The augment in aorist forms as elsewhere in Av. is commonly missing; the augmentless forms, moreover, often have a subjunctive (imperative) signification (cf. § 445 Note 2 injunctive). The endings in the indicative are the secondary.

§ 627. **Modes of the Aorist.** The modes—imperative, subjunctive (prim., sec.), optative—of the aorist are formed according to the regular laws of the other systems.

Note. Observe the existence of a form 3 sg. imperat. mid. in *-q m* = Skt. *-ām:* GAv. *sr̥ᵊūcqm* 'speak', *vidąm* 'it shall decide' Ys. 32.6, cf. Skt. *duhām*, Whitney, *Skt. Gram.* § 618.

i. Non-Sigmatic Group.

§ 628. The aorists of the non-sigmatic group—1. root-aorist, 2. simple *a*-aorist (thematic), 3. reduplicated aorist—resemble preterites (imperfects) which correspond respectively to the root-class, the *a*-conjugation (thematic), and to the reduplicated class.

1. Root-Aorist.
(Cf. Whitney, *Skt. Gram.* § 829.)

§ 629. The root-aorist is like an imperfect of the root-class without a corresponding present indicative. The endings are attached directly to the root in its strong or its weak form. The distribution of strong and weak stem-forms is in general the same as in the present and perfect systems. The modes show their characteristic mode-signs.

§ 630. Example of root-aorist inflection (almost exclusively GAv.).

Av. -𐬛𐬀 √*dā-* 'to give, do, make' (str. stem *dā-*, *da-*, wk. stem *d-*) = Skt. √*dā-*, *dhā-*, Whitney, *Skt. Gram.* § 829.

Note. For fuller GAv. lists in regard to the root-aorist see Bartholomae, *K.Z.* xxiv. p. 313 seq. = *Flexionslehre* p. 44 seq.

§ 647. Transfers to the thematic *a*-inflection are found, e. g. GAv. *vaẖš-a-ŧ* 'he increased', GAv. *frā-jm-a-ŧ* 'he came' (√*gam-*).

2. Simple *a*-Aorist (thematic).
(Cf. Whitney, *Skt. Gram.* § 846 seq.)

§ 648. The instances of the simple *a*-aorist are not very numerous; in Av. this aorist plays a part similar to that in the Skt. of the Rig Veda. In formation and inflection it is identical with a preterite (imperfect) of the 6th class. The root in its weak form simply assumes the thematic vowel *a;* the secondary endings are then added for the indicative.—Cf. Whitney, *Skt. Gram.* § 846.

§ 649. Examples of the *a*-aorist (chiefly GAv.) are the following:

1. Indicative. i. ACT. Aor. (pret.) Sg. 3. *vīdaŧ* 'he found' (beside 3 sg. pres. pret. *viŋd-aŧ*), *būjaŧ* 'he absolved' (beside pres. *buŋj-aⁱŋti*).—ii. MID. Pl. 3. *ẖšāŋtā* 'they ruled' (√*ẖšā-*).

2. Imperative. i. ACT. Sg. 2. *vīdā* 'find thou'.—ii. MID. Pl. 3. *ẖšāŋtąm* 'let them rule'.

3. Subjunctive. i. ACT. Sg. 1. *hanānī*, 3. *hanāŧ* 'let me, him earn'.

4. Optative. ii. MID. Sg. 3. *ẖšaētā* 'might he rule'.

5. Participle. i. ACT. *vīdaⁿ* (in compounds).

Likewise some other forms might be added.

---

3. Reduplicated Aorist.
(Cf. Whitney, *Skt. Gram.* § 856 seq.)

§ 650. The reduplicated aorist is comparatively rare. The stem is made by reduplicating the root which then appears in its weak form and assumes the thematic *a*. The secondary endings are added for the indicative.—Cf. Whitney, *Skt. Gram.* § 856.

§ 651. Example of inflection, Av. 𐬬𐬵𐬐 √*vac-* 'to speak' (stem *vaoc-a-* i. e. *va-uc-, va-vc-*) = Skt. √*vac- (vóca-):*

1. Indicative. i. ACT. Sg. 1. *vaocąm, vaocim* (§ 30), 2. *vaocō, vaocas-cā*, 3. *vaocaŧ, āvaocaŧ* (§§ 32, 466).—Pl. 1. *vaocāma, vaocāmā*.

2. Imperative. i. ACT. Sg. 2. *vaocā*.

3. Subjunctive. i. ACT. Sg. 1. *vaoca* (Ys. 45.3), 3. *vaocāŧ*.

4. Optative. i. ACT. Sg. 3. *vaocōiŧ*.—Pl. 1. *vaocōimā*.

Note 1. Similarly GAv. *nąsaŧ* 'he disappeared' (i. e. *na-ns-aŧ*, √*nas-* = Skt. √*naś-*).

Note 2. To the redupl. aor. possibly belong the obscure forms YAv. *urū-rudᵃ-u-ja* 'thou didst grow' 2 sg.-mid. Ys. 10.3, GAv. *qs-aš-u-tā* 'it has been accomplished'. The *u* may be anaptyctic, or is it from a pres. formation?

§ 652. Instances of the true causative aorist with strengthened reduplication (cf. Whitney, *Skt. Gram.* §§ 1046, 856) are: √*var-* 'to believe, cause to believe', GAv. *vāurāⁱtē* (3 sg. subjunct. mid.); *vāurayā* (1 sg. opt. mid.), *vāurōi-maⁱdī* (1 pl. opt. mid.). On *vāurāite* etc. for *vā-vr-āite* see § 62, 2 above.

Note 1. The forms *zīzanən, zīzanāṭ* (cf. Skt. *ajījanat*, Whitney, *Skt. Gram.* §§ 864, 869) are best reckoned under Cl. 3 in Av. on account of pres. indic. *zīzanənti* Yt. 13.15.

Note 2. The form *vaosirəm* Yt. 19.69 is reckoned under pluperf. above § 616.

ii. Sigmatic Group.

4. *h-* (*s-*) Aorist.

(Cf. Whitney, *Skt. Gram.* § 878 seq.)

§ 653. The characteristic mark of this aorist is an orig. sibilant *s* (= Av. *h, s, š*) which is added in forming the stem. The inflection is unthematic, the endings being attached directly to the root which shows different degrees of strengthening, see next section § 654.

§ 654. The indicative sg. act. has the vṛddhi-strengthening; the indic. plur. act. and generally both numbers of the indic. mid. have the guṇa form. The imperative mid. and the entire subjunctive act. show likewise guṇa. The optative and some instances of indic. plur. mid. generally have the weak form.

§ 655. Examples of inflection of this aorist are taken from the following roots:

Av. √*dī-* 'regard, think' = Skt. √*dhī-*; Av. √*dar-* 'hold, hold back' = Skt. √*dhar-*; Av. √*sand-* 'show, present, appear' = Skt. √*chand-* § 142; Av. √*man-* 'think' = Skt. √*man-*; Av. √*θwarš-* 'shape, create'; Av. √*fraš-* 'ask' = Skt. √*praś-*; Av. √*frā-* 'protect' = Skt. √*trā-*; Av. √*van-* 'win' = Skt. √*van-*; Av. √*1 nąš-, naš-* 'cause to vanish' = Skt. √*1 nąś-, naś-*; Av. √*varz-* 'work'

= Skt. √*varj-*; Av. √*pā-* 'protect' = Skt. √*tā-*; Av. √*vac-* 'speak' = Skt. √*vac-*; Av. √*dā-* 'give, do, make' = Skt. √*dā-*, *dhā-*; Av. √*2 naṣ-*, *nas-* 'attain' = Skt. √*2 naś-*, *naś-*.

5. *ha-* (*sa-*) Aorist.

(Cf. Whitney, *Skt. Gram.* § 916 seq.)

§ 662. The orig. *sa*-aorist (= Av. *ha, vha*) in Av. is really only a variety of the preceding *s*-aorist. It arises by transfer of the *s*-aorist to the *a*-inflection.

§ 663. Examples of the *ha- (sa-)* aorist inflection are the following:

1. Indicative. i. ACT. Sg. 3. YAv. *asąs-a-ţ* 'he fulfilled, offered' (√*sand-* above § 656) Vd. 19.15 = Skt. *á-chant-s-at.*

§ 664. One or two instances (GAv.) of the *iš*-aorist —see Whitney, *Skt. Gram.* § 898—are quotable. They are from √*kū-*, *cʿiū-* 'look for, hope', √*hŋ̊nu-* 'gratify, delight':—

1. Indic. i. ACT. Sg. 2. *°dā-hīš* 'thou hast made' (√*dā-*) Yt. 3.2 cf. Skt. *glāsīs*, Whitney, *Skt. Gram.* §§ 912, 913.

---

§ 666. No certain instance of a precative seems to be found in Avesta.

Aorist Passive, third Singular.

(Cf. Whitney, *Skt. Gram.* § 842.)

§ 667. In Av. as in Skt. an aor. 3rd. singular in *-i* with passive meaning occurs, though it is not of common use. The form is made by adding *i* to the verbal root which has either the vṛddhi or guṇa strengthening. The form may take the augment as in Skt.

§ 668. Examples of 3rd. sg. Aor. Pass. are the following:—

(a) With vṛddhi.—From Av. √*vac-* 'speak, call' *vācī*, *avācī* (GAv.) = Skt. *vāci*, *avāci*; Av. √*sru-* 'hear, call' *srāvī* (GAv.) = Skt. *srāvi*; so Av. *āʿidi* 'is said, spoken of' √*ad-* (so Geldner) = Skt.

ah-.—(b) With guṇa (or middle) form.—From Av. √*mrū-* 'say' *mraoī* (GAv. i. e. *mrav-ī*), Av. √*vaṭ-* 'understand' *=vaiṭī* (GAv.), Av. √*jan-* 'slay' *jaiṇi* (YAv.).

Note. The form YAv. *ərᵊnāvi* 'it was granted, obtained' (√*ar-*) is made, not directly from the root, but from the prepared stem *ərᵊ-nu-*, *ərᵊ-nāu-*.

IV. FUTURE-SYSTEM.

Future.

(Cf. Whitney, *Skt. Gram.* § 932 seq.)

§ 669. The characteristic mark of the future in Avesta as in Sanskrit is *-hy-* (*-šy-* § 133) = Skt. *-sy-* (*-sy-*) added to the root. The root assumes the guṇa-form; the inflection is thematic *(-hya, -šya)*.—Cf. Whitney, *Skt. Gram.* § 932 seq.

Modes of the Future.

§ 670. The instances of the future are in general not very numerous; they are confined to the indicative mode and to the participle. The place of the other modes is often taken by a subjunctive of other parts of the verb used in a future sense. Cf. Whitney, *Skt. Gram.* § 938.

Future Formation and Inflection.

§ 671. Examples of future formation and inflection are taken from the following roots. Cf. Whitney, *Skt. Gram.* § 933.

Av. √*vac-* 'to speak' = Skt. √*vac-*; Av. √*harz-* 'let go, drop' = Skt. √*sarj-*; Av. √*sū-* 'further, save' = Skt. √*sū-*.

§ 672. 1. Indicative.—Future.

i. ACTIVE. Av. *sao-šy-aŋt-* . . . . cf. Skt. *kṣē-ṣy-ánt-*

ii. MIDDLE. *har²-šy-amna-* . . . . . *yak-ṣy-ámāna-*

Forms to be observed.

§ 674. Notice the long vowel instead of strengthening in the Av. participles *bū-šy-aŋt-* from √*bū-*, opp. to Skt. *bhav-i-ṣyánt-* (§ 61 Note 2), cf. Skt. RV. *sū-ṣy-ant-*. Observe also *ɣrvī-šy-aŋt-* beside *ɣrvĭ-šy-aŋt-* from √*ɣrvī-* 'be raw, bloody'.

V. SECONDARY CONJUGATIONS.

§ 675. The secondary conjugations consist of the following formations (thematic), a. Passive, b. Causative, c. Denominative, d. Inchoative, e. Desiderative, and f. Intensive (unthematic).

A. Passive.

(Cf. Whitney, *Skt. Gram.* § 768 seq.)

§ 676. **General Remark.** The passive force may be given in any tense-system simply by employing the middle voice in a passive sense. In the present-system, however, there is also a formative passive made by means of the passive sign *-ya-* (cf. Cl. 4) attached to the prepared root.

Note. The connection between this formative passive in *ya* and Cl. 4 of the present-system is generally acknowledged. In Skt. the difference of accent distinguishes the two, the passive having accented *yá*, but Cl. 4 an unaccented *ya*. As no written accent is found in Av., such a distinction cannot always be sharply drawn; it is therefore sometimes doubtful whether a given form is really a passive or merely a middle used with passive sense, e. g. *manyetē* (pass.) Ys. 44.12 identical in form with *manyete* (mid.) Yt. 10.139 = Skt. *manyátē, mányatē*.

§ 677. **Formation of the Passive.** The passive sign is *-ya-* (= Skt. accented *-yá-*) attached to the root which then assumes the weak form.

Note. The *ar*-roots require some remark as they frequently show MS. variations as to the way in which the radical *r*-vowel is expressed: e. g. Av. √*mar-* 'to die', *mir-ye-iti, mir-ye-ite, mrə²-ye-iti, mair-ye-ite* Vd. 3.33 = Skt. *mriyátē;* again Av. √*kar-* 'to make', *kir-ye-iti* Yt. 10.109,

kir-ye-i̯ṇte v. l. *kaⁱr-ye-i̯ṇte* Vd. 3.9, cf. § 48 above. The development in such cases evidently is

**mṛ-ya-tē*

Av. *mar-ya-te* (or *-aⁱr-* § 48) or *mir-ya-te* (*-ir-* § 70) — Skt. *mṛ-i̯-yá-tē* *mr-i-yá-tē*

§ 678. **Endings.** In Skt. the passive form assumes the middle endings, but some exceptions with active endings occur, cf. Whitney, *Skt. Gram.* § 774. In Av. also, the middle endings are used but the active ones likewise are not very uncommon. Observe especially the MS. variants in final *e, i* (§ 35 Note 2) *kiryeⁱti, kiryeⁱte*. The intransitive passive force seems therefore to lie in the *ya*-element.

Note. An undoubted example of act. ending but passive force is *frā-yez-yāṯ* in Yt. 13.50 *kahe vō urvā* (nom. masc.) *frāyezyāṯ* 'of which one of you will the soul be worshipped?' Apparently also with active ending (from √*dā-*) *dayāṯ* (subjunct.) Vd. 3.32, *ni-dayaṯ* (impf.) Yt. 12.17.

Modes of the Passive.

§ 679. The modes of the passive are the usual ones of the present-system; a complete list of forms, however, cannot be gathered from the texts.

Passive Inflection.

§ 680. Examples of passive voice with middle and active endings are the following:

1. Indicative. a. Pres. Sg. 3. *baⁱr-yeⁱte* v. l. *baⁱryeⁱti* 'he is borne', *kiryeⁱti* v. l. *kiryeⁱte* 'it is made'; Pl. 3. *kiryeⁱṇte* v. l. *kaⁱr-yeⁱṇte* 'they are made' (§ 48).—Pret. Sg. 2. *maⁱryavha* 'didst die' v. l. *mərᵊyavha*, 3. *vī-sruyata* 'was heard', *ni-dayaṯ* 'was placed'.

3. Subjunctive. Sg. 3. *maⁱryāⁱte* v. l. *miryaⁱte*, *miryāⁱti* 'is destroyed, dies'; *yezyāṯ* 'is worshipped'; Pl. 3. *baⁱryə̄nte* 'they will be borne', *janyə̄nte* 'they will be slain' Yt. 14.43.

5. Participle. Av. *suyamna-* 'being advanced, saved'.

Note. From √*var-* 'to cover' is found a form *ni-vōⁱr-ye-ite* (v. l. *ᵊti*), —on *ō*, cf. § 39.

§ 681. A Perf. Pass. Participle in *-ta* or *-na* also belongs to the passive conjugation. See § 710 below.

§ 682. A Fut. Pass. Participle (Gerundive) in *ya-* is formed according to § 716 below.

§ 683. The Aorist Passive 3rd. Singular likewise falls under this formation. It is treated above, § 668.

B. Causative.

§ 684. **General Remark.** In Av. as in Skt. the causative *(-aya-)*, like the Denominative is identical in form with Cl. 10, the latter being originally a causative formation. The causal is found in the Present-System.

Note. In Skt. many of the so-called causatives do not have a strict causative value and are therefore reckoned as belonging to the Skt. *cur*-Class (10); similarly in Av., a number of causative forms have been treated above under Class 10, cf. § 482 seq.

§ 685. **Formation.** The present-stem of the causative is formed by adding the causal formative element *-aya-* to the root which is usually strengthened. The strengthening of the root is subject to certain variations.

a. Internal or initial *a* before a single consonant is generally lengthened (vṛddhi), but sometimes it remains unchanged, thus: Lengthened *ā*, Av. √*vat-* 'to comprehend', caus. 'make known' *vātaya-* = Skt. *vātáya-;* Av. √*tap-* 'to warm, be warm', caus. 'make warm' *tāpaya-* = Skt. *tāpáya-;* Av. √*gam-*, *jam-* 'go, come' *jāmaya-* = Skt. *gāmáya-* (Whitney, *Skt. Gram.* § 1042 g).—Unchanged *a*, Av. √*pat-* 'to fall, fly' *pataya-* = Skt. *patáya-;* Av. √*sad-* 'appear' *sadaya-* = Skt. *chadáya-;* Av. √*ap-* 'obtain', *apaya-*, opp. to Skt. *āpáya-*.

b. Internal and initial *a* before two consonants (i. e. long by position) remains unchanged: Av. √*daŋ̌-* 'to know, cause to know' *daŋ̌ŋaya-* = Skt. *dakṣáya-;* Av. √*vaŋ̌-* 'grow, cause to grow' *vaŋ̌ŋaya-* = Skt. *vakṣáya-;* Av. √*band-* 'bind' *bandaya-* = Skt. *bandháya-;* Av. √*zamb-* 'crush' *zmbaya-* = Skt. *jambháya-*.

c. Final long *ā* disappears: Av. √*stā-* 'to stand, cause to stand' *staya-* opp. to Skt. *sthāpáya-*, cf. Whitney, *Skt. Gram.* § 1042 i.

d. Internal or initial *i*, *u* before single consonants (i. e. in light syllables) have the guṇa-strengthening: Av. √*vid-* 'to know', caus. 'inform' *vaēdaya-* = Skt. *vēdáya-;* Av. √*ruc-* 'light up' *raocaya-* = Skt. *rōcáya-*.

e. Final *u* (or *i*) receives the vṛddhi-strengthening: Av. √*sru-* 'to hear' *srāvaya-* = Skt. *śrāváya-*.

Note 1. The nasal of the present-stem (Cl. 9) appears in Av. *kərᵊṇtaya-* from √*kart-* 'to cut' as in Skt. *kṛntáya-*, cf. Whitney, *Skt. Gram.* § 1042 h. So also Av. *bunjaya-* from √*buj-* 'to release'.

Note 2. The root *zā-* 'to let go' makes *zayaya-*, cf. Whitney, *Skt. Gram.* § 1042.

Note 3. Observe with lengthening instead of strengthening of root (§ 61 Note) GAv. *ᵘrūpayeiṇtī* 'they cause pain' (√*rup-*) = Skt. *rōpáyanti*; GAv. *ᵘrūdōyatā* 'he caused to lament' = Skt. *rōdhāyata*.

Modes of the Causative.

§ 686. The Causative shows the same modes, 1. Indicative, 2. Imperative, 3. Subjunctive, 4. Optative, including also 5. Participle, as the present-system naturally does.

Inflection of the Causative: Present-System.

§ 687. The causal in the present-system is inflected after the *a*-conjugation (thematic), see Cl. 10 above, §§ 481, 482 seq.

Other Causative Formations.

§ 688. To the causal formation belongs not only the causative of the present-system, but also a causal aorist (see § 652); possibly likewise a causative perfect (pluperfect), and some other parts.

§ 689. On the reduplicated Causative Aorist, see § 652 above.

§ 690. Possibly here belongs as Periphrastic Perfect (Plupf.), Av. *biwiwaŋha* 'he had frightened', see § 623.

§ 691. A causal derivative from √*hap-* 'to sleep' is made by attaching the root *dā-* 'to make, do' in its causal form directly to the radical element; thus, Av. *habdayeiti* 'puts to sleep'.

§ 692. Other causative derivatives made with root *dā-* (cf. § 691) but without causal form, are *ava-uhab-daẑta* 'he would cause to sleep' (√*hap-*), *ẋraoždaŋ* 'caused to howl' (√*ẋrus-*), *yaoždāiti* 'makes pure' (√*yaoš-*).

§ 693. Some forms with causal signification but without the *-aya-* formation occur: Av. *vaŋẋaŋ* 'he caused to grow' Ys. 48.6 opp. to *vaŋẋ-aya-tō* 'they both cause to grow' Ys. 10.3.

§ 694. An occasional verbal noun (infinitive) or adjective (participle) is likewise to be noted under the causal formation: Av. *fraɪrūta-* 'made

famous, renowned', *urvaēšta-* 'turned' Ys. 11.2. Cf. Whitney, *Skt. Gram.* § 1051 seq.

C. Denominative.

(Cf. Whitney, *Skt. Gram.* § 1053 seq.)

§ 695. Denominative verbs are formed from a noun-stem (substantive or adjective) by adding *-ya* or *-a* = Skt. *-yá* or *-a* to the stem. In Skt. the *-yá* is accented, but as there is no written accent in Av., it is sometimes hard to decide whether a certain given verb-form in *-aya* be really a denominative from an *a*-stem or not rather simply a causative. As to meaning, the denominative usually signifies 'to make, use, cause, be, or practise' that which the noun-stem itself denotes.

§ 696. Formation and Inflection. The denominative is found in the Present-System and is made 1. by adding *-ya* (= Skt. *-yá*), or more rarely 2. *-a* (= Skt. *-a*) directly to a noun-stem. The inflection is therefore that of the present-system *a*-conjugation (thematic).—Cf. Whitney, *Skt. Gram.* §§ 1054, 1068.

1. *ya* added: Av. *aša-* n. 'holiness' (*a*-stem) denom. *aša-ya-* 'to gain by holiness', *aša*^{i}*yei̯ti* = Skt. *ṛtayá-;* Av. *vāra-* m. 'rain' denom. *vāra-ya-mi* 'I rain down';—Av. *xvhu-* m. 'lord' (*u*-stem) denom. *xvhu-ya-* 'to become lord of', *xvhuyāite;*—Av. *nəmah-* n. 'homage' (cons. stem) denom. *nəmaŋ-ya-* 'do homage' *nəmaŋyāmahī* = Skt. *namasyá-;*—Av. *išud-* f. 'debt' (cons. stem) denom. *išud-ya-* 'incur a debt', *išū*^{i}*dyāmahī* = Skt. *iṣudhyá-*.

2. Simple *a* added: Av. *pa*^{i}*ti-* 'lord' (*i*-stem) denom. *pa*^{i}*py-a-* 'to possess as lord', *pa*^{i}*pyei̯ti* = Skt. *pátya-;*—Av. *ȝratu-* m. 'wisdom' (*u*-stem) denom. *ȝrapθw-a-* 'be wise', ptcpl. mid. *ȝrapθwəmnahe* 'of him that is wise';—Av. *fyaxhu-* m. 'mist' (*u*-stem) denom. *fyaxhv-a-* 'to fall as mist', *fyaxhuṇtaŋ-ca* (§§ 63, 493, 582);—Av. *aēnah-* n. 'sin' (cons. stem) denom. *aēnaxh-a-* 'to commit sin', *aēnaxha*^{i}*ti* Ys. 9.29 opp. Skt. *ēnas-yá-*.

Note. Final *a* of a noun-stem seems occasionally to disappear (cf. in Skt. after *n* or *r*, Whitney, *Skt. Gram.* § 1059 e). Thus, Av. *baēšaz-ya-ti* etc. 'he practises healing' Yt. 8.43 (*baēšaza-* n.), *vāstryaŋ-ta* 'let him pasture' (*vāstra-* n.), *par*^{ə}*san-ye-*^{i}*ti* 'he asks' Yt. 8.15. So probably also

Av. *pəŋanaiti* 'he fights' (*pəŋana-* n., *pəŋanā-* f.), cf. Skt. *pṛtanyati*, Whitney, *Skt. Gram.* § 1060.

D. Inchoative.

(Cf. Whitney, *Skt. Gram.* §§ 608, 747.)

§ 697. The existence of the inchoative in Av., as in Skt., is shown by a few verbs. The inchoative sign is *s* = Skt. *ch* (§ 142) added directly to the root in its weak stage. The thematic *a*-inflection is then assumed. The instances of inchoative are comparatively so few that these inchoative *s*-forms have sometimes been reckoned as independent roots.

§ 698. Examples of Inchoatives. The formation and inflection is shown by the following instances.

Av. √*gam-*, *jas-* (i. e. *gm̥-s-*) 'to go, come' *ja-s-a-iti*, cf. βάσκω = Skt. *gá-ch-a-ti*; Av. √*yam-*, *yas-* (i. e. *ym̥-s-*) 'come, reach' *ya-s-a-ite* = Skt. *yá-ch-a-te*; Av. √*fras-*, *pərəs-* (i. e. *pṛs-s-*) 'ask' *pərəs-s-aite*, cf. Lat. *po(r)scit* = Skt. *pṛ-ch-a-ti*; Av. √*vaḫ-*, *us-* (i. e. *us-s-*) 'to light up' *us-a-iti* = Skt. *uchati*; Av. √*tap-*, *tafs-* 'to warm, grow warm' *taf-s-a-ṭ*, cf. Lat. *tepesco*. Also a few others.

Note. Observe the assimilation and loss of consonants before *s* in the following examples: Av. *tərəsaiti* 'he trembles' (i. e. **tṛs-s-aiti*), cf. Skt. √*tras-*; Av. *usaiti* just above § 698. So Av. *hīsaṭ* 'he began to sweat' √*hid-* = Skt. √*svid-*. See §§ 184, 185 above.

E. Desiderative.

(Cf. Whitney, *Skt. Gram.* § 1026 seq.)

§ 699. The desiderative in Av. resembles the Skt. in formation and signification. The root is reduplicated and the formative element *-ha (-wha, -ša, -za)* = Skt. *-sa* as desiderative sign is added. The vowel of the reduplicated syllable is always *-i-* (*-ī-* § 21 Note); the initial consonant of the root in reduplicating follows the usual rules above § 465.

The root of the desiderative appears ordinarily in its weak grade; sometimes, however, in its strong (middle)

form. The desiderative is confined to the present-system; the inflection *(-ha, -sa)* is thematic.

§ 700. Examples of Desiderative Formation. The instances of the desiderative are not very numerous; the following may be noted.

Av. √*ji-* 'to conquer, win', desid. *jī-ji-ʒa-* 'seek to win over' = Skt. *ji-jī-ṣa-*; Av. √*ẖšnu-* 'gratify, rejoice', desid. *ci-ẖšnu-ʒa-*; Av. √*žnā-* 'know', desid. *zi-ẖšnə̄-vha-* (§§ 164, 465 Note 2) = Skt. *ji-jñā-sa-*; Av. √*dab-* 'deceive', desid. GAv. *di-w-ža-* (i. e. *di-^{d}bh-ža* § 80) 'seek to deceive' = Skt. *dipsa-*; Av. √*sac-* 'teach, learn, can', desid. *sīšu-* (i. e. **si-k-sa-*) = Skt. *si-k-ṣa-*. Likewise a few other forms, e. g. *dīdarᵊža-* from √*darz-* 'make firm', *mimaʒža-* from √*manj-* 'magnify', *vīvarᵊʒa-* from √*varz-* 'do'.

§ 701. Examples of Inflection. These are confined to the present-system thematic.

1. Indicative. a. Pres. i. ACT. Pl. 3. GAv. *jī-ji-ʒəṇtī* Ys. 39.1. —ii. MID. Pl. 2. *dī-draŋ-žōduyē* Ys. 48.7.—b. Pret. i. ACT. Sg. 2. *ci-ẖšnu-ʒō* Ys. 45.9.—ii. MID. Sg. 3. *dī darᵊ-ʒatā* 'he held back' (√*dar-*).

2. Imperative. i. ACT. Sg. 3. GAv. *vī-vāŋgha-tū* 'let him seek to surpass' (√*van-*).—ii. MID. Sg. 2. YAv. *mi-marᵊẖ-ʒavuha.*

3. Subjunctive. i. ACT. Sg. 1. GAv. *ci-ẖšnu-ʒa* Ys. 49.1; 3. YAv. *ji-ji-ʒā-iti.*—ii. MID. Sg. 3. *mi-marᵊẖ-ʒā-iṯē.*

5. Participle. i. ACT. GAv. *ci-ẖšnu-ʒaŋt-* Ys. 43.15.—ii. MID. YAv. *zi-ẖšnə̄-vhəmna-* § 465 Note 2.

Note. A Perf. Participle of the desid. Act. is *jaẖšavə̄* 'having the desire to slay' (√*jan-*) *ZPhl. Glossary* p. 92.

F. Intensive.

(Cf. Whitney, *Skt. Gram.* § 1000 seq.)

§ 702. The characteristic features of the Intensive are reduplication and the unthematic inflection. In formation, the Intensive in Av., as in Skt., closely resembles the reduplicating class (Cl. 3) of the present-system; it is distinguished from Cl. 3 by having a strengthened reduplicated syllable.

§ 703. As regards the reduplication, the formation of the Intensive in Av. is twofold.

1. The reduplicated syllable is made by repeating the initial consonant followed by the radical vowel in a strengthened form (*a* being strengthened to *ā*;—*i* to *aē*, *ōi*;—*u* to *ao*).—Cf. Whitney, *Skt. Gram.* § 1002.

2. The reduplicated syllable is made by repeating the entire root. —Cf. Whitney, *Skt. Gram.* § 1002 ii.

§ 704. As regards the radical syllable itself, this assumes sometimes the strong form, sometimes the weak grade, according to the person or the mode in which it is found. The inflection as stated above is unthematic.

§ 705. Examples of Formation. As instances to illustrate the Intensive formation the following may be taken:

1. Strengthened Reduplication: Av. √*part-* 'to fight', intens. *pā-pərᵊt-*;—Av. √*dis-* 'show, teach' *daē-dōis-*, *daē-dis-* = Skt. *dē-diś-*, *dē-diś-*; Av. √*vid-* 'find' *vōi-vid-* = Skt. *vē-vid-*;—Av. √*zū-* 'call' *zao-zao-* = Skt. *jō-hav-*.

2. Repeated Root: Av. √*dar-* 'to tear' *dar-dar-* = Skt. *dar-dar-*; Av. √*kar-* 'make' *car-kərᵊ-* = Skt. *cár-kr-*; Av. √*ǰžar-* 'stream, flow' *ǰžar-ǰžarᵊ-* (in participle) opp. Skt. *cā-kṣar-*.

Note. An intensive with the *ya*-inflection (Cl. 4 thematic) is to be found in the following instance: Av. √*raž-* 'to wound-, GAv. *rā-rəž-yeⁱŋtī* (indic.) Ys. 47.4; *rā-rəž-yąn* (subjunct.) Ys. 32.11; YAv. *rā-rəž-ya-ŋtō* (nom. pl. ptcpl.) Yt. 11.6; but un-thematic GAv. *rā-rəž-ō* (ptcpl.) Ys. 49.2—cf, Skt. *rā-rakṣ-*; see also Whitney, *Skt. Gram.* § 1016. Similarly, Av. √*yah-* 'be heated, boil' *yaēžya-* (i. e. *yā-iž-ya-*) in the ptcpl. *yaēžyaŋt-* = Skt. *yā-yas-*.

§ 706. Examples of Inflection. These are confined to the present-system unthematic, and they are mostly from GAv. Thus:

1. Indicative. a. Pres. I. ACT. Sg. 1. GAv. *zao-zao-mī*; Pl. 1. GAv. *carᵊ-kərᵊ-mahī* Ys. 58.4.—II. MID. Sg. 1. GAv. *vōi-vīd-ē*.—b. Pret. Sg. 3. *daē-dōiš-t*.

4. Optative. I. ACT. Sg. 3. YAv. *darᵊ-daⁱr-yāt* (with str. rad. stem *-dar-* instead of expected wk. *-dərᵊ-*).

5. Participle. I. ACT. YAv. *ǰžarᵊ-ǰžar-ənt-* (*a*-inflect.).

§ 707. Transfers to the *a*-inflection are found, e. g. Indic. Pres. 3 sg. act. YAv. *naē-niž-aⁱti* 'it removes', et al.

VI. VERBAL ABSTRACT FORMS.

Participle, Gerund, Infinitive.

§ 708. To the verbal system there also belong the Participle or verbal adjective, the Gerund, with Gerundive, and the Infinitive or verbal noun.

A. Participle.

1. Participle in *-aŋt, -at* (Act.); *-mna, -āna* (Mid.).

(Cf. Whitney, *Skt. Gram.* §§ 583, 584 etc.)

§ 709. Participial forms in *-aŋt, -at* (i. e. *-nt*), fem. *-aⁱŋtī, -aⁱtī* in the Active, and forms in *-mna, -āna (-ānа)* in the Middle, are found in each tense-system. As these attach themselves directly rather to the tense-systems, they have been discussed above under the respective systems, cf. §§ 488, 533 etc.

2. Passive Participle in *-ta*.

(Cf. Whitney, *Skt. Gram.* § 952 seq.)

§ 710. A passive participle or past passive participle, is made in Av., as in Skt., by adding the suffix *-ta* = Skt. *-tá* (accented) directly to the verbal root, which is subject however to certain euphonic changes. This verbal adjective in *-ta* (m. n.), *-tā* (f.) is regularly declined according to the *a*-declension §§ 236, 243. Examples of the formation are Av. *pāta-* 'protected' (√*pā-*) = Skt. *pātá-*; Av. *gərᵊpta-* 'grasped' (√*garw-* § 74) = Skt. *grbhītá*; Av. *druŋta-* 'deceived' (√*druj-* § 90) = Skt. *drugdhá-*.

§ 711. Treatment of the Root before *-ta*. The form of the root is subject to modification and is liable to vary before the added suffix. The following points may be noted:—

1. The root very commonly (but not always) shows the weak form, if it has one, before *-ta*; a penultimate nasal is accordingly dropped. Thus, with weak form, from Av. √*vac-* 'to speak' ptcpl. *ᵛuŋta-* = Skt. *uktá-*; Av. √*hu-* 'press out' *huta-* = Skt. *sutá-*; —Av. √*hanj-* 'draw, drive' *haŋta-*; Av. √*hanj-* 'encircle' *haŋta-* =

Skt. *svaktá-*; Av. √*baŋd-* 'to bind' *basta-* (§ 151) = Skt. *baddhá-*. —Strong form or unchanged, Av. √*dā-* 'to place' *dāta-* opp. Skt. *hitá-*; Av. √*taš-* 'cut, form' *tašta-* = Skt. *taṣṭá-*.

2. Roots in final *-ā* retain this. Thus, Av. √*stā-* 'to stand' *stāta-* opp. Skt. *sthitá-*; Av. √*dā-* 'place' opp. Skt. *hitá-*; Av. √*snā-* 'bathe' = Skt. *snātá-*; Av. √*pā-* 'protect' = Skt. *pātá-*.

3. Roots in *-ar* often show MS. variations between *-ərəta* and *-arəta*, cf. § 47 Note. Thus, Av. √*bar-* 'to bear' *bərəta-*, *barəta-* (e. g. Ys. 62.9) = Skt. *bhṛtá-*; Av. √*star-* 'stretch, strew' *frastərəta-*, *frastarəta-*.

4. Roots in *-an*, *-am* in Av., as in Skt., often form *-ata* (i. e. *-ṇtá*, *-ṃtá*); sometimes they show *-āta*. Thus, Av. √*jan-* 'to slay' *jata-* = Skt. *hatá-*; Av. √*man-* 'think' *mata-* = Skt. *matá-*; Av. √*gam-* 'go' *gata-* = Skt. *gatá-*; Av. *zan-* 'beget, bear' *zāta-* = Skt. *jātá-*.

5. But roots in *-an*, *-am* often retain the nasal (*m* being assimilated to *n* before *t*). Thus, Av. √*kan-* 'to dig' *ᵒkaṇta-* (cf. also *kata-*) opp. Skt. *khātá-*; Av. √*zan-* 'know' *ᵒzaṇta-*; Av. √*gram-* 'be angry' *graṇta-*.

6. Sometimes a radical short *ă* appears as long *ā* before *-ta*, cf. § 20. Thus, Av. √*sru-* 'to hear' *srāta-* = Skt. *śrutá-*; Av. √*dru-* 'run' *drāta-* = Skt. *drutá-*.

§ 712. The past participle in *-ita*, although common in Skt., hardly appears in Av.; the instances Av. *darʒita-* Ys. 57.11 = Skt. *dhṛṣitá-*, Av. *raoðita-*, *zairita-* are best treated under Suffixes below, § 786 Note 1.

3. Passive Participle in *-na*.
(Cf. Whitney, *Skt. Gram.* § 952.)

§ 713. The *na*-formation of the passive participle is very rare in Avesta. The instances are hardly distinguishable from adjectives. As examples may be given, Av. √*tan-* 'to stretch' *us-tāna-* 'upstretched' = Skt. *uttānáⁿ*; Av. √*ū-* 'be wanting' *ūna-* = Skt. *ūnáⁿ*; Av. √*par-* 'fill' *pərəna-* = Skt. *pūrṇáⁿ*.

4. Perfect Active Participle in *-vah*.
(Cf. Whitney, *Skt. Gram.* § 802.)

§ 714. The formation of the Perf. Act. Participle has been treated above under the Perfect-System, see §§ 611, 618, 399.

5. Perfect Middle Participle in *-āna, -āna.*
(Cf. Whitney, *Skt. Gram.* § 806.)

§ 715. On the formation of the Perf. Mid. Participle, see above under Perfect-System, §§ 611, 618.

B. Gerundive and Gerund.

1. Gerundive: (a) Fut. Pass. Participle in *-ya* (declined).
(Cf. Whitney, *Skt. Gram.* § 961.)

§ 716. A declined derivative adjective with verbal force is made from some verbs by attaching the formative element *-ya* to the root. Such an adjective is regularly inflected according to the *a*-declension. In meaning, it often corresponds to the Latin form in *-ndus;* it is therefore commonly called a gerundive or future passive participle.

Examples are from Av. √*iš-* 'to wish', a gerundive (vbl. adj.) *išya-* = Skt. °*iṣya-;* Av. √*karš-* 'draw furrows, plow' *karšya-* = Skt. °*kṛṣya-;* Av. √*var-* 'choose, believe' *vairya-* = Skt. *várya-*. Other instances occur.

2. Gerundive: (b) Fut. Pass. Participle in *-tva, -þwa* (declined).
(Cf. Whitney, *Skt. Gram.* § 966 a.)

§ 717. A declined derivative adjective of like signification *(-ndus)* with the preceding (§ 716) is made by adding *-tva, -þwa, -ðwa* (§§ 94, 96; see also under Suffixes) directly to the root in its strong form. Such a verbal adjective is regularly inflected after the *a*-declension.

Examples are: Av. *jaþwa-* 'worthy to be killed' (√*jan-*) = Skt. *hántva-;* Av. *ẖšnaoþwa-* 'worthy to be satisfied' (√*ẖšnu-*); Av. *varštva-* 'to be done' (√*varz-*), *maþwa-* 'to be thought', *vaŋ²ðwa-* 'to be spoken'.

3. Gerund (Absolutive) in *-ya* (indeclinable).
(Cf. Whitney, *Skt. Gram.* § 989 seq.)

§ 718. A species of Gerund or Absolute (indeclinable) in *-ya* seems to occur in the following instances with *daiþe:* Av. *aiþigairya* 'seizing' = Skt. °*gīrya;* Av. *paitiricya* 'throwing away'. But cf. Bartholomae in *B.B.* xv. 237.

see E. Benveniste. Les infinitifs avestiques. Paris 1935.

C. Infinitive.

(Cf. Whitney, *Skt. Gram.* §§ 538, 968.)

§ 719. The Infinitive is a verbal noun, an abstract derived from a verb. It is formed either directly from the root, or sometimes from a tense-stem. Such a derivative noun is used with an infinitival or a semi-infinitival force. The noun form is found most often in the dative case; sometimes, however, in other cases. The abstracts used as infinitives are most commonly cases of a substantive stem made by means of the suffix *-di, -ti, -ah;* less often they are formed from stems in *-man, -van, -a;* or they are from suffixless stems.

§ 720. Examples of Infinitives or Verbal Nouns so used, are the following. Cf. also Whitney, *Skt. Gram.* § 970.

1. **Ending Av. *-dyāi, -dyāi* dative = Skt. *-dhyāi.***
(Chiefly GAv.; rare YAv.)

From root: GAv. *dərᵊdyāi* 'for holding' (√*dar-*).—From pres. stem: GAv. *vərᵊzyeⁱdyāi* 'to work', YAv. *vazaⁱdyāi* 'for driving' (√*vaz-*) Yt. 15.28, *srāvayeⁱdyāi* 'to proclaim' Yt. 24.46.

2. **Ending Av. *-tōe, -tayaē-ca* dative = Skt. *-tayē.***
(Only YAv., but frequent.)

4. **Ending Av. *-maⁱne, -vaⁱne* dative = Skt. *-manē, -vanē.***
(GAv. and YAv.)

From pres. stem: YAv. *staomaⁱne* 'for praising' (√*stu-*), GAv. *vīdvanōi* 'to know' (√*vid-*) § 56. Also a couple of others.

5. Ending Av. *-āi* dative (*a*-decl.) = Skt. *-āi*.
(GAv. and YAv.)

From root: YAv. *jayāi* 'to win' (√*ji-*).—From stem: GYAv. *fradaþāi* 'to promote' (√*dā-*).

6. Ending Av. *-ē* dative (radical) = Skt. *-ē*.
(Chiefly GAv.)

7. Ending *-tē* locative.
(GAv. and YAv.)

From root: GAv. *āitē* 'to go to' (√*i-*) Ys. 31.9.—From stem: YAv. *dasṭe* 'to put, make' Vsp. 15.1.

§ 721. A number of other formations in the acc., gen., loc., cases of abstract nouns may be regarded as infinitives. For examples, see Geldner, in *K.Z.* xxvii. p. 226; Bartholomae, in *K.Z.* xxviii. p. 17, *B.B.* xv. p. 215 seq.

VII. PERIPHRASTIC VERBAL PHRASES.

§ 722. In the Av., there is an inclination occasionally to use periphrastic phrases made up by means of an adj., a participle or a noun, with a copula verb or auxiliary, instead of a regularly formed tense-stem. The auxiliary may sometimes even be omitted. The periphrastic phrase is chiefly found in YAv.; its presence, however, is recognized in GAv.—Cf. Whitney, *Skt. Gram.* § 1069 seq.

§ 723. The possible existence of a Periphrastic Perfect has been noted above, § 623.

§ 724. A number of Periphrastic Expressions made by means of an adjective, a participle, or a noun combined with a verb, deserve special mention.

1. Periphrastic with Av. √*i-* 'to go' = Skt. √*i-*, cf. Whitney, *Skt. Gram.* § 1075 a. GAv. *stavaṛ ayenī* 'I shall praise' Ys. 50.9.

2. With Av. √*āh-* 'sit' = Skt. √*ās-*, and Av. √*stā-* 'stand' = Skt. √*sthā-*, cf. Whitney, *Skt. Gram.* § 1075 c. YAv. *upa.maiθīm āste* 'remains', *tē hišṭenti ǰžarᵊǰžarəṇtiš* 'they keep flowing'.

3. With Av. √*ah-* 'be' = Skt. √*as-*, and Av. √*bū-* 'be' = Skt. √*bhū-*, cf. Whitney, *Skt. Gram.* § 1075 d. GAv. *ahvā frīnənmnā* 'let us both pray to', 1 du. injunct. Ys. 29.5; GAv. *hyāţ ciϑənuţō* 'let one be gratifying' Ys. 43.15; GAv. *iswā hąs* 'being able, possessed of'; YAv. *paⁱrikərᵊɱtiš auhən* 'may be looking about'; YAv. *yaoždayąn auhən*. Cf. also *fraoⁱristō* Yt. 13.25.—YAv. *yaţ. bavāni aⁱwi.vanyō* 'that I may be conquering'; YAv. *yaoždāta būn* 'they become cleansed', *vavanə buye* 'become victorious'.

4. With √*dā-* 'give, make, do'. So apparently YAv. *aⁱbīgaⁱryā daⁱϑē* 'I do accept', *paⁱtiricya daⁱϑē* 'he does throw away' cf. § 718.

INDECLINABLES.

§ 725. **General Remark.** The indeclinable words in Avesta, correspond in general to those in Sanskrit and in the other Indo-Germanic languages. Under Indeclinables are comprised Adverbs, Prepositions, Conjunctions, and Interjections. These may be taken up in detail. Kanga Av. Gr. p. 269

A. Adverbs.

§ 726. The adverbs in Av., as in Skt., may be made either from a pronominal stem or from a noun-stem by means of a suffix, or their forms are merely crystallized cases of old or abandoned nouns.

1. Adverbs made by Suffix.

(Cf. Whitney, *Skt. Gram.* § 1097.)

§ 727. A number of adverbs are made by adding suffixes to a noun or an adjective stem, or especially to a pronominal stem. Their meaning is various.

a. Adverbs of Place.

(Cf. Whitney, *Skt. Gram.* §§ 1099, 1100.)

§ 728. The principal adverbs of place made by means of a suffix are:

Suffix Av. *-tō* = Skt. *-tas*, Av. *aiwitō* 'around' = Skt. *abhítas*. —Suffix *-þra* = Skt. *-tra*, Av. *kuþra* 'where' = Skt. *kútra;* Av. *haþra* 'along, with' = Skt. *satrá*.—Suffix *-da* = Skt. *-ha*, Av. *ida* 'here, now' = Skt. *ihá*. Likewise a number of others.

b. Adverbs of Time.

(Cf. Whitney, *Skt. Gram.* § 1103.)

§ 729. The number of temporal adverbs that are made by means of a suffix is not extensive but corresponds in proportion to the Sanskrit. Examples are:

Suffix GYAv. *-dā, -da* = Skt. *-dā, -dhā, -dha*, Av. *yadā, yada* 'when' = Skt. *yadā; Av. kada, kadā* 'when?' = Skt. *kadā*. So Av. *ada* 'then' = Skt. *ádha, ádhā*.

c. Adverbs of Manner and Degree.

(Cf. Whitney, *Skt. Gram.* §§ 1101, 1104 seq.)

§ 730. The adverbs of manner and degree made by means of a suffix are numerous.

Suffix Av. *-þā* = Skt. *-thā*, GYAv. *yaþā, yaþa* 'as' = Skt. *yáthā;* Av. *aþā, aþa* 'so' = Skt. *átha (áthā)*.—Suffix *-š* = Skt. *-s* (Whitney, § 1105), Av. *priš* 'thrice' = Skt. *tris*.—Suffix *-ti* = Skt. *-ti* (Wh., § 1102), Av. *aiti* 'thus'.—Suffix *-vaŋ* (acc. sg. advbl.) = Skt. *-vat* (Wh., § 1106), Av. *vacastaštivaŋ* 'after the manner of the text'. Similarly Av. *hakərəŋ* 'once' = Skt. *sakŕt*.

2. Case-forms as Adverbs.

(Cf. Whitney, *Skt. Gram.* § 1110 seq.)

§ 731. Many adverbs in Av., as in Skt., are really only stereotyped cases of nouns, adjectives, or pronouns, used with an adverbial force.

1. Accusative as Adverb—frequent (cf. Whitney, § 1111): (a) From pron. stem, Av. *iŋ* 'even' = Skt. *id;* Av. *kaŋ* 'how' = Skt. *kát;* Av. °*ciŋ* particle = Skt. °*cit;* Av. *cōiŋ* (cpd. w. *iŋ*) particle = Skt. *cēt;* Av. *nōiŋ, naēda* 'not' = Skt. *nét*.—(b) From adj. stem, Av. *nūrąm* (acc. sg. f.), *nūrəm* (acc. sg. n.) 'now, quick', cf. Skt. *nūnám;* Av. *aparəm* 'hereafter' = Skt. *áparam*.—(c) From noun-stem, Av. *nąma* 'by name' = Skt. *nāma*.

2. Instrumental as Adverb (cf. Wh., § 1112): (a) From pron. stem, Av. *yavata* 'as long' = Skt. *yāvatā;* Av. *tā* 'by this, therefore', *yā* 'by which, whereby', *āiš* 'thereby' (§ 431).—(b) From adj., Av. *dahiṇa* 'to the right' = Skt. *dákṣiṇena;* Av. *yesnyata* 'praiseworthy' (cf. Wh., § 1112 d); Av. *tarasca* 'across' (§ 287 above) = Skt. *tiraścá;* Av. *fraca* 'forth' Ys. 9.8 (cf. § 287), cf. Skt. *prácā*.

3. Dative as Adverb (cf. Wh., § 1113): Av. *bityāi, þrityāi* 'for second, third time', Vd. 16.15, v. l.

4. Ablative as Adverb (cf. Wh., § 1114): (a) From pron. stem, *āţ* (GAv.), *āuţ* (YAv.) 'then' cf. § 431 above = Skt. *át*.—(b) From noun-stem, *aŋtarə.naēmāţ* 'within'.—(c) From adj. stem, Av. *dūrāţ* 'from afar' = Skt. *dūrāt;* Av. *paskāţ* 'behind' = Skt. *paścāt*.

5. Genitive as Adverb—in temporal sense (cf. Wh., § 1115): Av. *þąpō* 'at night'.

6. Locative as Adverb (cf. Wh., § 1116): From noun and adj. stems, Av. *dū[i]re, dūraz-ca* 'afar' = Skt. *dūrè;* Av. *asne, asnaē-ca* 'near'.

3. Miscellaneous Adverbs and Particles.

(Cf. Whitney, *Skt. Gram.* § 1122.)

§ 732. A number of adverbial words, chiefly monosyllabic forms, deserve mention here. Examples are:

a. Place. Av. *kva (k[a]va)* 'where' = Skt. *kvà;* Av. *haca* 'with, forth' = Skt. *sácа;* Av. *parənтarə* 'outside'. Likewise some others; see § 728 above.

b. Time. Av. *nū* 'now' = Skt. *nú, nū;* Av. *moʒu* 'soon, quickly' (§ 38) = Skt. *makṣú;* Av. *pascaētā* 'after'.

c. Manner. Av. *aēva* 'so' = Skt. *évá;* GAv. *nanā* 'differently, specially' (§ 17) = Skt. *nānā;* Av. *cā* 'how'.

d. Negative. Av. *mā* 'not' (prohibitive) = Skt. *má.*

e. Asseverative. Av. *bā* 'indeed, truly', *bāδā* 'even, indeed, always'.

4. Adverbial Prefixes.

(Cf. Whitney, *Skt. Gram.* § 1118 seq.)

§ 733. Here belong the verbal prefixes treated below (§ 749), some of which however show at times more or less distinctly their original adverbial value. Examples are:

Av. *a[i]pi, a[i]pī* (GAv.) 'even, for, afterward' = Skt. *ápi;* GAv. *a[i]bī,* YAv. *a[i]wi* 'to, unto' (occasionally advbl.) = Skt. *abhí;* Av. *ava, avā* (GAv.), *avō* (Ys. 30.10 extra metrum) 'down' = Skt. *áva, avás;* Av. *parō* 'forth, before, beyond' = Skt. *parás;* Av. *haca* 'with, forth' = Skt. *sácā;* Av. *upa[i]ri* 'above' = Skt. *upári.*

B. Prepositions.

(Cf. Whitney, *Skt. Gram.* § 1123 seq.)

§ 734. Prepositions in the sense of words that 'govern' oblique cases do not strictly exist in Avesta, any more than in Sanskrit. There are, however, a number of adverbial words which are used with the oblique cases and which define such cases more precisely. Their office is thus directive. These are termed Prepositions, and sometimes they seem really to govern the cases with which they stand.

§ 735. A fuller discussion of the Prepositions and of the cases with which they are used, belongs rather to Syntax. A mere enumeration of these forms in comparison with the Skt. is here given. Some of the words are case-forms used adverbially with a prepositional value; see under Syntax.

Principal Avesta Prepositions.

aiⁱpi (with acc., loc.) 'upon, after, for', cf. Gk. ἐπί = Skt. *ápi*
aiⁱwi, GAv. *aiⁱbī* (w. acc., dat., loc.) 'to, unto, upon', cf. ἀμφί = Skt. *abhí*
adaiⁱri (w. acc.) 'under, beneath', cf. Skt. *adhár* (adv.)
ana (w. acc.) 'along, upon', cf. Gk. ἀνά
anu (w. acc.) 'along, after, according to' = Skt. *ánu*
aŋtarᵊ (w. acc., instr., loc.) 'between, among', cf. Lat. *inter* = Skt. *antár*
apa (w. dat.) 'away, off', cf. Gk. ἀπό = Skt. *ápa*
arəm (w. abl., Ys. 51.14) 'without', opp. Skt. *áram*
avi, aoi (w. acc., dat., gen.) 'to, upon'; (w. abl.) 'from'; (loc.) 'in'
ā (w. acc., dat., abl., gen., loc.) 'hither, from, to, until' = Skt. *á*
upa (w. acc., loc.) 'unto, in', cf. Gk. ὑπό = Skt. *úpa*
upaiⁱri (w. acc., instr.) 'above, over', cf. Gk. ὑπέρ = Skt. *upári*
tarō, tarasca (w. acc.) 'through, across', cf. Lat. *trans* = Skt. *tirás, tiraścā*
paiⁱti (w. acc., instr., dat., abl., gen., loc.) 'to, at, for, with', cf. ποτί = Skt. *práti*
paiⁱri (w. acc., abl.) 'around, from around', cf. περί = Skt. *pári*
para (w. acc., instr., abl., gen.) 'before, from', cf. πέρᾱ = Skt. *párā*
parō, GAv. *parə* (w. abl., gen., loc.) 'before, beside', cf. πάρος = Skt. *parás*
pasca (w. acc., instr., abl., gen.) 'after, behind' = Skt. *paścā*
pascaēta (w. acc.) 'after, following'
pasne (w. acc., gen.) 'behind, on the other side of', cf. Lat. *pōne*
maŋ (w. instr., abl., gen.) 'with' = Skt. *smát* (§ 140 above)
haca (w. acc., instr., abl., gen.) 'with, in consequence of' = Skt. *sácā*
haŋra (w. acc., instr., dat.) 'with, along with' = Skt. *satrā*
hada (w. instr., dat., abl.) 'with, along with' = Skt. *sahá*.

§ 736. The Prepositions, as in other languages, are not infrequently placed after the case which they determine, instead of before it; they thus become 'Postpositions'. Examples are numerous:

Av. *apəm ā* 'to the water', *raocanəm paiti* 'at the window', *aŋ̊āŋ̊ haca* 'in accordance with righteousness', etc. Similarly in the loc. case *-hva, -ŋ̊va* = ᵉ*su* + *a*; so *ahmya* 'therein' = *ahmi* + *a*. Others likewise.

§ 737. The abl. phrase YAv. *aŋtarāţ nāēmāţ* 'within' is employed, in addition to its adverbial use, also with a force that is practically equivalent to a preposition: Av. *aŋtarāţ naēmāţ yārᵊdrājō* 'within a year's time'; *aŋtarāţ naēmāţ barəβriţva* 'within the wombs'.

C. Conjunctions.

(Cf. Whitney, *Skt. Gram.* § 1231 seq.)

§ 738. The conjunctions and particles of adverbial value have in part been treated above under Adverbs. It remains only to emphasize the conjunctive force of some of the most important Co-ordinates and Subordinates. They are mostly postpositive in position.

1. Co-ordinate Conjunctions.

§ 739. The chief co-ordinate conjunctions, copulative, adversative, etc. are here noted.

a. Copulative. Av. *ca* 'and, que' = Skt. *ca*; Av. *ca* ... *ca* 'both ... and' = Skt. *ca* ... *ca*; Av. *uta* 'also' = Skt. *utá*; Av. *uta* ... *uta* 'both ... and' = Skt. *uta* ... *uta*. Negative, Av. *nōiţ* 'not' = Skt. *nêt*; Av. *nōiţ* ... *nōiţ*, *nôiţ* ... *naēda*, *nava* ... *nōiţ* 'neither ... nor'.

b. Adversative. The only one in use seems to be Av. *tā* 'but, however' = Skt. *tú*.

c. Disjunctive. Av. *vā* 'or, else', e. g. Vd. 12.1 = Skt. *vā*; Av. *vā* ... *vā* 'either ... or' = Skt. *vā* ... *vā*.

d. Causal. Av. *zī* 'for' (orig. asseverative, and often so used in Av. as in Skt.) = Skt. *hí*.

e. Illative. Here may be noticed Av. *aβa* 'so, therefore' = Skt. *átha*. Perhaps also some others.

2. Subordinate Conjunctions.

§ 740. The subordinate conjunctions, temporal, modal, final, etc., with adverbial force, have been noted above under Adverbs (§ 728 seq.), e. g. Av. *yada* 'when', *yaβa* 'as, that', etc. To these may be added the conditional conjunction Av. *yezi*, *yeδi* 'if' = Skt. *yádi*.

D. Interjections.

§ 741. A few exclamations are worthy of notice; they are, in part, remnants of cases of unused words crystallized as Interjections. Examples are not numerous.

§ 742. The most important Interjections are: Av. *āi* 'O' (w. voc.) = Skt. *āi*; Av. *ušta* 'hail' (an old loc.). Likewise a few others, probably originally case-forms of nouns or adjectives, e. g. Av. *āvōya* 'alas' (old instr.), cf. *āvōya mē bāvōya* 'woe, woe indeed to me' Yt. 3.14; Av. *inja* 'ha, here', *tinja* 'ho, there'.

WORD-FORMATION.

FORMATION OF DECLINABLE STEMS.

§ 743. **General Remark.** Words are made from roots either directly without an affix, or they are more commonly formed by means of added suffixes, or again by composition.

(1) Only a small proportion of declinable stems, however, are made directly from verbal or pronominal radicals in their bare root-form without any affix. The simple root does sometimes serve as a declinable stem (see discussion below, § 744), but this happens chiefly in compounds.

(2) The great majority of words, in Av. as in other tongues, is derived from radicals by assuming an affix (suffix or prefix). The root-part of the word contains the fundamental idea; the prefix or suffix modifies its meaning.

(3) A third method of making new words is by combining words already formed so as to build up a compound.

The formation of verbs and pronouns has been sufficiently treated above; attention is here given to the formation of noun-words.

1. Suffixless Formation.

Root-Words.

(Cf. Whitney, *Skt. Gram.* § 1147.)

§ 744. A limited number of declinable stems, nouns and adjectives, in Av. as in Skt, are made directly from a simple root without assuming any suffix. The suffix-

less stems have been discussed above, under Declension §§ 248, 261 etc. They occur oftenest as finals of compounds; they are therefore frequently made up with verbal prefixes.

As to **signification**, the root-words, as in Skt. (cf. Whitney, *Skt. Gram.* § 1147a), are action-words, especially infinitives; or they may be nouns of agency. Sometimes they are adjectives.

§ 745. As **examples** of Root-Words without Suffix may be given:

Av. *vac-* 'voice, word' = Skt. *vâc-;* Av. *druj-* 'deceit, Fiend' = Skt. *drúh-;* Av. *adruh-* 'undeceiving' = Skt. *adrúh-;* Av. *aiwi-šac-* 'following' = Skt. *abhi-ṣâc-*.

Note 1. In Av., as in Skt., root-words at the end of a compound are subject to some variation. (a) Internal *ā* is often lengthened, *anuš-hāc-* 'attending'. — (b) Radical *i, u* remain unchanged. — (c) Roots ending in a short vowel including *-ar* usually assume a *t*, as in Skt. (cf. Whitney, *Skt. Gram.* § 1147d), Av. *āθrəʷt-* title of a priest (√*bar-*), cf. Skt. *°bhṛt-*, Whitney, *Skt. Gram.* § 383h. Similarly in the prior member of a compound, Av. *sruṯ.gaoša-* 'of listening ears' (√*sru-*), cf. Skt. *śrút-karṇa-;* Av. *jiṯ.aša-* (√*ji-*), cf. Whitney, *Skt. Gram.* §§ 1147e, 383h.

Note 2. Reduplication is perhaps to be sought in Av. *tū-tuc-*, cf. loc. pl. *tūtuẖšva* Vd. 6.51, cf. Skt. *tvác-*.

---

2. Derivation by Prefix and Suffix.

(Cf. Whitney, *Skt. Gram.* §§ 1118, 1136.)

§ 746. Words are derived from radicals chiefly by the addition of prefixes and suffixes. The Prefixes and Suffixes may now be taken up in detail.

PREFIXES.

a. Nominal Prefixes, Substantive and Adjective.

(Cf. Whitney, *Skt. Gram.* § 1121.)

§ 747. A number of prefixes are used in making new words of substantival or adjectival value out of words already formed; these may be called **nominal** or **noun-**

prefixes. The most important Nominal Prefixes (subst. and adj.) in Av. are: *a-* negative, *hu-* 'well', *duš-* 'ill'.

§ 748. Examples of nouns and adjectives formed with modifying nominal prefixes are:

Av. *a-* negative (*an-* before vowels, *ə-* before *v-*; rare *ana-*) = Skt. *a-*, *an-*: e. g. Av. *a-srušti-* 'disobedience'; Av. *an-arᵊta-* 'wrong' = Skt. *anartha-*; Av. *ə-visti-* 'ignorance' = Skt. *avitti-*; Av. *ana-maršdika* 'unmerciful'.

Av. *hu-* (occasionally *haa-*) 'well' = Skt. *su-*: e. g. Av. *hu-šiti-* 'prosperity' = Skt. *sukšiti-*; Av. *haa-xᵛaθwa-* 'friendship'.

Av. *duš-* (sporadic *dənš-*) 'ill' = Skt. *dus-*: e. g. Av. *dušiti-* (i. e. *duš-šiti-* § 186) 'distress'; sporadic Av. *dənš-sravah-* 'inglorious'. Likewise a few others.

b. Verbal Prefixes.

(Cf. Whitney, *Skt. Gram.* § 1076 seq.)

§ 749. A number of verbal prefixes or so-called 'prepositions' occur in combination with verbs; they modify or define the meaning of these more clearly. Some of these prefixes were originally stereotyped cases of nouns that have assumed an adverbial character.

§ 750. The most important verbal prefixes in Av. are the following. The meanings given are of course only general and approximate. See Whitney, *Skt. Gram.* § 1077.

1 Av. *aiti* 'past, over, beyond', √*bar-* + *aiti* 'bring over to' = Skt. *áti*
2 *aipi* 'upon, on', √*jan-* + *aipi* 'smite upon' = Skt. *api*
3 *aiwi*, GAv. *aibī* 'to, upon, against', √*gam-* + *aiwi*, *aibī* 'come upon' = Skt. *abhi*
4 *anu* 'after, along', √*i-* + *anu* 'go after' = Skt. *ánu*
5 *antarᵊ* 'between, among', √*mrū-* + *antarᵊ* 'interdict' = Skt. *antár*
6 *apa* 'away, forth, off', √*bar-* + *apa* 'bear away' = Skt. *ápa*
7 *ava* 'down, upon', √*jan-* + *ava* 'strike down' = Skt. *áva*
8 *avi*, *aoi* 'to, upon', √*bar-* + *avi* 'bring to'
9 *ā* 'to, unto', √*bar-* + *ā* 'bring to' = Skt. *á*
10 *upa* 'to, unto, toward', √*bar-* + *upa* 'bring up' = Skt. *úpa*
11 *us*, *uz* 'up, forth, out', √*bar-* + *us*, *uz* 'bring forth' = Skt. *úd*
12 *nī* 'down, in, into', √*jan-* + *nī* 'smite down' = Skt. *ni*
13 *niš*, *niž* 'out, forth, away', √*bar-* + *niš*, *niž* 'bring away' = Skt. *nís*
14 *para* 'away, forth', √*bar-* + *para* 'bear away' = Skt. *párā*
15 *pairi* 'round about, around', √*bar-* + *pairi* 'bear around' = Skt. *pári*

16 *frā* 'forth, fore, forward', √*bar-* + *frā* 'bring forth' = Skt. *prá*
17 *paiti* 'towards, against, back', √*bar-* + *paiti* 'bring towards' = Skt. *práti*
18 *vī* 'apart, away, out', √*bar-* + *vī* 'bear asunder' = Skt. *ví*
19 *hąm, haŋ-*, GAv. *hām, hāŋ-* 'together', √*bar-* + *hąm* 'bear together' = Skt. *sám*.

Note. Instances of stereotyped case-forms of a noun entering into verbal combination as prefix, are to be found: e. g. Av. *yaoš* + √*dā-*, *yaoš-dāiti* 'makes pure', cf. Av. *yaoš* Ys. 44.9 = Skt. *yós*.

§ 751. The connection between the prefix and the verb, in Av. as in Vedic Skt. (Whitney, *Skt. Gram.* § 1081) is very loose; several words, therefore, often intervene between the prefix and the predicate, so that sometimes it is difficult to tell whether the prefix is to be connected directly with the verb or is to be regarded merely as an adverb: e. g. *apa haca qzahibyō | miθra barōiš* 'mayest thou, O Mithra, bring us away from distresses' Yt. 10.23, beside *apa-baraiti* 'he brings away' Vd. 5.38.

§ 752. A repetition of the prefix is not uncommon, that is, the prefix may stand at some distance before the predicate and then be repeated in combination with the verb:

As an example of such repetition compare, Av. *hąm iđa šaētəm hąm.bārayən* 'let them collect possessions together there' Vd. 4.44.

Note 1. In GAv., the metre shows that the second prefix is regularly to be expunged: e. g. GAv. *hyaŋ hām vohū || mazdā [hāmᵘ]-frašīā mānaŋhā* 'when he conferred with Vohu Manah' Ys. 47.3. Again *hyaŋ þwā hām caŋmaiⁱnī [hāŋ]-graþəm* 'when I conceived thee in mine eye' Ys. 31.8. Similarly *us . . . [us]-jən* Ys. 46.12; et al.

Note 2. In the case of a long predicate, when several subjects or objects belong to the same verb, the verb itself is sometimes expressed but once, the prefix being then repeated each time with the subject or object as the case may be: e. g. *aya daēnaya fraorənta | ahurō mazdā aŋuva | frā vohu manō, frā . . . frā . . . frā . . .* 'Ahura Mazda professed his faith according to this law, Vohu Manah professed it, so did' etc. Ys. 57.24.

§ 753. When the prefix immediately precedes the verb to which it belongs, the form of the prefix is sometimes

made subject to the rules of sandhi (see Sandhi, below); sometimes, however, it undergoes no change but is allowed to remain unaltered, cf. §§ 51, 52 above. Thus:

(a) With Sandhi. Av. √*az-* 'to drive' + *ava, upa, para* may give *avāzōiṯ (ava + az°), upāzaⁱti (upa + az°), parāzəṇti (para + az°)*;—Av. √*i-* 'to go' + *upa, para* gives *upaēta- (upa + ita), parāⁱti (para + aēⁱti)*;—Av. √*vac-* 'to speak' shows *paⁱtyaoḫta* 'he spoke' Ys. 9.2, and *aⁱpyūḫða- (aⁱpi + uḫða)*, cf. § 52 Note 1;—Av. √*hac-* 'follow', *upavhacaⁱti (upa + hac°)*;—Av. √*harz-* 'let go', *upavharᵉzaⁱti, fravharᵉzaⁱti.*

(b) Without Sandhi. Av. √*as-* 'to reach, obtain', *ava.aŋhaoⁱti, paⁱti.aŋhaoⁱti* (beside *frāŋhaoⁱti* with sandhi). Also many other examples.

Note 1. The metre sometimes determines whether sandhi is to take place, or whether the hiatus is to be allowed to remain; compare instances like *paⁱti.apayaŋ* Yt. 8.38, *paⁱri.apaya* Yt. 10.105, et al.

Note 2. The forms *uz, niš* (with voiceless *s*) are used chiefly before voiceless consonants, the forms *uz, niž* are used before voiced; but this rule is likewise by no means without exception. Thus Av. *uzbarəṇti, uzuḫšyąn, nižbarᵉta*, so *arᵉzuḫða-* (*z* before voiced sounds); but *usaja-, nižąsya* Ys. 50.12, *aršuḫða-* (*s* before voiced).

Note 3. The preposition Av. *hąm* 'σύν' = Skt. *sám* appears in various forms, the form being assimilated to the sound following: thus, *ham-* (before vowels), *hąm* (before labials and some other consonants), *haŋ* (before gutturals, palatals, dentals), also *hɔ̃m, hɔ̃ŋ-* occur in GAv.—Examples are Av. *hamarᵉna-, hąmbārayən, hāŋkārayemi, haŋjasəṇte, haŋtacaⁱti.* Some exceptions to the law of assimilation occur, e. g. *maⁱnyu.hąm.tašta-* 'constructed by the spirit'; et al.

§ 754. Specially to be observed in compounds is the treatment of an original *s* after a prefix ending in *i, u*.

1. The original *s*, as expected, becomes *š* after *i, u*, cf. Whitney, *Skt. Gram.* § 185. Thus, YAv. *ništaⁱti* (√*stu-*) Yt. 14.42; YAv. *ništayeⁱti* (√*stā-*) Yt. 10.109 (but GAv. *paⁱtistavas* with *s* Ys. 50.9); Av. *aⁱwiŋšąc-* 'accompanying' Ys. 52.1 = Skt. *abhiṣāc-*; Av. *paⁱtišmarəmna-* (v. l. *paⁱti.šmarəmna-, paⁱti.marəmna-*) 'thinking upon' (Av. √*mar-* = Skt. √*smar-* § 140) Yt. 10.86.—Similarly in internal

reduplication, unless followed by *p* §§ 155, 109. Thus, Av. *hišma-rəṇt-* 'remembering'. But (with *sp*) Av. *hispāsrəṇtəm*, *hispōsmna* 'spying' Yt. 8.36, Yt. 10.45.

2. Frequently the peculiar writing *šh*, *žh* is found after *i*, *u*. It seems to be an attempt at etymological restoration. Thus, Av. *ānuš.hac-* 'attending' Ys. 31.12 = Skt. *ānuṣáṅ-*; Av. *aⁱwiš.huta-* (v. l. *aⁱwiž.huta-*) 'pressed haoma-juice' (Av. √*hu-* = Skt. √*su-*) Ys. 11.3; Av. *paⁱriš.haŋta-* 'encircled' Ys. 11.8 = Skt. *pariṣvakta-*; Av. *hušhafa* 'soundly sleeping' (§ 95) Ys. 57.17.—Similarly in internal reduplication, Av. *hišhaŋti* 'it clings' (√*hac-*).

3. Complicated are the following formations: GAv. *niš-a-vharatū* 'let him protect' Ys. 58.4 (beside Av. *nī . . . haraⁱte* Ys. 19.10); YAv. *niš-a-vhasti* 'he settles down' Ys. 57.30 (beside *nišādayaŋ* Ys. 9.24); Av. *paⁱriavharšta-* 'imbrued' (beside v. l. *paⁱriuharšta-*.)

SUFFIXES.

§ 755. Most derivatives, in Av. as in other languages, are made by means of suffixes. These resemble the corresponding suffixes in Skt., and they may likewise be divided into two general classes:

a. Primary Suffixes, or those added directly to original roots or to words resembling such.

b. Secondary Suffixes, or those added to derivative stems which have already been formed with a suffix.

These two classes may now be taken up in detail.

A. Primary Derivatives.

(Cf. Whitney, *Skt. Gram.* § 1143.)

§ 756. A Primary Derivative is a word that is formed by adding one of the so-called Primary Suffixes directly to an original root.

§ 757. Form of the Root. The root to which the primary suffix is added may undergo more or less change in its form. Most generally the root is strengthened either to the *guṇa* or the *vṛddhi* stage. Such variations

for the most part answer to corresponding changes in Skt.; they will not be taken up in detail here; reference may be made to Justi, *Handbuch der Zendsprache* pp. 366—383.

§ 758. Some general remarks, subject to exceptions, however, may be made with regard to the strengthening of the root.

(a) In Av., as in Skt., internal radical *a* is commonly vṛddhied before the suffix *u*; but it commonly remains unchanged before the suffix *i*.

(b) Internal and initial *i*, *u* are guṇated before the suffix *a* and *i*.

(c) Internal and final *i*, *u* are guṇated before the suffixes *-ana*, *-ah*, *-þra*, *-þwa*, *-man*.

(d) The root generally remains unstrengthened before the suffixes *-tu*, *-ti*, *-u*, *-þu*, *-ra*, *-van*, and in some other cases.

The Principal Primary Suffixes.

(Cf. Whitney, *Skt. Gram.* § 1146 a.)

§ 759. A list of the principal primary suffixes may here be given in connection with the Sanskrit, see Whitney, *Skt. Gram.* § 1146 a. One or two of these here given might perhaps be further resolved and regarded as secondary, but it is found convenient to include them here.

A few other Primary Suffixes.

§ 760. A few other suffixes occur sporadically and may also for convenience be classed under the primary division, though their secondary origin may be possibly traced. As examples may be taken:

Suffix, Av. *-aya* in *zarᵊdaya-*; Av. *-āra* in *daŋ̊ārā-*; Av. *-ura* in *razura-*; Av. *-tah* in *parštāh-* (Whitney, § 1152 a). Likewise some others.

Discussion of the Primary Suffixes.

1. Av. *-a* = Skt. *-a* (Whitney, § 1148).

§ 761. With this suffix a great number of derivatives are formed. Their signification is various; they are adjectives, action-nouns, agent-nouns. The root is generally strengthened by *guṇa* or *vṛddhi*. Examples are very numerous:

Noun (masc., neut.). Av. *vāza-* 'strength' = Skt. *vája-*; Av. *maēza-* 'cloud' = Skt. *mēghá-*; Av. *gaoša-* 'ear' = Skt. *ghóṣa-*; Av. *caŋ̊ra-* 'wheel' (neut.) = Skt. *cakrá-*.—Adjective. Av. *ama-* 'strong' = Skt. *áma-*; Av. *asāra-* 'headless'; Av. *amәša-* 'immortal' = Skt. *amṛ́ta-*; Av. *draoja-* 'deceitful' = Skt. *drógha-*. Also many others.

2. Av. *-an* = Skt. *-an* (Whitney, § 1160).

§ 762. This suffix forms a limited number of neuter and masculine nouns of action and agency, including also a few adjectives. Examples are:

Noun. Av. *uŋ̊an-* m. 'ox' = Skt. *ukṣán-*; Av. *taŋ̊an-* m. 'shaper' = Skt. *tákṣan-*; Av. *ᵘrvan-* m. 'soul'; Av. *masan-* n. 'greatness' = Skt. *mahán-*.—Adjective. Av. *zvinḍan-* 'not receiving'; Av. *ᵒθᵘrvan-* 'conquering'.

3. Av. *-ana (-әna)* = Skt. *-ana* (Whitney, § 1150).

§ 763. This suffix, as in Skt., forms many derivatives, nouns and adjectives of varied value. Roots in *i, u* commonly receive the *guṇa*-strengthening before this suffix.

Some of the adjectival derivatives made with this element can hardly be distinguished from participles. Examples are:

Noun. Av. *vaŋhana-* n. 'clothing' = Skt. *vásana-;* Av. *hanjamana-* n. 'assembly' = Skt. *saṃgámana-;* Av. *bajina-* n. 'dish' = Skt. *bhājana-*, § 17, 30; Av. *maēθana-* n. 'dwelling'; Av. *raocana-* n. 'light, window' = Skt. *rócana-*.—Adj. Av. *zayana-* 'wintry'.

§ 764. After an *r*, the Av. form *-ɔna* answers in some instances to orig. *-ana*, while in others it corresponds to *-na* (i. e. *-ɔna*, see § 802). These must be distinguished. As examples after *r:*

(a) Av. *-ɔna* = Skt. *-aṇa* (i. e. *-ᵃna*), Av. *varɔna-* m. 'choice, belief' = Skt. *varaṇá-;* Av. *hamərɔna-* n. 'battle, conflict' = Skt. *saṃráṇa-*. Likewise some others. But observe Av. *karana- (-ana)* 'side, shore' Yt. 5.38 etc. opp. to Av. *karᵊna- (-na)* 'ear' Yt. 11.2 = Skt. *kárṇa-;* yet consult the variants.

(b) Examples of Av. *-ɔna* (i. e. *-ɔna*) = Skt. *-na*, after *r*, are given below under *-na* § 802.

4. Av. *-aⁱni* = Skt. *-ani* (Whitney, § 1159).

§ 765. Sporadic traces of the suffix *-ani* in Av., as in Skt., are to be found. As example may be quoted:

Av. *duž-aⁱni-* adj. 'evil' Vd. 14.5.

5. Av. *-aŋt (-ɔŋt, -iŋt)* = Skt. *-ant* (Whitney, § 1172).

§ 766. This is the suffix which forms the pres. and fut. participles. It has been sufficiently treated above, §§ 477, 514.

6. Av. *-ar (-ara)* = Skt. *-ar* (Whitney, §§ 1694, 1151 l).

§ 767. This suffix forms a limited number of nouns; they are almost all of the neuter gender. It occurs likewise in adverbs and prepositions, probably there representing old case-endings. In some nouns the form becomes *-ara* by the *a*-transfer. The prefix *-ar* must be connected with *-an*, cf. § 337. Examples:

Av. *vadar-* n. 'weapon' = Skt. *vádhar-;* Av. *zafar-* n. 'jaw'; Av. *baēvar-, baēvara-* (*a*-inflection) 'thousand'; Av. *nar-, nara-* m. 'man' = Skt. *nár-, nara-*. Observe the adverbs Av. *aŋtarᵊ* 'between, inter' = Skt. *antár;* Av. *iǰarᵊ* 'immediately'.

7. Av. *-ah* = Skt. *-as* (Whitney, § 1151).

§ 768. From this very common suffix, in Av. as in Skt., a great number of derivatives are made. They are

chiefly abstract neuter nouns and some adjectives (probably originally distinguished from the latter by a difference of accent, cf. Whitney, *Skt. Gram.* § 1151 e). The roots in *i, u* show *guṇa*-strengthening before this suffix. Examples are:

Noun. Av. *avah-* n. 'aid' = Skt. *ávas-;* Av. *aēnah-* n. 'sin' = Skt. *énas-;* Av. *təmah-* n. 'darkness' = Skt. *támas-;* Av. *raocah-* n. 'light'.—Noun, Adjective. GAv. *dvaēšah-* n. 'hate', *dvaēšah-* adj. 'hateful' Ys. 43.8 = Skt. *dvéṣas-;* Av. *vasah-* n. 'will', *vasah-* adj. 'willing' Ys. 31.11, cf. Whitney, *Skt. Gram.* § 1151 e. A feminine noun in Av., as in Skt., is Av. *ušah-* f. 'dawn' = Skt. *uṣás-*, cf. § 357 above.

8. Av. *-ā* = Skt. *-ā* (Whitney, § 1149).

§ 769. This suffix makes feminine adjectives answering to masculine and neuter *a*-stems. It also makes a considerable number of feminine action-nouns. Its form is often obscured, as it frequently appears as *ă* §§ 25, 17, 18. Examples have been given under declension of fem. nouns and adjectives §§ 362, 243.

9. Av. *-āna (-ānа)* = Skt. *-āṇa* (Whitney, § 1175).

§ 770. This suffix is used in forming middle and passive participles; it has therefore been treated under the different tense-systems, §§ 477, 507 etc. Examples of participles mid. and pass. are:

Av. *išāna-* 'ruling' = Skt. *iśāna-;* Av. *mavhāna-* 'thinking' (aorist ptcpl.); Av. *yazāna-* 'worshipping', *pāpərᵊtāna-* 'fighting'. Also others.

Note. A few noun-stems in *-an* also show *-āna* as a sporadic heavy form with *a*-transfer, e. g. *arəšāna-* 'male' § 310.

10. Av. *-i* = Skt. *-i* (Whitney, § 1155).

§ 771. With this suffix a considerable number of derivatives are formed. They are adjectives and substantives.

The masculines are chiefly agent-nouns; the feminines are abstracts; there is an occasional neuter. The root generally shows the *guṇa* stage. Examples are:

Nouns. Av. *ažī-* m. 'dragon' = Skt. *áhi-;* Av. *kavi-* m. 'Kavi, king' = Skt. *kaví-*.—Av. *karšī-* f. 'circle, circuit' = Skt. *kṛṣí-;* Av. *dāhi-* f. 'creation' = Skt. *dhāsí-;* Av. *maēni-* f. 'wrath, punishment' Ys. 31.15, 44.19 = Skt. *mēní-*.—Av. *aši-* n. 'eye' = Skt. *ákṣi-*. —Adjective. Av. *zaⁱri-* 'yellow, golden' = Skt. *hári-;* Av. *darši-* 'bold', etc.

§ 772. On Av. *-ita* = Skt. *-ita*, see § 786 below.

§ 773. On Av. *-iti* = Skt. *-iti*, see § 789 below.

11. Av. *-in* = Skt. *-in* (Whitney, § 1183).

§ 774. Only a few undoubted instances of this suffix as a primary derivative are noted; its use in secondary formation of possessives is more familiar (§ 835), though not so common as in Sanskrit. Quotable examples of the primary usage of this suffix are:

Noun. Av. *kaⁱnin-* f. 'maiden'.—Adjective. Av. *°tacin* (in *afštacinō*) 'flowing, running'.

12. Av. *-ina* = Skt. *-ina* (Whitney, § 1177 c).

§ 775. There are a few quotable derivatives that show this suffix. Examples are:

Adjective. Av. *dahβina-* 'right' = Skt. *dákṣiṇa-;* Av. *zaⁱrina-* 'golden' = Skt. *hariṇá-*.

13. Av. *-iš* = Skt. *-is* (Whitney, § 1153).

§ 776. A small number of neuter nouns are made by means of this suffix. Instances are:

Noun. Av. *barᵊziš-* n. 'cover, mat', cf. Skt. *barhis-;* Av. *hudiš-* n. 'abode'; Av. *vipiš-* n. 'judgment', *snaⁱpiš-* n. 'weapon', cf. § 359 above.

14. Av. *-išī* = Skt. *-iṣī* (cf. Whitney, §§ 1153, 1156 a).

§ 777. This suffix belongs perhaps rather under secondary derivation than under primary endings. It occurs in only one or two words and may best be mentioned here. It seems to answer as a corresponding feminine formation

(-išī) to the preceding *-iš*. The root is strengthened before it. Examples are:

Noun. Av. *tavišī-* f. 'power, might' = Skt. *táviṣī-*; Av. *hāirišī-* f. 'mother'.

§ 778. On *-išta* in superlatives see § 813 below.

15. Av. *-ī* = Skt. *-ī* (Whitney, § 1156).

§ 779. This suffix is to be sought in feminine nouns and adjectives, cf. also Whitney, *Skt. Gram.* § 1156 b. Such feminines correspond for the most part to masc. and neut. stems in *-a*, *-i* or a consonant. Sometimes it is doubtful whether it would not be better to regard some of the nouns and adjectives as secondary in origin.

Noun. Av. *maŋšī-* f. 'fly', *vāiδī-* f. 'stream, river'. —Adjective. Av. *daēvī-* 'fiendish' = Skt. *dēvī-*; Av. *drīvī-* f. 'poor' (§ 187, fem. to *driγu-* m. n.). Likewise certain others, cf. § 362.

16. Av. *-u* = Skt. *-u* (Whitney, § 1178).

§ 780. This suffix which closely resembles the corresponding one in Skt., forms derivative nouns and adjectives. The nouns are chiefly masculine. Examples are:

Noun. Av. *aṣu-* m. 'branch, twig' = Skt. *aśú-*; Av. *išu-* m. 'arrow' = Skt. *iṣu-*; Av. *pasu-* m 'small cattle' = Skt. *paśú-*; Av. *tanu-*, *tanū-* f. 'body' = Skt. *tanú-*, *tanū-*; Av. *maδu-* n. 'honey' = Skt. *mádhu-*. —Adjective. Av. *pouru-* 'full' = Skt. *purú-*; Av. *vaŋhu-*, *vohu-* 'good' = Skt. *vasu-*; Av. *driγu-* 'poor'. Likewise others.

§ 781. On Av. *-una* = Skt. *-una*, see § 802 below.

§ 782. On Av. *-ura* = Skt. *-ura*, see § 816 below.

17. Av. *-uš* = Skt. *-us* (Whitney, § 1154).

§ 783. This suffix forms a few derivatives; they are chiefly neuter nouns. As examples may be quoted:

Av. *arᵊduš-* n. 'assault, battery', *garᵊbuš-* n. 'milk', *tanuš-* n. 'person' Ys. 43-7, cf. § 360. Add also *manuš-* masc. nom. propr.

18. Av. *-ā* = Skt. *-ā* (Whitney, § 1179).

§ 784. With this suffix only an occasional feminine noun is made. As an example may be quoted Av. *tanū- (tanu-)* f. 'body' = Skt. *tanū- (tanū-).*

19. Av. *-ka* = Skt. *-ka* (Whitney, § 1186).

§ 785. This suffix forms a few primary derivatives; they are nouns and adjectives. Its use in secondary derivation, as in Skt., is more common. Examples of *-ka* as primary suffix are:

Noun. Av. *aδka-* m. 'garment, robe' Yt. 5.126 = Skt. *átka-;* Av. *mahrka-* m. 'death' = Skt. *marká-.*—Adjective. Av. *huška-* 'dry' = Skt. *śúṣka-.*

20. Av. *-ta (-ita, -ata)* = Skt. *-ta (-ita, -ata),* Whitney, § 1176.

§ 786. The suffix *-ta* is used chiefly (1) in forming past-passive participles directly from the conjugation-stem as explained above under Participles, § 710 seq. It appears also (2) in a few general nouns and adjectives which show more or less of a participial character. The feminine form shows *-tā.* Examples are:

(1) Past-Passive Participles in *-ta,* see § 711 above.—(2) Nouns and Adjectives: Av. *dūta-* m. 'messenger' = Skt. *dūtá-;* Av. *aŋgušta-* m. 'toe' = Skt. *aṅguṣṭha-;* Av. *zasta-* m. 'hand' = Skt. *hásta-;* Av. *aša-* n. 'right' (*-ša* = *-rta,* § 163) = Skt. *ṛtá-;* Av. *anāhitā-* fem. 'Anahita' nom. propr.

Note 1. The suffix Av. *-ita* = Skt. *-ita* (Whitney, § 1176 d) appears in a few adjectives: e. g. Av. *zaiṛita-* 'yellow, green' = Skt. *hárita-;* Av. *masita-* 'great'; perhaps in Av. *raoδita-* 'red'. Likewise in the ptcpl. adj. Av. *darṣita-* 'emboldend, daring' (√*darš-*) Ys. 57.11 = Skt. *dhṛṣitá-,* cf. § 712 above.

Note 2. A suffix *-ata* (stem *a* + *ta*) = Skt. *-ata* (Whitney, § 1176 e) may be assumed in a few nouns and adjectives which show partly a gerundive force. Av. *ərəzata-* n. 'silver' = Skt. *rajatá-;* Av. *yazata-* m. 'adorable, divinity'.

Note 3. The suffix *-ta* is sometimes disguised as *-da* in accordance with certain phonetic changes, cf. § 89 etc. Av. *vərəzda-* 'grown great, mighty' (i. e. *vardh* + *ta*) = Skt. *vṛddhá-.* So Av. *drəwda-* Yt. 13.11. Likewise *-r-ta* is often disguised as *-ša,* cf. § 163.

21. Av. *-tar (-dar)* = Skt. *-tar* (Whitney, § 1182).

§ 787. This suffix is used in forming masculine, and a few feminine, nouns of agency and relationship, cf. § 321 seq. The suffix is attached directly to the root; and radical *i, u* are generally strengthened before it. There is a corresponding feminine *-ṛtī* besides. Examples of *-tar* are:

(1) Nouns of Agency. Av. *dātar-* m. 'giver, creator' = Skt. *d(h)ātar-;* Av. *saotar-* m. name of priest = Skt. *hótar-* et al. — (2) Nouns of Relationship. Av. *patar-* m. 'father' = Skt. *pitár-;* Av. *mātar-* f. 'mother' = Skt. *mātár-*.

Note 1. The suffix *-tar* is sometimes disguised (cf. § 163): Av. *hāṇṭar-* m. 'eater'; Av. *bāṇṭar-* m. 'rider' = Skt. *bhártar-*.

Note 2. Observe the form of the suffix in YAv. *duγdar-*, GAv. *duγᵊdar-* f. 'daughter' Yt. 17.2, Ys. 45.4 = Skt. *duhitár-*.

Note 3. Observe *-tar* as neuter in infin. YAv. *vīdāiṇṭre* Yt. 10.82 (perhaps here *harᵊṇṭre* v. l. Ys. 62.2).

22. Av. *-ti* = Skt. *-ti* (Whitney, § 1157).

§ 788. This suffix is used in forming a large number of feminine nouns, chiefly abstracts, and also an occasional masculine noun or adjective. The suffix is added directly to the root in its weak form. Examples are numerous:

Noun. Av. *anumaiti-* f. 'thought, agreement' = Skt. *ánumati-;* Av. *cisti-* f. 'wisdom' = Skt. *citti-;* Av. *stūiti-* f. 'praise' = Skt. *stuti-;* Av. *supti-* f. 'shoulder' = Skt. *śúpti-;* Av. *paiti-* masc. 'lord' = Skt. *páti-*.— Disguised form, Av. *aṣi-* f. 'Rectitude' = **ar-ti* § 163.

§ 789. A form Av. *-iti* = Skt. *-iti* (Whitney, § 1157 g) is found in a few words: Av. *spaṇiti-* Yt. 19.6, *āskᵊiti-* (cf. § 32) Ys. 44.17.

23. Av. *-tu* = Skt. *-tu* (Whitney, § 1161).

§ 790. With this suffix, in Av. as in Skt., are formed a number of abstract and concrete derivatives. They are prevailingly masculine. The root is commonly strengthened before the *-tu*. Examples are:

Av. *yātu-* m. 'sorcerer' = Skt. *yātú-;* Av. *haētu-* m. 'bridge' = Skt. *sétu-;* Av. *ḫratu-* m. 'wisdom' = Skt. *krátu-;* Av. *pitu-* m. 'food' = Skt. *pitú-;* Av. *vaŋtu-* masc. 'spouse'; Av. *jyātu-* (fem.?) 'life' = Skt. *jīvâtu-.*

24. Av. *-tra (-θra, -ðra)* = Skt. *-tra* (Whitney, § 1185).

§ 791. The suffix *-tra (-θra, -ðra, -dra)* forms numerous nouns, which are chiefly neuter, and a few adjectives. The root usually has the *guṇa*-strengthening, but sometimes it remains unaltered. The original form (1) *-tra* of the suffix is preserved only after sibilants or a written nasal (§ 78); otherwise it becomes regularly (2) *-θra* (§ 77, 2). The forms (3) *-ðra* (in *-fᵛdr-, -ḫðr-*) and *-dra* (in *-zdr-, -ždr-*) appear only under special circumstances, see §§ 79, 89, 90. The corresponding feminine is *-trā.* Examples are:

Noun. Av. *uštra-* m. 'camel' = Skt. *úṣṭra-;* Av. *vastra-* n. 'garment' = Skt. *vástra-.*—Av. *puθra-* m. 'son' = Skt. *putrá-;* Av. *ḫšaθra-* n. 'rule, kingdom' = Skt. *kṣatrá-.*—Av. *ᵛyaoᵛðra-* n. 'girdle' Yt. 15.54 (cf. § 79) = Skt. *yóktra-;* Av. *vaᵛðra-* n. 'word', cf. Skt. *vaktrá-;* Av. *važdra-* m. 'bearer'.—Adjective. Av. *fraoᵘrvačštra-* 'productive'.—Av. *brōiθra-* 'cutting' Yt. 10.130 etc. (√ *brī-*).—Av. *mązdra-* 'learned, wise' (§ 90), *sižðra-* Yt. 8.36; Vd. 13.2.

Note. A few feminines with suffix Av. *-trā* = Skt. *-trā* (Whitney, § 1185 d) may here be noted: Av. *aštrā-* f. 'goad' = Skt. *áṣṭrā-;* Av. *zaoθrā-* f. 'libation' = Skt. *hótrā-.*

25. Av. *-tva (-θwa, -ðwa)* = Skt. *-tva* (Whitney, § 966 a).

§ 792. The suffix *-tva, (-θwa, -ðwa* §§ 94, 96) is used (1) chiefly in forming the Gerundive, or declinable future-passive participle of adjectival value (Latin *-ndus*) as described above § 717. But it is found also (2) in a few abstract nouns. The feminine form is *-tvā, -θwā.*

1. Gerundive. Examples of the suffix so used have been given above.—2. Noun. Av. *staoθwa-* n. 'praise'; *dąstvā-* f. 'skill', *vąθwā-* f. 'herd'.

26. Av. *-þa (-ða, -da)* = Skt. *-tha* (Whitney, § 1163).

§ 793. With the suffix *-þa* (*-ða, -da* §§ 89, 90, 77 Note 3) are made, in Av. as in Skt., a number of action-nouns of different genders, and a few verbal adjectives with passive signification. The root usually appears in its weak form. The feminine is regularly *-þā*. Examples are:

Noun. Av. *raþa-* m. 'chariot' = Skt. *rátha-;* Av. *hamərᵊþa-* m. 'foe'; Av. *vīciþa-* m. 'decision'; Av. *zaþa-* m. 'birth'.—Av. *arᵊþa-* n. 'subject, thing' = Skt. *ártha-*.—Av. *gāþā-* f. 'song, hymn' = Skt. *gāthā́-;* Av. *gaēþā-* f. 'being, creature'; Av. *ciþā-* f. 'penalty'.—Adjective. Av. *uḫða-* 'spoken, word' (§ 77 Note 3) = Skt. *ukthá-;* Av. *þraŋfᵊða-* 'gratified'; Av. *yūḫða-* 'girt, compact' Yt. 10.127.

Note 1. On Av. *-da* = orig. *-ta*, see § 786 above.

Note 2. The form *-aþa* (probably thematic *a* + *þa*) = Skt. *-atha* (Whitney, § 1163 c) occurs in some words: Av. *vaŋ̊haþa-* n. 'growth' = Skt. *vakṣátha-*.

27, 28. Av. *-þi, -þu* = Skt. *-thi, -thu* (Whitney, § 1164).

§ 794. The suffix Av. *-þi* = Skt. *-thi* occurs in one or two words; it is also disguised as *-ti*. The suffix Av. *-þu* = Skt. *-thu* is likewise quotable. Both of these elements are used in making nouns, the suffix being attached to the weak form of the root. Examples are:

Suffix *-þi:* Av. *ciþi-* f. 'punishment'; Av. *aiþi-* f. 'dread, terror'. So Av. *asti-* m. 'minister', cf. Skt. *átithi-;* Av. *haŋ̊ti-* n. 'thigh' = Skt. *sákthi-*.—Suffix *-þu:* Av. *hiþu-* m. 'dweller, socius'.

§ 795. On the form *-þra*, see *-tra* § 791 above.

§ 796. On the form *-þwa*, see *-tva* § 792 above.

§ 797. On *-þwan*, see *-van* § 820 below.

§ 798. On the form *-þwaŋ̊t*, see below, § 821.

§ 799. On the form *-da*, see *-ta* § 786, and *-þa* § 793 above.

§ 800. On *-da* see above, *-þa* § 793.

§ 801. On the form *-dra* see *-tra, -þra* § 791 above.

29. Av. *-na, (-uṇa)* = Skt. *-na, (-una)*, Whitney, § 1177.

§ 802. The suffix *-na* is used (1) in making a few past-passive participles equivalent to those in *-ta*. It is

also employed (2) in forming some abstract nouns and likewise adjectives whose verbal character is easily recognized. The root is generally not strengthened.

(1) Passive Participle in *-na*. Examples of this formation have been given at § 713 above.—(2) Noun. Av. *fraϱna-* m. 'question' = Skt. *praśná-:* Av. *yasna-* m. 'sacrifice' = Skt. *yajñá-;* Av. *ẖafna-* m. 'sleep' = Skt. *svápna-*.—Av. *par²na-* n. m. 'wing' = Skt. *parṇá-*.—Av. *haēnā-* f. 'army' = Skt. *sénā-*.—Adjective. Av. *maϱna-* 'naked' = Skt. *nagná-;* Av. *kamna-* 'few'. See also § 713.

§ 803. The suffix form Av. *-una* = Skt. *-una* (Whitney, § 1177 c), doubtless of secondary origin, is distinguishable in a few words: Av. *ta*runa-* 'young' = Skt. *táruṇa-;* Av. *a*runa-* 'fiery' = Skt. *aruṇá-*.

30. Av. *-nah* = Skt. *-nas* (Whitney, § 1152).

§ 804. The suffix *-nah* is perhaps somewhat more common in Av. than in Sanskrit. It forms neuter abstracts. Radical *i, u* are strengthened before it; *a* remains unchanged. Examples are:

Av. *raẑẖnah-* n. 'possession' = Skt. *rékṇas-;* Av. *ẖar²nah-* n. 'splendor'; Av. *draonah-* 'offering' = Skt. *dráviṇas-;* Av. *par²nah-* n. (in *par²navhmṇtəm*) 'fulness' = Skt. *párīṇas-;* Av. *rafnah-* n. 'help, comfort'.

31. Av. *-ni* = Skt. *-ni* (Whitney, § 1158).

§ 805. With this suffix, as in Skt., are made a small number of nouns and adjectives. Strengthening of the root occurs. Examples are:

Av. *varϱni-* m. and adj. 'virile, male' = Skt. *vṛ́ṣṇi-;* Av. *sraoni-* f. 'hip' = Skt. *śróṇi-;* Av. *fϱaoni-* f. 'fatness'.

32. Av. *-nu, (-ϱnu)* = Skt. *-nu, (-snu),* Whitney, §§ 1162, 1194.

§ 806. With the suffix *-nu*, as in Skt., a small number of nouns or adjectives are made. Examples are:

Av. *bānu-* m. 'light, ray' = Skt. *bhānú-;* Av. *gar²nu-* m. 'itch' = Skt. *gṛdhnú-;* Av. *tafnu-* m. 'fever' = Skt. *tapnú-*.—Av. *daēnu-* f. 'female, cow' = Skt. *dhēnú-*.

§ 807. The suffix Av. *-ϱnu* = Skt. *-snu* (Whitney, § 1194) is likewise quotable: e. g. Av. *raoẖϱnu-* m. 'light, brightness' = Skt. *rōcíṣṇu-;* Av. *pąsnu-* f. 'dust', cf. Skt. *páṣṇi*.

33. Av. *-ma* = Skt. *-ma* (Whitney, § 1166).

§ 808. With this suffix a considerable number of derivatives are made; they are adjectives and nouns. The nouns are chiefly masculine. The root is often strengthened. Examples are:

Noun. Av. *haoma-* m. 'haoma' = Skt. *sóma-*; Av. *aẑžma-* m. 'fury'; Av. *ᵘruϕma-* m. 'growth'. — Av. *garᵊma-* n. 'heat' = Skt. *gharmá-*. — Adjective. Av. *ᵒbāma* 'shining' = Skt. *bhā́ma-*; Av. *taϕma-* 'strong, swift'; Av. *garᵊma-* 'hot' = Skt. *gharmá-*.

34. Av. *-man* = Skt. *-man* (Whitney, § 1168).

§ 809. The suffix *-man* in Av., as in Skt., forms a number of derivative action-nouns; most of these are neuter; a few are masculine. The root generally shows the guṇa-strengthening. Examples are:

Noun. Av. *asman-* m. 'stone, heaven' = Skt. *áśman-*; Av. *rasman-* m. 'column, rank'. — Av. *nāman-, nąman-* n. 'name' = Skt. *nā́man-*; Av. *vaēsman-* 'dwelling' (in *vaēsmɔn-da* Yt. 10.86) = Skt. *vḗśman-*; Av. *taoϕman-* n. 'seed' = Skt. *tókman-*; Av. *barᵊsman-* n. 'barsom'.

35. Av. *-mi* = Skt. *-mi* (Whitney, § 1167).

§ 810. This suffix, as in Skt., is found in a very few masculine and feminine nouns. Examples are:

Av. *varᵊmi-* m. 'wave, billow' = Skt. *ū́rmi-*; Av. *dąmi-* m. 'creator' Ys. 31.8; Av. *ᵒzāmi-* m. 'birth' = Skt. *jā́mi*. — Av. *būmi-* f. 'earth' = Skt. *bhū́mi-, bhūmī-*.

36. Av. *-mna, -mana* = Skt. *-māna* (Whitney, § 1174).

§ 811. This suffix is used in forming the middle (passive) participles of the different systems. It has been discussed above, § 709 etc. Furthermore on Av. *-mna, -mana* (Gk. *-μενος*) opp. to Skt. *-māna*, see § 18 Note 2.

37. Av. *-ya* = Skt. *-ya* (Whitney, § 1213).

§ 812. This suffix is used in making the Gerundive (fut. pass. ptcpl. § 716) and also verbal adjectives; likewise a few nouns. It is sometimes difficult, in Av. as in Skt., to distinguish the primary from the secondary deri-

vatives made with this suffix. The root is usually weak. The corresponding feminine form is *-yā*. Examples are:

Gerundive and Adjective (cf. also § 716): Av. *išya-* 'desirable' = Skt. *ḍśya-*; Av. *jīvya-* 'living, fresh' = Skt. *jīvya-*; Av. *maⁱrya-* 'deadly'; Av. *haⁱϸya-* 'true' = Skt. *satyá-*; Av. *maⁱdya-* 'middle' = Skt. *mádhya-*.—Noun. Av. *hahya-* n. 'grain' = Skt. *sasyá-*; Av. *qⁱϸyā-* fem. 'beam', cf. Lat. *antae*.

38. Av. *-yah, (-išta)* = Skt. *-īyas, (-iṣṭha)*, Whitney, § 1184.

§ 813. These suffixes are used respectively to form the comparative and superlative degree of a number of old adjectives The form *-išta* is perhaps more strictly secondary, but as both forms are practically added directly to the crude stem (§ 365) it is more convenient to keep both together under the head of primary derivation. For examples, see § 365.

39. Av. *-yu* = Skt. *-yu* (Whitney, § 1165).

§ 814. This suffix is attached in forming a very few nouns. The root remains unstrengthened before it. Examples are:

Noun. Av. *maⁱnyu-* m. 'spirit', cf. Skt. *manyú-*; Av. *mərᵊϸyu-* m. 'death' (√*mar-* + *t* as in Skt.) = Skt. *mṛtyú-*; Av. *dahyu-daⁱϸhu-* fem. 'country', cf. Skt. *dásyu-*.

40. Av. *-ra* = Skt. *-ra* (Whitney, § 1188).

§ 815. This suffix is common, in Av. as in Skt.; numerous adjectives are formed by it; these adjectives may also be used as nouns of all three genders. The root is usually weak. Examples are:

Noun. Av. *vaзra-* m. 'club' = Skt. *vájra-*; Av. *caϸra-* n. 'wheel' = Skt. *cakrá-*; Av. *hurā-* f. 'a drink' = Skt. *sūrā-*.—Adjective. Av. *uгra-* 'mighty' = Skt. *ugrá-*; Av. *ciϸra-* 'bright' = Skt. *citrá-*; Av. *suϸra-* 'red' = Skt. *śukrá-*; Av. *gufra-* 'deep'.

§ 816. The form Av. *-ura* = Skt. *-ura* (Whitney, § 1188 f) used apparently as a primary suffix has sporadic traces: Av. *rasura-* m. f. 'forest'. Perhaps also *arᵊzūra-* n. nomen propr. Mt. Demāvand *(-ūra)*.

41. Av. *-ri* = Skt. *-ri* (Whitney, § 1191).

§ 817. This suffix is found in a very few derivatives. Examples are: Av. *bāⁱri-* f. 'abundance', cf. Skt. *bhūri-*; Av. *tiгri-* m. nomen propr.

42. Av. *-ru* = Skt. *-ru* (Whitney, § 1192).

§ 818. This suffix occurs in a very few words. Noun and adjective examples are quotable:

Noun. Av. *asru-* n. 'tear' = Skt. *áśru-*.—Adjective. Av. *vaŋdru-* 'desiring'. Uncertain *amru-*, *camru-*.

43. Av. *-va (-ďwa, -spa)* = Skt. *-va* (Whitney, § 1190).

§ 819. With this suffix are formed a few derivative adjectives and nouns. The root generally appears in its weak form. The suffix is sometimes disguised in *°spa, °ďwa* §§ 96, 97. The corresponding feminine form is *-vā*.

Noun. Av. *saᵘrva-* m. nomen propr., cf. Skt. *śarvá-*; Av. *aspa-* m. 'horse' (§ 97) = Skt. *áśva-*; Av. *aŋhvā-* f. 'soul'; Av. *gadwā-* f. 'bitch'.—Adjective. Av. *haᵘrva-* 'whole' = Skt. *sárva-*; Av. *ɣraoždva-* 'hard'; Av. *ərᵊďwa-* 'high, arduus' = Skt. *ūrdhvá-*; Av. *aᵘrva-* 'speedy'.

44. Av. *-van (-þwan)* = Skt. *-van* (Whitney, § 1169).

§ 820. The suffix *-van* is comparatively rare in Avesta. It forms derivative nouns and adjectives. The root remains unstrengthened. A *t* is added, as in Skt., to roots ending in a short vowel, including *-ar*; this gives rise to the form *-þwan* § 94. Examples are:

Noun. GYAv. *advan-*, *adwan-* m. 'way' = Skt. *ádhvan-*; Av. *kərᵊþwan-* m. 'doer' (√*kar-* + *t*, see just above) = Skt. *kŕtvan-*; Av. *karšvan-* f. n. 'clime, zone'.—Adjective. Av. *išvan-* 'able, potent' (√*iš-*). With reduplication Av. *yāiþwan-* 'active' (i. e. *ya-it-van* fr. √*yat-*).

45. Av. *-vaŋt (-þwaŋt)* = Skt. *-vant* (Whitney, § 1233 g).

§ 821. The ending *-vaŋt* as primary suffix occurs in a few words, chiefly verbal adjectives. Some of these derivatives bear resemblance to an *aŋt*-participle of Cl. 8. As above (§ 820), a *t* is added after a root ending in a short vowel, including *-ar*; this gives rise to the form *-þwaŋt* § 94. The weak form of the root is the rule. The suffix *-vaŋt* sometimes seems to add the force of possession as it does when secondary. Examples are:

Av. *aᵘrvaŋt-* adj. and noun 'swift, courser' = Skt. *árvant-*; Av. *sᵘrunvaŋt-* 'audible'; Av. *bəzvaŋt-* 'advantageous' (§ 31); Av. *vivaŋhvaŋt-* m. nomen propr. = Skt. *vivásvant-*; Av. *stərᵊþwaŋt-* 'levelling' (√*star-* + *t*, see above); Av. *vibərᵊþwaŋt-* 'divided, having pauses' (√*bar-* + *t* added).

46. Av. *-vaḥ (-vāvḥ-, -uš)* = Skt. *-vas (-vāṣ, -us)*, Whitney, § 1173.

§ 822. With the suffix *-vaḥ (-vāvḥ* str., *-uš* wk.) is made the perfect active participle. The root is reduplicated except in a few words which make the perfect without reduplication. For examples, see § 348 seq.

47. Av. *-var (-vara)* = Skt. *-vara* (Whitney, § 1171).

§ 823. With the suffix *-vaṅ (-vara)* are made a considerable number of neuter nouns. They commonly show a parallel stem with suffix *-van* (§ 820). The form *-vara* arises by transfer to the *a*-declension. Examples are:

Av. *karϑvar-* n. f. beside *karϑvan-* 'clime, zone'; Av. *zafar-* (i. e. **zaṗ-var* § 95) n. beside *zafan-* 'jaw'; Av. *baēvar-* n. beside *baēvan-* 'myriad'. So *miϑwara-* n. *(-vara)* beside *miϑwan-* 'pair'. Observe Av. *srvara-* (for *sruvara-* § 68) 'horned, Sruvara'.

B. Secondary Derivatives.

(Cf. Whitney, *Skt. Gram.* § 1202 seq.)

§ 824. The so-called Secondary Suffixes are those which are added to make new derivatives from primary derivatives or words which already show a suffix. The forms thus arising are termed Secondary Derivatives. The great majority of them are adjectives, but often they are nouns.

§ 825. Form of the Stem. In assuming the secondary suffix the stem, though it is already prepared, may still undergo other changes in form.

(a) Final *-a* of a stem disappears before suffixes beginning with a vowel or *y*.

(b) Final *-i, -u* of a stem are generally strengthened before suffixes beginning with a vowel, though *u*, as in Skt., sometimes remains unchanged, cf. Whitney, *Skt. Gram.* § 1203 a, b.

(c) Final *-an* of the stem appears as *-an, -n*, depending chiefly upon the difficulty of pronunciation (cf. Whitney, § 1203 c): Av. *barᵊsmanya-* 'relating to the barsom', *vyāϑaⁱnya-* 'ruling in the council'; Av. *vārᵊϑraγni-* 'victorious' (from *an*-stem), cf. Skt. *vārtraghna-*.

(d) The initial syllable of the stem receives the vṛddhi-strengthening in secondary derivation less often in Av. than in Skt., cf. Whitney, § 1204. Examples of vṛddhi (cf. § 60) are: Av. *āhuiri-* 'of the Ahurian', cf. Skt. *āsuri-*; Av. *māzdayasni-* 'belonging to the worship of Mazda'; Av. *gāvya-* beside *gaoya-* 'belonging to the cow', opp. Skt. *gávya-* (§ 60 Note d); Av. *hāvani-* 'relating to Havana'; Av. *ārštya-* 'belonging to a spear'. For guṇa-forms, see above § 60 Note c.

The Principal Secondary Suffixes.

(Cf. Whitney, *Skt. Gram.* § 1207.)

A few other Secondary Suffixes.

§ 827. A few other secondary suffixes occur sporadically and may for convenience be mentioned here.

Suffix. Av. *-þva* in numerals, *þriþva-* 'a third', *caþruþva-* 'a fourth', *þaŋtaŋhva-* 'a fifth' Ys. 19.7. Also Av. *-sa* = Skt. *-ta* (Whitney, § 1229), Av. *navasa-*, *iþasa-*, *aẓþasa-*.

1. Av. *-a* = Skt. *-a* (Whitney, § 1208).

§ 828. This suffix, in Av. as in Skt., is very common. It forms secondary derivatives from nouns or from adjectives. The derivatives thus made are chiefly adjectives denoting 'relating to', 'of', 'with'; but there are also numerous nouns, including patronymics.

The secondary *a* is especially common in compound words, transferring the whole compound to the *a*-declen-

sion; the treatment of that, however, does not really belong here. Examples of *a* as secondary suffix are:

Noun. Av. *haoxaϕwa-* n. 'the goodly company'; Av. *ayavha-* m. n. 'iron' Ys. 11.7 = Skt. *āyasá-;* Av. *narava-* m. 'descendant of Naru' (patronym.).—Adjective. Av. *təmavha-* 'dark' = Skt. *tāmasa-* (w. vṛddhi); Av. *ϑpa-sm-a-* 'upon the earth' *(s²m-)* § 836.

Note. Final *-i, -u* of the primitive generally, but not always, appear as *-ay-, -av-* before this suffix. Thus, Av. *kāvaya-* 'kingly' *(kavi-)* = Skt. *kāvyá-;* Av. *dar²ga.arštaya-* 'long-speared'; Av. *ma¹nyava-* 'spiritual' *(ma¹nyu-).* But simple *y, v* in *staomya-* (fr. *staomi-*), *haoxaϕwa-* (fr. *huxaṇtu-*) above § 828.

2. Av. *-aēna (-aēni, -aini)* = Skt. *-ēna* (Whitney, § 1223 e).

§ 829. This suffix in Av. makes adjectives of material, cf. Skt. *sāmidhēná-*, Whitney, § 1223 e. The form *-aēni* is found beside it in the same adjectives; the sporadic *-aini* appears to be a mere variation of the latter, cf. § 193 Note 2. Examples are:

Av. *ayavhaēna-, ayavhaēni-* 'made of iron'; Av. *ərəzataēna-, °aēni-* 'of silver'; Av. *zaranaēna-, °aēni-* 'golden'; Av. *bawraini-* 'of beaver-skin'.

3. Av. *-aona*, cf. Skt. *-ana.*

§ 830. This suffix (perhaps primitive *u*-stem + *ana* § 832) occurs in Av. *θraētaona-* m. 'Thraetaona' = Skt. *trāitaná-;* Av. *ar²jaona-* m. nomen propr. Yt. 13.117 (? cf. Skt. *arhaṇa-* n.); Av. *pitaona-* m. nomen propr. Perhaps also in Av. *marəθaona-* adj. 'deadly'.

4. Av. *-an* (cf. Skt. *-in*).

§ 831. This derivative suffix forming secondary nouns and adjectives occurs in a few words. It corresponds in part to the Skt. suffix *-in.* A final stem vowel disappears before it. Examples are:

Noun. Av. *mąθran-* m. 'prophet', cf. Skt. *mantrin-;* Av. *hāvanan-* m. nomen propr.—Adjective. Av. *puθran-* 'having a son', cf. Skt. *putrín-;* Av. *vīsan-* 'possessing a house'.

5. Av. *-ana (-āna, -ānī)* = Skt. *-ana (-āna, -ānī),* Whitney, §§ 1175 a, 1223 a, b.

§ 832. This suffix is a patronymic and is found chiefly in proper nouns and adjectives. Before *-ana* a final stem vowel *a* may be dropped, or it may coalesce with the

ending, thus giving *-āna*. A final *i* is strengthened before *-ana*. The form *-ānī (-ānĭ)* seems to be a corresponding feminine. The initial syllable is not always strengthened. Examples are:

Noun. Av. *jāmāspāna-* m. 'son of Jamaspa'; Av. *gaorayāna-* m. 'son of Gaori' Yt. 13.118;—Av. *vəhrkāna-* m. 'Hyrcania'; Av. *ahurānī-* f. 'daughter of Ahura'.—Adjective. Av. *haẽcaŋ.aspāna-* 'descended from Haecataspa'; Av. *āθwyāna-, āθwyānī-* 'belonging to the Athwyas' (Skt. *āptyá-*).

6. Av. *-aŋc, -ac* = Skt. *-aṅc, -ac* (Whitney, § 407 seq.).

§ 833. The ending Av. *-aŋc, -ac* (of verbal origin) is combined with prepositions and some other words to make a few derivative adjectives. It may practically be regarded as a secondary suffix. See § 287 above.

Av. *paⁿrvaŋc-* 'advancing' (§ 287 above); Av. *fraŋc-, frac-* 'forward' = Skt. *prāṅc-, prāc-;* Av. *nyaŋc-* 'downward' = Skt. *nyáṅc-;* Av. *vīšvaŋc-* 'on all sides' = Skt. *viṣvaṅc-*.

7. Av. *-i* = Skt. *-i* (Whitney, § 1221).

§ 834. With this suffix are made some derivative adjectives and substantives chiefly patronymic. They are formed from noun-stems in *-a;* and most of the examples show the vṛddhi-strengthening.

Noun. Av. *hāvani-* m. nomen propr. (cf. Av. *havana-* = Skt. *sávana-*); Av. *uzdaẽzi-* m. beside *uzdaẽza-* 'heap'; Av. *hvaŋhvi-* m. 'blessedness' Ys. 53.1.—Adjective. Av. *āhuiri-* 'of the Ahurian' (§ 60), cf. Skt. *āsuri-;* Av. *māzdayasni-* 'Mazdayasnian' (fr. *māzdayasna-*); Av. *vāraθraγni-* 'victorious', cf. Skt. *vārtraghna-;* Av. *zāraθuštri-* 'of Zarathushtra'; Av. *raji-* 'belonging to Ragha' *(raγa-)*.

8. Av. *-in* = Skt. *-in* (Whitney, § 1230).

§ 835. The suffix *-in* is used as a secondary ending in Av., as in Skt., in forming possessive adjectives. They are not numerous. A final vowel disappears before the suffix. Examples are:

Av. *parᵊnin-* adj. 'having a feather' *(parᵊna-)* Yt. 14.38 = Skt. *parṇín-;* Av. *myezdin-* 'having offering' Yt. 13.64; Av. *drujin-* 'possessed of a devil' *(druj-)* Yt. 4.7.

9. Av. *-ina* = Skt. *-ina* (Whitney, § 1209 c).

§ 836. A secondary suffix *-ina* (apparently an *a*-inflection of *-in*) may be assumed for a few nouns and adjectives. As examples:

Noun. Av. *rapiθwina-* m. nomen propr.; Av. *uʂahina-* m. nomen propr. — Adjective. Av. *vacahina-* 'consisting of a word, verbal' Vd. 4.2. Similarly the ending *-ini* in Av. *maēʂini-* 'belonging to sheep' (fr. *maēʂī-*).

10. Av. *-ī* = Skt. *-ī* (cf. Whitney, § 1156 a).

§ 837. The primary derivatives in *-ī* have been treated above; one or two words however seem to show a more distinctive secondary origin, e. g. Av. *nāirī-* f. 'woman' (observe vṛddhi) = Skt. *nārī-*.

11. Av. *u*.

§ 838. The suffix *u*, used in forming secondary derivatives, is to be recognized in one or two instances: Noun. Av. *haŋdaŋhu-* m. 'satisfaction, fill' Ys. 62.9.

12. Av. *-ka (-aka, -ika)* = Skt. *-ka (-aka, -ika)*, Whitney, § 1222 seq.

§ 839. With the suffix *-ka* are made a number of nouns and adjectives. The forms in *-aka, -āka, -ika* may conveniently grouped with it, cf. Whitney, §§ 1186 c, 1181 d. The corresponding feminine is *-kā*. As examples:

Noun. Av. *araska-* m. 'disorder'; Av. *pasuka-* m. 'cattle, beast'; Av. *draʂtaka-* m. 'banner' (in *draʂtakavaŋt-*); Av. *daŋhāka-* m. nomen propr.; Av. *maŋyāka-* m. 'man'; — Av *marəždika-* n. 'mercy' (cf. Whitney, § 1186 c) = Skt. *mṛdīká-;* Av. *aⁱnika-* m. n. 'face' = Skt. *ánīka-;* — Av. *nāⁱrikā-* f. 'woman'; Av. *paⁱrikā-* f. 'fairy, Peri'. — Adjective. Av. *kasvika-* 'trifling'; Av. *kutaka-* 'small'. Pronominal adj. Av. *ahmāka-* 'ours' = Skt. *asmāka-;* Av. *ʰʂmāka-* 'your' = Skt. *yuṣmāka-*, cf. Whitney, § 1222 c.

13. Av. *-ta* = Skt. *-ta* (Whitney, § 1245 e).

§ 840. This ending as secondary suffix occurs in a few words, adjectival and substantival. Examples are:

Noun. Av. *prita-* m. 'Thrita', cf. Skt. *tritá-;* Av. *hāŋyaŋstā-* f. 'Bushyansta'. — Adjective. Av. *aŋavasta-* adj. 'righteous', m. 'righteousness'; Av. *pᵃtərəta-* 'winged'.

14. Av. *-tara, -təma* = Skt. *-tara, -tama* (Whitney, § 1242).

§ 841. These suffixes are used respectively in forming the comparative and superlative degree of adjectives, the latter also in the ordinals *vīsaŋstəma-, satōtəma-, ha-*

zavrōtəma-. The treatment of the stem-final before these endings has already been given. Examples, see §§ 364, 374.

15. Av. *-tāt* = Skt. *-tāt* (Whitney, §§ 1238, 383 k).

§ 842. This suffix makes feminine abstracts. Its independent origin is shown, for example, in Av. *yavaēca.tāiṭe* beside *yavaētāitaēca* Ys. 62.6, Yt. 13.50, cf. § 893. Examples:

Av. *uparatāt-* f. 'supremacy' = Skt. *uparátāt-;* Av. *haurvatāt-* f. 'completeness, Salvation' = Skt. *sarvátāt-*. Likewise others.

16. Av. *-ti* = Skt. *-ti* (Whitney, § 1157 h).

§ 843. The suffix *-ti* appears as secondary ending in a few words; the most important of these are the numerals. Examples are:

, Av. *þanwarəti-* f. 'bow' (cf. *þanvar-*); Av. *x̌vašti-* 'sixty' = Skt. *ṣaṣṭi-;* Av. *haptāiti-* 'seventy' = Skt. *saptati-;* Av. *navaiti-* 'ninety' = Skt. *navati-*, see § 366 above.

17. Av. *-þa (-ða)* = Skt. *-tha* (Whitney, § 1242 d).

§ 844. The secondary suffix *-þa* is to be sought in one or two numeral and pronominal words. As examples: Av. *haptaþa-* 'seventh' = Skt. *saptátha-;* Av. *puϑa-* 'fifth', cf. Skt. *pañc-a-tha-;*—Av. *avaþa-* 'thus, so'.

18. Av. *-þya* = Skt. *-tya* (Whitney, § 1245 b).

§ 845. This suffix in Av., as in Skt., makes one or two derivative adjectives from prepositions and adverbs. As instances: Av. *aiwiþya-* 'away, distant'; Av. *pasca̯þya-* 'behind'.

19. Av. *-þwa* = Skt. *-tva* (Whitney, § 1239).

§ 846. With this suffix, as in Skt., a few neuter nouns denoting 'condition', 'state' are formed from adjectives and nouns. Examples:

Av. *aṽhuþwa-* n. 'lordship'; Av. *ratuþwa-* n. 'mastership'; Av. *vaṽhuþwa-* n. 'good deed' = Skt. *vasutvá-*.

20. Av. *-þwana* = Skt. *-tvana* (Whitney, § 1240).

§ 847. This suffix is hardly more than an extension of the preceding, which it resembles in meaning. A quotable example is the abstract noun, Av. *nāiriþwana-* n. 'marriage', cf. Skt. *patitvaná-*, Whitney, § 1240.

21. Av. *-na* = Skt. *-na* (Whitney, § 1223 g).

§ 848. With this suffix a very few secondary derivatives are formed. Examples are:

Noun. Av. *ahuna-* m. 'the Ahuna formula'.—Adjective. Av. *ϱayana-* 'belonging to a well' Yt. 6.2; Av. *zrayana-* 'of the sea'; Av. *vahmana-* 'praiseworthy'; Av. *airyana-* 'Aryan'.

22. Av. *-ma* = Skt. *-ma* (Whitney, § 1224 b).

§ 849. With *-ma* as secondary suffix are made a few superlatives from prepositions, a few ordinal numerals, a small number of adjectives from nouns, and one or two derivative substantives likewise. Examples are:

Noun. Av. *spitāma-, spitama-* m. 'Spitama'.—Adjective. Av. *apəma-* 'last' = Skt. *apamá-;* Av. *upəma-* 'highest' = Skt. *upamá-;* —Av. *fraϑma-* 'first' = Skt. *prathamá-* (Whitney, § 487 h); Av. *nāuma-* 'ninth' (§§ 64, 374) = Skt. *navamá-;*—Av. *dahyuma-* 'belonging to the country' *(dahyu-);* Av. *zantuma-* 'belonging to the tribe'.

23. Av. *-man (-mana, -mna)* = Skt. *-man (-mna),* Whitney, §§ 1168 i, 1224 c.

§ 850. A very few words show the suffix *-man,* or its variations *-mana, -mna.* The examples are:

Noun. Av. *airyaman-* m. 'connection, family, Airyaman', cf. Skt. *aryamán-.*—Adjective. Av. *yātumana-* 'relating to a sorcerer'; Av. *zaranimna-* 'angered' Yt. 10.47.

24. Av. *-manṭ* = Skt. *-mant* (Whitney, § 1235).

§ 851. The secondary suffix *-manṭ,* like *-vanṭ* below, is used in making a number of possessive adjectives from noun-stems. The noun-stems with which it is used, as in Skt., are chiefly *u*-stems. Examples are:

Av. *ϱratumanṭ-* 'having wisdom' = Skt. *krátumant-;*
Av. *gaomanṭ-* 'having milk, flesh' = Skt. *gómant-;*
Av. *maδumanṭ-* 'rich in sweets' = Skt. *mádhumant-;*
—Av. *arᵊϑamanṭ-* 'right, true to fact' (from *a*-stem);
—Av. *afraŠīmanṭ-* 'not progressing' (fr. *i*-stem).

25. Av. *-ya (-aya)* = Skt. *-ya (-iya, -īya),* Whitney, §§ 1210, 1214, 1215.

§ 852. The suffix *-ya* corresponds to Skt. *-ya, -iya* (§ 68, 1), and forms a large number of secondary deriva-

tives. These are chiefly adjectives; less often they are nouns. The vṛddhi-strengthening which is often found in Skt. (Whitney, § 1211) is almost wanting in Avesta. The feminine form is *-yā*.

Before this suffix, the stems in *-a, -ā,* drop their final vowel; the stems ending in *-u* retain the *u* unchanged, unless it unites with a preceding *t* into *þw*, § 94.

A few forms in *-aya* occur, either by retention of stem-*a*, or by extension (§ 68 Note 3), compare Skt. *-iya*, Whitney, § 1214. Examples of *-ya* are:

Noun. Av. *aēþrya-* m. 'pupil'; Av. *nąmanhaiþya-* n. nomen propr., cf. Skt. *nāmatya-;* Av. *vāstrya-* adj. 'farming', m. 'farmer'; — Av. *avhuyā-* f. 'lordship'. — Adjective. From *a*-stem: Av. *āhūirya-* 'lordly' (observe vṛddhi fr. *ahura-*) Yt. 13.82, 14.39; Av. *agrya-* 'topmost' = Skt. *ágrya-, agriyá-;* Av. *haomya-* 'relating to haoma' = Skt. *sómya-;* Av. *ϧϧaþrya-* 'kingly' = Skt. *kṣatríya-;* Av. *yesnya-* 'revered' = Skt. *yajñíya-*. — From *ā*-stem: Av. *haēnya-* 'belonging to an army' = Skt. *sénya-;* Av. *gaēþya-* 'material, earthly'. — From *u*-stem: Av. *raþwya-* 'reasonable', cf. Skt. *ṛtviya-;* Av. *pouruya-* 'first' = Skt. *purvyá-;* so Av. *gaoya-, gāvya-* 'belonging to the cow' = Skt. *gávya-*. — From consonant stem: Av. *vīsya-* 'of the clan' = Skt. *viśyà-*.

Note. Observe the few forms that show *-aya* as remarked upon just above § 852 c. Examples are: Noun. Av. *zarᵊdaya-* n. 'heart' = Skt. *hṛdaya-;* Av. *zarᵊmaya-* adj. 'green', n. 'verdure', cf. Skt. *harmyá-*. — Adjective. Av. *aspaya-* (acc. *aspaēm*) 'belonging to a horse' = Skt. *áśvya-;* Av. *nāvaya-* 'flowing, navigable' = Skt. *nāvyà-*, cf. § 68 Note 3.

26. Av. *-ra* = Skt. *-ra* (Whitney, §§ 1226, 474).

§ 853. This suffix occurs in a very few words, chiefly pronominal derivatives. Examples are:

Av. *adara-* adj. 'under, lower' = Skt. *ádhara-;* Av. *apara-* adj. 'later, behind' = Skt. *ápara-;* Av. *upara-* adj. 'further, above' = Skt. *úpara-*. Probably Av. *hazaŋra-* adj. and n. 'thousand' = Skt. *sahásra-*. Observe Av. *ahura-* m. 'lord, Ahura' = Skt. *ásura-*.

27. Av. *-va, (-vya)* = Skt. *-va, (-vya)*, Whitney, § 1228.

§ 854. The ending *-va* as secondary suffix occurs in a very few adjectives. These must be distinguished from orig. *u*-adjectives transferred to the *a*-inflection. Examples of *-va* as secondary suffix are:

Av. *aŋrava-* 'belonging to the head' *(aŋra-)*; Av. *būnava-* 'belonging to the tail' (*buna-* § 185).

Note. The suffix Av. *-vya* = Skt. *-vya* (Whitney, § 1228 c) is disguised in one or two words, names of kindred: Av. *brātūiʳya-* m. 'uncle' § 191, cf. Skt. *bhrātṛvya-*.

28. Av. *-van,* (f. *-vaiʳī*) = Skt. *-van,* (f. *-varī*), Whitney, § 1234.

§ 855. A few secondary derivatives are made with the suffix *-van.* They show also a corresponding feminine *-vaiʳī.* Examples are:

Av. *aŋvan-* adj. m., *aŋvaiʳī-* (beside *aŋuonī-*) adj. f. 'righteous' = Skt. *ṛtávan-* (f. *-varī*); Av. *āθravan-* m. 'priest' = Skt. *átharvan-*; Av. *haptō.karšvan-* n. 'seven karshvars', Av. *haptō.karšvaiʳī-* 'belonging to the seven karshvars'.

29. Av. *-vana* = Skt. *-vana* (Whitney, § 1245 l).

§ 856. This suffix arises apparently by transfer of the preceding *-van* to the *a*-inflection. It bears also a relation to *-var* § 337. It is to be recognized in a couple of instances: Av. *āfrivana-* n. 'blessing'; Av. *θanvana-* m. 'bow'; Av. *hāθravana-* adj. 'splendid'.

30. Av. *-vaŋt* = Skt. *-vant* (Whitney, § 1233).

§ 857. The suffix *-vaŋt* is closely akin to the suffix *-maŋt,* and like the latter it is used in making a large number of possessive adjectives from nouns. The suffix *-vaŋt* is used with *a-, i-* and consonant stems, *-maŋt* being employed chiefly with *u*-stems as noted above § 251. Examples are numerous:

From *a*-stem: Av. *amavaŋt-* adj. 'strong' = Skt. *ámavant-*; Av. *puθravaŋt-* 'having a son' = Skt. *putravánt-*; Av. *haomavaŋt-* 'having haoma' = Skt. *sómavant-*.—From *i*-stem: Av. *frasaiŋtivaŋt-* 'having offspring'; Av. *nāiʳivaŋt-* 'having a wife'; Av. *raēvaŋt-* 'radiant' = Skt. *rēvánt-*.—From consonant stem: Av. *aojavhvaŋt-, aojōvhvaŋt-* 'mighty' Ys. 57.11, Ys. 31.4 = Skt. *ójasvant-*; Av. *təmavhvaŋt-* 'dark' = Skt. *támasvant-*; Av. *paēmavaŋt-* 'with milk' *(paēman-)*; Av. *aršnavaŋt-* 'possessing a stallion' *(aršan-)*.

Note 1. A trace of the lengthening of the final vowel before *-vaŋt* (cf. Whitney, § 1233 d) is to be found in Av. *saⁱrimyāvaŋt-* 'producing verdure' Yt. 7.5, cf. Skt. *vṛṣṇyāvant-*. So Av. *yuξmāvaŋt-, ẖšmāvaŋt-*.

Note 2. A few words, chiefly pronominal derivatives in *-vaŋt*, have the meaning 'like to', 'resembling', cf. Whitney, *Skt. Gram.* § 1233 f. Examples are: Av. *mavaŋt-* 'like me' = Skt. *mādvant-*; Av. *þwāvaŋt-* 'like thee, your Grace' = Skt. *tvādvant-*. So also Av. *vīsaⁱtivaŋt-* 'twenty-fold'; Av. *satavaŋt-* 'hundred-fold', § 376.

FORMATION OF COMPOUND STEMS.

§ 858. **General Remark.** Compounds, Verbal and Nominal, occur in Avesta as in Sanskrit, but in Av. since most words are written separately in the MSS. and each is followed by a point, the compounds are not always so easily recognized as in Skt., nor are the rules of Sandhi so rigorously carried out.

Verbal Composition has been sufficiently treated above, § 749 seq.; it is necessary here to take up only the Noun-Compounds.

Note. In printed texts the compounds are differently marked in different editions; Geldner's Avesta has the compound united in printing and retains the separating point (.); Westergaard likewise but a small dash (-) is used; Spiegel's edition does not designate the compounds.

Noun-Composition.

§ 859. Noun-compounds have either a substantival or an adjectival force. They consist usually of two members, more rarely of three (§ 894), e. g. *drva-aša-ciϑra* 'the sound offspring of righteousness'. The members which enter into composition may be nouns, adjectives, or indeclinables; or they may be parts of a verb, either radical or participial. The final member of the compound receives the inflection. The first member is subject to some modification in form, generally assuming the weak grade.

§ 860. Examples of different combinations, nouns, adjectives, etc., entering into composition are:

Av. *vīspaiti* (subst. + subst.) m. 'lord of the clan' = Skt. *viśpáti-*; Av. *darəgō.bāzu-* (adj. + subst.) adj. 'longimanus' = Skt. *dīrghabāhu-*; Av. *vīspō.hāmya-* (adj. + adj.) adj. 'all-shining'; Av. *hvaspa-* (indecl. + subst.) adj. 'well-horsed' = Skt. *sváśva-*; Av. *raṇaēštā-*, *raṇaēštar-* (subst. + rad.) m. 'warrior standing in chariot' = Skt. *ratheṣṭhá-*; Av. *nidāsmaiṗiš-* (rad. + subst.) adj. 'having weapons laid down'; Av. *staərətō.barəsman-* (ptcpl. + subst.) adj. 'with outspread barsom'. Likewise some other combinations.

Union of the Members of Compounds.

a. Contraction and Hiatus.

§ 861. The rules of Sandhi for concurrent vowels and consonants are in great measure carried out, though sometimes they are disregarded. Hiatus, for example, is at times allowed to remain between concurrent vowels.

§ 862. Examples of the different methods of treatment of vowels are:

With Contraction or Resolution. Av. *aurušāspa-* 'having white horses' *(aurušа + aspa)*; Av. *aiwyāma-* 'over-mighty' *(aiwi + amə)*; Av. *paityāsti-*, *paityasti-* (v. l. *paiṗi.asti-*), *paiṗyesti-* 'repetition' *(paiti + asə)* Ys. 53.3, Afr. 1.8, Vd. 22.13; so Av. *uityaojana-* beside *uiti aojana-* 'thus speaking'; Av. *paityaoxta* beside *paiti aoxta* 'he answered'; Av. *mazdaoxta-* 'spoken by Mazda' *(ºa + uxta)* Ys. 19.16. —With Hiatus. Av. *āsu.aspa-* 'swift-horsed' = Skt. *āśváśva-*; GAv. *ciṗrā.avah-* beside YAv. *cipravah-* 'manifestly aiding' Ys. 34.4, Ny. 3.10; Av. *ẖšviwi.išu-* 'having darting arrows'. See §§ 51, 52 above.

Note. In the Gāthās, as is shown by the metre, all contractions in compounds are to be resolved. See § 51 Note 2.

§ 863. Examples of consonant Sandhi in compounds are common. The following examples illustrate the interchange of voiced and voiceless § 74. Observe orig. *s*.

Av. *dušxərəta-* 'ill-done' = Skt. *duṣkṛtá-*; Av. *dužcipra-* 'of evil seed'; Av. *dužuxta-* 'ill-spoken' = Skt. *duruktá-*; Av. *dуždaēna-* 'of evil conscience'; Av. *vaŋhazdāh-* 'giving what is best'.

b. Treatment of the prior Member.

§ 864. Owing to the tendency in Av. to write all words separately the connection between the parts of the

noun-compound is much looser than in Skt.; hence the frequent variations in the form of the prior member. Observe particularly that the first member often assumes the form identical with its nominative singular. The principal points may be presented in detail.

§ 865. Final *-a* of the stem may remain unchanged before consonants, but more often it appears as *-ō* like the nominative. Occasionally, though more rarely, it is lengthened. Examples are:

Av. *hazaŋra.gaoša-*, *hazaŋrō.gaoša-*, *hazaŋrā.gaoša-* 'thousand-eared' Yt. 17.16, Yt. 10.91, Yt. 10.141 etc. So *hā-*, *hvā-* 'self' in composition, *hvādāta-* 'self-governed', *hvāvastra-* 'self-clothed'.

Note. Observe that *a* when preceded by *y* may give *ya*, *yō*, *yā*, but sporadic traces of reduction (§ 67) are found, e. g. Av. *naiⁱre.manah-* *(naiⁱrya + mᵉ)* 'manly-minded' Ys. 9.11, beside *haiⁱpyā.dāta-* Yt. 11.3, *haiⁱpyā.varᵊz-*. Similarly traces of *u* for *va*, *vā* are found in Av. *varᵊduśma-* 'soft-earth' *(varᵊdva-)*.

§ 866. Original *ā* of feminine stems may remain unchanged, but sometimes, like *a*, it becomes *-ō*. Examples are:

Av. *daēnā.vazah-* nomen propr., *daēnō.diśa-* m. 'teacher of the law' *(daēnā-)*, *urvarō.baēšaza-* adj. 'having the balm of plants' *(urvarā-)*.

Note. Original *mā* (prohibitive) appears as *mā-* in composition in YAv. *makarvīš mastrī* 'no dwarf, no woman' et al. Yt. 5.92; GAv. *mavaēpa-* 'not smiling' Ys. 41.1.

§ 867. Final *i*, *ī*, *u*, *(ū)* of a stem remain as a rule unchanged in the prior member of a compound, though *ī* usually appears for *ī*. Examples are:

Av. *zaiⁱri.gaona-* 'yellow-colored' *(zaiⁱri-)*, *mušti.masah-* 'large as the fist' *(mušti-)*, *nāiⁱri.cinah-* 'seeking a wife' *(nāiⁱrī-)*. — Av. *āśu.-kaiⁱrya-* 'quickly working', *vouⁿru.gaoyaoiti-* 'having wide pastures'.

Note 1. The *u*-stems occasionally show *-uš*, like the nominative singular: e. g. Av. *bāzuš.aojah-* 'strong-armed' (observe *-š*), *nasuš.ava.bərᵊta-* 'corpse-defiled'. Somewhat different is the *-š* in Av. *ānuš.hac-* 'accompanying' (Skt. *ānuṣáṅ-*), Av. *pasuš.hauⁿrva-* 'cattle-protecting', see above § 754, 2. Observe also YAv. *nasuspacya-* 'corpse-burning' (with *s* before *p*, § 754).

Note 2. Av. *gāu-*, *gao-* 'cow' appears in composition as *gao-*, *gava-*, *gavō-* (cf. Whitney, *Skt. Gram.* § 361 f): e. g. Av. *gaoyaoiti-* 'cow-pasture' = Skt. *gávyūti-*; Av. *gavašiti-* 'abode of cows', Av. *gavō.stāna-* 'cow-stall' = Skt. *gōsthāna-*.

§ 868. Simple stems ending in *p* show forms identical with the nominative singular. Examples are:

Av. *afšciþra-* 'containing the seed of waters' *(ap-)*, *awžδāta-* 'contained in the waters', *kərᵊfšhvar-* 'corpse-eating' *(kəhrp-)*.

§ 869. The *aŋt*-stems as a rule show the weak form *-aŋ* as final of a prior member. Sometimes, however, they show *-ō*, *-as*, like nominative, § 295. Examples are:

Av. *raēvaŋ.aspa-* 'having splendid horses', *varᵊδaŋ.gaēþa-* 'increasing the world'.—Av. *barō.zaoþra-* (observe *-ō*), beside *baraŋ.zaoþra-* (observe *-aŋ*) 'bearing the libation' Yt. 10.30, Yt. 10.126; *raēvas.-ciþra-* 'of splendid family' (but cf. also § 151).

Note. Observe the form *th* instead of *ŧ* in Av. *zarathuštra-* 'Zoroaster', *hamaspaþmaēδaya-* name of a season.

§ 870. The *an*-stems show *a* in composition as in Sanskrit (cf. Whitney, *Skt. Gram.* § 1315 a), or they appear as *-ō*. Examples are:

Av. *aŋavajan-* 'slaying the righteous' *(aŋavan-)*, *nąma.azbāiti-* 'invocation by name', *rāma.ŋayana-* 'having an abode of repose' *(rāman-)*.—Beside Av. *rāmō.ŋiti-* 'abode of repose' *(rāman-)*, *zrvō.-δāta-* 'created in eternity' *(zrvan-)*.

§ 871. The *ar*-stems naturally have anaptyctic *(ᵊ)* § 72, and form respectively *arᵊ*, *rᵊ*. As examples may be noted:

Av. *ayarᵊbara-* 'day's journey', *hvarᵊbarᵊzah-* 'height of the sun';—*nərᵊbarᵊzah-* 'height of a man'. Observe commonly *ātərᵊ.-þāta-*, *ātərᵊsavah-*, *ātərᵊ-* etc. Yt. 13.102, but *ātravaŋŋa-* name of priest Vsp. 3.6 etc.

§ 872. The *ah*-stems may appear in their original form *-as* under certain circumstances (§ 110), but otherwise they become *-ō* as usual (§ 120). Examples are:

Av. *təmasciþra-* 'containing the seed of darkness', *manaspaoiryа-* 'having the mind pre-eminent'.—Av. *ayō.ŋaoδa-* 'having a helmet of iron' *(ayah-)*, *xvō.gaēþa-* 'useful to the world', *hvarᵊnō.dāh-* 'glory-giving'.

Note 1. Observe is (§ 170) in Av. *vaŋhazdāh-* 'giving what is better' Ys. 65.12. Remark also the weak form of *-vah* in Av. *yaēluš.gaо-* nomen propr. Yt. 13.123, *vīduš.yasna-* 'knowing the Yasna'.

Note 2. Observe the peculiarity (*-ah* retained) in *miþahvacō* 'false-speaking' *(miþah-* + *vᵊ)* Ys. 31.12.

c. Treatment of the final Member.

§ 873. The final member of a compound in Av. as in Skt. (cf. Whitney, *Skt. Gram.* § 1315) often undergoes

changes in its original inflection; these will be noticed in the following in detail.

§ 874. There is a special tendency for the final member of a compound to assume the *a*-inflection; a compound is often thus transferred from the consonant to the vowel declension (cf Whitney, *Skt. Gram.* § 1316 c). Examples are:

Av. *hvarᵊ.darᵊsa-* (Skt. *svardṛś-*) 'sunlike', beside *parō.darᵊs-*, *parō.darᵊsa-*; Av. *āθrᵊ.vaḫša-* title of a priest, beside *āθrᵊ.vaḫš-* (cons.).

§ 875. An *an*-stem in the final member often undergoes transformation, as in Skt. (cf. Whitney, *Skt. Gram.* § 1315). As examples may be taken:

Av. *caθru.caŋma-* (observe *-a*) 'four-eyed', beside *baēvarᵊ.caŋmana-* (observe *-ana*) 'thousand-eyed', from *caŋman-*.

§ 876. The final member sometimes undergoes abbreviation, owing to an original change of accent in assuming the weak form, or to other causes (cf. Whitney, *Skt. Gram.* § 1315). As examples:

Av. *upasma-* 'upon earth' *(ᵊm-)*, *fraδa-* 'fore part of the foot' *(pada-)*, *fraŋθu-* 'abundance of cattle' *(pasu-)*. Likewise others.

d. Case-form appears in prior Member.

§ 877. In Av., as in Skt. (cf. Whitney, *Skt. Gram.* § 1250), a case-form is sometimes found in the prior member of a compound. Examples are:

a. Accusative (especially before radical finals). Av. *ahūm.-mərᵊɳc-* 'destroying the soul', *aŋhmaoŋa-* 'confounding righteousness' (*aŋhm maoŋa*, *m* + *m* = *m*, § 186), *ahūmbiš-* 'healing the soul', *daēum.jan-* 'daeva-smiting'. — b. Dative. Av. *yavaē-jīt-* 'living for ever'. — c. Genitive. Av. *ᵊmascipra-* 'having the seed of earth'. — d. Locative. Av. *duraēdars-* 'seeing at a distance', *raθaēštā-*, *raθaēštar-* 'warrior standing in a chariot' *(raθe-)*, *maiδyōi.paitištāna-* 'to the middle of the breast'.

Classes of Compounds.

(Cf. Whitney, *Skt. Gram.* § 1246 seq.)

§ 878. Modelled after the Sanskrit Grammar the compounds in Avesta may conveniently be divided into the following classes:—

SYNOPSIS OF COMPOUNDS
- i. Copulative.
- ii. Determinative
  - a. Dependent.
  - b. Descriptive.
- iii. Secondary Adjective Compounds
  - a. Possessive.
  - b. With governed Final.
- iv. Other Compound Forms.

These different classes may be taken up in detail in comparison with the corresponding Sanskrit divisions.

i. Copulative Compounds.

(Cf. Whitney, *Skt. Gram.* §§ 1252, 1255.)

§ 879. Copulative Compounds (Skt. Dvandva). Two co-ordinate terms which would form a pair connected by 'both—and' may dispense with the conjunction and unite into a compound. The Av. Dvandva-Compounds differ from the Skt. in this that in Av. each member assumes the dual form and is separately declined. Examples of Copulative or Dvandva-Compounds are:

Av. *pasu vīra* 'cattle and men' Ys. 9.4 etc.; *pasubya vīraēibya* 'by cattle and men' Vd. 6.32 etc.; *pasvō vīrayō* 'of both cattle and men' Vsp. 7.3 etc.; *āpa urvaⁱre, āpē urvaⁱre* 'water and trees' Ys. 9.4, Gāh. 4.5; *pāyū pwōrᵊštāra* 'the keeper and the judge' Ys. 57.2.

Note. A rather late instance may be cited in which several successive members, though ordinarily found only in the singular, unite as a series each in the plural and form an aggregative compound: Vsp. 10.1 *āyese yešti arᵊzahibyō savahibyō fradafšubyō vīdadafšubyō voⁿru.barᵊštibyō voⁿru.jarᵊštibyō aheca karšvanō yaŋ hvaniraŋhe.*

ii. Determinative Compounds.

(Cf. Whitney, *Skt. Gram.* § 1262 seq.)

§ 880. Determinative Compounds are divided into two classes, (a) Dependent Compounds, (b) Descriptive Compounds. In regard to signification, the Determinative may have either a substantival or an adjectival value.

a. Dependent Compounds.

(Cf. Whitney, *Skt. Gram.* § 1264 seq.)

§ 881. Dependent Compounds (Skt. Tatpurusa) are those in which the former member stands in relation to

the latter member as though it were governed by the latter. The force of the prior member is that of an oblique case (acc., instr. gen. etc.) depending upon the latter; and actual case-forms in such instances do sometimes occur, see § 877 above. The compound has noun or adjectival value according to its final member.

1. Noun value (Whitney, § 1264): Accusative relation. Av. *miθrō.druj-* m. 'one that breaks his pledge'.—Gen. relation. Av. *vīspaiti-* m. 'lord of the clan'.—Loc. relation. Av. *raθaēštā-* m. 'warrior standing in a chariot' (*raθe* = actual loc., cf. § 877).

2. Adjective value (Whitney, § 1265): Acc. relation. Av. *kamərəδō.jan-* 'smiting the head'.—Dat. relation. Av. *dāmiδāta-* 'created for all creatures'.—Instr. relation. Av. *ahuradāta-* 'made by Ahura'.—Abl. relation. Av. *qzō.δūj-* 'freeing from distress'.—Loc. relation. Av. *zəmarəgāz-* 'hiding in the earth'.

b. Descriptive Compounds.

(Cf. Whitney, *Skt. Gram.* § 1279 seq.)

§ 882. Descriptive Compounds (Skt. Karmadhārya) are those in which the former member stands not in a case-relation but in attributive relation to the second and adds some qualification to it. The value of the compound itself is substantival or adjectival according to its final member.

1. Noun value (Whitney, § 1280 b, d): Av. *darəγō.šiti-* f. 'a long residence', *pərənō.māuha-* n. 'full-moon';—Av. *uštrādaēnu-* f. 'she-camel', cf. Whitney, *Skt. Gram.* § 1280 d.

2. Adjective value (Whitney, § 1282): Av. *vīspō.bāmya-* 'all-brilliant', *uparō.kaiрya-* 'making higher, raising up'. With advbl. prefixes (*a-, un-, hu-, duš-, arš-* etc.), Av. *hukərəta-* 'well-made', Av. *aršuxδa-* 'right-spoken'. Likewise some others.

iii. Secondary Adjective Compounds.

(Cf. Whitney, *Skt. Gram.* § 1292 seq.)

§ 883. The secondary adjective compounds are of two kinds, (a) Possessive, (b) those with governed final member.

a. Possessive Compounds.

(Cf. Whitney, *Skt. Gram.* § 1293 seq.)

§ 884. Possessive Compounds (Skt. Bahuvrīhi) are composite adjectives formed from a corresponding Determinative compound (§ 880) merely by adding to the latter the idea of 'having' or 'possessing' that which the determinative itself denotes.

§ 885. The Skt. shows a difference of accent between a Determinative and its corresponding Possessive; in Av., as there is no written accent, the distinction cannot be drawn in that manner.

§ 886. The second member of the Possessive is generally a substantive; the first member may be a substantive, adjective, pronoun, numeral, participle or indeclinable. The force of the compound always remains adjectival.

Possessive Adjectives.—Noun initial. Av. *afšciθra-* 'having the seed of waters'.—Adj. initial. Av. *darᵉγō.dāzu-* 'having long arms, longimanus'.—Pron. initial. Av. *hvāvastra-* 'having own clothing', *yā.ϑyaoθna-* 'having what actions' Ys. 31.16.—Num. initial. Av. *hazaŋra.gaoša-* 'having a thousand ears' (cf. Whitney, § 1300).—Ptcpl. initial. Av. *uzγrᵉθtō.drafša-* 'with uplifted banners'.—Indecl. initial (Whitney, § 1304). Av. *aŋrafna-* 'not-sleeping', *aⁱwyāma-* 'having excessive might' (Whitney, § 1305).

b. Adjective Compounds with governed final Member.

(Cf. Whitney, *Skt. Gram.* § 1309 seq.)

§ 887. These adjectives are exactly the reverse of Dependent compounds; they are attributives in which the first member practically governs the second member. The second member is always a noun and stands in case-relation to the first. The compound itself has an adjectival value.

This group shows two subdivisions, (1) Participial, (2) Prepositional, according as the prior member is a participle or a preposition. Details follow.

1. Participial Adjective Compounds.

(Cf. Whitney, *Skt. Gram.* § 1309.)

§ 888. These compounds are old in Av. as they are in Sanskrit. The prior member is a present participle which in meaning governs the second part. The whole is an adjective. Examples are:

Av. *vanaŋ.pəŋana-* adj. 'winning battles', *varᵊdaŋ.gaēθa-* 'increasing the world', *vīkᵊrᵊŋ.uštāna-* 'cutting off life'. Likewise in nomina propria *haēcaŋ.aspa-* 'Haecataspa'.

2. Prepositional Adjective Compounds.

(Cf. Whitney, *Skt. Gram.* § 1310.)

§ 889. These are combinations in which the first member is a preposition (adverb) that governs the second member in meaning. The whole is equivalent to an adjective. Examples are:

Av. *āžnu-* 'reaching to the knee', cf. Skt. *abhijñú-* (Whitney, § 1310a); Av. *aiwi.daŋyu-* 'around the country', *antarᵊ.daŋyu-* 'within the country' (cf. Skt. *antarhastá-*), Av. *uzdaŋyu-* 'out of the country'; Av. *upasma-* 'upon the earth' (*zᵊm-* § 152); Av. *parō.asna-* 'beyond the present' (i. e. *parō* + *asan-*) § 153, cf. Skt. *parókṣa-*; Av. *tarō.yāra-* 'beyond a year', cf. Skt. *tiróahnya-*.

iv. Other Compound Forms.

§ 890. Beside the above regular compounds, in Av. as in Skt., there are also some other composite forms that require notice.

a. Numeral Compounds.

(Cf. Whitney, *Skt. Gram.* § 1312.)

§ 891. Numeral Compounds (Skt. Dvigu) are a species of determinative that have a numeral as prior member, and which are commonly, though not always, used as a singular collective noun in the neuter gender. Examples are:

Av. *þrigāya-* n. 'space of three steps', *þripada-* n. 'three feet, a yard', *nava.karša-* n. 'the nine furrows', *nava.žžaþara-* n. 'space of nine nights'. — Av. *paṇca.yaêžīš* (fem. acc. pl.) 'five twigs'. — Av. *haptōᵊriŋga* (masc. plur.) 'the Great Bear'.

b. Adverbial Compounds.

(Cf. Whitney, *Skt. Gram.* § 1313.)

§ 892. Adverbial Compounds (Skt. Avyayībhāva) are composites made by the union of a preposition or a particle as prior member and a noun as final member, combined to form an indeclinable noun or rather neuter accusative used adverbially, cf. § 934. The class is quotable in an instance or two: Av. *āþritīm* 'up to three times', cf. Skt. *ādvādaśám*; Av. *paityāþəm* 'against the stream, contrary' (§ 934) Ys. 65.6, Vd. 6.40 = Skt.

pratīpâm (cf. Lanman, *Skt. Reader* p. 195); Av. *frā.āpəm, nyāpəm, upa.-āpəm* 'from out, down, to the water' Vd. 21.2.

c. Loose Compound Combinations.

(Cf. Whitney, *Skt. Gram.* § 1315.)

§ 893. One or two other points in regard to compounds and their formation may be noticed here.

1. The nomen propr. *nairyō.saŋha-* m. 'Nairyosangha' sometimes has its component elements separately declined, e. g. *nairyehe saŋhahe* Yt. 13.85, Vsp. 11.16, beside *nairyō.saŋhahe* Ny. 5.6. Similarly, the derivative *yavaēca.tāite* beside *yavaētāitaēca* 'for ever' Ys. 62.6, Yt. 13.50, cf. § 842. So in verbal derivatives, *zarazdā-, zarasca dāṭ*, etc.

2. Observe later such agglomerations, especially from initial words of chapters (cf. Te Deum), as Av. *kamnamaēząm hāitīm* 'the whither-to-turn Chapter' *(kām nəmōi ząm)* Ys. 46 end; *taṭ.þwā.þərəsa-* 'beginning with the words This-I-ask-Thee'. Likewise in nomina propria, resembling the Puritanical names, e. g. Av. *aŋəm.yeuhe.raocā nąma* 'Bright-in-Righteousness by name' Yt. 13.120, et al.

§ 894. Long compounds are not common in Avesta; as examples merely may be quoted, Av. *frādaṭ.vīspąm.-hujyāiti-* 'advancing all good life', *nairyąm.hąm.varətivaŋt-* 'having manly courage', *pouru.sarədō.vīrō.vaþwa* 'having a crowd of many kinds of male offspring' Vsp. 1.5.

Sandhi with Enclitics.

(Cf. Whitney, *Skt. Gram.* § 109 seq.)

§ 895. The principles of euphonic combination may be regarded as twofold: (1) as applied in the building up of a word from its elements; (2) in the union of words in a sentence. The former may be called Internal Combination or Word-Sandhi; the latter, though practically wanting in Av., is called External Combination or Sentence-Sandhi.

§ 896. The laws for the internal combination of formative elements and endings have been treated above under Phonology.

§ 897. Sentence-Sandhi, or the external combination of words in a sentence, is wanting in the Avesta (§ 4) except in the case of enclitics and in compounds, and there only conditionally. The words otherwise are written separately, each followed by a point. Thus, GAv. *yaϕā ahū* Ys. 27.13; GAv. *yāscā ūitī* Ys. 39.3; YAv. *nī aməm* Ys. 9.17; YAv. *aipi imąm* Ys. 57.33, and countless others.

Note 1. In Geldner's *Metrik* pp. 54—57, numerous instances are collected where external sandhi is apparently to be accepted, but they are uncertain, and in the edition of the Avesta texts Geldner has rightly followed the MSS.

Note 2. Observe the MS. reading GAv. *zīţ* 'for indeed' (but in metre properly *zī iţ*) Ys. 45.8. Conversely GAv. *yϕāiš* (so also according to metre, but better MS. authority for *yaϕā āiš*, Geldner) Ys. 33.1.

Combination with Enclitics and Proclitics.

§ 898. Instances of Sandhi are common in the case of enclitics like *tū, hē, ciţ, ca* which form a unit with the preceding word and are often written together with it; but even here the manuscripts often preserve the usual law of keeping each word separate and unchanged. As examples:

YAv. *paiⁱri.šē* 'round him' (combined like Skt. *hí ṣaḥ* Whitney, *Skt. Gram.* § 188) Ys. 9.28, beside *nī hīm* (uncombined) Yt. 13.100. Again YAv. *skəṇdəm šē manō kərᵊnūⁱdi* 'make his brain cracked' Ys. 9.28; GAv. *kas.tē* 'who to thee' Ys. 29.7; GAv. *kasnā* (cf. Germ. 'man') Ys. 44.4. So GAv. *saškəṇ-cā* (observe *ṇ*) Ys. 53.1 beside *usuḫšyąn-ca* (observe *n*) Yt. 13.78.— Similarly with Sandhi after the manner of enclitics and proclitics, GAv. *huzəṇtušᵊ spəṇtō* Ys. 43.3; YAv. *havayāsᵊ tanvō* 'of his own self'; GAv. *vasasᵊ ḫšaϕraḫyā* Ys. 43.8; YAv. *yasᵊ taḫmō* 'I who am strong' Yt. 19.87; YAv. *ẅityaojanō* 'thus speaking', beside *ẅiti aojanō*.

Note 1. In the MSS., enclitics and proclitics are frequently written together as a single word, e. g. GAv. *kāmənā* for *kā.mə̄.nā* Ys. 50.1; *tāḫwā* for *tā.ḫwā* Ys. 31.13; *tə̄ŋgā* for *tə̄ŋg.ā* Ys. 46.13; *nāⁱrīvā* for *nāⁱrī.vā* Ys. 41.2. Likewise YAv. *ātaṯ* and *ā.taṯ* Vd. 5.2, and many others.

Note 2. Observe that *-ca* 'que' is always written together with the preceding word; notice the difference of treatment of vowels and consonants before it. See *(-ăca, -āca, -ica, -aṣca, -ūsca, -əsca)* §§ 19, 26 Note, 120, 124, 129.

§ 899. Special attention may be drawn to the treatment of words before an enclitic beginning with *t*. In several instances, especially in the Gāthās, a word before a *t*-enclitic takes a sort of compromise form made by a mixture of the usual pause form and the grammatical Sandhi-form. Thus are to be explained:

GAv. *vāstā* (compromise between *vas.tā* and *vā tā*, hence *ā*, *s*) Ys. 46.17; GAv. *yāŋgstā* (mixture of *yāŋg tā* and *yąs.tā*). Contrast GAv. *ākās-tə̄ŋg* (= °*ās* + *t*) Ys. 50.2, with Av. *gaẓḫūs-ca* (°*ūs* + *c*). But GAv. *dūs-tā* Ys. 28.7, cf. § 124 above.

Note. Observe likewise YAv. *kasᵛ.ḫwąm*, *yasᵛ.ḫwā*, a compromise between *kō ḫwąm* and *kastwąm* etc. § 78 above.

§ 900. The laws of euphonic combination in Noun-Compounds and also in Verbal-Composition have been treated above §§ 753, 861 seq.; they require no further remark here.

I. AVESTA-INDEX
(Grammatical Elements).

The references throughout are to the sections (§§).

Abbreviations are extensively used; but it is believed they will be readily recognized. For example, 'cpd.' is compound, 'cpsn.' composition; 'dcln.' means declension; 'endg.' ending; 'pronc.' pronunciation; 'primy.', 'scdry.' stand for primary, secondary; 'pdgm.' is paradigm; etc.

The Indexes are comparatively full, but if an element is not found under one of its letters look for it under one of its other letters, or under the appropriate head in the other Indexes. Remember that long and short vowels sometimes interchange in Avesta.
